Introduction

This report reviews end of year performance for 2012-13 against the priorities outlined in the Sustainable Community Strategy (SCS) 2010-13.

The theme partnerships of the North Tyneside Strategic Partnership (NTSP) and their constituent organisations are responsible for the delivery of the priorities outlined in the SCS. The NTSP during the SCS 2010-13 refresh process, identified four priority areas, each with equal weighting, these are:

- Regeneration
- · Quality of life
- Best start in life
- Sense of place

The North Tyneside Sustainable Community Strategy 2010-13 sets out a range of measurers which we are using to monitor delivery. The Strategy forms part of the Council's Policy Framework.

At the beginning of October 2010, the government announced that the National Indicator Set and the requirement to produce and report on Local Area Agreements (LAA) would be abolished. At the end of 2012-13 a review of the national indicators and LAA measures which were being used to monitor the SCS was carried out. The review showed that approximately two thirds of the measures were still being collected in some form; we have continued to use these measures to assess the progress made towards achieving the SCS priorities.

The Sustainable Community Strategy is a useful way of demonstrating how partners work together to achieve the best outcome for North Tyneside.

Part 1 of the report shows how we are performing both overall and also by priority area in relation to achieving our targets and direction of travel. Part 2 then goes on to give more detail behind the individual performance measures used to monitor progress against the priorities and aims outlined in the SCS 2010-13.

Part 1 – Performance Summaries

A total of 84 high level measures were initially identified to monitor progress against the priorities and aims within the SCS 2010-13. These indicators included a mix of national and local measures, as well as the measures which were contained within the LAA 2008-11.

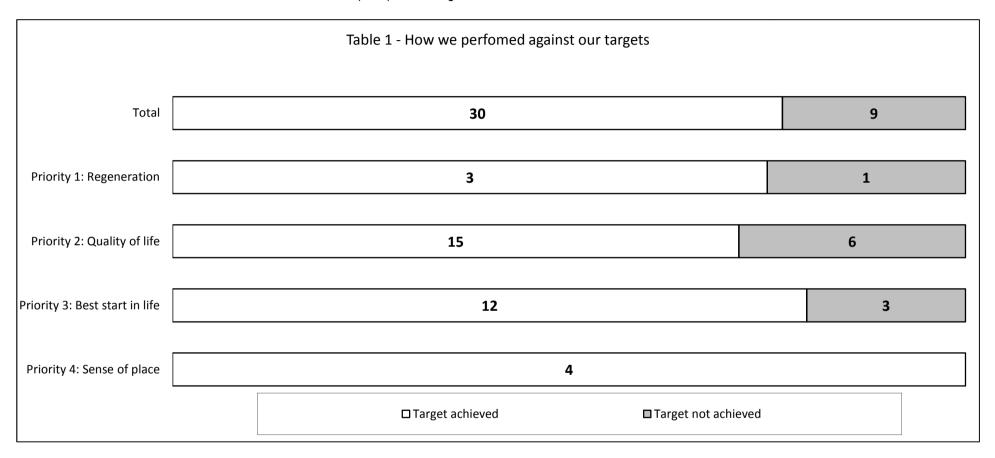

After the Government announced the abolishment of the National Indicator Set at the beginning of October 2010, a review of the original 84 measures was carried out to ascertain which ones were still available for reporting. Of the original set of measures, 54 are still being collected however of these, a number have either had a change of definition or a change in the methodology.

This section shows how we are performing both overall and by priority areas for the following:

- How we performed against our targets
- How we are performing direction of travel (DoT)

How we performed against our targets

Table 1 below shows how we have performed against our targets at the end of 2012-13. Overall, of the measures we could assess we achieved 30 (77%) of our targets.

Please note:

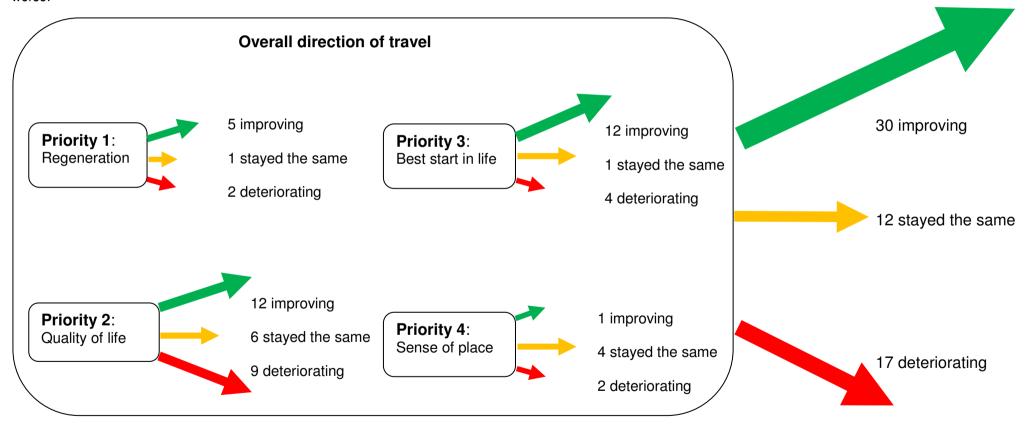

There are five measures (NI 154 and NI195a-d) which are used to measure progress against more than one priority. For the purpose of this analysis they have been included in all relevant priorities but to avoid duplication only once in the overall total.

At the end of 2012-13 a total of 16 measures could not be compared to a target, these have been excluded from the analysis.

How we are performing – direction of travel (DoT)

The table below shows how we are performing in relation to direction of travel. In most instances direction of travel has been compared between end of year performance 2011-12 and 2012-13. Where this is not possible, assessment has been made between previous years 2009/10 and 2010/11.

At the end of 2012-13, overall 42 (71%) measures improved, or stayed the same, (being 30 (51%) improved and 12 (20%) stayed the same), with 17 (29%) measures getting worse.

Please note:

There are six measures (NI 056, NI 154 and NI195a-d) which are used to measure progress against more than one priority. For the purpose of this analysis they have been included in all relevant priorities but to avoid duplication only once in the overall total.

At the end of 2012-13 1 measure could not be assessed for direction of travel, this has been excluded from the analysis.

Part 2 – Priority Areas and Performance Tables

This section is structured by the four priority areas within the Sustainable Community Strategy 2010-13 and includes performance tables which show how we have performed at the end of year 2012-13 against those measures where data is available and/or comparison is possible. The tables include the 63 measures which are available to report at the end of 2012-13 and where possible includes:

- Past performance since 2009-10
- Latest outturn data against target
- · How we have performed against target
- If we have improved from the previous year

For performance measures which are not on target at the end of 2012-13, comments and proposed action are included after the performance tables.

Key for Performance Tables

Target achievement	✓	Target achieved (within tolerance set)
	×	Target not achieved
		No target available therefore achievement can't be assessed

Performance improvement		Improved
	\Leftrightarrow	No change
	Û	Declined
		No comparable data

NB: In most instances direction of travel has been compared between end of year performance 2011-12 and 2012-13. Where this is not possible, assessment has been made with the latest available data.

Please note that for some measures:

- There is a time delay in reporting data, for example at the end of 2012-13 we are reporting outturn data relating to 2011-12.
- The latest outturn data available is provisional and still awaiting external verification.
- The outturn data for 2012-13 has not yet been published.

Priority 1: Regeneration - Performance Table

NI 154 Net additional homes provided

Comment on performance and proposed action

The Local Authority has limited influence over the build rate of new homes on site. 2012/13 has seen further improvement in new build rates compared to recent years which is indicative of general improvement in the housing market and lending on house purchase but not back to pre-2007 rates.

NI 008: Adult participation in sport and active recreation

Comment on performance and proposed action:

This indicator is undertaken by Sports England as part of their Active People's Survey conducted 4 times a year and involves telephone research with 998 randomly selected residents across North Tyneside. The target for this indicator is a stretch target to be top quartile nationally. Our performance in 2012/13 placed NTC as the highest performer in Tyne and Wear, fourth place regionally and upper middle quartile nationally.

In 2012/13 the Sport and Leisure Team either achieved or exceeded their attendance and participation targets and has demonstrated a year on year increase in attendance and participation since 2007/08. In 2012/13 our Indoor Sport and Leisure Facilities had **1,556,007** attendances from visitors, our Sports Development had **68,012** participants, our Outdoor Facilities had **81,520** users and we had a record number of **8,427** live Contours memberships at the end of 2012/13 (677 memberships above target).

NI 016: Serious Acquisitive Crime rate

Comment on performance and proposed action:

This is a composite measure including domestic burglary, vehicle theft and robbery. Although there was a considerable net decrease in burglary, robbery and theft of vehicles, an increase in theft from vehicles was the cause of the target miss. This was up by 33% compared to 2011/12 (+110 offences, from 332 to 442). However, this was not an issue peculiar to North Tyneside, which remained best-performing in its family grouping and second in Northumbria (in fact, best performing when looking at Quarter 4 2012/13 alone).

NI 032: Repeat incidents of domestic violence

Comment on performance and proposed action:

This target was missed by 3% (31% vs. a target of 28%). This was primarily a methodological issue: The data is updated every two weeks, with the average for the twelve months up to that point taken as the result. Although this average had previously been well below target that for the twelve months up to the end of March 2013 happened to be higher. The average two weeks later dropped to 28%, which is on target.

NI 065: Children becoming the subject of a child protection order for a second or subsequent time

Comment on performance and proposed action:

This indicator has been flagged as a matter of exception each quarter this year. The end of year outcome of 11.9% is 1.9% off the target of 10%. This evidences the impact of the work undertaken to address the matter and continue the positive trajectory, noting that the figure stood at 23.6% at the end of quarter 1.

The strong interventions put in place during 2012/13 will continue into 2013/14 to ensure the target is met. These include

- All potential re plan cases are discussed with a senior manager to ensure a robust challenge in relation to whether a child protection plan is the most appropriate course of action
- Discussion with legal services to agree children do not need to be subject to a protection plan to initiate proceedings. This has reduced the number of cases where children are made subject to a child protection plan when the plan is to initiate care proceedings.
- At the point of de planning a multi agency Child in need plan is agreed which ensures continued support to the family, the impact being a reduction in the number of re referrals which lead to the need for a child protection enquiry.

NI 135: Carers receiving a needs assessment or review, a specific carer's service, or advice and information

Comment on performance and proposed action:

We have seen a decrease in the number of carers assessments during the year as a result of changes to the criteria for assessment for low level support services. This has had an impact on the number of information, advice and support services that are reported via this indicator. Development of the Signposting, Information and Guidance Network (SIGN NT) and development of our Adult Social Care website has meant that a large number of carers will now self-access information/advice about care and support services, rather than through the formal social care assessment process. We will be considering how we capture this information in the future so that we can understand how effective these communication methods are.

NI 154: Net additional homes provided

Comment on performance and proposed action:

The Local Authority has limited influence over the build rate of new homes on site. 2012/13 has seen further improvement in new build rates compared to recent years which is indicative of general improvement in the housing market and lending on house purchase but not back to pre-2007 rates.

NI 081: Inequality gap in the achievement of a Level 3 qualification by the age of 19

Comment on performance and proposed action:

Level 3 performance at 19 has improved by 3.2% from last year. It is now above the national average. The FSM gap for Level 3 performance at 19 decreased by 1% (improved performance) in the same period and is now 2nd quartile for the first time since 2009-10. It is, however, far below a very ambitious target. We are continuing with the range of interventions identified trough the collaborative work of schools in order to achieve our very ambitious target of top guartile performance.

NI 092: Narrowing the gap between the lowest 20% in Early Years Foundation Stage Profile and the rest

Comment on performance and proposed action:

Despite consistent performance overall in the Early Years Foundation Stage profile we have seen the gap between the 20% lowest achieving and the rest widen this year. Schools are identifying a greater proportion of children who need support at this early stage and the main focus of the Early Years Foundation Stage team is around early intervention, raising awareness of vulnerability and supporting practitioners with issues of special educational needs. This will enable each child to receive the appropriate support at the earliest possible stage to help them achieve their potential. Our moderation of Early Years Profile judgements were more robust and rigorous this year and have been quality assured by a Department for Education external visitor who considered them to be 'strong' in our feedback letter.

NI 102b: Achievement gap between pupils eligible for free school meals and their peers achieving the expected level at Key Stage 4

Comment on performance and proposed action:

Overall performance at GCSE improved by 3.4%, and is on the borderline between 2nd and top quartiles. The performance of the FSM cohort also improved, however at a lower rate, therefore the FSM gap increased by nearly 1% from last year (declining performance).

Schools are being targeted as part of the support and challenge programme to ensure FSM pupils make the same rate of progress as non FSM pupils. Schools that are achieving particularly well in this area are providing support to their colleagues.
