

# Report to Cabinet

Local Plan Pre-Submission Draft,  
12 October 2015

## **Appendix 1: Schedule of Representations Received to the Local Plan Consultation Draft Policies (2015) and Officer Responses**

## Schedule of Representations Received

This schedule provides a complete account of all representations providing a written comment to a policy or proposal received during consultation on the Local Plan Consultation Draft February 2015. The representations are from residents, landowners and other stakeholders with an interest or role in plan making.

North Tyneside Council have reviewed and prepared a response to all these responses as part of the preparation of the next stage of the Local Plan.

### How to use this document as a respondent

This document is saved in Adobe PDF format and you can use the “Find” function to navigate to particular Comments you are interested in. You can access find by the keyboard shortcut “Ctrl F”, within the “Edit” menu on Adobe Reader, or via a toolbar link at the top of your page.

- Policies - the representations are arranged in order of the policy of the Local Plan Consultation Draft 2015 they have been identified as relevant to. For example, Policy S7.3 Distribution of Potential Housing Development Sites.
- Person IDs – If you are a previous respondent that made a specific comment directly in relation to a site within the Local Plan Consultation Draft 2015, you will have a Person ID. You can type this ID into “Find” within the document to locate each site where your ID and comment has been recorded and summarised.

If you would like any assistance accessing this information or finding specific information within this schedule of representations, you can contact the Planning Policy Team at:

[planning.policy@northtyneside.uk](mailto:planning.policy@northtyneside.uk)

Tel: 0191 643 2310.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
586329		RESIDENT	LP20151	It is pleasing to see that residents' comments have been listened to (unlike in the previous Core Strategy). What a shame this plan was not put forward five years ago.		Introduction 1	Support noted.	No amendments proposed.
878568			LP20152	1.20 There are 2 routes by car from the coast to Newcastle - The new coast road (A1058) and the old coast road (A186/A191). The more housing you 'stuff' into the remaining space at the coast, the more congested these routes will become.		Introduction 1	Comment noted. The suggested growth in the Local Plan has been used in the transport modelling work that has informed the junction improvements in the Borough with the purpose to make it easier and safer to travel in the Borough.	No amendments proposed.
878651		RESIDENT	LP20155	Concern that West Moor is not labelled on the Summary Map.		Introduction 1	The Summary Map is a simple overview of the Borough and the Local Plan proposals. It was not possible to include comprehensive information and so not every area is labelled. We apologise if this has caused concern but would stress that there is no significance in the omission of a specific label for this or any other area. We will consider these concerns in future map preparation.	Reference to West Moor will be included in future mapping
878568			LP201512	1.20 I wouldn't describe Newcastle as easily accessible by road at peak commuter times.		Introduction 1	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel in the Borough.	No amendments proposed.
878568			LP201513	1.39 What about the effects on wildlife in areas that are not European designated wildlife sites. At the back of Thorntree Drive there are hedgerows and trees that have always supported birds and animals. There are mice, voles, stoats, foxes, bats, hedgehogs		Introduction 1	Para 1.39 (now para 1.30) discusses the Local Plan's Habitat Regulations Assessment (HRA). HRAs are prepared under the European Union Habitats Directive to provide an assessment of the affect of a plan or project on sites considered to be of	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				and a huge variety of birds that come to roost including the ones that rely on them, like the sparrowhawks.			European importance for their nature conservation value. Sites that are not of European importance are considered and have policies for their protection in chapter 8 <i>The Natural Environment</i> of the Local Plan.	
804904			LP201528	I'll look forward to reviewing and providing a more thorough review of the plans although initial thoughts are that my previous comments have been almost completely ignored for the greater good of developing so called greenfield sites that in NT area doesn't seem to mean a thing as long as they are not in the councillors back yard! Disappointing but as to be expected by such a small minded electorate. I'll look forward to printing off all 174 pages and reviewing only to tell me that the choice of sites is completely inevitable and the habitat of wildlife will be perfectly capable of emigrating to more suitable brown belt land / more built up areas in the perceived view that there extinction in the area will benefit the overall aged human population by reducing the amount of poverty in the area! To coin one of my favourite films... you are here because you were sent here, you were told to come here and you obeyed. [Laughs] It is, of course, the way of all things. You see, there is only one constant, one universal, it is the only real truth: causality. Action. Reaction. Cause and effect. Morpheus: Everything begins with choice. Merovingian: No. Wrong. Choice is an illusion, created between those with power, and those without. Look there, at that woman. My God, just look at her. Affecting everyone around her, so obvious, so bourgeois, so boring. But		Introduction 1	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				wait... Watch - you see, I have sent her dessert, a very special dessert. I wrote it myself. It starts so simply, each line of the program creating a new effect, just like poetry. First, a rush... heat... her heart flutters. You can see it, Neo, yes? She does not understand why - is it the wine? No. What is it then, what is the reason? And soon it does not matter, soon the why and the reason are gone, and all that matters is the feeling itself. This is the nature of the universe. We struggle against it, we fight to deny it, but it is of course pretence, it is a lie. Beneath our poised appearance, the truth is we are completely out of control. Causality. There is no escape from it, we are forever slaves to it. Our only hope, our only peace is to understand it, to understand the `why.' `Why' is what separates us from them, you from me. `Why' is the only real social power, without it you are powerless. And this is how you come to me, without `why,' without power. Another link in the chain. But fear not, since I have seen how good you are at following orders, I will tell you what to do next. Run back, and give the fortune teller this message: Her time is almost up. Now I have some real business to do, I will say adieu and goodbye.				
879296		RESIDENT	LP201533	Do not destroy aspects of North Tyneside that currently attract people unless significant improvements are planned to road and transport networks in advance of proposed developments. These proposals seem short-sighted for short term Council financial gain.		Introduction 1	Comment noted.	No amendments proposed.
879463		RESIDENT	LP201542	* do you want to know my sex when I was born or my current status * my age varies		Introduction 1	As stated alongside these questions, they are used for equality monitoring purposes	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				depending on whether my grandson is with me * the colour of my skin varies with the factor of my sun cream * I vary my sexuality depending on my mood * I keep my health problems between me and my doctor You may take it as read that I find these questionnaires a complete and utter waste of time.			to help the Council to understand who they are reaching with their consultations and how they may better consult in the future. As stated, they are optional and do not need to be completed.	
891715			LP2015201	You missed out one legged squint eyed lesbian in your Equality Monitoring list. What does that have to do with building houses for Heavens sake!!! Apart from that bit of stupidity, by the time this lot is built, the only bit of green left will be on our back lawns. Far too much housing in Whitley Bay and far too much fees added as well at the coast for Council run Services. Try inland for a change.		Introduction 1	Comment noted. The monitoring questions help provide a record of those people who respond to the consultation so that we can measure which groups in society are and are not engaging with the Local Plan and whether we need to address this in subsequent consultations. The questions are not mandatory. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections over the next 15 years places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development.	No amendments proposed.
467684		RESIDENT	LP2015322	I believe this consultation is a sham and a waste of time and money. Hoping the councillors enjoy their pay rise by the way!		Introduction 1	Comment noted. North Tyneside Council are required by planning legislation to carry out public consultation events.	No amendments proposed.
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015462	Thank you for e-mail of 11 February 2015 consulting South Tyneside Council on the revised consultation version of North Tyneside's emerging Local Plan development plan document. As part of the North East LA7 group of local authorities we are committed to working closely with North Tyneside Council in contributing to the		Introduction 1	Support noted for continued commitment to work closely together and as part of the LA7 group in accordance with the Duty to cooperate requirements.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				preparation of your development plan in accordance with the Duty to Co-operate requirements and the LA7 Memorandum of Understanding. This response is further to our response to the previous version in December 2013 and participation in the North Tyneside Local Plan workshop event in October 2014. We note the duty to co-operate and regional context, and the ongoing dialogue between the LA7 group of authorities on key cross-boundary issues, as recognised in the introductory section to the Local Plan, together with the North East Local Enterprise Partnership and Combined Authority and the Strategic Economic Plan.				
801358		RESIDENT	LP2015484	I feel this is yet another case of NTC paying lip service to the tax paying residents of this borough because, regardless of what we think or say, we will be wholeheartedly ignored.		Introduction 1	Comment noted. The Council are actively seeking to engage with the public in the production of the forthcoming Local Plan and it has already been through many stages of public consultation. The Council reviews each comment submitted and considers how it can influence the Local Plan as it is progressed. The views of residents have to be balanced against other factors such as national government policy and population projections. The views of residents are not ignored. The Local Authority has a responsibility to produce a Local Plan to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							needed. The Council has therefore had to suggest green field sites for development but with objective to also protect and enhance the natural environment and enhance the image of the Borough. The reality of recent planning appeals for large scale housing development within the Borough, which have been refused by the Council but overturned at appeal by a independent inspector, reflects the position of the Council having to make provision for future generations.	
			LP2015488	It is obviously a very large document for people to get their heads around and given this plan will effect how planning decisions are made for some time local contribution is difficult. How the local authority apply these with their own applications is a concern - especially in light of the current application for demolition of Central Lower Prom!! (which I object to by the way). Also of concern is that this event has not been well advertised in Whitley Bay. There are very few people here.		Introduction 1	Comments noted. The Local Planning Authority act impartially in the assessment of all applications and any decision made is able to be fully scrutinised. Drop-in events were advertised in a number of ways, including via a leaflet delivered to every property in the Borough.	No amendments proposed.
898311		RESIDENT	LP2015743	Broadly I am in agreement with the 2015		Introduction 1	Support noted.	No amendments proposed.
791875		RESIDENT	LP2015851	The plans all look comprehensive and I ask who is paying for all of these investigations now, and if improved, the actual constructions of the changes? Could the forthcoming election alter the arrangements?		Introduction 1	Comment noted. The Plan has been through many previous stages of public consultation where the proposals have been amended and refined (this information is available to view on the Council website). Studies on the evidence required to bring forward the Local Plan have been carried out by a number of different parties, some internal to the Council and some who have been commissioned by the Council. Some funding has been received from government	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							agencies to help support the evidence of the Local Plan. Since the election there has been no change in the commitment to deliver an up to date Local Plan for North Tyneside.	
898964			LP2015992	1. I think the rigmarole of having to register to make comments will considerably reduce the number of comments received by the council.		Introduction 1	We are sorry that you found our consultation portal difficult to use to make your comments on the Local Plan. We understand that people may want to use different methods to make their comments and thus welcomed comments via the portal, email, letter or the feedback slip that was delivered to every property in the Borough.	No amendments proposed.
898404		RESIDENT	LP2015993	I am appalled by the plans to build all these new houses in the Benton area. This area has seen a dramatic rise in residential housing, with the developments at Darsley Green and East Benton Rise. My complaints centre around, pollution, loss of identity for the area, strain on public services, loss of wildlife, the legacy we are leaving our children and grandchildren and above all congestion. Have any of these Councillors or planners drove along Whitley Road in a rush hour? I hope the council planners don't hide behind the "it's the Government's fault" line, as I will be making a freedom of information request after this has been decided to check on the veracity of these claims. I naively thought we lived in a democracy!		Introduction 1	The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside places a requirement on the authority to plan for growth due to the guidance from national government guidance (NPPF). Without an up to date Local Plan future development within the Borough will happen on an ad hoc basis and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth being forecast. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							<p>Policy DM8.2 'Protection of Green Infrastructure' (now DM5.2) and the intention of the policy is to be positive with a strategic approach to green links through the Borough. A number of constraints lie within the proposed development sites, whether its wildlife corridors or flood zones which will result in smaller site areas for some sites. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence. The Local Plan seeks to consider the needs of current and future residents and how these needs will change over time. The importance of infrastructure to support the levels of growth proposed in the Local Plan is reflected in the relevant Section and the Infrastructure Delivery Plan. Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements (including along the A191) to make it easier and safer to travel throughout the Borough.</p>	
898968	Killingworth Village Residents' Association		LP2015994	On behalf of Killingworth Village residents we wish to submit the following: Firstly, we understand that there has to be a master plan so that central government targets are met. However, we feel that the building on		Introduction 1	Comment noted. It is important that the needs of the existing and future residents are considered within the two large areas of development at Murton and Killingworth Moor. the strategic allocations policy	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Killingworth Moor does not provide nearly enough protection for Killingworth Village conservation area. Our main concerns are the road infrastructure, in particular the links onto the B1317 which is basically a country road originally designed for horses and carts. This road is completely unsuitable for the increased volume of traffic. The junction at Palmersville, complete with traffic lights is already in existence and the size of the roads proposed gives the impression that Development had already been decided. The lack of amenities and strain put on existing amenities would be a real cause for concern. Schools, doctors and the lack of public transport in this area remain an area for concern since there are no real plans outlined. It is our opinion that local people should have at least equal input into the future Development as any developers. We feel that a master plan should not be written by the developers and any proposals for the site should be resisted until a master plan is agreed.</p>			<p>outlines that further comprehensive master planning will be required by the landowner/s and North Tyneside Council to ensure the provision of essential infrastructure, facilities and services are appropriately provided. The Local Plan seeks to consider the needs of current and future residents and how these needs will change over time. The importance of health and education facilities is reflected in the Infrastructure section of the Plan The planning team have been in discussion with the Councils education officers and NHS England to determine the impact of the proposed level of growth on school places and this has shown the need for an additional primary and secondary school to meet the needs of the future populations at Killingworth Moor and Murton, plus additional health facilities. The transport infrastructure to support the development of each site and the connections to the wider transport will be developed as the Masterplan is prepared for each site.</p>	
805282			LP20151002	<p>This plan appears to be 'preferred' by the developers who should not be allowed a biased say in the local area of the people who actually live here and their pay council tax! It is written to confuse the majority and should be laid out in a clear and concise manner for people to understand. It appears to me that my views from the original consultation have been largely ignored by people who have a vested interest in this plan going ahead. I strongly disagree with the development of the Annitsford Farm site as it will over develop an</p>		Introduction 1	<p>The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside places a requirement on the authority to plan for growth due to the guidance from national government guidance (NPPF). 							Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements (including along the A191) to make it easier and safer to travel throughout the Borough.	
898977			LP20151004	Brownfield sites should be considered for any form of development prior to consideration of developing greenfield sites. As you are no doubt aware the NPPF (March 2012) suggests that:"encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value". (Section 17 NPPF) 111. Planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed (brownfield land), that it is not of high environmental value. Local planning authorities may continue to consider the case for setting a locally appropriate target for the use of brownfield land. Submitted by Alan Vasey		Introduction 1	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. The Councils intention to prioritise delivery of housing on brown field land is reflected in Policy S7.1 (now S4.1), but when allocating sites for new development there is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough.	No amendments proposed.
898964			LP20151069	I would like more explanation of how this plan dovetails with neighbouring councils' plans. How can we be assured that the level of house building proposed is not going to encourage people to move into the area, and have little impact on demand?		Introduction 1	This Local Plan has been prepared alongside an ongoing process of engagement with neighbouring authorities as part of the duty to co-operate. Through that process Newcastle and Northumberland, as our two closest neighbours have prepared their own plans that each include measures to increase the overall rate of housing delivery and retain a greater proportion of their working age population. Those plans have the potential to influence rates of migration between the authorities. The overall proposals for North Tyneside reflect a lower	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							number of homes than would be required if people continued to live in North Tyneside and work in Newcastle at the same proportion that they do today and is informed by the aging of existing residents in the borough and jobs growth.	
685823	North Tyneside Green Party		LP20151071	The Green Party is concerned about the future and the condition of our local communities which we will be passing on to our children and grandchildren in the context of the planet as a whole. We subscribe to the notion of sustainable development as a framework within which to assess proposed changes to the local environment. Sustainable development has 3 dimensions, all of which have equal value: social, environmental and economic. Economic and social growth have to be balanced against the impact on the environment. There are two other key considerations: the impact of climate change and the finite resources of the planet on which we live and depend upon for our food and wellbeing. Where climate change is concerned increasing instability of weather conditions worldwide is already having an impact upon food production and hence food prices here. We have seen increasing frequency of floods, droughts and strong winds all of which have a detrimental effect on our natural and built environment. The government's Environmental Audit Committee has recently (March 2015) warned on the climate change adaptation challenge. Despite the Government's National Adaptation Programme (NAP) putting the UK ahead of many countries in preparing for the		Introduction 1	Comment noted. The NPPF advises that Local Planning Authorities need to make decisions in accordance with achieving sustainable development and sets out the approaches they should take in doing so. Policy DM2.1 (now DM1.3) reflects this intention 'The Council will work pro-actively with applicants to jointly find solutions that mean proposals can be approved wherever possible that improve the economic, social and environmental conditions in the area through the Development Management process and application of the policies of the Local Plan.'. The First Objective of the Local Plan is to promote the renewable energy sector and developments which seek to minimise energy and resource consumption, whilst improving the Borough's resilience to the effects of climate change, this is reflected throughout the policies of the Plan The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth and therefore Low Growth Option was not a suggested option at the last stage of consultation. The Councils intention to prioritise delivery of housing on	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>impacts of climate change, the Environmental Audit Committee has warned that it has not identified proactive adaptation policies and there is no sense that we are tackling the priority climate risks. There is nothing in this Local Plan which indicates that North Tyneside Council is taking climate change seriously. And as Naomi Klein warns: "We know that if we continue on our current path of allowing emissions to rise year after year climate change will change everything about our world. And we don't have to do anything to bring about this future. All we have to do is nothing."(This Changes Everything quoted in the Guardian 7th March 2015). This Local Plan must make provision for the actions that must take place in this borough to reduce carbon emissions and protect its residents as far as possible from the consequences of climate change. Where the finite resources of the planet is concerned, the assumption of perpetual economic growth is unsustainable (and leads, together with climate change, to competition for resources, war, and large scale migration of people which we are already seeing). This doesn't mean that no economic development is possible but it does mean that such development has to recycle as much as possible as well as contribute to the reduction in carbon emissions therefore promote recycled and recyclable goods, goods and services which promote energy efficiency and prioritise goods which have long lives as opposed to those which need frequent replacement. The implications of these concerns for the Local Plan are: Economic</p>			<p>brown field land is reflected in Policy S7.1 (now S4.1), but when allocating sites for new development there is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM8.2 'Protection of Green Infrastructure' (now DM5.2) and wildlife interests are considered in Policy S8.1, DM8.2, DM8.4 and DM8.5 (now S5.1, DM5.2, DM5.4 and DM5.5) with the intention of the policy is to be positive with a strategic approach to green links through the Borough. The approach of the Local Plan is to set the policy framework that can be applied to proposals. Where there are overlapping interests on a site these issues will need to be discussed on a site by site basis applying the relevant policies that are applicable. Each Policy has been reviewed as part of the Sustainability Appraisal of the Local Plan which sets out the environmental, social and economic implications of the suggested policy contained in the Plan. This is to ensure that the preferred policy options are the most sustainable relative to other alternative options that could have been pursued. The Sustainability Appraisal can be viewed on the Council website. Within the two large areas of development at Murton and Killingworth Moor Policy AS7.4 (now S4.4)</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>growth has to be balanced against environmental and social considerations in particular reduction in carbon emissions and the impact of climate change. Opportunities for food production and therefore land use - should be included in plans for economic growth, Opportunities for waste reduction and waste recycling into products maximized Opportunities for energy production maximized including both generation and preservation/insulation The borough of North Tyneside has great potential for the creation of a more sustainable society for both present and future residents. The Local Plan should be a vehicle through which this can be achieved. In order to do this however the Local Plan needs to be amended in a number of key areas: Lower Growth Option for population and therefore economic and housing growth Specific attention given to sustainability in terms of energy generation, food production, clean air and water and other essentials to the wellbeing of residents. Giving the Local Authority's responsibility to maintain and enhance the natural environment equal weight to that of economic and housing development Integration of Green Infrastructure, Bio-Diversity and other relevant strategies and action plans with the economic and housing development proposed in the Local Plan so that it is clear where the policies are in conflict with each other, and how the conflict is to be resolved bearing in mind the Local Authority's responsibility to maintain and enhance the natural environment.</p>			<p>outlines the importance of providing a green space strategy, which could include future provision of allotments to encourage local food production. The Local Plan advocates the minimisation of waste production and the re-use and recovery of waste materials e.g. recycling, composting and energy from waste recovery (Policy S10.13, now S7.9).</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made

This is an important plot of land for the local community. I feel that the local infrastructure would not support the development of this site.		Introduction 1	Support noted. Benton Curve and Triangle are not included in this of the Local Plan as suggested development sites and are proposed to be retained as green space.	No amendments proposed.
685823	North Tyneside Green Party		LP20151073	Green Party 1. The Regional Context 1.33 We note that the Regional Spatial Strategy was abolished in 2013 and therefore no longer dictates the number of houses NT Council is required to build over the next 15 years. The decisions made on this matter have been therefore discretionary and determined on the basis of consultation with residents and others on preferred growth options undertaken in 2013. We further note that, as indicated in your document Consultation November 2013 in relation to the consultation on growth options, that: The responses demonstrate that a lower level of growth is desired by the people of North Tyneside, with the majority of respondents supporting at the lower level of growth or finding an alternative option. However this Local Plan is based on a higher level of growth. We are of the view that this level of growth is unachievable as well as undesirable and not wanted by the residents of the borough. While we think it is likely that the Council has opted for the higher growth because of pressure from central government it is important to note that Durham County's Local Plan has been rejected by the Inspector		Introduction 1	Comment noted. The Planning Inspectorates decision on the Durham Local Plan has stressed the importance to working closely with partners and neighbouring local authorities to ensure that the objectives and growth targets in the Local Plan are deliverable. The evidence produced from independent consultants on levels of growth in North Tyneside are supported by neighbouring authorities and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth forecast. Aiming for a low level of growth would in all likelihood result in a Local Plan for North Tyneside that would be rejected by an independent inspector. The inspector would be applying central government guidance to examine the Local Plan and consider if the Borough was making provision for its future objectively assessed development needs. Through the Local Plan process the Council intends to develop a Plan led approach to future growth so the issues of new	No amendments proposed.

				for being too ambitious in its growth plans. North Tyneside Council might well find itself in the same situation because the Plan for economic and particularly housing development is not achievable given the land available.			development can be considered collectively delivering benefits to existing and future communities.	
792500			LP20151074	Site 14: We are very happy that this area has been removed from the Local Plan - it is a totally impractical area of land to be used for housing, there is massive local community support to not only preserve this land but to be able to utilise it - as it has been previously - until recently - by way of allotments and community space and we have demonstrated this by gaining over 110 local names on a petition of support in an application for Designated Green Space and the forming of the Benton Triangle Community Action Group. see us on <a href="http://www.betontriangle.com">www.betontriangle.com</a> Therefore we wish to express our strong support for the permanent removal of the land at the rear of Midhurst Road, Benton from the list of potential development sites and its retention as an official designated Green Space.		Introduction 1	Assessment through the Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, has determined that the most appropriate designation for this site is as open space. As a result the site will not be selected as a preferred residential allocation. Following designation as open space through the Local Plan, any proposal for alternative use of the site, including for residential development, would be assessed on individual merit in light of relevant policies. As part of any proposal for development, a planning application must include an assessment to consider the current role, use and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision. The proposals for a Local Green Space designation have arisen from the representations of Benton Triangle Action Group and it was necessary to undertake an assessment of the appropriateness of such a designation through the Local Plan process. However, following assessment in accordance with the criteria provided in the	No amendments proposed.

							NPPF, it is recommended that this site would not be suitable for designation as formal Local Green Space. Further information on the assessment process is available in the relevant accompanying documentation.	
805535			LP20151076	AS7.4.-(d) Access and transport strategy- Killingworth Way, Great Lime Road, Shiremoor By-pass. - Rake Lane, Earsdon By-pass. Why was Killingworth lane B 1317 not mentioned ? As new junctions are proposed from the K / Moor S.Site, at present, it is a very busy rat run at peak times as is Simonside Way - East Bailey ). North Tyneside Council is spending Â£150million on road infrastructure over the next 5 years. However I am concerned as at present these roads are at full capacity at peak times ! The additional traffic generated by the proposed 2 strategic sites will cause gridlock from Monkseaton to Longbenton / Gosforth Park area. I have spoken to many people who think a new junction is proposed on the A19 from one of the proposed K / Moor roads, the reason for this is they do not know at present a public footpath, farmers lane and tunnel exists ( which is only 5.4 metres wide x 4.2 metres high ) through the embankment of the A19, and leads to a roundabout on the Shiremoor By-Pass. On the N.T.C. L.P. map the latter section of proposed new road from the tunnel to Shiremoor By-pass is totally obscured, as 'Northumberland park ' is written across the route. Hence people think a new junction on to the A19 is proposed. The tunnel is only 5.4 metres wide, enough for 2 cars to pass, but no		Introduction 1	Comment noted. Future transport assessments for both Murton and Killingworth Moor would consider the impact on the surrounding transport network and provide more detailed designs of the routes and connections to the existing highway network. This would need to include the roads passing under the A19 from the Killingworth Moor site and connecting to the Shiremoor by-pass. The layout of these routes will be improved on future versions of the Maps to ensure that it is not obscured by text. The specific references to the future highway network proposed through the Killingworth site in Policy AS7.4 (now S4.4) (d) would aim to reduce the impact on the surrounding network, such as the B1317. Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough. The North West North West Communities sub-area is recognised in the Local Plan with the proposed allocations of employment at Indigo Park and housing at Annitsford Farm. The North West is surrounded by Greenbelt and having undertaken an assessment of	Comment noted. 				<p>dying out. Therefore it is important the network of wildlife sites and links between them is maintained and enhanced ". there is evidence to prove that electricity pylon routes are of no use as wildlife corridors. Study suggests pylons and wires that stretch across many landscapes are having a worldwide impact on wildlife! Power lines are seen as glowing and flashing bands across the sky by many animals, research has revealed. Scientists knew many creatures avoid power lines but the reason why was mysterious as they are not impassable physical barriers. Now, a new understanding of just how many species can see the ultraviolet light "" which is invisible to humans "" has revealed the major visual impact of the power lines."It was a big surprise but we now think the majority of animals can see UV light," said Professor Glen Jeffery, a vision expert at University College London. "There is no reason why this phenomenon is not occurring around the world."Dr Nicolas Tyler, an ecologist at UIT The Arctic University of Norway and another member of the research team, said: "The flashes occur at random in time and space, so the power lines are not grey and passive, but seen as lines of light flashing."He said the discovery has global significance: "The loss and fragmentation of habitat by infrastructure is the principle global threat to biodiversity "" it is absolutely major. Roads have always got particular attention but this will push power lines right up the list of offenders." The avoidance of power lines can interfere with migration routes, breeding grounds and</p>				<p>further review of the Green Belt. Not all biodiversity and geodiversity avoid electricity pylons. The Wildlife Corridors which run along the Pylons provide key connections to other important Green infrastructure elements within the borough. On the Killingworth site, additional Wildlife Corridor's have been identified to further enhance the wildlife links within the area.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>grazing for both animals and birds. Autopsies on dozens of mammals from zoos and abattoirs showed their eyes were able to see UV, including cattle, cats, dogs, rats, bats, okapi, red pandas and hedgehogs. Also on the list were reindeer and further work published in the journal Conservation Biology showed these animals, whose eyes are specially adapted to the dark Arctic winters, are particularly sensitive to UV light. UV vision helps reindeer find plants in snow cover, but in the depths of winter their wide irises and sensitive eyes means the power lines appear particularly bright. The avoidance of power lines had been explained in the past by the corridors cut through forests to accommodate them, where animals would be exposed in the open to predators. Around the world, Tyler said: "There are hundred of examples of animals avoiding power lines. Now we know that, not only do these clear-cut corridors mean exposure to predators, at the same time there is this damn thing flashing at you." Jeffery said burying all power cables would be unrealistically expensive but added that one idea would be to put a non-conducting shield around the cable to screen it from view. The UV light, which is caused by electricity ionising the air around cables, are a major source of inefficiency for electricity companies and also cause the hissing or crackling noises sometimes heard. Power companies already use helicopter-mounted UV cameras to monitor power cables, because the flashes can be an early sign of conduction problems, but the cameras only</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>record a very narrow range of UV. "Animals see across the range, so the intensity of light seen by them is much more than seen by the helicopter flights," said Jeffery. The new research was funded by the UK's Biotechnology and Biological Sciences Research Council. There is also the issue of the many research papers on powerlines &amp; childhood leukaemia-this is why you have designated the route under the powerlines as the wildlife corridor, because you cannot build houses in close proximity to the power lines. As" the North West Communities sub-area is a priority area for investment regeneration". Could more be achieved in this area, As AS1,6 (4,43) states "the North West Area well served by major road network A1,A19,A189 and is uniquely placed as gateway into N.T. from Newcastle and Northumberland". Indigo Park is welcomed but could another employment park be sited on the northern border ? AS1,6 (4,48) states." The N.W. Area at present projecting a poor image which can be a discouragement to investors and visitors". The area also has surplus school places at both junior and high school level. Why build all of the housing on two sites with already congested road networks? Surely the better option would be to also utilise the Annitsford area with its much better access to the major road network. Robert Marchbanks</p>

				<p>comments. My thoughts on the plan are quite plain - North Tyneside Council seem to be intent on ripping up any open space, green fields and suchlike and filling the space with houses to the detriment of local residents and wildlife. If these plans go ahead then areas such as Benton, Wallsend and Palmersville presently bordered with fields will meld into one indistinguishable urban area, clogged with cars and lacking in green spaces to enjoy and wildlife that used to live there. Even without taking into account the lowering of quality of life due to the loss of green fields, the roads around Longbenton, Benton, Wallsend, and Palmersville are already very busy places, with drivers getting increasingly frustrated with longer journeys, if these plans go ahead - then the area will be in total gridlock at busy times. I am a resident of West Moor and in the near future will see the much loved fields of Whitehouse Farm destroyed for a huge executive housing estate (at least 2 car households), this development alone is going to cause traffic chaos, imagine how it will be if the plans go ahead... Finally, people love open spaces - cycling, dog walking and just watching wildlife brightens up people's lives and helps their mental well-being. Please North Tyneside Council, think very carefully before ripping up the fields, please think about using existing brownfield areas first and in a creative way. Once the fields are gone, they're gone for ever...</p>			<p>authority to plan for growth due to the guidance from national government guidance (NPPF). Without an up to date Local Plan future development within the Borough will happen on an ad hoc basis and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth being forecast. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM5.2 'Protection of Green Infrastructure' (now DM2.2) and the intention of the policy is to be positive with a strategic approach to green links through the Borough. A number of constraints lie within the proposed development sites, whether its wildlife corridors or flood zones which will result in smaller site areas for some sites. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence. The</p>

							Local Plan seeks to consider the needs of current and future residents and how these needs will change over time. The importance of infrastructure to support the levels of growth proposed in the Local Plan is reflected in Policy S10.13 (now 7.1) and the Infrastructure Delivery Plan. Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements (including along the A191) to make it easier and safer to travel throughout the Borough.	
685823	North Tyneside Green Party		LP20151091	The Green Party is concerned about the future and the condition of our local communities which we will be passing on to our children and grandchildren in the context of the planet as a whole. We subscribe to the notion of sustainable development as a framework within which to assess proposed changes to the local environment. Sustainable development has 3 dimensions, all of which have equal value: social, environmental and economic. Economic and social growth have to be balanced against the impact on the environment. There are two other key considerations: the impact of climate change and the finite resources of the planet on which we live and depend upon for our food and wellbeing. Where climate change is concerned increasing instability of weather conditions worldwide is already having an impact upon food production and hence food prices here. We have seen increasing frequency of floods, droughts and strong		Introduction 1	Comment noted. The NPPF advises that Local Planning Authorities need to make decisions in accordance with achieving sustainable development and sets out the approaches they should take in doing so. Policy DM2.1 (now DM1.3) reflects this intention 'The Council will work pro-actively with applicants to jointly find solutions that mean proposals can be approved wherever possible that improve the economic, social and environmental conditions in the area through the Development Management process and application of the policies of the Local Plan.'. The First Objective of the Local Plan is to promote the renewable energy sector and developments which seek to minimise energy and resource consumption, whilst improving the Borough's resilience to the effects of climate change, this is reflected in Policy S1.1, Policy DM2.2, DM7.5, S7.1 (now S1.4, DM4.5 and S4.1). The Council has to provide for the	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>winds all of which have a detrimental effect on our natural and built environment. The government's Environmental Audit Committee has recently (March 2015) warned on the climate change adaptation challenge. Despite the Government's National Adaptation Programme (NAP) putting the UK ahead of many countries in preparing for the impacts of climate change, the Environmental Audit Committee has warned that it has not identified proactive adaptation policies and there is no sense that we are tackling the priority climate risks. There is nothing in this Local Plan which indicates that North Tyneside Council is taking climate change seriously. And as Naomi Klein warns: "We know that if we continue on our current path of allowing emissions to rise year after year climate change will change everything about our world. And we don't have to do anything to bring about this future. All we have to do is nothing" (This Changes Everything quoted in the Guardian 7th March 2015). This Local Plan must make provision for the actions that must take place in this borough to reduce carbon emissions and protect its residents as far as possible from the consequences of climate change. Where the finite resources of the planet is concerned, the assumption of perpetual economic growth is unsustainable (and leads, together with climate change, to competition for resources, war, and large scale migration of people which we are already seeing). This doesn't mean that no economic development is possible but it does mean that such development has to recycle as</p>			<p>future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth and therefore Low Growth Option was not a suggested option at the last stage of consultation. The Councils intention to prioritise delivery of housing on brown field land is reflected in Policy S7.1 (now S4.1), but when allocating sites for new development there is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM8.2 'Protection of Green Infrastructure' (now DM5.2) and wildlife interests are considered in Policy S8.1 , DM8.2, DM8.4 and DM8.5 (now S5.1, DM5.2, DM5.4 and DM5.5) with the intention of the policy is to be positive with a strategic approach to green links through the Borough. The approach of the Local Plan is to set the policy framework that can be applied to proposals. Where there are overlapping interests on a site these issues will need to be discussed on a site by site basis applying the relevant policies that are applicable. Each Policy has been reviewed as part of the Sustainability Appraisal of the Local Plan which sets out the environmental, social and economic</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>much as possible as well as contribute to the reduction in carbon emissions therefore promote recycled and recyclable goods, goods and services which promote energy efficiency and prioritise goods which have long lives as opposed to those which need frequent replacement. The implications of these concerns for the Local Plan are: "ç Economic growth has to be balanced against environmental and social considerations in particular reduction in carbon emissions and the impact of climate change "ç Opportunities for food production "" and therefore land use - should be included in plans for economic growth " ç Opportunities for waste reduction and waste recycling into products maximized "ç Opportunities for energy production maximized including both generation and preservation/insulation The borough of North Tyneside has great potential for the creation of a more sustainable society for both present and future residents. The Local Plan should be a vehicle through which this can be achieved. In order to do this however the Local Plan needs to be amended in a number of key areas: "ç Lower Growth Option for population and therefore economic and housing growth "ç Specific attention given to sustainability in terms of energy generation, food production, clean air and water and other essentials to the wellbeing of residents "ç Giving the Local Authority's responsibility to maintain and enhance the natural environment equal weight to that of economic and housing development "ç Integration of Green Infrastructure, Bio-Diversity and other</p>			<p>implications of the suggested policy contained in the Plan. This is to ensure that the preferred policy options are the most sustainable relative to other alternative options that could have been pursued. The Sustainability Appraisal can be viewed on the Council website. Within the two large areas of development at Murton and Killingworth Moor Policy AS7.4 (now S4.4) outlines the importance of providing a green space strategy, which could include future provision of allotments to encourage local food production. The Local Plan advocates the minimisation of waste production and the re-use and recovery of waste materials e.g. recycling, composting and energy from waste recovery (now Policy S7.7).</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>relevant strategies and action plans with the economic and housing development proposed in the Local Plan so that it is clear where the policies are in conflict with each other, and how the conflict is to be resolved "" bearing in mind the Local Authority's responsibility to maintain and enhance the natural environment. 1. The Regional Context 1.33 We note that the Regional Spatial Strategy was abolished in 2013 and therefore no longer dictates the number of houses NT Council is required to build over the next 15 years. The decisions made on this matter have been therefore discretionary and determined on the basis of consultation with residents and others on preferred growth options undertaken in 2013. We further note that, as indicated in your document Consultation November 2013 in relation to the consultation on growth options, that: "The responses demonstrate that a lower level of growth is desired by the people of North Tyneside, with the majority of respondents supporting at the lower level of growth or finding an alternative option." However this Local Plan is based on a higher level of growth. We are of the view that this level of growth is unachievable as well as undesirable and not wanted by the residents of the borough. While we think it is likely that the Council has opted for the higher growth because of pressure from central government it is important to note that Durham County's Local Plan has been rejected by the Inspector for being too ambitious in its growth plans. North Tyneside Council might well find itself</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				in the same situation because the Plan for economic and particularly housing development is not achievable given the land available.				
899278			LP20151111	The North Tyneside Plan claims to be a vision and plan for all residents but in my view does not take sufficient account of the needs, interests, aspirations and potential of the children and young people who currently live in the Borough and the additional children who will live in NT as a result of the new housing developments. North Tyneside is in many ways a great place for children to live, to go to nursery, to go to school, to play and to grow up in. It has outstanding beaches, parks, schools, children's centres and green spaces. In addition it has a unique world class adventure playground and an equally unique and outstanding countryside centre. As well as places and spaces, North Tyneside also has special people and vibrant and distinctive communities. Parents, carers, grandparents and professionals who are supportive of children, their learning, development, health and play. Planning needs to create the infrastructure which is sensitive to children of different ages and abilities and supports the adults who care for them.		Introduction 1	Comment noted. The Local Plan sets out in its objectives the needs of young people and the growth projections incorporate the demographic changes within the Borough, therefore planning for the housing, employment, recreation and necessary infrastructure for future generations.	No amendments proposed.
899291			LP20151119	I would like to register my concern and objection to the further development of residential and commercial buildings in the Benton area. The infrastructure in this area due to existing developments in Benton and surrounding areas is already under pressure. There is major road congestion on Whitley Rd and Station Rd at rush hours each day,		Introduction 1	Comments noted, the Local Plan must respond to the identified objectively assessed needs for development. This means a range of brownfield and sustainable greenfield sites are required to be identified for development across the Borough. Alongside this the Local Plan sets out a range of policy seeking to protect the	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				resulting in drivers using Thornhill Rd and Grange Avenue as a rat run. The pressure on this junction will only continue. I also have concerns about the pressure on local service such as Doctor and school as well as the loss of green fields and wildlife.			wildlife value, character and environment of the Borough.	
899298			LP20151123	The overall structure of the plan lacks imagination and a systematic consideration of the integrated needs of the community, housing, employment, transport and quality of life. It would appear that the preferred options of commercial builders, large uncomplicated spaces, have been proposed on the basis that otherwise there will be a cost of appeals. I would like my Council to take a more creative approach which utilises the key resources of the region, i.e. not just the land within the plan but also how residents interact with the surrounding areas - Council boundaries are invisible to residents. Key under-utilised resources are the river and rail infrastructure, passenger services are required for the development of employment yet the current plan only employs the road network which is currently beyond its practical capacity. The viability of the Region requires an integrated approach by all the local Councils to support the movement of people by public transport which could be satisfied by services along the river. The most compelling advantage of this is that the main infrastructure exists, all that is needed are landing points, Dunstan to North Shields would open up significant parts of the Regions brown field potential. The Metro has capacity, subject to some signalling and track upgrade,		Introduction 1	Comment noted. The Local Plan seeks to integrate a range of complex issues to present a Plan that provides for future homes and jobs with adequate infrastructure in a manner to improve the quality of life and reduce the need to travel – Policy S1.1. The Council is working in cooperation with its neighbouring authorities to determine the impact of each Local Plans impact on the future of their areas. One example of this is the proposed Ashington, Blyth and Tyne railway line that Northumberland County Council is supporting. The North Tyneside Local Plan has identified safeguarded land of the proposed route through the Borough to secure the ambitions of Northumberland County Council. The proposals for ferry transportation up and down the Tyne have been considered previously but have never been taken up. The Local Plan would support alternative forms of travel to ‘secure a comprehensive, integrated, safe, accessible, and efficient public transport network’ – Policy S10.3 (now S7.3), but the Local Plan would not be responsible for the provision of a ferry service. Wildlife corridors have been suggested in Policy DM8.2 (now DM5.2) in cooperation with local biodiversity officers from adjoining	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				to increase capacity but again this requires an integrated approach by all the Councils which is not demonstrated by this plan and therefore leaves each Council to stand alone against the lawyers of the large housing firms who have no interest in the quality of life in the housing they produce or responsible attitude to their accumulated impact on the community. Fundamentally the areas marked as 'wildlife corridors' and 'buffer zones' are inadequate, the only option which would provide sustainable communities is to integrate within the region without each Council attempting to meet every target.			authorities with the intention to have a strategic approach to green links that connect authorities.	
898630			LP20151177	1.16e Why are there no specific policies for the rest of the borough? Forest Hall shopping area could do with some help. The café© has been empty for a year - hit by an increase in rent and high business rates, and the little greengrocers has gone. Also, with a bit of imagination the office block could be developed into flats which would help invigorate the area and meet some housing need.		Introduction 1	Comment noted. Although Paragraph 1.16(e) relates to key areas of North Tyneside the majority of the Plan relates to the whole Borough and centres such as Forest Hall are recognised in the Plan and are supported in Policies such as S6.1 (now S3.1) , S6.2 (now S3.2) and S6.3 (now S3.3). The Local Plan supports residential development in town centres to promote the vitality and viability of centres and the conversion of the upper floors to residential (Policy DM3.5), but rental levels or business rates are not a planning matter. The Council has recently invested in some improvements to Forest Hall with the intention to improve the public realm to try and create an environment people are more likely to visit and therefore create further opportunities for private sector investment. Planning can support its town centres through policies to enable appropriate development but ultimately the decisions to	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							invest in a centre are market led.	
805554			LP20151236	I disagree with the plans for provision of sites for housing development. The centre of the borough will see a disproportionate loss of green space around the wall send and Benton areas and effectively merge communities together and reduce quality of life for residents who live there. When I attended one of the consultation sessions there was no credible explanation as to how things like traffic congestion could be managed in partnership with other authorities and the impression that was given was one of a very siloed and micro approach to traffic flow. The same applies to demand for school places etc. The areas to the North of Wallsend could see more than 1,200 houses constructed and this will overwhelm services and local communities. Better use of the remaining green space to the north west of station road would be outdoor leisure space.		Introduction 1	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. Wildlife interests are considered in Policy S8.1 (now S5.1), DM8.2 (now DM5.2), DM8.4 (now DM5.4) and DM8.5 (now DM5.5). The Borough does have excellent transport connections to Newcastle but the transport infrastructure would need to be capable of delivering the growth projections. This has been considered within the transport modelling, looking at future impact and the how the £150million investment over the next five years will help towards the potential levels of growth outlined in the Plan. The Local Plan seeks to consider the needs of current and future residents and how these needs will change over time. The importance of health and education facilities is reflected in Policy S10.13 (now S7.10) 'Community Infrastructure' and 'General Infrastructure and Funding' Policy S10.1 (now S7.1). The planning team have been in discussion with the Councils	No amendments proposed.

							weekend to complete their response.	
899431			LP20151251	I'm concerned about the Priority Transport Improvements on the plan which show a proposed new route from the A191 Murton to A186 at Earsdon. This route passes through Green Belt land and crosses a Metro line. Also any new route through this area would seriously affect the drainage of an already vulnerable area. Why move traffic North from the Murton area to the A186 where it can only then travel South West on the A186 back to Northumberland Park, or South East on the A192, back to Monkseaton?		Introduction 1	Comment noted. Drainage issues associated with development on the suggested Murton site would need to be considered by Policy DM5.12 – 'All developments will be required to demonstrate that flood risk does not increase as a result of the development proposed, and that options have been taken to reduce overall flood risk from all sources, taking into account the impact of climate change over its lifetime'. The proposed new route is intended to serve the residents of the proposed new development and provide an alternative access of those in the north east of borough to the A1058.	No amendments proposed.
898630			LP20151277	1.20 Newcastle is not easily accessible by road, the westbound A191 is already backed up to Proctor and Gamble and Salters Road is starting to get backed up to West Moor. The improvements to the network on the A191 may alleviate present matters but there are nearly 2000 houses going up in that area and you propose to use the last remaining greenfield sites there to add yet more housing and industrial units along that stretch of road. The plan is certainly comprehensive, but I have found it difficult to understand and cross check back/forward to other sections, and it's been hard for me to put forward a coherent integrated argument and I've had to repeat comments in several sections for fear that they may be missed. The plan is big on statements but I see little in the way of how you will do things. For example, you say that housing will be appropriate etc. but from that		Introduction 1	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. Wildlife interests are considered in Policy S8.1 (now S5.1), DM8.2 (now DM5.2), DM8.4 (now DM5.4) and DM8.5 (now DM5.5). The Borough does have excellent transport connections to Newcastle but the transport infrastructure would need to be capable of delivering the growth projections. This has	Recommend future consultation periods to end on a Monday to allow people the weekend to submit comments.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>it's hard to visualise what that will look like in reality, so it makes me less inclined to support your proposed use of greenfield land for housing. If, say on the East Benton Rise site, a small village was built that provided access to the country park, that would be more palatable than an anonymous housing estate. Or if you could create images to see what the proposals might look like - it wouldn't take much in this day and age - then people might be more engaged. Given the size and nature of the document, I don't think six weeks is enough for the average person to take this in and comment on it. A deadline of 9am or noon Monday would have been better - you would have got responses back over the weekend and it would not have made any difference to your timings. Please make the next consultation longer, and let people know in advance that it is coming. You haven't helped yourselves by running it over Christmas in the first place then giving only six weeks for this one. I hope that you respond to every comment, because each one, no matter what they are or who they are from, should be listened and responded to. This may take more effort on your part, but it might improve the feeling, real or perceived, that you don't listen. Finally, may I suggest that once you have a set of ideas/options from this consultation, and before you publish the next that you engage and discuss the options with people, or at least those who have commented. This would form a dialogue that might actually get to a reasonable compromise. At the moment you create a</p>			<p>been considered within the transport modelling, looking at future impact and the how the £150million investment over the next five years will help towards the potential levels of growth outlined in the Plan. 				<p>Benton and travel by car to work (no public transport alternative) via the A1. Each and every day without exception the part of my journey which takes the longest is the first / last few miles getting to and from the A1 on our aged, over congested, local single carriageway roads. Do our councillors / planners live or travel in the borough at peak times? Every day is gridlock on the surrounding single carriage way roads. (A191, Station Road, Whitely Road, Great Lime Road, Sandy Lane, Four Lane Ends). Surely the 4000 + homes planned for these two sites will result in a minimum of 4000 extra cars on our old, congested, single carriageway roads. Not considering the many, many thousands of homes for which planning permission has been given but work is yet to start. Such as sites in Holystone, Wallsend, Rising Sun, Killingworth, Forest Hall, West Moor. The proposed access routes onto Killingworth moor include making use of an old country lane (B1317) and access via an existing housing estate onto Great Lime Road, both are already under significant traffic pressures. Could we not have an access route directly onto the Holystone roundabout (under A19). At present there is an access road onto the roundabout for the local Holystone residents that could be better utilised. Would it not make better sense to put the bulk of proposed new housing and employment sites towards the north of the borough, in areas such as Camperdown, Seaton Burn, Wideopen, Dudley, Seghill. - Areas which are currently well served by excellent under-</p>			<p>positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. Wildlife interests and accessibility to green space are considered in Policy S8.1 (now S5.1), DM8.2 (now DM5.2), DM8.4 (now DM5.4) and DM8.5 (now DM5.5). Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. Private gardens provide an important habitat for a wide range of wildlife. Large or small, private gardens have an important ecological function acting as wildlife corridors that link parks and green spaces, often providing quiet and undisturbed routes along which birds, bats and invertebrates can travel and feed. The provision of employment land in the Local Plan is based upon the evidence from the Employment Land Review (ELR), which was recently updated (2015) and considers previous take up rates of employment land from an annual monitoring survey, which records how much is available, and how much has been taken up. The ELR also considers the market perception of the Borough and market signals to reflect which areas of employment land are likely to see future</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>utilised dual carriageway roads; A189, A19, A1. All within a close proximity to each other allowing faster travel across the borough and region as a whole. - Areas which the council recognises as requiring priority investment and regeneration. - Areas with surplus school places and little other capital investment With the above points in mind it would seem madness to site development anywhere else considering the existing infrastructure in place. However to the possible developers these areas would present a significantly lower Return on Investment than developing Killingworth / Murton would (i.e. significantly lower property prices). I would like to remind the council this our borough not the property developers', they should dance to our tune not vice versa! Could we not make Sandy Lane and Killingworth Way a dual carriageway, linking the A1 to A189 to A19? I understand in years gone by this was always the intention. Surely we have sufficient space either side of the existing carriageway to do this? With this additional infrastructure in place for the future we would then be ideally placed to open up the huge swathes of land to the north (deprived former mining areas such as Camperdown, Seghill, Burradon, Seaton Burn etc.) to development on roads designed to cope with the traffic of the future. I feel it rather short sighted to consider placing "Employment sites" and any housing directly alongside the A19. Preventing any further widening or expansion of a major route permanently. Consider the roundabout at Silverlink where the A19 goes under the Coast</p>			<p>demand in occupancy or investment. All these factors are considered in the future provision of employment land in the Local Plan so that it is able to accommodate future investment. The Future transport assessments for both Murton and Killingworth Moor Masterplans will consider the impact on the surrounding transport network and provide more detailed designs of the routes and connections to the existing highway network. Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough, which includes the A191 corridor. The comments that you have made to the long term planning for three lanes on the A19 have never been raised by Highways England as an issue that needs to be considered in the Local Plan as they are the organisation responsible for the maintenance and future improvements of the strategic highway network. The North West Communities sub-area is recognised in the Local Plan with the proposed allocations of employment at Indigo Park and housing at Annitsford Farm. The North West is largely surrounded by Greenbelt and having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional circumstances exist to amend its boundary. Having considered the extent of</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Road, this has recently under gone major works to expand the road to 4 or 5 lanes which (for the moment) has relieved the bottle-neck. Has any consideration been given that at some point in the future this road up to Moor Farm roundabout might need to be extended to 3 full lanes of motorway traffic? And that buildings beside the road might just get in the way of expansion? Especially to accommodate the many thousands of extra vehicles that additional housing and employment sites will inevitably / hopefully attract? Surely we have enough industrial / employment sites. Just look at the Silverlink, many shiny new office blocks which have never been occupied. Even the Council had to occupy one (presumably to hide the embarrassment!) The company I work for in the previous few years looked at occupying a site at Silverlink, we were offered 5 years rent free just to move there! Surprisingly we turned it down for an even better offer. Finally I find the allocation of wildlife corridors almost hilarious. How are animals to move through these corridors when they run through housing estates, built up areas and busy roads? Are we to issue deer and badgers with keys for folks' garden gates, will we see foxes and stoats leaping gracefully over back fences to get to the next green space? Clearly at best these proposed Wildlife Corridors will only serve bird life and give zero regard land based creatures or the invertebrates which make up a huge part of our wild creatures food chain. Consider the Rising Sun Country Park, which like any wild area needs it's</p>			development required to 2032 and the capacity of existing Safeguarded Land in the Borough, there remains sufficient land to meet the development needs of the Borough for at least the current Plan period without requiring a further review of the Green Belt.

				biodiversity and genetic stock replenished by the movement of animals. The stag living there is a huge draw to visitors, how will the next stag arrive when the park has become an island of green surrounded by housing and light industry. How much of a "Country Park" will the Rising Sun remain, and for how long? Many thanks for giving the opportunity to voice my opinions and concerns. Kind regards				
899444	George F White		LP20151297	1.23 Duty to co-operate Reference is made at 1.23- 1.25 to the Duty to Co-operate (DtC) indicating joint work has been undertaken and that this will continue throughout the preparation of the plan. A clear statement to demonstrate the evidence of this cooperation is required (NPPF 181) this would improve the transparency of the plans preparation demonstrating that the plan has been positively prepared having regard to the unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development NPPF (182). Evidence within the SHMA (Dec 2014) indicates that North Tyneside is not a self-contained housing market, but is part of a wider housing market extending into Newcastle and Northumberland . Whilst reference is made to the interrelationship of the housing market area between Newcastle and Northumberland, there is no clear indication of the impact of this and how much, if any, of North Tyneside's objectively assessed housing need (OAN) is expected to be met by the adjoining authorities. Both Newcastle and Northumberland LPAs indicate in their		Introduction 1	Comments noted. The council is working closely with its neighbours in undertaking the duty to cooperate. As part of this a series of position statements are being prepared that will provide a summary of the cross border relationships and evidence that will assist in understanding .	No amendment proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>respective emerging Development Plans objectives to retain working age population and reduce out-migration. Specifically Newcastle seeks to reduce out-migration to North Tyneside (Newcastle and Gateshead Joint Core Strategy response to Matter 3 Housing Need and Provision), whilst Northumberland indicates it could support additional housing from adjoining authorities if any need arises. Further evidence to demonstrate the scale and impact of this with regard to the OAN and the distribution of housing provision for North Tyneside is required to clearly demonstrate that the Council has made provision to meet OAN of the plan area. Little reference is made to the needs of the adjoining Local Planning area of South Tyneside and if any identified needs arising are being sought or met from North Tyneside. The housing figures discussed in section 7 of the Consultation therefore require further clarification and more explicit quantification with specific regard to the DtC.</p>				
899479	Save Killingworth Moor		LP20151313	<p>With regard to the Local Plan Consultation and with specific reference to the area Killingworth Moor / A19 Corridor, on your "North Tyneside Suggested sites for development " plan, the following comments reflect the views of the Save Killingworth Moor group. We note the comments of the reduction of new house building in the Killingworth area to "no more than 2000" however this is in addition to the many housing developments currently taking place in Killingworth, including the substantial developments on the lakeshore and the REME</p>		Introduction 1	<p>Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth even taking into account the recent planning approvals around Killingworth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>workshop site redevelopment which have not been counted in these plans as existing planning consent has been granted. The "Local consultation plan" does not reflect these extensive developments and so the reduction of numbers of housing on Killingworth Moor does not reflect a reduction of housing developments in Killingworth location placing pressure upon the existing resources and infrastructure. The reduction in housing developments upon Killingworth Moor as proposed by the council is still excessive for the area. The NPPF (2012) Indicates that Council's should promote mixed use developments, and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions (such as for wildlife, recreation, flood risk mitigation, carbon storage, or food production); however the residential developments upon Killingworth moor would not offer any rural land, habitat for wildlife or flood mitigation, and serve only to create a huge urban sprawl with no distinction between Killingworth, Killingworth Village, Backworth, Forest Hall, Holystone, Palmersville and West Allotment. Point 38 of the NPPF illustrates that for larger scale residential developments in particular, planning policies should promote a mix of uses in order to provide opportunities to undertake day-to-day activities including work on site. Where practical, particularly within large-scale developments, key facilities such as primary schools and local shops should be located within walking distance of most</p>			<p>natural environment and enhance the image of the Borough. Green links are considered in Policy DM5.2 'Protection of Green Infrastructure' and the intention of the policy is to be positive with a strategic approach to green links through the Borough. Policy AS7.4 (now S4.4) does reflect the importance green corridors within Murton and Killingworth Moor - 'major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity'. Wildlife interests and accessibility to green space are considered in Policy S5.1, DM5.2, DM5.4 and DM5.5. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The justification for the housing figures for the Borough are included in Chapter Seven of the Local Plan but further detail is available to view on the Council website for the Local Plan under the heading '2015 Local Plan Consultation Key Evidence and Supporting Documents Schedule' or you can select the following link - <a href="http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=558913">http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=558913</a> . It is important that the needs of the existing and future residents are considered within the two large areas of development at</p>

				<p>properties. However as indicated in the report on Education (2014) produced by AV Consulting on behalf of save Killingworth Moor any development within the Killingworth Moor site will not offer any employment opportunities neither will it offer any primary schools within walking distance outside of NPPF guidance. The current road B1317 has already seen a number of accidents and recent traffic survey completed 2014 illustrated that a significant number of drivers use excessive speed upon the road both heading into and out of Killingworth village, it has also been highlighted that the current road structure cannot accommodate full size buses or construction traffic either through the village or down Killingworth bank leaving the only option as via the A19. Should this road be widened to accept higher levels of traffic the resulting impact would be upon the existing dwellings and structures which are already close to the main road. This would result in an increased level of noise and pollution experienced by the existing dwellings, Transport Report 2014. The impact of this level of development will have a massive impact upon local wildlife and will almost totally obliterate the wildlife corridor. Resulting in reducing the corridor to only a few feet and in places the only wildlife corridor will be the main road!! The site has been shown to contain Great crested newts (Natural England 2014), Hedgehogs, Kestrels, Bats, and Owls (the latter being protected species. Indeed a Police investigation was instituted into the drainage of ponds and the</p>			<p>Murton and Killingworth Moor. the strategic allocations policy outlines that further comprehensive master planning will be required by the landowner/s and North Tyneside Council to ensure the provision of essential infrastructure, facilities and services are appropriately provided. The Local Plan seeks to consider the needs of current and future residents and how these needs will change over time. The importance of health and education facilities is reflected in Policy S7.10 'Community Infrastructure' and Policy S7.1 'General Infrastructure and Funding'. The planning team have been in discussion with the Councils education officers and health officials to determine the impact of the proposed level of growth on the area. The transport infrastructure to support the development of each site and the connections to the wider transport network will be developed as the Masterplan is prepared for each site, but the traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough. Flooding is an issue that is covered by Policies in the Local Plan – Policy DM5.12 states 'All major developments will be required to demonstrate that flood risk does not increase as a result of the development proposed, and that options have been taken to reduce overall flood risk from all sources,</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>disturbance of wildlife and destruction of habitat without the necessary permits obtained from Natural England. Indeed recent Bat and wildlife surveys were carried out with the months of hibernation October - January 2014 for the Bellway REME development, the report submitted to planning officers by the Wildlife group following the bat survey clearly indicated it could not be used to support a planning application. There are a significant number of reports illustrating the numbers and variety of wildlife on Killingworth Moor, and given the large amount of wildlife corridor which will be obliterated should any further developments commence upon the moor, Appraisal of Ecology Report 2014. In addition to Wildlife the original use of the land was mining, the recent mining survey, "North Tyneside: Coal mining risk area planar" (2014), indicated that the Killingworth Moor area was a Development high risk area.' Construction within this site has the potential to cause serious destabilisation with the area and existing properties suffered some significant movement following the severe storms and rain in 2012. In addition to the risk further development upon the site will "sterilise the mineral rights' to the land " leaving no option to extract the remaining coal reserves under the site. Section 1 of the Planning Practice Guidance (DCLG 2014) indicates that Flood risk is a combination of the probability of and potential consequences of flooding from all sources, including rivers, seas, directly from rainfall on the ground or surface and rising</p>			<p>taking into account the impact of climate change over its lifetime. All new development should contribute positively to actively reducing flood risk in line with national policy, through avoidance, reduction, management and mitigation'. Concerns of development effecting former coal mining areas at Killingworth Moor and potential mineral resources being sterilised are covered within Policy DM8.14 and DM8.15 (now AS5.17 and DM5.18).</p>

							Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough.	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151317	Para 2.1 includes reference to the road network through the Borough. It might also constructively include reference to the Metro highlighting that it gives access to the national rail network and to Newcastle Airport. Certainly para 2.18 should highlight the Metro providing this access if the Plan is going to promote modal shift away from car use.		Introduction 1	Comment noted. The justification for referencing the highway network in paragraph 2.1 is due to the nature of the roads acting as significant characteristics to the orientation of the Borough being east and west of the A19 and north and south of the A1058. The Metro is a valuable asset for the Borough and its importance to connect North Tyneside to the wider transport network and support more sustainable modes of travel could be further emphasised.	Greater reference of the Metro connections to national rail links and the Airport. Greater reference to emphasis the role of the Metro to support more sustainable forms of travel in the Borough.
803900	Northumberland County Council	LOCAL AUTHORITY	LP20151527	The Council welcomes and supports the statements regarding the Duty to Cooperate and the common issues with Northumberland as identified in paragraphs 1.17 to 1.29. The Council welcomes the commitment to continuing to work with neighbouring authorities in accordance with the Duty to Cooperate requirements.		Introduction 1	Comment noted.	No amendments proposed.
899323			LP20151614	On behalf of our Client (NewRiver Retail) owners of the Beacon Shopping Centre in North Shields Town Centre and the Forum Shopping Centre in Wallsend Town Centre. We hereby submit the following representations to the North Tyneside Local Plan: Consultation 2015 (February 2015). Background The Two Shopping Centres are currently occupied principally for retail purposes, with key retailers including New Look, Iceland and Home Bargains within the		Introduction 1	Comment noted. The Council adopts a town centre first approach in the Local Plan and this is reflected in its objectives. Policies in the Local Plan seek to reinforce the delivery of this objective and support the protection and enhancement of the vitality and viability of its centres, but the Council will consider if greater flexibility can be achieved through its town centre policies. The Local Plan has a specific policy for each town centre (except of Killingworth), with the intention to	Greater flexibility of town centre uses included in the frontage Policy (DM6.5) and additional wording to DM6.4 to strengthen the support towards town centres first. Contacted the respondents with the intention to work in cooperation of supporting the boroughs town

				<p>Forum (Wallsend), and Wilkinson, Home Bargains and Poundland within the Beacon (North Shields). At present, NewRiver Retail are considering investment opportunities for their holdings and are very mindful of the challenging commercial property environment in North Shields Town Centre and Wallsend Town Centre. NewRiver Retail is broadly supportive of the North Tyneside Local Plan: Consultation 2015 document but as set out above, we request on behalf of our Client, NewRiver Retail, that the above changes are made to ensure that the new Policies protect planned growth in town centres. NRR is concerned that in particular, the Council's retail policy on out-of-centre development needs to be strengthened. Our Client also considers it necessary to make the town centre policies more commercially flexible to enable more diversity of uses in the town centres, which will contribute to their vitality and viability. Without such changes the investment potential outside of defined centres could become more attractive to the commercial property market. Particularly in the context of the challenging condition of the local retail market, the current health of the existing town centres of North Tyneside and competition from out-of-centre retail offer. It is our Client's opinion that the Council should be doing all in their powers to direct new retail development towards the town centres. On behalf of our Client, NewRiver Retail, we request to be kept informed with progress of the North Tyneside Local Plan and wish to reserve our Client's position to make further</p>			<p>provide confidence and direct future regeneration to its centres. The Local Plan adheres to the guidance provided in NPPF for applying the sequential test and the Council has adopted a locally set floorspace threshold for an impact assessment, based on the evidence in the updated Retail and Leisure Study (2014) to reflect the challenging local retail environment. The Council recognises that improvements can be made in each of its centres and will welcome further discussions with NewRiver to support further appropriate town centre investment.</p>	centres.

				representations on subsequent consultation documents.				
808917	BDW North East	LAND DEVELOPER	LP20151770	The LPCD states that "this of the Local Plan has been amended taking into consideration: the comments received during consultation on the last of the Local Plan". The LPCD 2013 Statement of Consultation contains information on the work done to engage communities and the comments received. However, it lacks reference on how the council have used these comments to inform the LPCD 2015. BDW urge the council to clearly identify what was the outcome of the consultation issues raised and how they informed policy. This will help demonstrate the plan being developed is genuinely planned, empowering local people to shape their surroundings, by preparing the plan in consultation with the local community at each stage. The council should clearly identify the outcomes of their consultation, issues raised and how they have informed the policy going forward.		Introduction 1	Comment noted. The Consultation Statement to accompany the Local Plan will provide a clear and transparent record of the comments recorded and how they have been taken into account.	No amendments proposed.
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151807	To summarise, we are broadly supportive of the overall content and vision of the North Tyneside LPCD. We believe that there are elements contained within the Flood Risk and Water Management sections that have the potential to form a good basis upon which to build a strong suite of sustainable water management policies, subject to a number of amendments and alterations suggested above. However, there are also aspects of the key policies (spatial development, economy, housing development) where our interests in sustainable water management and our role		Introduction 1	Comment noted. The Councils response to the specific policy comments from Northumbrian Water are dealt with individually but the overall commendation is welcomed and the Council will continue to keep Northumbrian Water updated as the Plan progresses.	No amendments proposed.

							Assistance was available via the planning policy team at <a href="mailto:planning.policy@northtyneside.gov.uk">planning.policy@northtyneside.gov.uk</a> , by telephone 0191 6432310 or in person at our offices or at the drop-in sessions.	
591119			LP20151883	<p>Firstly may I explain why I am sending my comments on the Local Plan Consultation 2015 in letter form via email. Despite working in I.T. for over 30 years and consider myself IT literate, I found responding via your website both ominous and onerous. Not only that, when attempting to find my feedback on earlier stages of this process using your instructions I found it impossible. The documents you quoted in my correspondence from you in February 2015, appear NOT to exist! I am not sure you take into account the high degree of objections against using Greenfield sites, as was demonstrated by your removal of "safeguarded" status from the Whitehouse Farm, farmed land in your earlier and aborted attempt at a Local Plan / UDP, which opened the door to the developer cashing in on it's landbank and the local community losing it's main accessible (public bridleways criss-crossing it) open space as well as the adverse impact on the wildlife.</p>		Introduction 1	<p>Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM5.2 'Protection of Green Infrastructure' and the intention of the policy is to be positive with a strategic approach to green links through the Borough. The Council makes every effort to encourage responses to the Local Plan and it is with regret to learn of your difficulties in submitting comments. The Council offer a variety of ways comments can be submitted. We have an online consultation portal. Alternatively comments can be emailed to the Planning team or sent by post. 638268	Natural History Society of Northumbria		LP20151892	Thank you for consulting the Natural History Society of Northumbria (NHSN) on the Local Plan for North Tyneside. We are pleased to see that the current includes some changes that we suggested in the earlier consultation but disappointed to see that others have not been acted upon.		Introduction 1	Comment noted.	No amendments proposed.
396511	GVA	PLANNING CONSULTANCY	LP20152000	Duty to Co-operate The consortium has land interests in Newcastle and Northumberland and is aware of the importance of Duty to Co-operate between those Authorities and North Tyneside. They are particularly aware of the importance of the overlap of the housing market areas and the impending adoption of the NewcastleGateshead Core Strategy and the emergence of the Northumberland Local Plan. There are examples of failed Local Plans due to the lack of Duty to Co-operate and therefore the consortium is keen to fully understand the process that North Tyneside is undertaking to ensure that at Examination in Public ("EiP") the Inspector is satisfied that		Introduction 1	Comments noted. The council is working closely with its neighbours in undertaking the duty to cooperate. As part of this a series of position statements are being prepared that will provide a summary of the cross border relationships and evidence that will assist in understanding .	No amendment proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the obligations in NPPF have been met. The consortium is encouraged that the Council has engaged in cross-boundary working with adjoining authorities as outlined in paragraphs 1.17 to 1.29 of the local plan. It is also noted that the Council has worked closely with Newcastle and Northumberland during its consideration of the housing requirement, as detailed in paragraphs 7.31 and 7.32 of the plan and the 2014 Strategic Housing Market Assessment (2014 SHMA). As set out below, the consortium does however have some concerns regarding the Objectively Assessed Housing Need ("OAN" in Policy S7.1 (now S4.1)) including in relation to Northumberland. The consortium is well aware that the NewcastleGateshead Core Strategy about to be adopted is seeking to reduce out-migration from Newcastle to North Tyneside, a point commented upon by the Inspector in his report upon their plan following the Examination in Public. The consortium considers that the North Tyneside plan should replicate this agreement and it is noted that this is referred to in paragraph 7.32 of the plan. In the case of Northumberland, their plan currently proposes 23,520 new dwellings of which 12,820 would be in South East Northumberland which has a common boundary and is linked in housing market and employment terms to North Tyneside. However, the level of agreement between the two authorities is much less clear and the consortium would wish to understand better the relationships between the two and how</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				any changes in proposals for Northumberland as their local plan processes are aligned with North Tyneside. Currently there is a lack of discussion within the plan or background evidence relating to the level of agreement between the two authorities and the consortium would wish to understand this more fully with the Council before the Submission of the Local Plan to the Secretary of State.				
830571	Persimmon Homes	DEVELOPER	LP20152015	These representations are made on behalf of Persimmon Homes and Charles Church in relation to the North Tyneside Local Plan: Consultation (NTLPCD 15). The two companies represent one of the largest house builders in the UK and are a significant stakeholder in the borough with a vested interest in the long-term future of North Tyneside. Whilst there are many positive aspects of the plan there are a small number of areas upon which it is considered further work or amendment is necessary. The comments put forward through these representations are intended to inform the next stage of the process and ultimately to ensure that the Local Plan is found sound at Examination in Public. Persimmon Homes and Charles Church have significant involvement in public examinations both nationally and regionally, this representation seeks to provide advice and guidance as a critical friend and offer our experiences of recent examinations in an attempt to ensure the plan process is robust and passes through the EIP process with minimal revision. This representation builds upon and references		Introduction 1	Comments noted. The council is working closely with its neighbours in undertaking the duty to cooperate. As part of this a series of position statements are being prepared that will provide a summary of the cross border relationships and evidence that will assist in understanding.	No amendment proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>our previous consultation representations submitted last January where relevant. The representation is structured alongside the contents of the NTLPCD 15 but where applicable makes reference to the following other documents which have been of note, "ç North Tyneside, Green Belt Review (Feb 2015) "ç North Tyneside Strategic Housing Market Assessment V6 (December 14) "ç North Tyneside Employment Land Review (Feb 2015) "ç North Tyneside Green Infrastructure Strategy (2015) "ç North Tyneside Strategic Housing Land Availability Assessment (Jan 2015) "ç North Tyneside Habitat Regulation Report (Jan 2015) These comments should be taken as official representations in relation to these evidence base documents alongside the overall representations given to the NTLPCD 15. All comments are structured in response to specific policies, when subdividing this representation please take all relevant material as referenced for each policy (this may include additional paragraphs elsewhere in the rep) as indicated. Section 1 (Introduction) The Plan Period This section clearly sets out the reasons for the emerging strategy, the plan's context and the direction of travel for the consultation process moving towards the EIP, however it is unclear from this section precisely what the time period of the proposed plan would be. While it is stated to be "up to 2032" this seems vague as to the start time and the total running time of the plan. It is stated later that the plan is set to run from 2011/12 " 2031/32 which we</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>support as it falls within the advised 15 year minimum period by PINS and as stated in NPPF Paragraph 157. We would request that this section be amended to include a clear timeframe for the plan as all other comments and policies are then bound by this timetable. The Duty to Co-operate As highlighted in our previous representations we remain concerned as to the level of evidence provided and the overall quality of the joint duty to co operate within the North East. Recent Public Examinations (Durham County Council and NewcastleGateshead) have tested this approach. While the inspector in NewcastleGateshead was eventually assured that the level of discussion was appropriate this was in the context of these authorities reversing outward migration and consuming their own generated need. Further to our previous consultation responses made in 2014 we continue to be concerned to the level of reliance given on the outward migration trends to Northumberland. It is noted that the 2014 Northumberland Strategic Housing Market Assessment (2014 Northumberland SHMA) discusses the interactions between the two authorities and suggests that 2,500 additional migrants are anticipated from North Tyneside over the plan period. Yet paragraph 6.11 of the 2014 Northumberland SHMA indicates that these additional migrants have not been built into the population and household forecasts undertaken by Edge Analytics on behalf of the Council. This is a serious flaw in the evidence base and under the Duty to Cooperate (DtC).</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Without detailed information upon such agreements, how this figure has been derived or how this has effected the resultant housing requirement for each authority compliance with the DtC cannot be properly judged. To overcome this issue we strongly recommended that a DtC statement is produced which clearly explains what has been agreed, the level of assistance, if any, Northumberland CC is providing for North Tyneside and how this has impacted upon the relevant housing figures. The statement should also provide similar commentary upon other adjoining authorities. Section 2 (A Picture of North Tyneside) In section 2 paragraph 2.1 the area is described as being "bisected east/west by the A19T and North South by the A1058 Coast Road." This needs to be amended to the other way round. While a minor change it is best that the document reflect and accurately describe the area of North Tyneside.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152126	Paragraph 1.15 sets out the key strategic priorities which the NPPF requires Local Plans to address. Priority (f) is the conservation and enhancement of the natural, built and historic environment. This being the case, I consider it important for the title of Chapter 9 to explicitly refer to the 'historic' environment, and for other references to the built environment to also explicitly include reference to it where applicable.		Introduction 1	Comments noted.	Chapter 9 title changed to "The Built and Historic Environment" and title of section within is now "Enhancement of the Built and Historic Environment". "and Historic" added to para 1.45, 3.4 (objective 10), 10.4, 10.77
805724		LANDOWNER / BUSINESS	LP2015280	Horton Estate welcome the Plan and thank the Council for positive discussions thus far.		The Local Plan	Support noted.	No amendments proposed.
444526		RESIDENT	LP2015308	I have no further comments to make. It meets most of my comments in 2013.		The Local Plan	Support noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015542	Northumberland Wildlife Trust would seek clarification on why some sites with current planning permission have not been highlighted in the Policies Map. Many of these sites were not allocated through the previous UDP and would be likely to contribute significantly towards the land allocation for new housing developments. Not including these on the map can mislead the reader into thinking these sites are not going to be developed. We welcome the alteration to the map in this respect, however it is not clear from the map if these areas (now with planning permission) contribute towards the overall housing number aims?		The Local Plan	Comments noted. The Local Plan states 'in ensuring the delivery of the overall housing requirement, North Tyneside already has a significant number of homes that have either been built, or benefit from planning permission and will contribute to meeting the Borough's needs'. A table is provided below this text to show the amount of homes, once these are taken into account, that the Local Plan will need to provide for.	No amendments proposed.
897298		RESIDENT	LP2015607	Your stated you had listened to the people. We had concerns about harm to wildlife, character of the area, schools, health facilities, and in particular the current level of traffics congestion which would get drastically worse...NONE of these were covered or able to be explained by the planners at the local meeting.		The Local Plan	Comment noted. The Local Plan does consider the comments that are submitted as the Plan is progressed. Further work is still required to determine the impacts from the strategic development sites at Murton and Killingworth but these are being brought forward as part of a comprehensive master plan (as set out in Policy S4.4) to ensure the provision of essential infrastructure, facilities and services are appropriately provided. The importance of health and education facilities is reflected in Policy S7.10 'Community Infrastructure' and Policy S7.1 'General Infrastructure and Funding'. The planning team have been in discussion with the Councils education officers and health officials to determine the impact of the proposed level of growth on the area. The transport infrastructure will be developed in the future Masterplan, but the traffic impacts from the amount of growth	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							<p>suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM5.2 'Protection of Green Infrastructure' and the intention of the policy is to be positive with a strategic approach to green links through the Borough. Policy AS7.4 (now S4.4) does reflect the importance green corridors within Murton and Killingworth Moor - 'major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity'. Wildlife interests and accessibility to green space are considered in Policy S5.1, DM5.2, DM5.4 and DM5.5.</p>	
804813			LP2015634	Having spent some time studying the Consultation of North Tyneside's Local Plan, the first thing to say is that we found it		The Local Plan	Comment noted. The Map to accompany the Local Plan will be further improved to provide greater clarity and understanding of	Policies map will endeavour to be more clear.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				unclear and difficult to read. This was largely due to the colours and patterns on the map not matching the 'legend'. For example, there is no equivalent in the 'legend' to the hatching drawn around Murton (the colours appear quite different). Also, it is not easy to see how far the map represents the existing situation, as opposed to how far it represents proposed changes. For example, if the map, as stated, represents only 'suggested' sites, why does it include large sites for which planning permission has already been granted, presumably to private developers?			proposals. The hatching around Murton refers to the Strategic Settlement Buffer that is included in the legend but it could be more clearly presented. The map includes large sites with planning permission (which are predominantly being taken forward by private developers) so that people can see what other housing sites are contributing to the overall housing supply for the Borough and the relationship of suggested sites to those with approval already granted.	
463681		RESIDENT	LP2015717	Overall plan is well thought out, balanced plan that will help economic growth creating more job opportunities for local residents and also makes North Tyneside a good place to live. P.S only problem to date appears to be an increase in the amount of rats sighted near Burradon abattoir and farm.		The Local Plan	Comments noted.	No amendments proposed.
898630			LP2015890	1.48 This links to the old plan. This is an error that needs to be fixed immediately. I am sure this is just a mistake, but this doesn't help with the feeling, real or perceived, that we won't be listened to. We cannot comment on an old map.		The Local Plan	Our apologies that the link to the map within the document was incorrect. The updated map was available online alongside the Local Plan.	Link updated.
805689			LP2015891	I understand that NTC are required to put forward a plan and that you will never please all the people all the time. I understand the parameters within which you are working in order to have your plan accepted by Government. I understand that you have to base your plan on the evidence provided to you in terms of future population growth etc. I understand that a labour council is always going to try and improve the lives of those		The Local Plan	Comments noted. With regards to shop frontages, much shopfront work does not require planning permission and therefore out of our control. However, in recognising the issue, the Local Plan does include policies that aim to ensure good quality shop fronts in those occasions where planning permission is required. With regards to litter, the Planning system primarily deals with the built environment.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>less fortunate and in doing so, Whitley Bay has certainly suffered, with the centre - especially Whitley Road looking appalling with all the gaudy shop signage. However, by far my biggest concern right now is the appalling state of the whole area in terms of litter. I am not exaggerating in saying that every single place I walk or drive is badly littered - on the ground, in the hedges and trees and it is hugely depressing. I understand the cuts to services have hit hard - but what on earth is the point of trying to talk up North Tyneside as being a great place to live, work and visit when it looks one huge waste tip?? If you started to tackle this kind of problem and help make the general environment more pleasant to be in, then you may find people become more accepting of your proposals. Talking to two sets of neighbours yesterday, all three of us have recently had punctures after visiting the waste disposal site. If you want to set an example to people - I would start right there and get your people to tidy the place up - it is always in a disgusting mess and I've never seen any of the staff trying to tidy it up. I emailed the council a week ago to find out information about the Spring Clean up - I'm still waiting for a reply. So, before you build another 4,500 homes with all the associated waste/litter, please do something about this huge fundamental problem and get the area cleaned up. The wheelie bins and weekly collections are adding to the problem - it's not just people dropping litter. I followed a wagon down Marine Avenue and picked up half a tub of coleslaw, a teabag and a plastic meat tray</p>			<p>The Local Plan contains a policy to ensure that new developments provide sustainable waste management (during construction and use) through the provision of recycling facilities and ensure a suitable location for the storage and collection of waste (policy DM7.9 New Development and Waste). However the Local Plan or Planning system are otherwise not able to manage litter. The Council have a Streetcare team who deal with litter issues and they are aware of your concerns. Residents are encouraged to report issues by calling the team or via an online form:  <a href="http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins">http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins</a></p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				that had been left after a bin was emptied. If each commercial property would just clear up outside their premises each day, that would start to improve things quickly - but there is huge apathy because it looks like the council are simply turning a blind eye to the litter problem. Personally, I would rather pay a 14% rise in my council tax than continue seeing North Tyneside go downhill like this. I'm sure many more residents would get involved in litter clean-ups if you would just make it more easy to join in and set a good example in leadership on the problem. I know I've vented my spleen here - but providing a clean and pleasant environment which is safe for wildlife (God knows how many animals are dying as the result of litter) and pleasing for residents has got to be a priority in winning hearts and minds to your wider agenda.				
898751			LP2015905	I would also like to add that I found it very awkward to work out how to object to these plans, and My Mother-in-Law who also wished to object was put off by the complexity of the website and the need to register. I am not even sure that I have put this comment in the right place, or if it will be counted as an objection.		The Local Plan	We are sorry that you found our consultation portal difficult to use to make your comments on the Local Plan. We understand that people may want to use different methods to make their comments and thus welcomed comments via the portal, email, letter or the feedback slip that was delivered to every property in the Borough.	No amendments proposed.
898787		RESIDENT	LP2015921	Why is West Moor not named on the Local Plan Consultation Map February 2015?		The Local Plan	The Summary Map is a simple overview of the Borough and the Local Plan proposals. It was not possible to include comprehensive information and so not every area is labelled. 							suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough, as set out in the relevant section of the Local Plan.	
898912		RESIDENT	LP2015979	I would like to see the Council (1) aim for a more realistic growth rate, (2) reduce the amount of greenfield land to be built on, and (3) make proper provision for ecological networks.		The Local Plan	Comment noted. The Council does listen to the public's response to the consultation, but it also has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside places a requirement on the authority to plan for growth due to the guidance from national government guidance (NPPF). Without an up to date Local Plan future development within the Borough will happen on an ad hoc basis and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth being forecast. The Councils intention to prioritise delivery of housing on brown field land is reflected in Policy S4.1, but when allocating sites for new development there is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and ecological networks, e.g. Policy S5.1, DM5.2, DM5.4 and DM5.5.	No amendments proposed.
898989		RESIDENT	LP20151006	The information available to residents about the plan is not user friendly. The information		The Local Plan	The consultation on the Local Plan aimed to encourage as many people as possible to	No amendments proposed.

				is fragmented and difficult to interpret to the untrained professional. It was not immediately clear to myself as a resident from the Consultation Plan summary leaflet that the A191 Holystone Interchange to Cobalt Business Park was planned to be increased to 4 lanes of traffic and the Interchange itself significantly altered. I believe the Council could make a significant improvement in the quality of the information and how it is communicated to local residents.			respond. The layout of the Local Plan will be reviewed to consider if it can be restructured to make it easier to interpret. The consultation of the Local Plan coincided with the announcement that over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of commuters, public transport users, cyclists and pedestrians. The detailed designs of the highway network improvements will be consulted on separately to the Local Plan. It was considered appropriate to highlight these strategic improvements to the highways network in the Local Plan summary leaflet. The proposed highway improvements reflect the anticipated levels of economic growth across the Borough's key employment sites, namely Quorum, Cobalt, Indigo Park, and North Bank of the Tyne (inc. Tyne Tunnel Trading Est.). There are four major improvement schemes; A19 employment corridor access improvements (A19 Holystone to Cobalt), Coach Lane and Tyne View Park (A191 corridor), A1056 Weetslade Corridor (Sandy Lane), North Bank of Tyne. These works focus on improving the highway network directly impacted by the expected job growth and not the housing sites associated with the emerging Local Plan for which any highway improvements would be predominantly developer funded separately. 				Killingworth now have planning permission or are already built. I think this area has had enough development.				
899479	Save Killingworth Moor		LP20151314	With regard to the Local Plan Consultation and with specific reference to the area Killingworth Moor / A19 Corridor, on your "North Tyneside Suggested sites for development" plan, the following comments reflect the views of the Save Killingworth Moor group. We note the comments of the reduction of new house building in the Killingworth area to "no more than 2000' however this is in addition to the many housing developments currently taking place in Killingworth, including the substantial developments on the lakeshore and the REME workshop site redevelopment which have not been counted in these plans as existing planning consent has been granted. The "Local consultation planar€™ does not reflect these extensive developments and so the reduction of numbers of housing on Killingworth Moor does not reflect a reduction of housing developments in Killingworth location "" placing pressure upon the existing resources and infrastructure. The reduction in housing developments upon Killingworth Moor as proposed by the council is still excessive for the area. The NPPF (2012) Indicates that Council's should promote mixed use developments, and encourage multiple benefits from the use of land in urban and rural areas, recognising that some open land can perform many functions (such as for wildlife, recreation, flood risk mitigation, carbon storage, or food production); however		The Local Plan	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth even taking into account the recent planning approvals around Killingworth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM5.2 'Protection of Green Infrastructure' and the intention of the policy is to be positive with a strategic approach to green links through the Borough. Policy AS4.4 does reflect the importance green corridors within Murton and Killingworth Moor - 'major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity'. Wildlife interests and accessibility to green space are considered in Policy S5.1, DM5.2, DM5.4 and DM5.5. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of	No amendments proposed

				<p>the residential developments upon Killingworth moor would not offer any rural land, habitat for wildlife or flood mitigation, and serve only to create a huge urban sprawl with no distinction between Killingworth, Killingworth Village, Backworth, Forest Hall, Holystone, Palmersville and West Allotment. Point 38 of the NPPF "" illustrates that for larger scale residential developments in particular, planning policies should promote a mix of uses in order to provide opportunities to undertake day-to-day activities including work on site. Where practical, particularly within large-scale developments, key facilities such as primary schools and local shops should be located within walking distance of most properties. However as indicated in the report on Education (2014) produced by AV Consulting on behalf of save Killingworth Moor any development within the Killingworth Moor site will not offer any employment opportunities neither will it offer any primary schools within walking distance outside of NPPF guidance. The current road B1317 has already seen a number of accidents and recent traffic survey completed 2014 illustrated that a significant number of drivers use excessive speed upon the road both heading into and out of Killingworth village, it has also been highlighted that the current road structure cannot accommodate full size buses or construction traffic either through the village or down Killingworth bank leaving the only option as via the A19. Should this road be widened to accept higher levels of traffic the resulting impact would be upon the</p>			<p>wildlife movement through a site. The justification for the housing figures for the Borough are included in Chapter Seven of the Local Plan but further detail is available to view on the Council website for the Local Plan under the heading '2015 Local Plan Consultation Key Evidence and Supporting Documents Schedule' or you can select the following link - <a href="http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=558913">http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=558913</a> .</p> <p>It is important that the needs of the existing and future residents are considered within the two large areas of development at Murton and Killingworth Moor. Policy S4.4 outlines that further comprehensive master planning will be required by the landowner/s and North Tyneside Council to ensure the provision of essential infrastructure, facilities and services are appropriately provided. The Local Plan seeks to consider the needs of current and future residents and how these needs will change over time. The importance of health and education facilities is reflected in Policy S7.1 (now S4.1)0 'Community Infrastructure' and Policy S7.1 (now S4.1) 'General Infrastructure and Funding'. The planning team have been in discussion with the Councils education officers and health officials to determine the impact of the proposed level of growth on the area. The transport infrastructure to support the development of each site and the connections to the wider transport network</p>

				<p>existing dwellings and structures which are already close to the main road. This would result in an increased level of noise and pollution experienced by the existing dwellings, Transport Report 2014. The impact of this level of development will have a massive impact upon local wildlife and will almost totally obliterate the wildlife corridor. Resulting in reducing the corridor to only a few feet and in places the only wildlife corridor will be the main road!! The site has been shown to contain Great crested newts (Natural England 2014), Hedgehogs, Kestrels, Bats, and Owls (the latter being protected species. Indeed a Police investigation was instituted into the drainage of ponds and the disturbance of wildlife and destruction of habitat without the necessary permits obtained from Natural England. Indeed recent Bat and wildlife surveys were carried out with the months of hibernation October "" January 2014 for the Bellway REME development, the report submitted to planning officers by the Wildlife group following the bat survey clearly indicated it could not be used to support a planning application. There are a significant number of reports illustrating the numbers and variety of wildlife on Killingworth Moor, and given the large amount of wildlife corridor which will be obliterated should any further developments commence upon the moor, Appraisal of Ecology Report 2014. In addition to Wildlife the original use of the land was mining, the recent mining survey, ""North Tyneside: Coal mining risk area planar€™ (2014), indicated that the</p>			<p>will be developed as the Masterplan is prepared for each site, but the traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough. Flooding is an issue that is covered by Policy DM5.12, S5.9 and DM5.10 in the Local Plan – Policy DM5.12 states ‘All major developments will be required to demonstrate that flood risk does not increase as a result of the development proposed, and that options have been taken to reduce overall flood risk from all sources, taking into account the impact of climate change over its lifetime. All new development should contribute positively to actively reducing flood risk in line with national policy, through avoidance, reduction, management and mitigation’. Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Killingworth Moor area was a Development high risk area.' Construction within this site has the potential to cause serious destabilisation with the area and existing properties suffered some significant movement following the severe storms and rain in 2012. In addition to the risk further development upon the site will "sterilise the mineral rights' to the land " leaving no option to extract the remaining coal reserves under the site. Section 1 of the Planning Practice Guidance (DCLG 2014) indicates that Flood risk is a combination of the probability of and potential consequences of flooding from all sources, including rivers, seas, directly from rainfall on the ground or surface and rising groundwater, overwhelmed sewers and drainage systems. Houses at the lower gradient in Palmersville have already experienced flooding with seasonal weather, the current information provided indicates there could be a greatly increased risk of flooding to the properties, downstream and at lower gradient than the proposed development area. We note the "Local Plan' is based upon "preferred levels of housing growth' however no context is give as to the actual levels of growth, making the quotation out of context and wholly unreliable as based upon aspirational growth figures and not actual figures. For the reasons illustrated above we believe the Council need to reconsider the amount of housing proposed for Killingworth Moor and restrict this to the existing development on the REME site. There are a number of other brownfield sites</p>

				towards Holywell and consider the use of some of the designated green open space land near the green belt in the Whitley bay and Dudley areas to create sustainable communities who can all share the green open spaces within the area. Justine Nichol Secretary "'Save Killingworth Moor'				
472456		RESIDENT	LP20151396	The plan is based on growth rates which are overly-ambitious even though earlier consultation showed that people in North Tyneside wanted to aim for lower rate of growth in order to save valued green spaces. The ceding of population to NewcastleGateshead is not adequately reflected in the growth figures. I would also wonder where all these people are going to work and how they will get to these jobs you have in mind.		The Local Plan	Comment noted. The Council does listen to the public's response to the consultation, but it also has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside places a requirement on the authority to plan for growth due to the guidance from national government guidance (NPPF). Without an up to date Local Plan future development within the Borough will happen on an ad hoc basis and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth being forecast. The Councils intention to prioritise delivery of housing on brown field land is reflected in Policy S4.1, but when allocating sites for new development there is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and ecological networks, e.g. Policy S5.1, DM5.2, DM5.4 and DM5.5. The next stage of the	No amendments proposed.

							Plan will further emphasise the level of cooperation that has been undertaken towards determining the housing figures for North Tyneside, through working in cooperation with its neighbouring authorities. The numbers of jobs are based on the work of economic analysts who have produced an Employment Land Review (ELR) for North Tyneside (2015). The ELR also considers how much future employment land needs to be provided in the Local Plan to accommodate future investment in the Borough. The traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough. Further detailed traffic modelling work will also be carried out when detailed site layouts can be considered within a planning application.	
472456		RESIDENT	LP20151409	I would like to see the Council aim for a more realistic growth rate which would reduce the amount of greenfields that will be built on and which will make the protection and enhancement of coherent ecological networks more achievable. This will contribute to climate change reduction, will make the borough a physically attractive one without sprawling concrete estates. All of this will contribute to the wellbeing of the citizens and to the building of communities in a sustainable way.		The Local Plan	Comment noted. The First Objective of the Local Plan is to improving the Borough's resilience to the effects of climate change, this is reflected in Policy S1.1, Policy DM2.2 (now S1.4), DM7.5 (now DM4.5), S7.1 (now S4.1) . The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. The Councils intention to prioritise delivery of housing on brown field land is reflected in	No amendments proposed.

899837		RESIDENT	LP20151487	The information available to residents about the plan is not user friendly. The information is fragmented and difficult to interpret to the untrained professional. It was not immediately clear to myself as a resident from the Consultation Plan summary leaflet that the A191 Holystone Interchange to Cobalt Business Park was planned to be increased to 4 lanes of traffic and the Interchange itself significantly altered. I believe the Council could make a significant improvement in the quality of the information and how it is communicated to local residents.		The Local Plan	The consultation on the Local Plan aimed to encourage as many people as possible to respond. The layout of the Local Plan will be reviewed to consider if it can be restructured to make it easier to interpret. The consultation of the Local Plan coincided with the announcement that over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of commuters, public transport users, cyclists and pedestrians. The detailed designs of the highway network improvements will be consulted on separately to the Local Plan. It was considered appropriate to highlight these strategic improvements to the highways network in the Local Plan summary leaflet. The proposed highway improvements reflect the anticipated levels of economic growth across the Borough's key employment sites, namely Quorum, Cobalt, Indigo Park, and North Bank of the Tyne (inc. Tyne Tunnel Trading Est.). There are	No amendments proposed.

805615	Lambert Smith Hampton	PLANNING CONSULTANT	LP20151652	We are writing in connection with the Consultation of the above plan in the context of representations made on behalf of the Port of Tyne to the previous consultation issued in November 2013. As you will recall these representations expressed concern that the previous of the plan placed greater emphasis on certain sectors, including advanced engineering, low carbon and renewables, than existing business operations including those of the Port on the north bank of the Tyne. The Port made representations suggesting revisions to the working of some of the policies and also put forward wording for a Port specific policy that would relate to its land holdings on the north bank of the Tyne. The Port is, therefore, supportive of certain revisions made to the emerging plan. In order to try and move the discussion forward we have, therefore, set out the Port's response to the revisions put forward and set out further representations on certain policies, as appropriate.		The Local Plan	Noted - further specific comments provided are recorded and responded to in turn through this schedule for each relevant section of the Local Plan.	No amendments proposed.

							<p>on what mitigation would be required will be developed as the Local Plan progresses.</p> <p>For the schemes that qualify for the £150million funding an Outline Business Case (OBC) will be prepared and submitted to the NELEP (North East Local Enterprise Partnership) for assessment and a comprehensive public consultation process will commence. Further information of the consultation process will be available on the Council website. The OBC will include a screening assessment of the environmental impacts of the proposed schemes. Any impacts identified as significant will be assessed in more detail and associated mitigation measures proposed where practicable, this would include air quality, noise and ecology concerns. The Full Business Case would include any environmental impact assessment required to support the scheme submission. The NELEP have indicated that the funding sort is available subject to North Tyneside Council demonstrating the scheme is good value for money.</p>	
899297			LP20151686	Thank you for providing an opportunity to comment on the Local Plan for North Tyneside. As a local resident I have a number of comments and concerns with regards to the above document (these are attached with this letter). Whilst there are positive aspects to the Local Plan, I have considerable concerns, primarily relating to policy content, landscape connectivity and the large allocations of green land for development. I		The Local Plan	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>consider that such issues must be addressed to ensure that the future growth of North Tyneside is fully sustainable for both people and wildlife. Recent developments have produced a number of contentious issues which this plan should seek to address. In my opinion, the plan is based on growth rates which are overly-ambitious and ignore earlier consultation feedback showing a public opinion for a lower rate of growth to save valued green spaces. In addition, evidence provided by North Tyneside Council to the examination in public for Newcastle City Local Plan, stated a lower anticipated growth rate than have been used in preparation of this plan. It is inconceivable that such a dramatic change would be probable. Given this, there is no evidence-based justification for the safeguarding of additional land for development beyond the Plan period, therefore safeguarded sites should be removed. Whilst a number of alterations have been made since the last consultation, many of them welcomed, much of the plan does not to meet the requirements of National Planning Policy Framework, in particular paragraphs*: . &gt; 81 - positively to enhance the beneficial use of the Green Belt &gt; 109 - The planning system should contribute to and enhance the natural and local environment by: - recognising the wider benefits of ecosystem services; - minimising impacts on biodiversity and providing net gains in biodiversity where possible, contributing to the Government's commitment to halt the overall decline in biodiversity, including by</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>establishing coherent ecological networks that are more resilient to current and future pressures; &gt; 110 --In preparing plans to meet development needs, the aim should be to minimise " adverse effects on the local and natural environment. &gt; 114 - Local planning authorities should: - set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure; and - maintain the character of the undeveloped coast &gt; 117 - To minimise impacts on biodiversity and geodiversity, planning policies should: - identify and map components of the local ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect them and areas identified by local partnerships for habitat restoration or creation; &gt; 118 - proposed development on land within or outside a Site of Special Scientific Interest likely to have an adverse effect on a Site of Special Scientific Interest (either individually or in combination with other developments) should not normally be permitted. . The LPA should be planning positively for biodiversity, seeking net gain and producing a coherent and functioning wildlife corridor network. Many of the current allocations for development, such as sites 22-26, 35-41 and 109 do not meet this and will ultimately result in a net loss of biodiversity with fragmented small areas of habitat, not linked by a</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				workable network of wildlife corridors. Furthermore, I do not consider that the LPA are not planning positively for biodiversity and not meeting the requirements of NNPF by failing to produce a strategic map of identified areas for biodiversity off-setting, mitigation, compensation and wildlife habitat creation. . This letter builds upon points raised by the 2014 consultation, which still apply and I have added these below [NTC Officer Note: recorded against each relevant Policy] which I would like those to be considered as part of this additional response. New comments are in black, previous comments from the consultation responses are in light grey.				
755686	Home Builders Federation		LP20151722	1. Thank you for consulting with the Home Builders Federation (HBF) on the consultation of the North Tyneside Local Plan. 2. The HBF is the principal representative body of the house building industry in England and Wales and our representations reflect the views of our membership of multinational PLCs, through regional developers to small, local builders. Our members account for over 80% of all new housing built in England and Wales in any one year including a large proportion of the new affordable housing stock. 3. We would like to submit the following comments. General Comments 4. The HBF is keen to work with the Council in order to achieve an adopted local plan which enables an increase in the rate of house building across North Tyneside. In this regard the HBF has identified a number of areas where it is considered that the plan would benefit either from modifications or further evidence prior to the		The Local Plan	Comment noted. The Council is working closely with its neighbours, particularly Northumberland and Newcastle through the preparation of the Local Plan, to consider the cross border relationships and evidence that arise through each authorities strategy. A series of position papers are being produced that once published will support understanding of these issues and how they have been addressed.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>next stage of consultation. The following comments are provided based upon our substantial experience of local plan examinations across the country. Plan Period 5. The HBF is supportive of the extension of the plan period to 2032, this is in conformity with our comments upon the previous consultation upon the plan in January 2014. It is noted that the Council anticipate that the plan will be adopted in August 2016. Providing there are no slippages in plan preparation this should enable the 15 year time horizon, preferred within national policy (NPPF paragraph 157), to be met. Duty to cooperate 6. The HBF is encouraged to note that the Council has engaged in cross-boundary working with adjoining authorities as outlined in paragraphs 1.17 to 1.29 of the plan. It is also noted that the Council has worked closely with Newcastle and Northumberland during its consideration of the housing requirement, as detailed in paragraphs 7.31 and 7.32 of the plan and the 2014 Strategic Housing Market Assessment (2014 SHMA). 7. The HBF is aware that the Gateshead and Newcastle Core Strategy and Urban Core Plan sought to reduce out-migration from Newcastle to North Tyneside, a point commented upon by the Inspector in his report upon their plan. It is therefore considered consistent that the North Tyneside plan replicate this agreement. In the case of Northumberland the level of agreement between the two authorities is much less certain. This stems not only from the fact that Northumberland are yet to finalise their plan but also due to a lack of</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>discussion within the plan or background evidence relating to the level of agreement between the two authorities. 8. It is noted that the 2014 Northumberland Strategic Housing Market Assessment (2014 Northumberland SHMA) discusses the interactions between the two authorities and suggests that 2,500 additional migrants are anticipated from North Tyneside over the plan period. Yet paragraph 6.11 of the 2014 Northumberland SHMA indicates that these additional migrants have not been built into the population and household forecasts undertaken by Edge Analytics on behalf of the Council. This is a serious flaw in the evidence base and under the Duty to Cooperate (DtC). Without detailed information upon such agreements, how this figure has been derived or how this has effected the resultant housing requirement for each authority compliance with the DtC cannot be properly judged. 9. To overcome this issue it is strongly recommended that a DtC statement is produced which clearly explains what has been agreed, the level of assistance, if any, Northumberland CC is providing for North Tyneside and how this has impacted upon the relevant housing figures. The statement should also provide similar commentary upon other adjoining authorities.</p>				
808917	BDW North East	LAND DEVELOPER	LP20151767	<p>BDW value our involvement in the production of North Tyneside's Local Plan. We are supportive of the LPCD which aims to set out the councils preferred policies to guide planning decisions and ensure the sustainable growth and development of North Tyneside.</p>		The Local Plan	Comment noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
396253	Northumberland Estates	DEVELOPER	LP20151808	<p>The Northumberland Estates support the Local Plan's intention to work with its neighbouring Local Authorities, most notably Northumberland County Council and Newcastle City Council (paragraph 1.17-1.25). It is important that North Tyneside work with its neighbours in planning for employment land and housing land, given how people fluctuate between Local Authority boundaries for work and living. Also of importance is planning for open green space and wildlife provision, particularly the possibility of providing cross-boundary ecological mitigation. While the housing figures for Newcastle are now fixed, Northumberland County Council have recently consulted on a full of their new Local Plan Core Strategy, which sets a housing target of 23,520 dwellings within the plan period (to 2031). The majority of these houses, 12,820, are focused in the south-east of the county, which forms the border with North Tyneside. The housing projections of neighbouring Local Authorities should be fully taken into account in the preparation of the North Tyneside Local Plan. In particular the housing allocations within North Tyneside should be responsive should Northumberland's overall housing figure be decreased in the submission version of the Local Plan Core Strategy.</p>		The Local Plan	<p>Comment noted. The Council is working closely with its neighbours, particularly Northumberland and Newcastle through the preparation of the Local Plan, to consider the cross border relationships and evidence that arise through each authorities strategy. A series of position papers are being produced that once published will support understanding of these issues and how they have been addressed.</p>	No amendments proposed.
805704			LP20151868	<p>Thank you for the opportunity to contribute to the consultation about the second of the Local Plan. It's a remarkable document which, while I have issues with it, speaks well of those who have written it and contributed to it. Within the constraints placed upon the</p>		The Local Plan	<p>Comment noted. This response obviously leads on to further comments that have been responded to separately.</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Local Authority by the National Planning Policy Framework it is quite an achievement and ought to provide the basis for an ongoing conversation with the people of North Tyneside. I have taken advantage of the local sessions at which staff of the Planning Department were present and was grateful for their courtesy and openness. They give me an insight to how worthwhile your work is and how difficult. The NPPF reflects the priorities of politicians led by the competition in the market which in this instance seem to be housing and jobs "" but what sort of housing, what sort of jobs and for whom?. Planning seems to be about embracing priorities so that people are enabled to create homes they can afford in communities they are glad to live in. You appear to be charged with maintaining a holistic appreciation of all the dimensions that contribute to that aspiration that we all might share. No easy task. So balancing the three pillars of sustainable development with the political is a considerable responsibility which is evident in the document. I refer to my contribution to the first one year ago. In that submission I know that several of my comments were strategic and political which you were not bound to respond to and might have been appropriately referred elsewhere. I am not going to repeat them all here but they remain a context to explain the following.</p>				
752587	Marine Management Organisation	GOVERNMENT AGENCY	LP20151882	<p>Thank you for inviting the Marine Management Organisation (MMO) to comment on the above consultation. The MMO has reviewed the document and whilst</p>		The Local Plan	Comment noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
	n			<p>we have no specific comments to make we would like to draw your attention to the Marine Planning remit of our organisation as you may wish to be aware of this in relation to the consultation. As the marine planning authority for England the MMO is responsible for preparing marine plans for English inshore and offshore waters. At its landward extent, a marine plan will apply up to the mean high water springs mark, which includes the tidal extent of any rivers. As marine plan boundaries extend up to the level of the mean high water spring tides mark there will be an overlap with terrestrial plans which generally extend to the mean low water springs mark. In our duty to take all reasonable steps to ensure compatibility with existing development plans, which apply down to the low water mark, we are seeking to identify the "marine relevance" of applicable plan policies. On 2 April 2014 the East Inshore and East Offshore marine plans were published, becoming a material consideration for the Marine Management Organisation (MMO) and other public authorities with decision making functions. The East Inshore and East Offshore Marine Plans provide guidance for sustainable development in English waters, and cover the coast and seas from Flamborough Head to Felixstowe. Marine plans will inform and guide decision makers on development in marine and coastal areas. More information including the East Inshore and East Offshore marine plans document can be found at <a href="http://www.marinemanagement.org.uk/mari">http://www.marinemanagement.org.uk/mari</a></p>

900817		RESIDENT	LP20151996	<p>Apologies for the last minute nature of this email, I purchased my house at the end of January and only found out about these plans 10 days ago via the 'Our North Tyneside' magazine and a couple of neighbours. But I ask that you please include my comments as part of the consultation as they have been submitted on the deadline date and the plans concern me very much. The first issue I would like to raise is that out of 4 neighbours I have discussed these plans with at length in the last week, only one of us had received a hard copy of the policies map, despite one of the others confirming after having ordered one that you claim to have sent one to all residents and would only accept comments on an A4 piece of plain paper with a comments form on that hard copy attached to it. In addition to my only recently hearing about the building work on these sites, I was devastated to learn of the proposed dual carriageway through the middle of the fields right next to my newly purchased house (not to mention very angry) to see that there was no sign of it at all in the map in the "our North Tyneside" magazine. It was only via discussions with a friend on my street that I knew to come on to your main website and have a look/feed back my concerns. I'm also personally feeling angry about this as none of these plans made any appearance whatsoever in the local searches taken out whilst I was buying my house in Angerton Avenue, nor in those which my seller took out whilst relocating further along the same street.</p>		The Local Plan	<p>Comment noted. It is disappointing to learn that you and your neighbours did not receive a copy of the 'Our North Tyneside' magazine with the relevant information concerning the Local Plan. The Council magazine is meant to be distributed to every home in the Borough. If you are aware of further distributions of the 'Our North Tyneside' magazine having not been received by residents please contact ourselves and we shall pass this information on to those responsible for the distribution of the magazine. We will accept comments in a variety of different forms, from hand written notes to emails such as your own; we do not only accept comments on a piece of A4 plain paper with a comments form attached. Not all the details of the Local Plan could be included in the North Tyneside magazine but it was intended to inform people of where to get more information. The Local Plan outlines the progress that has been achieved in producing a new Local Plan for the Borough and outlines the policies with associated maps of suggested development sites. Further work is still required to determine the impacts from the strategic development sites at Murton and Killingworth but these are being brought forward as part of a comprehensive master plan (as set out in Policy AS7.4 (now AS4.4) of the Local Plan) to ensure the provision of essential infrastructure, facilities and services are appropriately provided. Proposed highways works to support the development and the</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							impact it would have on the surrounding roads will be considered in the master plan. It is anticipated that the recommendations of the master plan will be included in the next version of the Local Plan, which is due for public consultation in November 2015.	
901136		LOCAL AUTHORITY	LP20152061	Thank you for consulting Newcastle City Council on the consultation of the North Tyneside Local Plan. Newcastle and North Tyneside alongside the other local authorities in the NELEP area have cooperated for some time when preparing their Local Plans. As agreed in a position statement, all seven authorities seek to retain or encourage growth to support sustainable economic growth, maintain a proportion of economically active population, accommodate the trend of ageing population profiles and meet objectively assessed needs. We provide comments on strategic matters which have cross-boundary implications and we have raised some issues for further consideration. Perhaps these can be discussed firstly at the theme meetings we have agreed to arrange and then our next Duty to Co-operate meeting.		The Local Plan	Comment noted. The Council will continue to work in cooperation with its neighbouring authorities.	No amendments proposed.
808201		RESIDENT	LP20152108	The village of West Moor is not marked on the Plan. West Moor should be marked on the Plan so that it becomes a community in its own right. By doing this one can see that this village is one of the smallest communities in North Tyneside. Yet it has one of the largest 'brown sites' marked as having planning permission in the borough. Should brown sites not be allocated as a ratio to the size of the community, thereby treating all		The Local Plan	Comment noted. West Moor will be labelled on future versions of the Policy Map. The ratio of brownfield sites to an existing community is considered in the analysis of a proposed site but there is not a ratio threshold that would be used to restrict further development based on the ratio of the proposed allocation to the size of the existing community.	West Moor has been added to the Policies Map and summary leaflet

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				communities equally and fairly.				
			LP20152228	<p>1. Devaluation of homes 2. Wildlife Corridor 3. Increased waiting time for doctor and hospital appointments transport or lack of in Shiremoor area: Buses half hourly or hourly do not turn up. 1 bus (59 diverted to West Allotment) residents there have access to any number of buses on the Cobalt which is only a short walk away 4. West Park housing in Earsdon not selling and severe traffic congestion on Earsdon Road and the Shiremoor and Monkseaton area despite a bypass being built which is hardly used. 5. Money spent by the Council for Cobalt which is paid for by us the tax payer for rent. 6. Councillors giving themselves a huge pay increase. 7. Who on the Council supervised the distribution of pamphlets because very few people received them so how could they get a response from people whoop didn't get one. 8. How many social houses were built at West Park, Earsdon and how many houses are left unsold.</p>		The Local Plan	<p>Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional circumstances exist to amend its boundary therefore conserving rural land within the Borough (Policy S1.5). The importance of health and education facilities is reflected in Policy S10.13 (now S7.10) 'Community Infrastructure' and Policy 'General Infrastructure and Funding'. The planning team have been in discussion with the Councils education officers and health officials to determine the impact of the proposed level of growth on the area. The Employment Land Review (ELR) was recently updated (2015) and forms an important part of the evidence base for the Local Plan. The ELR considers which areas of employment land are likely to see future demand in occupancy or investment. All these factors are considered in the future</p>	No amendments proposed

878767			LP201522	It is encouraging that one of the stated attributes for the Plan's Vision for 2032 is for the ".Borough's residents benefit from ..... easy access to open space, leisure and recreational facilities." It follows that large scale housing developments on existing greenfield sites should therefore be avoided or delayed for as long as possible. The schedule for developing the required housing sites for the Borough should therefore reflect this stated vision and avoid large scale greenfield site developments where possible. The commencement of the current proposed large scale housing developments on the greenfield sites at Killingworth Moor (2000		Vision and Objectives	Comment noted. In delivering the Borough's requirements for development the Local Plan needs to identify a range of sustainable, deliverable and viable housing sites. These sites have been selected from the Strategic Housing Land Availability Assessment that has considered all known sites in the Borough and the Plan cannot rely on potentially unknown sites becoming available in future years to accommodate a large proportion of development. The delivery of homes on the sites identified at Murton and Killingworth would need to be delivered throughout the lifetime of the Local Plan rather than later in the latter	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				houses) and around Murton (3000 houses) should therefore at this stage be deferred until the latter years of the planning period i.e. in years 11-15. This will then at least allow sufficient time to see if actual housing demand merits the need for these major greenfield site developments and/or whether by that time other as yet unidentified more suitable sites become available in the Borough for future housing developments. Currently the plans are indicating that housing developments on these greenfield sites would be planned to commence within 6-10 years.			years as it is important that the Council maintains a five year supply of housing throughout the Plan period. The process of producing a Local Plan for North Tyneside is to establish certainty as to the levels of housing demand for the next 15 years and where this demand will be allocated. The Local Plan allows for flexibility and the policies and proposals suggested will be monitored and if they are not being implemented, or the overall level of growth/and/or delivery of allocations are not being achieved the Council will undertake a review of the relevant policy and implementation procedure to establish the issues affecting delivery. The Plan does seek the protection, enhancement, extension and creation of green infrastructure in the Borough and Policy AS7.4 (now AS4.4) specifically outlines a multifunctional green infrastructure strategy would be required for Murton and Killingworth Moor that 'retains, enhances, connects and increases the biodiversity of each site, retains and enhances any important hedgerows or tree belts, provides well integrated green space (formal, natural and allotments), provides well integrated sustainable drainage systems and provides cycle and pedestrian links through the site that connect to the existing network and town centre.'	
898920	Sustrans		LP2015980	Sustrans support objective 11, Ensure sustainable access, but it should be noted that delivering a sustainable transport network will require construction of a grid of high quality		Vision and Objectives	Comment noted. Further investigations will consider the recommended 250m spacing of cycle routes from urbanised areas in the Borough.	Although the guidance from Sustrans refers to 250m figure it is understood to be guidance

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				cycle routes at 250 metre spacing across the urbanised areas of the borough. There is little in the detail of the plan to support and encourage this.				and not a requirement for future development proposals.
797386			LP20151039	NT is currently an attractive place to live and work. In part, this comes from the good balance of coast, town centres, green areas, housing and good transport links. But there is a risk of upsetting this balance. Whilst there is some growth in population, it is not great and only a modest increase in housing is needed in this area (unlike, for example, the southeast of England). Too much new housing, other than on genuine brownfield sites, will result in excessive suburban sprawl and traffic problems and thus make the area less attractive for residents and related businesses.		Vision and Objectives	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional circumstances exist to amend its boundary therefore conserving rural land within the Borough (Policy S3.1) (now S1.5). The importance of services such as health and education facilities is reflected in Policy S10.13 (now S7.10) 'Community Infrastructure' and 'General Infrastructure and Funding'. The planning team have been in discussion with the Councils education officers and health officials to determine the impact of the proposed level of growth on the area. The traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							improvements to make it easier and safer to travel throughout the Borough.	
856633	Theatres Trust		LP20151048	One of the Core Planning Principles in the National Planning Policy Framework (Item 17) notes that the plan should take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs. We therefore recommend that the vision and objectives include adequate reference to cultural facilities and social and cultural wellbeing, in addition to the health and leisure issues noted.		Vision and Objectives	Comment noted and the amendments will be reflected in the next version of the Local Plan	Supporting text to Objective 3 now includes the reference to culture. New text: Plans will support improvement to the quality of education provision in the Borough <b>and cultural wellbeing for all</b> . New health <b>and cultural</b> facilities, provision of open space and all aspects of development will promote and recognise residents need for a safe environment and an active lifestyle, reducing the risks of crime, disease and poor health and enhancing residents quality of life.
685823	North Tyneside Green Party		LP20151075	NT Green Party 3. Vision and Objectives 3.1 We agree with the first part of your definition of sustainable development: " Sustainable means ensuring that better lives for ourselves doesn't mean worse lives for future generations. However you then go on to say: "Development means growth. We must accommodate the new ways by which we will earn our living in a competitive world..." which accepts without challenge the need for growth and competition and which, as indicated above, we argue is a dangerous and unnecessary vision for the future. In the context of the Local Plan the extent of "growth" envisaged may well mean "worse		Vision and Objectives	Comment noted. The Council supports sustainable development and sets out in its objectives to ensure a sustainable future for North Tyneside with communities and infrastructure that are well placed to mitigate climate change. The Policies in the Plan seek to provide additional detail as to how these objectives are to apply within North Tyneside , AS7.4 (now AS4 .4), S8.1 (now S5.1), DM9.2 (now S6.2). The Strategic Housing Market Assessment identifies the overall need for market and affordable housing in North Tyneside and the range and type of homes that would be meet the needs of residents. PolicyS7.1 (now S4.1)	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>lives for future generations". Objectives 1. Ensure a sustainable future We need more detail here such as specific support for local renewable energy generation (solar, wind and wave power, generation through food waste recycling (anaerobic digester)), local food production e.g. community supported agriculture, market gardening, community orchards etc on land identified for the purpose; and proposals for supporting the development of localized sustainable fishing as well as the conservation of the marine habitat. 2. Diversify, strengthen and grow the local economy. No mention of agriculture, horticulture or market gardening here, in spite of the existence of a substantial area of farmland within the borough. Using some of the open land for a range of food production initiatives would provide local food, jobs and an educational resource related to healthy living. In addition we would like to see a mention of the great potential for jobs in the insulation and renewables industries. Also the Local Authority has a powerful tool in the drive for sustainable production and services through its procurement policies. 4. Provide an appropriate range and choice of housing According to this Plan the population of the borough is forecast to grow by 23,000 a 12% increase over 15 years. That's considerably more than in the past several decades. Given increase in older residents we need a commitment to building "homes for life" which are designed so they can be adapted as people get older; and also to carbon neutral homes to support Objective 1. No reason why</p>			<p>and DM7.8 (Policy now merged into 4.8 'range of housing types' ) will ensure the delivery of new homes makes a major contribution towards ensuring the needs of an increasingly diverse and growing population are met. The Local Plan advocates the minimisation of waste production and the re-use and recovery of waste materials e.g. recycling, composting and energy from waste recovery (Policy DM10.13 (now S7.9) but there are currently no proposals for an anaerobic digester within the Plan. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and ecological networks and these policies would need to be considered alongside appropriate development proposals, e.g. Policy AS7.4 (now AS4.4), S8.1 (now 5.1), DM8.2 (now 5.2), DM8.4 (now 5.4) and DM8.5 (now 5.5).</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>all new houses cannot be built to both conserve and generate energy and these should be a priority. 8. Manage waste as a resource This should include: food waste recycling through an anaerobic digester which would also generate energy. Many local authorities are now doing this successfully. An appropriate site could be identified (e.g. by existing sewage works?). Support to be given for the development of uses for recycled waste incl manufactured items (S10.11) so that waste does not have to be exported outside the borough. 9. Protect and enhance the natural environment The plans for housing and other developments contained in this document include development on many environmentally sensitive sites (e.g. Site 9, now Site E008, opp Gosforth Wildlife Site) and across many wildlife corridors (e.g. in the Killingworth Moor and Murton sites) as well as substantially reduce the open land available to residents for walking and other health promoting activities. These plans are in addition to areas where planning permission for development has already been given, and will further compromise "the borough" rich natural environment. Policy 8.2 states: "loss of any part of the green infrastructure network will only be considered in exceptional circumstances". Policy 8.4 states: "Borough's biodiversity and geodiversity resources will be protected, enhanced and managed" and "Conserving, enhancing and managing a Borough-wide network of local sites and wildlife corridors". The developments proposed in this Plan</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				appear to be in contradiction to these and similar statements. In order to fulfil the vision of a sustainable borough much greater attention needs to be given to the preservation and enhancement of the natural environment.				
805543			LP20151084	Sadly this plan automatically destroys LPCD Objective 9. The council's main objective, just like the previous Tory council, is to cover North Tyneside with bricks no matter what the cost. The vast increase in housing (with no additional amenities) and the corresponding explosion of traffic will make North Tyneside the place not to live. Further, the dramatic increase in housing will guarantee future flooding run-off into Wallsend (and Walkergate) where water levels are rising rapidly and many homes now require submersible pumps.		Vision and Objectives	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. 				<p>recycling through an anaerobic digester which would also generate energy. Many local authorities are now doing this successfully. An appropriate site could be identified (e.g. by existing sewage works?). Support to be given for the development of uses for recycled waste incl manufactured items (S10.11) so that waste does not have to be exported outside the borough. 9. Protect and enhance the natural environment The plans for housing and other developments contained in this document include development on many environmentally sensitive sites (e.g. Site 9, now Site E008, opp Gosforth Wildlife Site) and across many wildlife corridors (e.g. in the Killingworth Moor and Murton sites) as well as substantially reduce the open land available to residents for walking and other health promoting activities. These plans are in addition to areas where planning permission for development has already been given, and will further compromise the borough's rich natural environment. Policy 8.2 states: "loss of any part of the green infrastructure network will only be considered in exceptional circumstances". Policy 8.4 states: "Borough's biodiversity and geodiversity resources will be protected, enhanced and managed" and "Conserving, enhancing and managing a Borough-wide network of local sites and wildlife corridors" The developments proposed in this Plan appear to be in contradiction to these and similar statements. In order to fulfil the vision of a sustainable borough much greater attention needs to be given to the</p>

				preservation and enhancement of the natural environment.				
898981			LP20151112	The consultation states that it should "mitigate the impact of, climate change, including flood risk; ". This seems to be in direct competition with the stated plan to build houses on all of the remaining green belt land bordering Whitley Road, given that these current green field sites will be acting as efficient groundwater buffers, absorbing any flash rainfall and releasing it slowly. Once concreted over, any rainfall on these areas will run off significantly faster leading to increased flood risk further down the hill towards the coast road.		Vision and Objectives	Comment noted. Flooding is an issue that is covered within the Local Plan – the Local Plan states 'All developments will be required to demonstrate that flood risk does not increase as a result of the development proposed, and that options have been taken to reduce overall flood risk from all sources, taking into account the impact of climate change over its lifetime. All new development should contribute positively to actively reducing flood risk in line with national policy, through avoidance, reduction, management and mitigation'. The Council has not suggested any green belt sites for development. Having undertaken an assessment of the existing boundaries of the green belt in North Tyneside, it is determined that no exceptional circumstances exist to amend its boundary, but the evidence on housing and job projections over the next 15 years place a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development.	No amendments proposed.
898981			LP20151113	The consultation plan also states that the rich natural environment "will be protected and enhanced for their biodiversity and recreational value". This is an objective I wholeheartedly agree with and hope the council will back up this statement by removing all green field sites from their		Vision and Objectives	Comment noted. 	Public Transport Users Group			objectives of our organisation and its constituent affiliated groups. Whilst we welcome much of this plan we think that it needs to go further if we as a community are to encourage real changes in the way that we travel and manage our impact on the environment. We need to achieve modal shift from cars to a fully integrated public transport network ,to help to improve our environment, so that everyone can access within easy reach of home or work or leisure. We need to encourage cycling and walking in order to improve our physical health to support the access to public transport interchanges. We need to ensure that individuals with mobility needs can access commercial and public services as well as being able to enjoy our beautiful environment. We need to make sure that people from all parts of the North East can enjoy the new vision of the coast so clearly set out in recent Council plans without having to endure the frustration and damage to health that comes from congestion. We need to set challenging targets for North Tyneside so that we can all play our part in avoiding the disaster of climate change for our children and our children's children.			throughout the Borough, with the wider region and beyond. Although the Plan does not set targets for climate change the Plan aims to 'to reduce greenhouse gas emissions and to adapt to, and mitigate the impact of, climate change, including flood risk; promoting the renewable energy sector and developments which seek to minimise energy and resource consumption, whilst improving the Borough's resilience to the effects of climate change.'	
899194	Northumbrian Water Ltd		LP20151641	Objective 1 We note that Objective 1 has now been amended to read "promoting the renewable energy sector and developments which seek to minimise energy and resource consumption". In line with our previous representations on this objective, NWL supports this amendment. This revision ensures that developments will not need to include renewable elements which would		Vision and Objectives	Comment noted. Objective 4 will be amended so it more clearly identifies that the full housing needs will be met within the Plan period.	Amendments made to Objective 4 text. Objective now reads: The population of North Tyneside is forecast to grow, particularly with more residents aged 65 and over. Along with improvements to the

				<p>priorities does just this and in my view this Local Plan has been obliged to follow it. To satisfy the Governments requirement to prioritise housing and jobs invites placing other considerations as secondary. Where is the balance? The reasons for Sustainable Development and the causes of Climate Change exposes a serious risk of being unable to provide for ourselves in those elements essential to life such as food, water, energy, minerals, natural materials etc .which housing and jobs are but products of. This is not only a matter of sufficiency of natural resources but of course is also an issue of who owns, controls and distributes them. Also, dare I say it, what motivates them. In the competitive world the present Government envisages, the dangers seem all too obvious. While this a political issue, a Local Plan could objectively point up the issues involved in aspiring to a sustainable community which this Plan does not make clear and attainable. The North Tyneside Borough is no longer self sufficient in those elements essential to life particularly land and food. Those others such as energy and water we are dependant upon others for. They are not always benign. However common sense suggests that we adopt a precautionary principle by optimising our own self sufficiency particularly in relation to those essentials we could provide for ourselves. This means husbanding our natural resources land and sea. I think the Local Plan should make this clear, inform people of the challenges and provide for an ongoing conversation with local people as we seek to move to a</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				sustainable future. We are all consumers and live in a democracy. I would suggest that the Local Plan which has many worthwhile proposals, is obliged to accommodate the status quo and that is not realistic when seeking sustainability. I would propose that land, food, energy, water, air, waste, population must be sovereign, should be subject to democratic control and where possible ownership. That must be a foundation of a sustainable community. The difficulties are manifold and not always apparent. Any local government seeking to provide security for its constituency must accept the role of enabling them provide for themselves and each other. Ways must be found to insist on this, based upon the informed and objective evidence which has been collected.				
638268	Natural History Society of Northumbria		LP20151896	Whilst a number of alterations have been made since the last consultation, many of them welcomed, NHSN still considers that much of the plan does not to meet the requirements of National Planning Policy Framework, in particular paragraphs: 81 - positively to enhance the beneficial use of the Green Belt 109 - The planning system should contribute to and enhance the natural and local environment by: i, recognising the wider benefits of ecosystem services; ii, minimising impacts on biodiversity and providing net gains in biodiversity where possible, contributing to the Government's commitment to halt the overall decline in biodiversity, including by establishing coherent ecological networks that are more		Vision and Objectives	Comment noted. The Council has to provide for the future needs of the Borough. 				<p>particularly supports the Council's objective of providing "attractive and accessible employment sites supported by excellent infrastructure and services, providing jobs and the homes that residents living and working in North Tyneside need; stimulating competition, business creation and increasing skills and educational attainment". It is considered that the development of our client's site for employment uses would contribute towards achieving Objective 2 due to its advantageous location at the A1/A19 junction. Employment development at the site would also contribute towards the delivery of Objective 11: to "ensure sustainable access throughout the Borough, with the wider region and beyond". This is not only as a result of its excellent access off the A1 and A19 but also due to the close proximity of bus services along Front Street and the nearby National Cycle Network travelling through Seaton Burn, which provide sustainable transport options travelling within and outside of the Borough. In addition, by virtue of the site's location to the north of Seaton Burn traffic impact in the village would be minimised.</p>

				in order to comply with Objective 1 and is consistent with paragraphs 95 and 96 of the NPPF. Our client broadly supports Objective 4 to provide an appropriate range and choice of housing to meet the housing needs of the Borough. Our client particularly supports the objective to provide "additional homes in sustainable locations [to] assist housing affordability, improve the range and choice of housing and meet the needs of all sectors of a changing and growing population, and enable growth of the Borough's economy". It is considered that housing development at our client's site would contribute towards achieving Objective 4 due to its sustainable location in close proximity to the A1/A19, public transport and the National Cycle Network, whilst improving the choice of housing in Seaton Burn. As such, the site should be removed from the Green Belt in order to bring forward a suitable housing site.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152130	Paragraph 3.2- it is notable that the vision and objectives of the Council Plan, Our North Tyneside- 2014 to 2018, as set out here, make no overt reference to the historic environment.		Vision and Objectives	Comments noted. The Council Plan priorities have been set and adopted by the Council.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152130	Paragraphs 3.3 and 3.4 - It is disappointing to observe that other than the creation of 'a high quality environment', there is nothing in the Vision for 2032 to suggest that the well-being of the historic environment could, or should, play an important role in the renaissance of the Borough.		Vision and Objectives	Comments noted. Section 3.4 outlines the key objectives for North Tyneside which stem from the vision. Objective 10- Protect and enhance the built and historic environment states "The Borough has a diverse and unique historic environment, with a wealth of both designated and non designated heritage assets. North Tyneside will conserve and enhance these special features. for present and future	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							generations. The more recent urban development of the Borough will be conserved and where necessary enhanced to continue to provide pleasant and attractive communities in which to live."	
396269	English Heritage	GOVERNMENT AGENCY	LP20152130	Nevertheless, I welcome the inclusion of Objective 10 which deals in large measure with the conservation of the historic environment. That said, I would suggest the use of the word 'conserve' instead of 'preserve'. The latter implies a reluctance to countenance change, whereas the former allows for carefully managed change and adaptation to heritage assets to aid the social and economic regeneration of the area. The word 'conserve' also allows for preservation where necessary and appropriate.		Vision and Objectives	Comments noted. Section will be amended.	Objective 10 now reads "conserve" instead of "preserve".
396269	English Heritage	GOVERNMENT AGENCY	LP20152130	I also welcome a number of other Objectives focusing on issues which would/could additionally address heritage conservation matters through their achievement. In particular I would observe the following- Objective 1 - the sequentially preferential prudent use of existing built fabric can do much to minimise energy and resource consumption. Objective 2- a programme of heritage conservation can help to broaden the skills base of the area's workforce and provide valuable employment opportunities in addition to those in the tourism and cultural sector. This should be recognised in Policy DM5.7 and seen as a high priority for improving skills and education in the Borough. Objective 6- making best use of the Borough's heritage assets can make a positive contribution to the regeneration of the coast,		Vision and Objectives	Comments noted. The positive and wide-reaching impacts of heritage assets are recognised and reflected throughout the Plan.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				whilst simultaneously safeguarding it along with the natural environment. Objective 7 - I welcome reference to the Fish Quay as a catalyst for the regeneration of the riverside, but other heritage assets have similar potential, especially the World Heritage Site. Objective 8 - as with Objective 1, the sequentially preferential prudent use of existing built fabric can do much to minimise waste generation and reduce pressure on landfill sites. Objective 11 - appropriate maintenance of the transport infrastructure of the Borough (some of which is of historic value) would additionally assist with the conservation of a number of heritage assets. Objective 12 -the heritage of the area helps to convey a positive image of the Borough.				
396449	Cyclists Touring Club	OTHER / LOCAL ORGANISATION	LP2015580	11. We welcome the objective of "making walking and cycling an attractive and safe choice for all", as well as the proposals for increased provision and priority for cyclists and pedestrians in other sections of the Plan.		Vision and Objectives 3	Support noted.	No amendments proposed.
685823	North Tyneside Green Party		LP20151092	Green Party Addendum Sustainable Development The Green Party subscribes to the concept of sustainable development as advocated by the Brundtland Commission, endorsed by the United Nations and the UK Government. Sustainable Development provides the framework within which proposed changes to the environment should be assessed. Economic and social growth have to be balanced with the imperative to preserve and enhance the natural environment. We therefore take exception to the interpretation of Sustainable Development imposed by the National		Vision and Objectives 3	Comment noted. The Council supports sustainable development and sets out in its objectives to ensure a sustainable future for North Tyneside with communities and infrastructure that are well placed to mitigate climate change. Each Policy in the Local Plan has been subject to consideration in the sustainability appraisal, which tests the sustainability objectives (including health and open space) against the policies and objectives. The Local Plan is prepared in cooperation with its neighbouring authorities and the shared goal to deliver sustainable development as outlined in the	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Planning and Policy Framework which obliges economic and housing development to be market led and as we will see makes balancing the 3 dimensions in favour of sustainability problematic. The Local Plan offers the opportunity to recommit to Sustainable Development and the universality of the Brundtland Report. Therefore we would prefer this definition of sustainable development: <i>Development that meets the needs of the present without compromising the ability of future generations to meet their own needs</i>, <i>Living within environmental limits</i>, <i>Ensuring a strong, healthy and just society</i>, <i>Achieving a sustainable economy</i>, <i>Promoting good governance</i>, <i>Using sound science responsibly</i>. Climate change and finite resources of the planet Climate change is already having its impact upon food production and hence food prices here.. Nature recognises no national or indeed local sovereignty. We commend the Local Authority's Climate Change and Carbon Reduction initiatives. However we urge in the face of such considerable uncertainty that food, water and the other essentials to life should be sovereign and restored to democratic control. As things are and increasingly, they are subject to those who can afford them. Where the finite resources of the planet are concerned we know that perpetual economic growth is unsustainable. This doesn't mean that no economic development is possible. Who can deny the need and right of people seen and unseen to sufficiency and to wellbeing? But we wonder</p>			<p>National Planning Policy Framework. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and ecological networks, e.g. Policy AS7.4 (now AS4.4), S8.1 (now 5.1), DM8.2 (now 5.2), DM8.4 (now 5.4) and DM8.5 (now 5.5).</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>whether current population growth and movement driven by forms of economic development and encouraged by market driven priorities aren't now making that right problematic. Growth options We therefore question the growth proposals upon which this Plan is based especially given that residents when consulted chose the lower growth options. Has sufficient weighting been given to local people's expressed desire for open space and all that it offers to their sense of wellbeing and to their health in particular? Whilst acknowledging the need for housing, the nettle must be grasped and recognition given that there must be finite limits to population growth in North Tyneside. Bio-regionalism This Borough appears to us unable to provide for itself in essentials such as food. The production of a Local Plan has a Duty to Co-operate with neighbouring authorities. It would be interesting to know whether discussions have considered bio-regionalism as a means of addressing scarcity particularly in regard to life's essentials such as food, land, water, shelter, energy etc. all of which are threatened by climate change and require to be carefully stewarded. We are seriously concerned that the huge uncertainties that accompany climate change particularly in regard to life's essentials as identified above demand the greatest of attention. This requires an appreciation that they are all interconnected and sustainable. They are also a matter of self sufficiency and their security a matter for local democratic control, regulation and subsidiary. We trust</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				therefore that the Local Authority will make good its commitment to support Neighbourhood Plans, Localism and reconsider adopting the provisions of the Sustainable Communities Act.				
900234		RESIDENT	LP20151764	- The Plan should clearly show how NTC might work with prospective development partners to achieve regeneration: mentioning use of Compulsory Purchase powers and 'back to back' deals for example to help bring forward schemes which help realise the Plan. -		Vision and Objectives 3	Comments noted. References to such approaches are included within the Implementation section of the Local Plan.	No amendments proposed.
806149	New River Retail	LANDOWNER / BUSINESS	LP20151876	Our client fully supports the identified regeneration and investment strategy set out in the local plan with particular reference to the proposals for North Shields. The Plan identifies 15 key objectives which include: i, Objective 5 Revitalise the Town Centres; i, Objective 6 Regenerate the Coast; and i, Objective 7 Regenerate the Riverside. We therefore support the vision, subject to the point of objection identified, and trust that the Council will take these comments into consideration, in progressing the plan. We would be grateful if we could be kept updated on progress.		Vision and Objectives 3	Comment noted. Further comments received are covered in other sections of the Plan	No amendments proposed.
791197		RESIDENT	LP2015128	I think your view of the political situation is wildly over optimistic. This is a political decision that will affect a great many people. I would of guess you won't be the Mayor after the next election!!		A Picture Of North Tyneside 2	Comments noted.	No amendments proposed.
898182		RESIDENT	LP2015718	The level in employment growth and level of housing growth suggests that everyone taking up employment in the Borough will be living in the Borough this may not be the case. I know people who travel from Gateshead, Newcastle, co. Durham and Northumberland.		A Picture Of North Tyneside 2	Comment noted. The growth projections for the Borough have considered the movement of people living and/or working within North Tyneside and/or the surrounding area. The Plan aims to provide for employment land that allows for	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							increased employment opportunities in the Borough as there are currently fewer opportunities in North Tyneside than there are residents in work.	
898981			LP20151114	<p>I am yet to see a government created document which does not make the a priori assumption that "growth is good" and will happen regardless. There are two obvious flaws in this assumption Firstly the idea seems to be that growth is exogenous (i.e. entirely outside of the decisions of the council). Statements that the population of North Tyneside will rise by X by 2032 makes the decisions of the council a passive spectator to this, when the opposite is true. The population of the borough will only rise if the council decides to create additional housing stock, otherwise it will not. This can easily be seen in places where development is severely limited - often places which are known for their standard of living. An excellent example would be Mallorca vs. Menorca. Mallorca has effectively had an open season on development - as a result, large parts of the island are concreted over and have lost all identity and are known for cheap holidays. On the other hand, Menorca had a moratorium on development and is now known for eco-tourism and the beauty of its national environment. Secondly, it seems to ignore the fact that the borough is a limited size and thus has limited resources. Increasing the population of the borough (growth) by definition either uses some of those resources (green belt land) or reduces the quality of them for existing residents (making transport</p>		A Picture Of North Tyneside 2	<p>Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside places a requirement on the authority to plan for growth due to the guidance from national government guidance (NPPF). Without an up to date Local Plan future development within the Borough will happen on an ad hoc basis and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth being forecast. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM8.2 'Protection of Green Infrastructure' (now DM5.2) and the intention of the policy is to be positive with a strategic approach to green links through the Borough. Policy AS7.4 (now S4.4) does reflect the importance green corridors within Murton and Killingworth Moor which are the two principal housing sites within the Borough - 'major new areas of open</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				infrastructure over-stretched for example). It would be nice to see a plan which examines how to be improve the quality of life of the residents of the borough, rather than one which attempts to increase the quantity of people in it.			space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity.'	
898630			LP20151267	2.9. I strongly disagree with the projections here. The population in North Tyneside in 1981 was 198,700, so there has been a very low increase in population (by your measure 2300 people in 34 years). The lowest population figure of 190,500 was in 1997, and the increase between then and now is 10,700. The ONS projects an increase of nearly DOUBLE this figure over a slightly longer period of time, which is optimistic given the previous trends. And they use the term "'if current trends continue' so these projections are not a given as has been quoted back to me. The say 21,000 new people, yet, you are planning for 23,000? Far from using the middling ground I think these figures are overly optimistic and I don't think you should be planning on an "'if current trends continue' scenario. You make no mention of sensitivity analysis in these figures which would help you to monitor progress and to prioritise development. The worst effects of the recession were over by 2011, your statement implies that there has been a recession up to the present day, suggesting that we need to plan for even more growth. I find this statement a little misleading. In addition, what is the demographic of the 23,000 people you expect to live in the borough? This will significantly affect the type		A Picture Of North Tyneside 2	Population and household forecasts for North Tyneside are informed by a range of evidence and are part of a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities. Not making adequate provision for new homes within North Tyneside will simply make it harder for residents to find quality homes to live in which they can afford.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>of housing required. For example, the population of the over 65s increased by 14% between 1981 and 2010, and the family population " those from 0 to 49 - has decreased by 9.5% over the same period. This means that different housing stock is required to the 2, 3, 4 bedroom " executive' houses currently being built. In addition to this point, older people live in their large houses because they want to be near their friends of 30,40,50 years. If appropriate housing was built for them, that would free up larger housing stock, without the need to build on precious green fields. It would be useful to know who decided what "The preferred growth scenario" is. I find this a lot in the public sector where a statement is made as if it is a fact and is official, like this one, but it is actually just an opinion of an individual or small group. . '2.17 -...average weekly pay for residents of North Tyneside in 2014 Â£16 per week lower than the North East average and Â£59 per week below the average for Great Britain' If average wages are lower than the national and local average, then it will be very hard for people to buy the new houses being built. Please also see my comment about how much more expensive it is to use the metro than the London tube. '2.18 Overall, the Borough has good transport links that contribute to its suitability as a location for new housing and economic activity.' I don't agree with this statement. The metro has not been expanded since 2002 and it is very expensive. I expect the current poor service to improve after all of the work but the worse its</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>service, the more people will move to cars. It is cheaper to travel on the tube in London than on the metro and their GDP per head is significantly greater than ours. The north south public transport links are poor and reliant on congested roads. Provision for cyclists is poor - it's dangerous or convoluted to use your bicycle here. The 'A191 corridor' and the traffic to it from Killingworth - along Great Lime Road down through Forest Hall and Benton, and from it into Wallsend down Station Road is already congested. It is my understanding from talking to council officials that bus services will come when the housing is built, but this will be too late - people will get used to using their cars. The roads cannot cope as it is. I hope the proposed improvements along the A191 help, but I cannot see how they will support the two thousand plus 2, 3 and 4 bedroom houses already planned, and the new houses already being built; never mind the new housing you propose for the remaining green fields around Whitley Road, which would add another 650-700 houses to the mix. Over 4000 houses, probably a lot of them with two cars. How can the infrastructure cope with this? "2.19 North Tyneside has the highest level of car ownership in Tyne and Wear' If we already have the highest car ownership in Tyne and Wear, the proposed housing, not served well by public transport or the metro being sold to people with 2,3 cars. It will only make getting around the borough by car even harder, and this will have a long term economic impact on the borough's economy. Road congestion cost</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the UK economy Â£13bn in 2013 according to the CEPD. I think you may also want to reflect on why the borough has the largest car ownership in Tyne and Wear, is this a result of the public transport provision in the borough or the building of houses without putting in the infrastructure to cope with them? It can't be because we are all rich because our average wage is lower than the Tyne and Wear average. ""2.20 Of the residents in employment, half work within the Borough and half outside. A substantial number of residents of adjacent areas commute into the Borough to work, but there is also a significant commuting outflow. The main origins of the 25,000 in-commuters are Newcastle, South East Northumberland and Gateshead. North Tyneside is the second largest destination for workers commuting out of Newcastle. 83% of these inward commuters travel by car and 14% by public transport.' The last sentence is quite a damning statistic. I don't blame the council for this, but I think, along with the point about car ownership, shows where investment/support is needed. It would be useful to know the breakdown of the 25,000 inward commuters. If a significant number come from South East Northumberland then this would strengthen the argument for better metro connections to perhaps Blyth, and the improvement and reopening of commuter rail/metro services from Cramlington, Killingworth and Forest Hall than could possibly link into the metro.</p>

							together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity.'	
396269	English Heritage	GOVERNMENT AGENCY	LP20152128	Whilst necessarily only a brief snapshot of the Borough, paragraph 2.4 could nevertheless benefit from at least a passing reference to the broad range and number of other asset types it possesses, and the issues that arise from the general condition of, and pressures faced by, the historic environment of the area.		A Picture Of North Tyneside 2	Comments noted. The section will be amended.	Para 2.4 now reads "North Tyneside has many heritage assets, including locally registered buildings, listed buildings, scheduled ancient monuments and conservation areas. Hadrian's Wall at Wallsend is part of the Frontiers of the Roman Empire World Heritage site at Wallsend and is of international importance. These precious assets require careful management to ensure they are conserved and maintained so they can be appreciated now and in the future."
463028			LP201579	Don't kid yourselves: no development is "sustainable". Stop talking rubbish!		A Sustainable Development Strategy for North Tyneside 4	Comment noted. Sustainable development is outlined in the Governments National Planning Policy Framework (NPPF) as 'meeting the needs of the present without compromising the ability of future generations to meet their own needs.'(page 2). The NPPF outlines that there are three dimensions to sustainable development: economic, social and environmental.	No amendments proposed.
890396		RESIDENT	LP2015133	The loss of much of the open spaces between the various local communities in North Tyneside means that all of them now merge into one massive town. Please leave more		A Sustainable Development Strategy for North	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				open spaces once they are gone, they are gone forever for our grandchildren.		Tyneside 4		
889975	Northumberland & Newcastle Society		LP2015871	The Northumberland and Newcastle Society wish to register their objection to the North Tyneside Local Plan on the grounds of over development, loss of open space, creation of urban sprawl and the potential overwhelming of the existing road network and infrastructure. The Council's apparent appeasement to developers by releasing large areas of green field land throughout the borough will result in the merging of local communities and consequential loss of identity. The forecasted economic growth is debatable as is the proposed increase in population figures. North Tyneside has already seen a rapid and huge increase in housing developments and the Society objects to the loss of such large swathes within such a comparably short time frame. Smaller infill developments retaining green buffer zones would at least allow communities access to some urban open spaces. We urge North Tyneside Council to reconsider the plans and considerably reduce the proposed number of new houses.		A Sustainable Development Strategy for North Tyneside 4	Comment noted. The Local Plan will seek to conserve, enhance and manage a borough wide network of wildlife corridors within and adjoining the Borough. However, the Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM8.2 (now DM5.2) 'Protection of Green Infrastructure' and the intention of the policy is to be positive with a strategic approach to green links through the Borough. Policy AS7.4 (now AS4.4) does reflect the importance green corridors within Murton and Killingworth Moor which are the two principal housing sites within the Borough - 'major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity.' The Plan has to be deliverable and evidence will need to show that the existing or proposed level of infrastructure	No amendments proposed.

							required will be capable to accommodate the levels of growth outlined is critical. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	
898831		RESIDENT	LP2015939	What jobs are expected that warrant these new homes? We know of people who have moved away from N. Tyneside to Northumberland County Council Areas, despite still working in Newcastle. They quote:- more house for your money, less council tax, easy access to A189, A19 and A1 and therefore longer but quicker journeys to and from work, with the added benefit of lots of "green" space still available. All of which is being lost in the Forest Hall/ Benton areas.		A Sustainable Development Strategy for North Tyneside 4	The numbers of jobs are based on the work of specialist economic analysts who have produced an Employment Land Review (ELR) for North Tyneside (2015). This analyses many contributing factors but draws upon the economic forecasts from the North East Local Economic Partnership.	No amendments proposed.
898848		RESIDENT	LP2015955	With Northumberland on our Doorstep, why do we need to ruin North Tyneside with over development. Start thinking of the locals who have to live with your (Council) decisions. No one in their right minds wants to live in an area of wall to wall housing and industrial estates. Quality of life is more important. Listen to the people, out Waggonways are great but if all they do is run between housing estates, which is happening, then they lose their recreational purpose and appeal.		A Sustainable Development Strategy for North Tyneside 4	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. 				<p>support regeneration or support local services          "" why repeat the mistakes of the past?          Development on these sites will not bring particular benefits to the regeneration of the area, it will erode what's left of an attractive place to live and visit. Building on these fields does not retain significant green structure, it will erode it and residents will feel boxed in with limited recreation such as walking and cycling in fresh air and semi rural setting, and the biodiversity will be more or less wiped out. Please confirm whether the land in sites (17,111, 139, and 110) is available and suitable for development or not, because I have heard that on both counts that it is not. In addition, you have added sites 111 and 139 since the last , yet sites 16, 18, 83, the land opposite Station Road near Darsley Park, a site at Palmersville, and four in Killingworth now have planning permission or are already built. I think this area has had enough development. Please designate the last remaining green field sites in Benton/Wallsend (17,111, 139, and 110) as Safeguarded land to retain a visual break between the communities of Benton/Forest Hall, Palmersville, and Wallsend. This would retain at least some element of their separate identities, support and enhance wildlife corridors, not contribute to traffic congestion, and be a relatively tranquil place for the surrounding residents to enjoy, thus retaining North Tyneside's status as an attractive place to live and visit.</p>			<p>Council is working closely with the Coal Authority and the Environment Agency, both through the development management and Local Plan processes. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.</p> <p>Sites 17, 111 and 139 are assessed through the SHLAA and from this the most suitable and sustainable housing sites have been selected as potential housing allocations through the Local Plan process. Through this assessment it is has been determined that these are suitable and available for residential development, being deliverable and developable within the plan period. However planning permission will still be required before development could be progressed.</p> <p>Proposals for the Station Rd/Whitley Rd sites are unlikely to include any development of the most northern part of Station Rd (W) and an appropriate buffer will have to be maintained to existing development to safeguard and enhance</p>

				the area, if not then this would trigger a full or partial local plan review before the end of the plan period. (4.63) Land outside of both the urban area and the Green Belt is proposed to be identified as safeguarded land. In light of our comments to (4.54) it is requested that these sites are reassessed and brought forward as developable sites within the plan period. Specific reference in this regard is made to Site 4 SHLAA ref 333 for the reasons set out in S7.3.			safeguarded land would have to be made through a review of the Local Plan.	
396238	North Tyneside Council	COUNCILLOR	LP20152096	Land to the North and West of Nixon's Kitchen lying between the A 1 and A 19 and adjacent to the Holiday Inn roundabout is in the Green Belt but has been a source of nuisance and misuse for many years which has had to be dealt with by the Police and the Council. Ward Councillors were approached by the owner of the land with change of use proposal to use it for small industrial and manufacturing units. We understand that an outline business proposal has already been sent to the Council and we ourselves were given a plan. Without prejudice we have raised this informally with local people. Not only do those we have asked support this proposal from the point of view of local jobs but also feel it would put an end to the illegal use which they have had to put up with for many years. It is recognised that this is Green Belt land but having studied the Northumberland Local Plan where that Council is considering adding to their Green Belt land, could consideration be given to a reciprocal exchange approach to the Green Belt? It has been suggested by the Council		Green Belt, Safeguarded Land and Killingworth Break	Any change to the existing Green Belt, either addition and deletion, must be proposed through the Local Plan process. In line with NPPF, in order to make such a change exceptional circumstances must be identified. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. The boundaries identified are considered to be permanent and able to endure beyond the plan period. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period. The Council is working with both Newcastle City Council and Northumberland County Council as part of the Duty to Cooperate arrangements in order to ensure that there is a coherent sub-regional approach to strategic issues. This includes the role of adjacent areas of Green Belt and both the amount and location of new housing development.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				that there is already enough land being proposed for Industrial use and this could have an impact on Indigo Park. We are led to believe the proposed Business Plan submitted by the site owner would provide for a different type of use with smaller units so would not be in conflict with other sites. In Newcastle's local Plan there are proposals for 400 houses to be built next to Brunswick Village (and we believe from local knowledge that movement is already in hand to start this development sooner than anticipated), a further 100 on Coach Lane in Hazlerigg and more recently a proposal for an extension to the Great Park of 5,000 houses. In the Northumberland Plan there are proposals for a further 3,000 houses immediately to the North of Seaton Burn. This will increase the demand for more job opportunities near to where these houses are to be built. I have also seen letters of support from the two existing successful business units next to where this land is situated. Without prejudice ward Councillors support this change of use.				
798761		RESIDENT	LP20152196	Only use present agricultural land as a last resort. Please keep field around Earsdon for agriculture. Thank you.		Green Belt, Safeguarded Land and Killingworth Break	Comments noted. Guidance from the NPPF states that the best and most versatile agricultural land should be protected. The 2011 SEA scoping report shows the agricultural grades within North Tyneside. Agricultural land is categorised into grades 1-5, with grades 1,2 and 3a considered the best and most versatile. Whilst the map reveals that North Tyneside does not contain any agricultural land of significant value areas should be protected in light of their GI value, recognising how	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							development can help improve the quality of existing GI assets. There is significant scope to integrate multifunctional GI in a way which is complementary and beneficial for development.	
804904			LP2015253	Please provide detail on how the council arrives at the decision of what land within the borough is considered green belt versus the 'synthetic' green field' ? Is this decided with input from the environmentalist groups, or is it just based on the current councillors residence.		Spatial Strategy	Green Belt is a recognised national designation in national planning guidance whereas green field land is a description of the land that carries less influence in determining planning decisions unless there are other designations that cover the land e.g. site of wildlife importance. The extent of the Green Belt across North Tyneside is already established within the Unitary Development Plan (UDP). When the Green Belt was last confirmed in the UDP in 2002, it identified areas as 'safeguarded land' for the primary reason that these areas could be considered as long term development options as part of any future review of that plan. As a result, we are now considering safeguarded land as a suggested option. Having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional circumstances exist to require amendments to the existing extent of North Tyneside's Green Belt. Having considered the extent of development required to 2032 and the capacity of existing Safeguarded Land in the Borough (some of which is classed as green field), there remains sufficient land to meet the development needs of the Borough for at least the current plan period without requiring review of the Green Belt.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
895070		RESIDENT	LP2015478	<p>We wish to object in the most strongest possible terms to the above (North Tyneside Local Plan 2015), whilst I appreciate the need to have such a plan reference both industrial and housing developments, we cannot accept there is a need to destroy a large proportion of green belt putting both the welfare of existing homeowners at risk along with the very negative provision for wildlife corridors, they are totally inadequate. There are more opportunities to utilize more brown field sites in the borough and masses along the River Tyne corridor and these development opportunities should be considered first and foremost. I bet the vast majority of the green belt will be owned by the Duke of Northumberland who is quite happy to develop sites well away from his backyard and no doubt wealth and privilege are the overriding factors here who gets what. The road extended networks are unsafe and not necessary and there are more opportunities to develop adjacent to seaton burn if it really is required to develop green belt, which we do not accept. Look at the monstrosity along the A1 where Sage has developed its an eyesore endorsed by two JAGS PRESCOTT. To conclude yes use brownfield but a massive NO to greenbelt.</p>		Spatial Strategy	<p>Comment noted. The Local Authority has a responsibility to produce a Local Plan to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth needed. There are sites at the Riverside but these are considered important for future employment opportunities. The Council has therefore had to suggest Greenfield sites for development but with objective to also protect and enhance the image of the Borough. The last Local Plan for North Tyneside, the Unitary Development Plan (2002), identified areas as 'safeguarded land' for the primary reason that these areas could be considered as long term development options as part of any future review of that Plan. As a result, we are now considering safeguarded land as a suggested option. 				Labour ignoring coast people and imposing their own plans regardless of opposition. Farce. Vote them out.			<p>applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth needed. The Council has therefore had to suggest Greenfield sites for development but with objective to also protect and enhance the image of the Borough. The last Local Plan for North Tyneside, the Unitary Development Plan (2002), identified areas as 'safeguarded land' for the primary reason that these areas could be considered as long term development options as part of any future review of that Plan. As a result, we are now considering safeguarded land as a suggested option. Having considered the extent of development required to 2032 and the capacity of existing Safeguarded Land in the Borough (some of which is classed as green field), there remains sufficient land to meet the development needs of the Borough for at least the current plan period. The traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough. Further detailed traffic modelling work will also be carried out when detailed site layouts can be considered within a planning application. The impact on house prices is not a planning consideration but the Plan does set out policies for flooding in Policy DM8.12 (now DM5.12) states 'All major</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							developments will be required to demonstrate that flood risk does not increase as a result of the development proposed, and that options have been taken to reduce overall flood risk from all sources, taking into account the impact of climate change over its lifetime. All new development should contribute positively to actively reducing flood risk in line with national policy, through avoidance, reduction, management and mitigation'.	
396269	English Heritage	GOVERNMENT AGENCY	LP20152123	Thank you for your communication of 9 February 2015 inviting English Heritage to comment on the above document. We are pleased to do so. Our representations should be read in conjunction with our previous responses to your earlier consultation exercises, particularly that dated 15 January 2013. In our most recent response we drew particular attention to the requirements of the National Planning Policy Framework (NPPF) with regard to plan-making and the historic environment, and the need for Local Plans to enable the delivery of sustainable development, one of the core dimensions of which being the protection and enhancement of the historic environment (paragraph 7). By way of reminder, I would repeat that in order to satisfy the NPPF, development plans are required, in summary, to - 1. identify the historic environment as a strategic priority (paragraph 156), 2. contain a policy or policies for the conservation and enjoyment of the historic environment that is/are clearly identified as strategic (paragraph 156), 3. contain a positive strategy for the		Spatial Strategy	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>conservation, enhancement and enjoyment of the historic environment (paragraph 126), 4. demonstrate that they have been informed by a proper assessment of the significance of the heritage assets in the area, and the contribution they make to their environment, and of the potential for finding new sites of archaeological or historic interest (paragraph 163), 5. identify where development would be inappropriate because of its historic significance (paragraph 157). Our previous response provided reasoned commentary on each of these requirements and an assessment of the Plan in respect of them. I do not intend to fully repeat this commentary, but instead propose to set out below an updated assessment of the extent to which the current Plan satisfies the NPPF criteria. In addition, in an attached ANNEX A, I include specific comments and observations on the text of the document which I hope you will find helpful and constructive. 1. The historic environment as a strategic priority English Heritage is satisfied that taken as a whole the Plan satisfies that part of NPPF paragraph 156 which requires Local Plans to identify the historic environment as a strategic priority. 2. Strategic policy for the historic environment English Heritage is satisfied that the Plan contains policies for the historic environment that are clearly identified as strategic, thereby satisfying that part of paragraph 156 of the NPPF. 3. A positive strategy for the historic environment Taking the Plan as a whole, English Heritage is satisfied that it contains a number of positive</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				commitments that amount to a positive strategy for the historic environment, thereby broadly satisfying paragraph 126 of the NPPF. Annex A below, however, identifies a number of areas where the Plan somewhat undersells itself in this regard and could usefully be strengthened. Paragraph 4.10- potential development sites should be subject additionally to an assessment of the significance of any heritage assets on or otherwise affected by them, an assessment of the extent to which their significance might be harmed or lost as a consequence of development and evidence that the local authority has questioned whether the harm or loss is justified in relation to necessary public benefits that cannot be met in any other way. This exercise is also fundamental to ensuring that development is sustainable.				
898630			LP2015902	I'm sorry, I didn't understand a word of this. Please explain acronyms before using them. For example what is an SPD?		Supporting Neighbourhood Plans	SPD is explained earlier in the Local Plan. However, we will include a glossary to provide clarity.	Glossary included within Local Plan document.
396449	Cyclists Touring Club	OTHER / LOCAL ORGANISATION	LP2015583	8.33. The first sentence would read better as: ... and access to National Cycle Network Route 72, Hadrian's Cycleway (or NCN 72, Hadrian's Cycleway). 8.34 & 8.35. Change bicycle and bike to cycle, as cycle covers non-standard bikes i.e. trikes, tandems.		Wallsend and Willington Quay Sub Area: Green Infrastructure	Comments noted.	Amendments made as suggested.
879379			LP201550	As a local resident, I don't want to see anymore green areas being developed as these are a vital to maintaining an attractive and natural areas for not only drawing tourists but also for use of is local residents.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							accommodate the future levels of growth needed. The Council has therefore had to suggest the most sustainable Greenfield sites for development but with objective to also protect and enhance the natural environment and enhance the image of the Borough.	
890843		RESIDENT	LP2015165	The steady loss of the land around the Rising Sun area is not good and the area around Murton should become protected. The line of green from North Shields to Shiremoor needs to be maintained.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as those around the Rising Sun), but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM8.2 'Protection of Green Infrastructure' (now Policy DM5.2) and the intention of the policy is to be positive with a strategic approach to green links through the Borough. Policy AS7.4 (now Policy AS4.4) does reflect the importance green corridors within Murton and Killingworth Moor - 'major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity.'	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
890857		RESIDENT	LP2015171	At present I face a plot of agricultural land that creates a space between Dudley and Annitsford, this plan means they will merge in to one!!		S 1.1 Spatial Strategy for Sustainable Development	Comment noted.	No amendments proposed.
890925		RESIDENT	LP2015185	Having lived on Marden for 50 years, I have seen the number of open spaces and fields in the surrounding area gradually disappearing. I use Rake Lane daily and it does not support the level of traffic as it is - the plans for housing in Murton as proposed will greatly add to this problem. Hardly any green space left - very sad!		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections over the next 15 years places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Policy AS7.4 (now Policy S4.4) does reflect the importance green spaces to be considered within any future development at Murton 'major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							amenity space, access to the countryside, and biodiversity.'	
890959			LP2015188	The Plan aims to promote the regeneration of the borough's town centres such as Whitley Bay, Wallsend and North Shields, which is a worthwhile aim. The recent proposals concerning the expansion of the Crown Estates Silverlink out of town shopping centre are incongruent with this aim and do not seem to feature in the Local Plan. If the Council truly has the interests of town centres at heart, then it should be rejecting any expansion of out of town sites such as the Silverlink.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Plan supports the regeneration of the Town Centres but it also outlines the future provision of retail floorspace over the next 15 years. The Local Plan needs to accommodate 6,378(sqm net) convenience floorspace and 15,249(sqm net) comparison floorspace over the next 15 years. The recent planning approval of the Crown Estates Silverlink shopping development outlined the difficulty in accommodating large scale modern retail floorspace within the Boroughs town centres. However, the Local Plan supports the principles of town centre first for potential town centre development and Policy DM6.10 (now Policy DM3.4) advocates sites to be consider in priority order first, in-centre, edge of centre, existing out-of-centre development sites previously occupied by appropriate main town centre uses that are readily accessible to metro stations or other transport connections to the town centres and finally existing out-of-centre locations.	No amendments proposed.
892229		RESIDENT	LP2015285	Concern about North Tyneside being one big estate - green space disappearing.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. 							cyclists, horse-riders and other non-motorised modes of transport, using green links where appropriate.	
814591			LP2015342	You talk of the importance of town centres and community and I couldn't agree more. When all of the land in between each little village and each larger town is built on will it not just become one large urban sprawl? Which town centres will be chosen to represent the areas then?		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth needed. The Council has therefore had to suggest Greenfield sites for development but with objective to also protect and enhance the image of the Borough. The last Local Plan for North Tyneside, the Unitary Development Plan (2002), identified areas as 'safeguarded land' for the primary reason that these areas could be considered as long term development options as part of any future review of that plan. As a result, we are now considering safeguarded land as a suggested option. Having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional circumstances exist to require amendments to the existing extent of North Tyneside's Green Belt. Having considered the extent of development required to 2032 and the capacity of existing Safeguarded Land in the Borough (some of which is classed as green field), there remains sufficient land to meet the development needs of the Borough for at least the current plan period without	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							requiring review of the Green Belt. It is important that within the two large areas of development at Murton and Killingworth Moor the needs of the existing and future residents are considered. the strategic allocations policy outlines that further comprehensive master planning will be required by the landowner/s and North Tyneside Council to ensure the provision of essential infrastructure, facilities and services are appropriately provided. It may be the case that a new local centre is required for Murton and or Killingworth Moor, alongside strengthening links to the existing centres that lie within close proximity to new development. These will issues will be considered as the Local Plan progresses.	
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015496	There is a requirement of NPPF for LPAs to (paragraph 117) identify and map components of the local ecological networks and areas identified by local partnerships for habitat restoration or creation. The Northumberland Wildlife Trust considers that there is a need for this policy to meet this requirement. Without this it is difficult to see how this policy meets the statement in paragraph 4.10 (of the Local Plan) which states that The strategy has the potential to accommodate new development whilst also maintaining the existing Green Belt, significant green infrastructure, and open areas to meet strategic objectives relating to open space, recreation, health and biodiversity.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The ecological networks have been mapped on the Policies Map and the Council are keen to work with partners such as Northumberland Wildlife Trust to identify areas for habitat restoration or creation, but this is also covered within policy DM8.5 (now Policy DM5.5) 'maximise opportunities for creation, restoration, enhancement, management and connection of natural habitats'. Although Policy S1.1 does not cover local ecological networks these are covered elsewhere chapter 8 of the Plan.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
897295		RESIDENT	LP2015605	I would like to see the Council aim for a more realistic growth rate which would reduce the amount of greenfields that will be built on and which will make the protection and enhancement of coherent ecological networks more achievable.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment with coherent ecological networks.	No amendments proposed.
897599		RESIDENT	LP2015643	I strongly urge North Tyneside Council to re-asses growth rates and reduce the amount of greenfield land that will be lost to development. We are lucky to live in a fantastic borough for wildlife and I wish to see the Council maintain and enhance our protected area, without further erosion of wildlife and open space.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM8.2 (now Policy DM5.2) 'Protection of Green Infrastructure' and the intention of the policy is to be positive with a strategic approach to green links through the Borough. Two of the largest suggested sites in the Local Plan are covered by Policy AS7.4 (now Policy S4.4) which aims to reflect the importance green corridors within potential development of Murton	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							and Killingworth Moor - 'major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identify, maintaining amenity space, access to the countryside, and biodiversity.'	
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015659	Positively Prepared - yes Justified - yes Effective - yes Consistency to NPPF - yes Legal & Procedural Requirements Inc. Duty to Cooperate - yes As set out above, there are surface coal resources right across North Tyneside and as such any new housing or other development offers the potential for mineral sterilisation. Where there is a possibility of new development taking place over surface coal resources, it is important that consideration is given to the issue of mineral sterilisation. Both paragraphs 143 and 144 of the NPPF specifically refer to avoiding the unnecessary sterilisation of mineral resources through non-minerals development; this includes surface coal as a mineral of national importance. Furthermore, wherever practicable, they encourage the extraction of minerals/coal in advance of developments which would otherwise lead to sterilisation. In order to ensure consistency with national policy guidance, the Local Plan should therefore acknowledge that, as part of taking forward any development/redevelopment proposals within the surface coal resource area, it will be necessary for any sterilisation effects on the coal resource to be considered, as well as whether the prior extraction of the coal		S 1.1 Spatial Strategy for Sustainable Development	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				would be appropriate. It is important therefore that the Local Plan is balanced by also addressing the issue of mineral safeguarding which it does. Any choice of spatial option and distribution strategy is predominantly a matter for local choice and The Coal Authority would not wish to indicate any particular preference. Any spatial strategy chosen for North Tyneside is likely to raise issues of mineral safeguarding. Where there is a possibility of new development taking place in areas at high risk of instability arising from mining legacy, it is important that consideration is given to the issue of land stability as required by paragraphs 109, 120, 121 and 166 of the NPPF. In order to ensure consistency with national policy guidance, the Local Plan should therefore acknowledge that, as part of taking forward any development/redevelopment proposals within the "Development High Risk" area as identified by The Coal Authority, it will be necessary for due cognisance to be given to land stability. It is important therefore that the Local Plan is balanced by also addressing the issue of unstable land which it also does. Any choice of spatial option and distribution strategy is predominantly a matter for local choice and The Coal Authority would not wish to indicate any particular preference. Any spatial strategy chosen for North Tyneside is likely to raise issues of land stability.				
396641		RESIDENT	LP2015691	As "protect the Green Belt in North Tyneside" is the first key proposal in the Local Plan, I am concerned as I have mentioned, that areas 17 and 139 are shown as on top of the green belt		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. Both site 17 and 139 are green field sites but not designated green belt land. Wildlife corridors pass through both sites and policies S8.4, DM8.5 and	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				corridor. The green belt is already being eaten into in other sites with planning permission, so we must be very careful to abide that first key proposal as well as support the other key proposals.			DM8.6 (now Policies S5.4, DM5.5 and DM5.6) seek to minimise impacts on biodiversity and geodiversity and provide net biodiversity gains where possible. The Local Authority has a responsibility to produce a Local Plan to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth needed. The Council has therefore had to suggest green field sites for development but with objective to also protect and enhance the natural environment and enhance the image of the Borough.	
791875		RESIDENT	LP2015852	Will the adjacent land to the different areas co-operate and build housing and industrial sites and vice-versa?		S 1.1 Spatial Strategy for Sustainable Development	The Local Plan has suggested sites for different uses such as housing and employment. The Council has suggested these sites to meet the overall requirements of housing and employment need in the Borough and these sites have been selected based on evidence reports and previous consultation responses. There would be no requirement to develop adjacent land to suggested sites in the Local Plan.	No amendments proposed
804904			LP2015906	I don't think there are enough brown areas on this map, lets fill in those blank spaces around Murton with 3000 houses. What is the NTC 30/50 year plan for the region - are we to start building houses in the north sea under the absurd field of dreams assumption that 'if we build it people will come'		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan for the next 15 years to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							that have already been built on to accommodate the future levels of growth needed. The Council has therefore had to suggest Greenfield sites for development but with objective to also protect and enhance the natural environment and enhance the image of the Borough.	
805010		RESIDENT	LP2015911	I was very disappointed at the outcome of the appeal by Persimmons to build on field to East of Station Road North. I am now concerned about losing identity as Wallsend Benton Holystone Forest Hall & Palmersville will soon be merged into one if planning permission is given for any more building on green field sites in this locality. I wish to register my opposition to any more developments on green fields in my area.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan for the next 15 years to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth needed and the recent appeal decisions have shown the need to Plan for growth. The Council has therefore had to suggest Greenfield sites for development but with objective to also protect and enhance the natural environment and enhance the image of the Borough.	No amendments proposed
898939	38 Degrees North Tyneside East		LP2015987	I am writing on behalf of 38 Degrees North Tyneside East, a local group that is part of a national campaigning organisation. We are local people, we are writing about the area proposed to be developed surrounding Murton and adjacent to New York, Shiremoor, Wellfield, Earsdon and Preston Grange. Whilst we accept there is a need for more social housing in North Tyneside, we would not accept that proposed site is suitable for a development as described in the plan. Indeed, the plan far exceeds earlier figures following		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan for the next 15 years to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth needed. The Council has therefore had to suggest Greenfield sites for development	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>consultations at a previous stage of the planar€™s progress. Our objections hinge on a number of major impact areas for residents:</p> <p>1. Loss of Amenity "" a decrease in attractiveness and value of the open space to the current North Tyneside residents, particularly those living adjacent to the proposed development area. This area is much used and loved by local people.</p> <p>2. Traffic congestion - Significant worsening of traffic on already very congested roads. Additionally, the traffic management plans are either unclear or damaging, for example crossing wildlife corridors.</p> <p>3. Noise and Air Pollution "" as a result of a major increases in traffic will result</p> <p>4. Wildlife and the natural environment "" I understand the arable land at Murton Park was identified as a compensation area, being provided as a means of compensating for the loss of the Station Road development site (North Tyneside Council planning reference 12/02025/FUL Fields north of 45 Sunholme Drive, Wallsend). The original planning application for Station Road, part of which was the habitat management plan which set up Murton as the offset land. This is the wildlife and habitat management plan for Murton is a compensation area for the Station Road development. It identifies an 8 acres site at the North of Murton, including the wildlife corridor identified on the local plan as emerging from the greenbelt at Earsdon and crossing the Murton area, which is to be the designated offset land. This land is specified as "to be managed in perpetuity for wintering</p>			<p>but with objective to also protect and enhance the natural environment and enhance the image of the Borough. The Murton and Killingworth sites are suggested as strategic allocations and Policy AS7.4 (now Policy S4.4) includes a set of criteria that would need to be considered, including a comprehensive Masterplan detailing how amenity space, green infrastructure and traffic would be incorporated in any proposal. Policy DM8.16 (now DM5.19), which aims to address any potentially unacceptable problems associated with pollution (whether by noise or air quality). The Council has a Green Infrastructure Strategy (2015) and Policy S8.1 and DM8.2 (now Policies S5.1 and DM5.2) expand on the Council approach to strategic green infrastructure and the protection of green infrastructure. The development of the Murton Site would have to allow for the planning obligations attached to the planning application at Station Road for the mitigation of wintering birds.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				waders and farmland birds" (p4), further, the detailed plans identify a subset of land immediately to the North of Murton which is the designated grassland area which is to be "set aside as an area of permanent grassland". The management work at Murton Park was described as forming a key part of the ecological mitigation strategy devised for that planning application. This plan was drawn up not only for wintering wading bird species, of special importance to golden plover and lapwings, but also for farmland birds species including skylark, meadow pipit and yellowhammer and grey partridge. Can we assume the plans protect these agreements at the very least 5. Green infrastructure - has the council got a strategic plan for the green infrastructure, including the mitigated land, and how will this be maintained (and improved) amongst all the proposed development				
805282			LP20151001	I remain very concerned at the comment that, "most housing development will be located within the areas of ...the North West..." Despite your follow up comments those of the public to the original consultation, the area between Annitsford and Dudley (Annitsford Farm) does provide a recreational area for local residents and is also a home to wildlife. You have ignored the objections of local residents who do not wish to be swallowed up by yet more new housing. To build 400 homes on this site is ludicrous, losing valuable green space to residents and animals and increasing stress on local services and roads. There will be an inevitable effect		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council are actively seeking to engage with the public in the production of the forthcoming Local Plan and it has already been through many stages of public consultation. The views of residents have to be balanced against other factors such as national government policy and population projections. The Local Authority has a responsibility to produce a Local Plan to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>on existing house prices which will decrease as a result of becoming part of a larger housing estate, something that I did. not move here to be! Considering that the new Gentoo development on The Wyndings have still not sold all their 'new' homes,' it seems absolute madness to add yet more!</p> <p>Annitsford and Dudley are losing their identity and will become merged into one giant housing estate, homes being surrounded by yet more urban development. There are plenty of other sites that could be considered over this area rather than over developing one small site.</p>			<p>that have already been built on to accommodate the future levels of growth needed. The Council has therefore had to suggest green field sites for development but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Wildlife and recreational interests are considered in chapter 8 of the Plan. The reality of recent planning appeals for large scale housing development within the Borough, which have been refused by the Council but overturned at appeal by an independent inspector, reflects the position of the Council having to make provision for future generations.</p>	
797386			LP20151041	<p>There is no need for a great deal of new housing; static property prices show that we do not have a major lack of housing here. Some affordable housing may be needed. That can be achieved by using the brownfield sites. It would be quite wrong and unnecessary to use any of the green areas or to crowd out the coast with more housing.</p>		S 1.1 Spatial Strategy for Sustainable Development	<p>Comment noted. The Local Authority has a responsibility to produce a Local Plan for the next 15 years to set out the future development allocations and policies to guide decisions made on planning applications. The reality for North Tyneside is that when considering where future development will go there is a lack of sites that have already been built on to accommodate the future levels of growth needed. The Council has therefore had to suggest Greenfield sites for development but with objective to also protect and enhance the natural environment and enhance the image of the Borough.</p>	No amendments proposed
899444	George F White		LP20151299	<p>4 A sustainable Development Strategy for North Tyneside (4.5) The sub-division of the plan area into "'Strategic Policy Areas' would benefit from further clarity on Map 2 and the proposals map. The extent of the "'Urban</p>		S 1.1 Spatial Strategy for Sustainable Development	<p>Comment noted. Map 2 and the Strategic Policy Areas will be clarified. Further evidence on the viability work to accompany the Local Plan will be made available once it is published.</p>	Revised Map produced to show strategic policy areas

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Fringe Area' is unclear, this requires a boundary line to make it clear where the 'Urban Fringe' is differentiated from the remaining 'Main Urban Area'.				
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151319	Policy S1: Spatial Strategy for Sustainable Development. CPRE broadly support the spatial strategy. Reference to development of the transport (public & road) provision and networks in the Borough in relation to development location would be helpful. Paragraph 4:17, p. 26. It is important to stress here and elsewhere that riverside industrial sites should be reserved for maritime industries that require direct access to the River and in particular the deep water channel, in line with Obj 7.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. Paragraph 4.17 (now para 11.5) will be amended to reflect the opportunities for maritime industries to take advantage of the riverside frontage along the Tyne. Policy S1.1 does reference the Plans approach to support development that reduces the need to travel, which involves the coordination between new development and transport provision. This is also identified in paragraph 4.8 and therefore it is not considered necessary to make any further amendments.	Amend paragraph 4.17 to include reference to opportunities for maritime industries on the industrial sites with river access. Now paragraph 11.5
808714		RESIDENT	LP20151413	I understand the requirement for a plan however - North Tyneside does not need this level of over development - North Tyneside are not able to promise homes and employment on the basis of this plan - Durham Council had a broadly similar plan which was rejected by central government, this completely reduces North Tyneside Claims that central government require it. - Development on this scale will ruin North Tyneside		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Durham decision has stressed the importance to working closely with partners and neighbouring local authorities to ensure that the objectives and growth targets in the Local Plan are deliverable. The evidence produced from independent consultants on levels of growth in North Tyneside are supported by neighbouring authorities and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth forecast. Through the Local Plan the Council intends to develop a Plan led approach to future growth so the issues of new development can be considered together and therefore bringing about the best possible solutions to	Continue to work in cooperation with neighbouring authorities

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							difficult issues.	
805211		RESIDENT	LP20151426	In summary, I would like to see the Council aim for a more realistic growth rate which would reduce the amount of green field land that would be built on and which will make the protection and enhancement of coherent ecological networks more achievable. I trust that you will attach due weight to my comments and afford them and our local wildlife the consideration they deserve. Development sites are proposed which are inappropriate and contrary to planning policy. For example Site 11 now Site E010 contains a Site of Local Wildlife Interest, site 109 is located on a wildlife corridor and part of sites 35-41 is to provide ecological compensation for a development elsewhere in the borough.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as 11 & 109), but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. This will result in smaller site areas for some sites but provide a more accurate picture of the overall development proposed. Site 109 along with other sites suggested for development in the Plan have wildlife corridors running through them. The precise location of development within these sites has not been determined and the policies of the Plan highlights the need for wildlife corridors to be accommodated within future development. Council officer's comment on site 109 was 'Development would not be supported if adequate and good quality wildlife corridors were not incorporated into any scheme'. The development of the sites 35-41 would have to allow for the planning obligations	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							attached to the planning application at Station Road for the mitigation of wintering birds. Policy AS7.4 (now Policy S4.4) also includes a set of criteria that would need to be considered, including a comprehensive Masterplan detailing how amenity space, green infrastructure and traffic would be incorporated in any proposal.	
898767			LP20151542	I hope you will be able to take the objections below into consideration when debating the strategic plan. We understand that there are people keen to get on the housing ladder. We have children in that situation ourselves. But this is not the way. By filling every available green patch with identikit houses Benton will lose it's character and it's desirability. Worse, the infra structure will grind to a halt. We understand that people - especially young people - are desperate for work. But creating a house building bubble is not in the long term interests for them, for us or for the area of Benton, when there are far more creative ways of developing trades and skills by re-using existing housing stock and converting available buildings, not to mention developing skills in creation and management of sustainable natural habitats adjacent to semi urban areas.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. The Council have been successful in securing grant funding for highway improvements that mean over the next five years around £150million is set to be invested in the Boroughs highway network (including the A191) for the benefit for public transport users, cyclists and pedestrians.	No amendments proposed.
899323			LP20151607	NewRiver Retail supports the Council's decision to direct most retail and leisure activities within the main town centres including Wallsend and North Shields as set out in Policy S1.1. This is in accordance with Paragraph 23 of the National Planning Policy Framework (NPPF).		S 1.1 Spatial Strategy for Sustainable Development	Support noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
899297			LP20151693	There is a requirement of NPPF for LPAs to (paragraph 117) identify and map components of the local ecological networks"; and areas identified by local partnerships for habitat restoration or creation. Northumberland Wildlife Trust considered that there is a need for this policy to meet this requirement. Without this it is difficult to see how this policy meets the statement in paragraph 4.10 (of the Local Plan) which states that "The strategy has the potential to accommodate new development whilst also maintaining the existing Green Belt, significant green infrastructure, and open areas to meet strategic objectives relating to open space, recreation, health and biodiversity". These comments have not been addressed.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The ecological networks have been mapped on the Policies Map and the Council are keen to work with partners such as Northumberland Wildlife Trust to identify areas for habitat restoration or creation, but this is also covered within policy DM8.5 'maximise opportunities for creation, restoration, enhancement, management and connection of natural habitats'. Although Policy S1.1 does not cover local ecological networks these are covered elsewhere within Chapter 8 of the Plan.	No amendments proposed.
755686	Home Builders Federation		LP20151725	12. Part "b' of the policy indicates that most housing development will be located within a dispersed pattern within the Main Urban Area and within the areas of North Shields, Wallsend, the Coast and the North West where development could bring particular benefits to the regeneration of the area. The 2010 Affordable Housing Viability Assessment does, however, identify that many of these areas suffer from the greatest viability issues. It is noted that the Council is currently undertaking an Area Wide Viability Assessment which is likely to provide additional up to date information, unfortunately this report was not available at the time of writing and as such has not informed our comments. 13. To ensure that the plan is delivered, it is important that the		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council will need to ensure that the Local Plan is effective and therefore it will need to show that the sites proposed for future development will be deliverable. The Local Plan includes a wide range of sites and the viability report will be available as the Plan is developed.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				sites identified are deliverable early in the plan process and that significant burdens are not placed upon development, particularly in the more marginal areas. The Council may wish to consider reducing its reliance upon the more marginal areas by providing a wider range of sites to ensure plan deliverability. In addition the Council may wish to consider reducing the				
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151793	We recognise the varying characteristics presented by different geographical areas of the Borough, and that the Spatial Strategy has been developed in accordance with Strategic Policy Areas, whereby the Borough area has been divided accordingly. Upon reviewing Policy S1.1 "Spatial Strategy for Sustainable Development", we would suggest that an additional criterion is added to both sections "a" and "b", to ensure that employment and housing developments are located in accordance with the capacity of the sewerage network. We suggest that the additional wording should read as follows: a) Employment development will be located: i. within the Main Urban Area ii. at areas easily accessible to residents by a range of sustainable means of transport iii. where businesses may benefit from the Borough's excellent national and international transport connections " including the strategic road network and opportunities provided by the River Tyne iv. where the capacities of critical infrastructure, and timescales associated with investment works, can support development proposals b) Most housing development will be located: i. in a dispersed pattern in the		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The offer of support and expertise on sustainable surface water management is welcomed and the Council will continue to seek the early involvement of Northumbria Water in development proposals. The issues relating to reducing the flood risk through reducing surface water discharge to sewers and the incorporation of sustainable surface water management design are included in section 8 The Water Environment. The emphasis of proposed criteria (a)(iv) and criteria (b)(iii) are outlined in the first sentence of the Policy and the Local Plan should be read as a whole whereby other policies such as the water environment would be applicable.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Main Urban Area; and ii. within the areas of North Shields, Wallsend, the Coast and the North West where development could bring particular benefits to the regeneration of the area iii. where the capacities of critical infrastructure, and timescales associated with investment works, can support development proposals At this point, we would like to highlight the opportunities presented by the LPCD to reduce existing sewer flooding risk in the Borough, thereby contributing towards the achievement of sustainable development. The sustainable redevelopment of brownfield sites can improve existing flood risk by reducing surface water discharge to sewers, whilst larger sites present opportunities for masterplanning and strategic drainage schemes. Removal of surface water from the sewerage network will not only serve to reduce the risk of sewer flooding in the Borough, but will also increase the headroom of Howdon STW for future foul flows. In this respect, we have attached a copy of a recent position statement on the capacity of Howdon STW for your information. This was previously provided to your planning officers. It is our opinion that the benefits of sustainable surface water management and the importance of surface water separation schemes should be highlighted throughout the LPCD, with policies striving to ensure that all new development seeks to incorporate sustainable surface water management design. Following the identification of specific sites using the guidance contained within Policy S1.1, we would recommend that</p>

							A191) for the benefit for public transport users, cyclists and pedestrians.	
900519		RESIDENT	LP20151854	We are concerned that the proposed plan will mean losing the fields between Benton and Palmersville and Wallsend, resulting in an ever growing urban conurbation.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as 11), but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. This will result in smaller site areas for some sites but provide a more accurate picture of the overall development proposed. The physical constraints of overhead power lines to the northern section of site 17 means this area would be removed from the allocation of housing land, but designated as green space.	No amendments proposed to the policies map. Within the body of the Local Plan document additional indicative mapping is provided identifying potential access points and strategic open space within proposed allocations.
807291		RESIDENT	LP20151864	I am annoyed that more houses are being built in Killingworth. North Tyneside council is hell bent on building on more greenfields. Lots of birds nesting on these fields and wildlife. Put more houses up in the Dudley/Seaton Burn area - plenty of room.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth and a lack of available sites within	No amendments proposed

				<p>future communities in North Tyneside as well as those that exist. This pilot would explore what is meant by a sustainable community and explore design and build that is responsive to the changes in the climate. Could this village/town be truly inclusive, designed in away that optimises self sufficiency and sustainability? Could it minimise or indeed eliminate the disadvantages of people often considered vulnerable. That is to say people who are poor, disabled, elderly, woman, children, those suffering ill health and those without a private motor car. Indeed all of us at some time in our lives. It would be designed to a human scale, that is to say, in a way that would enable people to know and appreciate each other in an environment, natural as well as built, which furthers their health and sense of well being? - where children could play safely and yet have ease of access to the natural environment - where the pedestrian and those with mobility difficulties young and old are favoured. - where women in particular can be confident at any time. This would mean having ease of access to the provision of shops, services, community facilities, doctors, dentists, pubs, churches, schools, police, banks etc which if not possible to reach by foot or wheelchair have good public transport available. This suggests a local economy which would support community self sufficiency, community ownership and encourage active citizenship. It could mean locally grown food that might be provided from allotments, a market garden, community</p>			<p>growth. The Council has therefore had to suggest green field sites for development, but with objective to deliver sustainable development addressing the points you highlight. Overall the Local Plan sets out what a sustainable community may look like and this is probably best evidenced within Policy S1.1.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				supported agriculture, orchards etc. where there is self sufficiency in energy generation provided by renewable forms of it and is efficiently used and where local waste remains a local resource. Where local enterprise is encouraged and which amongst other things, meets the real needs of local people sustainably. Where people can "'grow' their own culture and value their own heritage. It would be designed, planned and built to standards and with materials that accommodating climate change requires. What is best practice? In a national and global economy in which we will continue to need to trade, how we respond competitively or co-operatively to the socially just interests and wellbeing of others unseen will affect this future. A transition to a Sustainable future?. Why the above? I asked in my previous submission that the Local Plan defines a Sustainable Community which might help explain from an ideal, the ambitions of a local plan to enable the transition to a sustainable future and why. I think as a community we owe it to ourselves and our children to be experimenting, researching, exploring what a sustainable community might look like, together. We should though, have in mind those who may have difficulty participating in the conversation and its consequences. I believe times demand it and this Local Plan may in final form offer the opportunity.				
900541		RESIDENT	LP20151872	Concerning Benton area where we have lived for 30 years: Forest hall and Benton were green and pleasant places to live 30 years ago.. Ever since there has been a thoughtless		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The government guidance has been supportive of new housing development over recent	No amendments proposed

				and ill considered building allowed on green field sites, houses and gardens have been destroyed to provide dense housing schemes and no thought has been given to townscape and provision of amenities. Traffic has become impossible at rush hour with no provision for improving the road system. The result is a built up area with no environmental appeal and an unattractive place to live.			years and this has continued with the guidance published in the National Planning Policy Framework (NPPF). The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. The Council has a lack of available sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but also planning for the infrastructure that would be necessary. Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough.	
806149	New River Retail	LANDOWNER / BUSINESS	LP20151877	We support the identification of North Shields as a focus for new retail, leisure and other main town centre uses and its improvement through a comprehensive approach to social, economic and physical regeneration, together with enhanced shopping, leisure provision, offices and homes. Furthermore the plan seeks to regenerate the Coast from North Shields Fish Quay to St Mary's Lighthouse in Whitley Bay, enhancing its image through a coordinated approach to delivering regeneration schemes with new facilities and improved public realm to develop the tourism and visitor offer whilst safeguarding the natural landscape and wildlife habitat. However, although we support the wider objectives and strategy of the Plan, we		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Plan does seek to revitalise its town centres (Objective 5) and supports a town centre first approach towards new development for main town centre uses in accordance with NPPF. Proposals for town centre uses that come forward outside of defined centres will need to consider the impact in accordance with Policy DM6.10 (now Policy DM3.4) that requires proposals over a certain floorspace threshold to commission an impact assessment considering the following criteria:  g. the proposal would have no significant adverse impacts, either individually or cumulatively, on existing, committed and planned public and private investment in a	Contacted the agents to request any potential amendments to the policy that could further strengthen the town centres or if they are aware of any future regeneration proposals for the town centres.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				believe that it should include a specific policy mechanism for testing the effects of application proposals that come forward outside the defined North Shields regeneration areas, in order to ensure that they will not have any material adverse effects on any aspects of the regeneration strategy. Safeguarding the defined areas in this way and guiding development activity will be an important part of securing the necessary investment in the regeneration areas and we object to the Plan's lack of specific policy framework on this point,			<p>centre or centres in the catchment area of the proposal; and</p> <p>h. the impact of the proposal on the vitality and viability of a Town Centre, including consumer choice and trade in the Town Centre.</p> <p>It is through this specific policy mechanism that the Local Plan seeks to test the effects of application proposals that come forward outside of defined centres to promote a town centre first approach and encourage investment into its town centres. The Council are committed to working with respondents through the Local Plan consultation process and will seek to engage in further discussion with the respondent on this issue.</p>	
638268	Natural History Society of Northumbria		LP20151898	There is a requirement of NPPF for LPAs to (paragraph 117) identify and map components of the local ecological networks and areas identified by local partnerships for habitat restoration or creation. NHSN considers that there is a need for this policy to meet this requirement. Without this it is difficult to see how this policy meets the statement in paragraph 4.10 (of the Local Plan) which states that "The strategy has the potential to accommodate new development whilst also maintaining the existing Green Belt, significant green infrastructure, and open areas to meet strategic objectives relating to open space, recreation, health and biodiversity".		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The wildlife corridors have been mapped on the Policies Map and the Council are keen to work with partners such as Northumberland Wildlife Trust to identify areas for habitat restoration or creation and this is reflected in policy DM8.5 (now Policy DM5.7) 'maximise opportunities for creation, restoration, enhancement, management and connection of natural habitats'. Policies S8.4, DM8.5 and DM8.6 (now Policies S5.4, DM5.5 and DM5.6) are consistent with the guidance set out in the NPPF that advises planning authorities to minimise impacts on biodiversity and geodiversity and provide net biodiversity gains where possible. Having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							circumstances exist to amend its boundary. The Local Plan also accommodates significant green infrastructure and open areas within the Borough and this is prioritised in Policy S8.1 and DM8.2 (now Policies S5.1 and DM5.2).	
510094	Natural England	GOVERNMENT AGENCY	LP20151931	The Sustainability Appraisal (SA) states there is no direct link between this policy and SA objective 13 which is "To avoid adverse effects to the areas ecological network, including designated wildlife sites and protected species, and to protect and enhance biodiversity and geodiversity." However, Natural England disagree as the policy references the coast as one of the locations where most housing, tourist, cultural facilities and accommodation will be located. As the coast contains nationally and internationally protected nature conservation sites that may be directly or indirectly harmed by the spatial strategy this should be reassessed against reasonable strategy alternatives.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. SA to be revised for this policy, acknowledging the link between SA objective 13 on ecology and the spatial strategy of the Borough.	SA revised accordingly.
830576	Taylor Wimpey	DEVELOPER	LP20151979	The general principle of preparing a spatial strategy on the categories of the Urban Fringe, the Main Urban Area and the Four Priority Investment Areas is generally supported. However, the accompanying plan (map 2 within the consultation document) is difficult to correlate with the above listed category. Specifically, the map includes reference to the 'Urban Region' which it is assumed comprises the 'Main Urban Area'. Similarly, it is not clear from the corresponding map exactly what areas of the borough are considered to comprise the		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. Map 2 (now Map ?) and the Strategic Policy Areas will be clarified. Further evidence on the viability work to accompany the Local Plan will be made available once it is published.	Revised Map produced to show strategic policy areas

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				'Urban Fringe'. In order facilitate clarity in the plan, it is considered the references on the plan should be consistent with the references contained within the spatial strategy. Without such conformity, there is a risk of uncertainty in the application of subsequent policies of the plan. It is also noted that certain areas of the borough identified for growth over the plan period suffer from constraints over viability. We reserve our position to make further comments on the viability of specific areas of the plan as and when the viability assessment is published.				
900788		DEVELOPER	LP20151987	Our client welcomes the recognition in Policy S1.1 ((b) i) and ((b) ii) that housing development should be located "in a dispersed pattern in the Main Urban Area" and "within the areas of North Shields, Wall send, the Coast and the North West where development could bring particular benefits to the regeneration of the area". It is considered that our client's site would meet these criteria due to its location within the Main Urban Area, as well as its potential to contribute to the delivery of regeneration benefits in the local area. As such, the site should be brought forward for residential development.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted.	No amendments proposed.
396511	GVA	PLANNING CONSULTANCY	LP20152002	The consortium supports Policy S1.1 and the spatial strategy for sustainable development but would suggest an amendment to criterion b) to include specific reference to the Strategic Site Allocations at Killingworth Moor and Murton. This is because combined the two sites will deliver a significant proportion of the overall housing allocation for the		S 1.1 Spatial Strategy for Sustainable Development	Comment noted and the suggested amendment will be discussed to reflect the proposed growth at Murton and Killingworth.	Wording of policy S1.1 amended to incorporate reference to the Murton and Killingworth Moor strategic allocations.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Borough, are of strategic importance and should therefore be listed in the spatial strategy. We would suggest Policy S1.1 is amended as follows: b) Most housing developments will be located; i. in a dispersed pattern in the Main Urban Area; and ii. at the Strategic Allocations at Killingworth Moor and Murton iii. within the areas of North Shields, Wallsend, the coast and the North West where development could bring particular benefits to the regeneration of the area				
830571	Persimmon Homes	DEVELOPER	LP20152017	Policy S1.1 is generally supported as this provides the most logical and sustainable spatial strategy for the North Tyneside area.		S 1.1 Spatial Strategy for Sustainable Development	Support noted.	No amendments proposed.
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152071	RE New Site: Russell Square. Our client supports the Spatial Strategy for delivering sustainable development in the Borough as outlined in Policy S1.1 which states that "Most housing development will be located" within the areas of North Shields, Wallsend, the Coast and the North West where development could bring particular benefits to the regeneration of the area". Our client supports the recognition that the North West of the Borough provides a suitable and preferred location for new housing development. The development of our Client's site would therefore contribute towards the delivery of new housing in the North West and aid the achievement of the Spatial Strategy. Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				given verbal support to this submission. General. 1. Would like to see more recognition of need to have plans for regeneration of former mining villages, especially Dudley and Seaton Burn so that development of current empty sites will allow some structure to the village in the future and provide for current unmet need. 2. As the Northern Gateway (Sandy Lane Bypass) has been omitted from the Plan and there are proposals for further extensive house building in the area as well as the development of the Weetslade Industrial site there is a special need to consider future traffic flows and movements. Work to the south of the Sandy Lane roundabout in front of Gosforth Park is long overdue but Sandy Lane itself has been over capacity since the 70s ...			AS1.6, AS9.9 and AS9.10 (now Policies AS8.24, AS8.25 and AS8.26). Policies referring to the North West will be amended to "North west Villages rather than "North West Communities". Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements (including along the A1056) to make it easier and safer to travel throughout the Borough.	
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152086	RE New Site: Land to rear Front Street, Seaton Burn. Our client welcomes the recognition in Policy S1.1 ((a) iii) that employment development should be located "where businesses may benefit from the Borough's excellent national and international transport connections - including the strategic road network". The recognition that employment development should also be located "at areas easily accessible to residents by a range of sustainable means of transport" (as set out in (a) ii) is also supported. As set out above, it is considered that our client's site would fully meet these criteria due to its unique location adjacent to the A1/A19 junction, as well as the close proximity of bus stops and National Cycle Network. As such, the site should be removed from the Green Belt and brought		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Local Plan has consequently not sought to review or amend the existing boundaries of the Green Belt in North Tyneside. Having considered the extent of development requirements to 2032 and the capacity of existing Safeguarded Land in the Borough, addressed in policies S3.3 and DM3.4 (now Policies S1.7 and DM1.8), there remains sufficient land in sustainable locations to meet the development needs of the Borough for at least the current plan period without requiring review of the Green Belt.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				forward as a suitable employment site.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152101	RE New Site: Land to south of Meadow Drive, Seaton Burn. Our client supports the Spatial Strategy for delivering sustainable development in the Borough as outlined in Policy S1.1 which states that "Most housing development will be located" within the areas of North Shields, Wallsend, the Coast and the North West where development could bring particular benefits to the regeneration of the area. Our client supports the recognition that the North West of the Borough provides a suitable and preferred location for new housing development. The development of our Client's land would therefore contribute towards the delivery of new housing in the North West and aid the achievement of the Spatial Strategy.		S 1.1 Spatial Strategy for Sustainable Development	Support noted.	No amendments proposed
396269	English Heritage	GOVERNMENT AGENCY	LP20152132	Policy S 1.1 proposes to focus new tourist and cultural facilities and accommodation in specific locations. It should be acknowledged, however, that 'historic' facilities exist wherever found and cannot be moved or necessarily made to align comfortably with what might be regarded as locationally preferential planning areas. Some recreational activities, by their nature, are better suited to rural locations. Segedunum is so important in terms of culture, tourism and recreation that it justifies specific reference in the policy.		S 1.1 Spatial Strategy for Sustainable Development	Comments noted. We acknowledge that some established facilities and activities will be in parts of the Borough that may not correspond with this spatial strategy. The policy recognises this by the use of "most". A reference to Segedunum can be added to the policy.	Criterion dii now reads "at areas such as the Coast, riverside and main town centres of Whitley Bay, North Shields and Wallsend, including the World Heritage Site at Segedunum Roman Fort."
798761		RESIDENT	LP20152195	PLEASE USE BROWNFIELD sites first.		S 1.1 Spatial Strategy for Sustainable	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for	No amendments proposed.

						Development	North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. The Councils intention to prioritise delivery of housing on brown field land is reflected in Policy S7.1 (now S4.1), but when allocating sites for new development there is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development.	
901303		RESIDENT	LP20152203	North Tyneside still (only just) feels like it has some space and air to it. If all your proposals go through then it will become just another sprawl of buildings like the West end of Newcastle. Leaving some fields on the outskirts is not sufficient to maintain what MAKES North Tyneside. An alternative location if opposing a suggested site - No Idea!! It must be very difficult for you!! I do appreciate that. Key proposals to protect and enhance green areas seems to be a joke! Its going!! On the Map where is the NEW accessible open space??? Your Green Belt is literally a strip. What about lungs within North Tyneside itself The pressure to build and build is immense, I know, but please know that North Tyneside is a great borough with a wide mix of people "" and its spaces help all of breathe and be well and walk dogs and let kids play. SPACE is very important.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. The Councils intention to prioritise delivery of housing on brown field land is reflected in Policy S7.1 (now S4.1), but when allocating sites for new development there is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Policy AS7.4 (now Policy AS4.4), which covers the strategic allocations at Murton and Killingworth, reflects the importance green spaces to be considered within future development 'Major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							identify, maintaining amenity space, access to the countryside, and biodiversity.'	
901305		RESIDENT	LP20152204	Refer to Council report "" 1987 Findings still stand today! We are the last village in North Tyneside.		S 1.1 Spatial Strategy for Sustainable Development	Comment noted. Unfortunately there is not enough detail in the response to check the findings of the 1987 report.	No amendments proposed.
892444		RESIDENT	LP2015261	In 2007/2008 the council hired at taxpayers expense an outside consultancy agency; aimed at improving the 'North Banks' of the Tyne. Some of the plans were very exciting and aimed at attracting new 'green' and hi tech industry onto the river and improving housing and the environment. It seems little or nothing has been done. While welcoming hundreds of jobs at OGN, most of the area around Howdon remains runs down and almost derelict.		AS 1.2 The Wallsend and Willington Quay Sub Area	Comment noted. The River Tyne North Bank consultant study provides a strategic framework for regeneration and investment in the area and is the basis which the Council has worked to bring major investment into the Borough. Although take up of this land for economic development has been slow there has been lots of work carried out to attract investment to the area and large parts of the riverside are now designated as an Enterprise Zone. This provides financial incentives to encourage investment in the area and simplified planning regulations. Policy S5.5 ('River Tyne North Bank') (now S2.5) reaffirms the Councils ambitions to bring forward investment in renewable and marine off-shore manufacturing and sub sea technologies and the Enterprise Zone is designated for Low Carbon Enterprise.	No amendments proposed.
396551		RESIDENT	LP2015317	It seems unfortunate that no provision has been made to allow an area of public access to the North Bank of the River Tyne, for local / tourist sightseeing purposes.		AS 1.2 The Wallsend and Willington Quay Sub Area	The topography, area and limited width to the riverside presents a challenge to accessibility. The Fish Quay Neighbourhood Plan provides specific detail on the area and outlines the ambitions for a 'Promenade' (SPD).	No amendments proposed
396449	Cyclists Touring Club	OTHER / LOCAL ORGANISATION	LP2015581	f. Hadrian's Way Cycle Path should be Hadrian's Cycleway.		AS 1.2 The Wallsend and Willington Quay Sub Area	Thank you for the correct information.	"Hadrian's Way Cycle Path" changed to "Hadrian's Cycleway"

				<p>Neighbourhood Plan incorporated in to this higher Local Area Plan, as was promised. However, my main area of concern is the number of dwellings provide for each identified development site within the Fish Quay/North Shields area. As a layperson I have difficulty in visualising how many dwelling can be accommodated on each site, and fear that the numbers may be too high. High numbers of dwellings will inevitably mean additional volumes of traffic and parking, and I would not wish to see residents competing with visitors or businesses for resources. North Shields and the Fish Quay are a tightly constrained area and the possibility of high-density developments will negatively impact on an area that is already attempting to re-generate itself. There is already ongoing dialogue over the issues of parking, rubbish, and services. Adding to this by possible further conflicts of interest between business, residents and visitors needs to be avoided. The provision of dwelling numbers for each identified development site is troublesome. The numbers provided in the Plan will in all likelihood be taken as minimum (starting volumes), rather than the maximum, nor will they be used as guidelines. It is possible that good design can provide for more dwellings, but this should be the outcome of consultation with the local residents and users of the area, and agreement on density. It would be useful if the Plan could: 1. Plainly state that the numbers for housing shown are a guide, and that density will be agreed as</p>			<p>requirement. Any housingsites that come forward would have to be assessed through the planning application process where the policies in the Plan will guide decisions on the suitability of a development in terms of impact on infrastructure, etc. DM7.4 "New Development and Transport" for example, ensures that the transport requirements of new development is taken into account. s106 and/or CIL will be pursued where necessary and will be calculated and utilised in accordance with national policy and guidance.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				part of a local pre-project consultation with all interested parties; and 2. Made clear that: a. Developers will need to provide justification for the number of dwellings in their plan, as well show provisions of appropriate infrastructure investment to match the needs of the proposed level of development; b. The use of section 106 clauses and community infrastructure levies will be used to provide any necessary additional infrastructure and facilities (e.g. parking and refuse), to overcome any conflicts, concerns or problems within the local area; and c. That the levies will be applied to the development site in question and not across the borough.				
741945	FISH	OTHER / LOCAL ORGANISATION	LP2015723	The FISH Group would like to offer the following comments on the Local Area Plan. The Group have obviously focused on aspects of the plan that may affect the Fish Quay and local area. Overall the Group was pleased to see the Fish Quay Neighbourhood Plan incorporated in to this higher Local Area Plan, as was promised. Our main area of concern is the possibility of high-density developments in an already constrained area. Whilst we wish to encourage development, re-generation and growth within the Fish Quay area, we are concerned about the possibility of over development. As lay people, we have a difficulty in visualising how many dwelling can be accommodated on each site, and one concern is that the numbers provided against each development will become the maximum, not minimum, nor will they be used as a guide. It is possible that good design can provide for higher density of dwellings, but		AS 1.4 Fish Quay and New Quay	Comments noted. The number of dwellings stated are "potential". It is necessary that potential dwelling numbers are included to illustrate that the Plan can deliver the Borough's objectively assessed housing requirement. Any housing sites that come forward would have to be assessed through the planning application process where the policies in the Plan will guide decisions on the suitability of a development in terms of impact on infrastructure, etc. DM7.4 "New Development and Transport" for example, ensures that the transport requirements of new development is taken into account. s106 and/or CIL will be pursued where necessary and will be calculated and utilised in accordance with national policy and guidance.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the final agreed numbers should be the outcome of consultation with the local residents and users of the area, and agreement on density. Over development will impact on already stretched infrastructure and services. In an area that is already attempting to revive itself, and which is already dealing with infrastructure issues, further conflicts of interest between business, residents and visitors need to be avoided. High-density sites will inevitably means additional volumes of traffic and parking, and we would not wish to see residents competing with visitors or businesses for resources. It would be useful if the Local Plan could definitively state that formal consultation will be required for each and every site earmarked for development, and that developers will be required to provide justification for the number of dwellings in their plan along with matching levels of infrastructure investment to match the needs of the proposed level of development. Along with clarity over consultation, it would also be useful to see it stated that the use of Section 106 clauses and Community Infrastructure Levies will be used to provide the necessary additional infrastructure (e.g., parking) and facilities required to overcome any conflicts, concerns or problems within the local area. And that these levies will be used/applied to the development site in question and not, as may be the case, across the wider borough.</p>

879379			LP201540	Why are we not developing areas that are already an eyesore and could bring in further tourism and revenue to the area? I am talking about the Tynemouth open pool which was remained a horrible eyesore for years, but along with the already large local support base could be turned into a highly attractive (and profitable) amenity for locals and tourists alike. I have no doubt that if the		AS 1.5 The Coastal Sub Area	Comments noted. The Local Plan contains policy AS5.8 "Tourism and Visitor Accommodation at the Coast" (now policy AS8.16). In April 2014 the Council adopted the Tynemouth Village Conservation Area Supplementary Planning Document that includes the restoration and re-use of the Pool as a high priority.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				council supported the already established campaign to reinstate the outdoor pool to its former glory, the benefits of extra tourism will reap rewards for bringing in extra money to the area. I strongly believe we should developing already existing areas such as the Tynemouth pool to improve the area before we start developing further green sites. I can only hope that the council reads this and takes it into consideration.				
891065		RESIDENT	LP2015193	This is, I expect, your strategic planning for the creation of jobs and building homes. Do you have any plan for Whitley Bay? Or any, say, for the Dome and Spanish City? If so, why has it not bore fruit for the last decade? It is time that you did something for the neglected Whitley Bay - simple things other than your so-called strategic planning. One simple and common sense action: when local authority's men cut grass in residential areas, then they should collect the cut grass!! Do you do that in your own garden? North Tyneside's so-called planners and policy makers are devoid of some of the most basic management/admin skills, never mind planning and strategic thinking.		AS 1.5 The Coastal Sub Area	North Tyneside Council has recently approved a Masterplan for the regeneration of Whitley Bay. North Tyneside's Local Planning authority does not manage the cutting of grass within the Borough.	No amendments proposed.
805724		LANDOWNER / BUSINESS	LP2015271	Support expressed generally for the policy and its reasoned justification.		AS 1.5 The Coastal Sub Area	Support noted.	No amendments proposed.
814591			LP2015346	It would be great to see Whitley Bay come to life again as a nice place to live with varied shops in the centre to support those who live and (hopefully) work there. Should all of the stations not get a hand up the regeneration ladder, not just Tynemouth Safer cycling routes away from the traffic are to be hoped		AS 1.5 The Coastal Sub Area	Comment noted and the echoed by the objectives of the Local Plan. Regeneration of the Metro Stations are principally the responsibility of Nexus but the investment of upgrading existing stations is included in criteria a) of Policy S10.3 Transport (now policy S7.3).	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				for.				
894746		RESIDENT	LP2015448	Imagine a future after regeneration. A sunny day with lots of leisure and culture activities for all. A great community, with excellent local shops, a nice environment with lovely green area and lovely plants, places to relax, places to have fun, ice cream. Places to exercise and modern, safe, up-market, classy bars, places to have a nice meal out and places for entertainment and dancing = healthy coastal town, prosperous coastal town.		AS 1.5 The Coastal Sub Area	Comment noted. The Local Plan is intended to allow the opportunities for the regeneration of the coast to create long lasting benefits throughout the Plan period.	No amendments proposed.
895180		RESIDENT	LP2015512	Should not demolish Lower Prom, should develop this into shops to create employment opportunities. We need nice shops in Whitley Bay to stop people going out of town to Silverlink.		AS 1.5 The Coastal Sub Area	The Local Plan seeks to encourage the regeneration of the coast with a vibrant town centre for Whitley Bay with a mix of shopping and other town centre businesses. The demolition of the Lower Prom will be considered in detail by the current planning application that has been submitted and at this stage the Local Plan has limited weight in determining the outcome of that decision.	No amendments proposed.
396412	Northumb erland Wildlife Trust	OTHER / LOCAL ORGANISATI ON	LP2015619	NWT is broadly in support of this policy area but is concerned to ensure that the policy is correctly balanced to fully conserve and enhance the natural assets of the coastline and ensure that development is not detrimental to this. In this regard this policy needs to fully recognise the international and national significance of biological and geological features (which are highlighted elsewhere "" cross referencing needed). Currently there is reference to the SPA within the policy however we would add that this policy could also benefit from recognition of		AS 1.5 The Coastal Sub Area	Comment noted. Reference to the recommended Marine Conservation Zone is outlined in paragraph 4.33 and although Policy AS1.5 (now Policy AS8.15) does not refer directly to the designated SSSI sites at the coast these are covered in Policy S8.4 (now Policy 5.4), but reference to SSSI in this Policy will be reviewed.	Policy AS1.5 (now Policy AS8.15) has been amended to include reference to the SSSIs within criteria (c )

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				SSSI status along the entire coast and also the following; Recommended Marine Conservation Zone "" Coquet to St. Marys rMCZ This is an area covered by a recommendation for a Marine Conservation Zone under the provisions of the Marine and Coastal Access Act 2009.				
897641		RESIDENT	LP2015652	Finally there is the quality of life. Nowhere in this part of the borough is ever car free, in fact the frequency seems to be increasing at weekends and holiday periods. Yes to tourism, but the effect of tourists, and further housing development is going to cause a significant deterioration in both the quality of living here, and the health of the residents. I have lived within this area for over 30 years, and the developments so far have changed the landscape beyond recognition. I truly believe that you need to revisit the proposal for whitely bay area.		AS 1.5 The Coastal Sub Area	Comment noted. The balance between tourism and residents and the impacts on traffic at the coast is covered in Policy AS10.5 (now Policy AS8.23), which recognises the need to 'balance competing needs on Whitley Bay town centre road network, including the need to maintain traffic circulation and minimise congestion with opportunities to give greater priority to pedestrians, cyclists, public transport users and people with disabilities'.	No amendments proposed
803472		RESIDENT	LP2015695	Council will not be happy until they have ruined Whitley Bay and Monkseaton - roads are already busy and cannot accommodate extra traffic.		AS 1.5 The Coastal Sub Area	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	No amendments proposed
805689			LP2015815	I understand that NTC are required to put forward a plan and that you will never please all the people all the time. I understand the		AS 1.5 The Coastal Sub Area	Comments noted. With regards to shop frontages, much shopfront work does not require planning permission and therefore	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>parameters within which you are working in order to have your plan accepted by Government. I understand that you have to base your plan on the evidence provided to you in terms of future population growth etc. I understand that a labour council is always going to try and improve the lives of those less fortunate and in doing so, Whitley Bay has certainly suffered, with the centre - especially Whitley Road looking appalling with all the gaudy shop signage. However, by far my biggest concern right now is the appalling state of the whole area in terms of litter. I am not exaggerating in saying that every single place I walk or drive is badly littered - on the ground, in the hedges and trees and it is hugely depressing. I understand the cuts to services have hit hard - but what on earth is the point of trying to talk up North Tyneside as being a great place to live, work and visit when it looks one huge waste tip?? If you started to tackle this kind of problem and help make the general environment more pleasant to be in, then you may find people become more accepting of your proposals. Talking to two sets of neighbours yesterday, all three of us have recently had punctures after visiting the waste disposal site. If you want to set an example to people - I would start right there and get your people to tidy the place up - it is always in a disgusting mess and I've never seen any of the staff trying to tidy it up. I emailed the council a week ago to find out information about the Spring Clean up - I'm still waiting for a reply. So, before you build another 4,500 homes with all the associated</p>			<p>out of our control. However, in recognising the issue, the Local Plan does include policies that aim to ensure good quality shop fronts in those occasions where planning permission is required. With regards to litter, the Planning system primarily deals with the built environment. The Local Plan contains a policy to ensure that new developments provide sustainable waste management (during construction and use) through the provision of recycling facilities and ensure a suitable location for the storage and collection of waste (policy DM7.9 New Development and Waste). However the Local Plan or Planning system are otherwise not able to manage litter. The Council have a Streetcare team who deal with litter issues and they are aware of your concerns. Residents are encouraged to report issues by calling the team or via an online form:  <a href="http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins">http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins</a></p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				waste/litter, please do something about this huge fundamental problem and get the area cleaned up. The wheelie bins and weekly collections are adding to the problem - it's not just people dropping litter. I followed a wagon down Marine Avenue and picked up half a tub of coleslaw, a teabag and a plastic meat tray that had been left after a bin was emptied. If each commercial property would just clear up outside their premises each day, that would start to improve things quickly - but there is huge apathy because it looks like the council are simply turning a blind eye to the litter problem. Personally, I would rather pay a 14% rise in my council tax than continue seeing North Tyneside go downhill like this. I'm sure many more residents would get involved in litter clean-ups if you would just make it more easy to join in and set a good example in leadership on the problem. I know I've vented my spleen here - but providing a clean and pleasant environment which is safe for wildlife (God knows how many animals are dying as the result of litter) and pleasing for residents has got to be a priority in winning hearts and minds to your wider agenda.				
797386			LP20151129	Whitley Bay needs a lot of attention. It needs to move up market. It is currently two towns - the streets where the bars used to be; and the northern and western parts. It is essential to make progress with the Dome - even if all of the funding is not in place yet, why not start by painting it, so that it appears attractive to tourists? Volunteers could do the lower parts, even if one had to pay contractors to do the upper parts. The arcade-type outlets do		AS 1.5 The Coastal Sub Area	Comment noted. The Local Plan sets out in its Objectives the need to revitalise the town centres in the Borough and this is detailed further in Policy AS9.7 (now Policy AS8.19) for Whitley Bay. Spanish City is a critical site in the regeneration of the area and the Local Plan seeks to support the regeneration of the site through a mix of uses that will positively contribute to the tourism offer and support Whitley Bay as a	No amendments proposed.

				nothing to enhance the area. They suggest to tourists that this is a down market old-fashioned seaside resort. And it is said that many of the streets off Whitley Road are used for housing those whom Newcastle and other areas cannot house - this will do nothing to revitalise the town. You urgently need to set up a group of residents and businesses to work closely with the Council to come up with ways of turning Whitley Bay around. I			fun and family friendly destination – Policy AS9.16 (now Policy AS8.18). The Council have already secured some grant funding towards the regeneration of Spanish city but is seeking to secure further funding from the Heritage Lottery Fund that will help deliver the Whitley Bay Masterplan (available to view on the Council website - <a href="http://www.northtyneside.gov.uk/browse.shtml?p_subjectCategory=1658">http://www.northtyneside.gov.uk/browse.shtml?p_subjectCategory=1658</a> ), which includes the refurbishment of the Dome. Problems associated with residential institutions in Whitley Bay have been raised in previous consultation responses and Policy AS7.1 (now S4.1)3 (now Policy AS8.21) outlines criteria to assess future applications. The Council is committed to working with the local community to revitalise Whitley Bay. A Master Plan for the regeneration of the Seafront has been approved by the Council following extensive engagement with residents across the borough and work is already advancing on a number of the projects that make up the Master Plan. The Council is also working with Whitley Bay Big Local (which is brings together Whitley Bay residents and businesses) to deliver the vision for the Whitley Bay Seafront Master Plan and their own Master Plan for the Big Local area, which covers the remainder of the town centre.

396269	English Heritage	GOVERNMENT AGENCY	LP20152139	Paragraphs 4.40-4.42 contain much welcome commentary regarding the heritage of the North West Communities Sub Area, but none of this narrative carries through to Policy AS 1.6.		AS 1.6 The North West Communities Sub Area	Comment noted. Policy AS1.6 (now Policy 8.24) sets out the general strategy for the NW area, with policies elsewhere in the Plan expanding on the themes. Policy AS9.9 (AS8.25) expands on signposting and promoting the key attractions (including heritage sites) in the area.	No amendments proposed.
685823	North Tyneside Green Party		LP20151095	Green Party The presumption should be against development unless it can be shown that such development would benefit the environment or residents.		DM 2.1 Presumption in Favour of Sustainable	Comment noted. The government is clear in the National Planning Policy Framework (NPPF) to make a presumption in favour of sustainable development a 'golden thread'	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
						Development	running through the planning process. The Local authority has to therefore consider sustainable development as outlined in the NPPF as performing three roles within planning, economic, environmental and social. This requires a judgement in planning between the three roles and how these can be best delivered. The Council supports sustainable development and through the Local Plan it is seeking to provide long term benefits for the environment , the economy and its residents.	
899444	George F White		LP20151301	DM2.1 Presumption in favour of Sustainable Development This policy is supported as it broadly reflects the NPPF. (4.54) The UDP identified areas of safeguarded land for the plan period to 2006. The safeguarded land has previously been assessed as being in suitable locations where development would make an efficient use of land, is well integrated with existing development, and well related to public transport and other existing and planned infrastructure, so promoting sustainable development. The sites identified as safeguarded land have been acknowledged as having potential for development beyond the UDP plan period, post 2006. The LPCD 2015 has subsequently identified some of the safeguarded land as preferred sites to meet the OAN. However, as comments to section S7.2 highlights the OAN will require revision, in light of the recently released DCLG 2012 based household projections (27 February 2015). As a consequence of this, it is likely that additional sites for residential development will be needed to meet revised		DM 2.1 Presumption in Favour of Sustainable Development	Comment noted. The council will continue to monitor the latest data projections that are available and the amount of developable housing land that is available to meet the Objectively Assessed Need to provide a range and choice of genuinely developable and deliverable sites necessary for the Plan to be considered positively prepared, justified and effective in accordance with NPPF.	The Local Plan pre-submission draft has been updated to reflect the latest available evidence of forecast population and household growth.

				<p>OAN within the plan period to 2032. In line with the Council's previous approach a reassessment of the identified safeguarded land is required to meet the increased OAN and to also offer realistic alternative sites to some of the preferred sites identified in the LPCD 2015. There are uncertainties with regard to some of the preferred sites identified to meet the OAN in policy S7.3 specifically in respect of the commencement and completion times, the proposed rates of delivery and the suitability of the sites. These concerns have been substantiated by recent Appeal decisions and concerns raised by statutory consultees; for example Site 3 Annitsford Farm - concerns have been raised with regard to the deliverability of the site due to a significant part of it being identified as within Flood Zone 2 and 3. A reassessment of the developable housing land supply necessary to meet a reassessed OAN (in light of the recently released DCLG Household Projections 27 February 2015) and to provide a range and choice of genuinely developable and deliverable sites is necessary for the plan to be considered positively prepared, justified and effective in accordance with NPPF (182).</p>

510094	Natural England	GOVERNMENT AGENCY	LP20151935	Natural England supports this policy.		DM 2.1 Presumption in Favour of Sustainable Development	Support noted	No amendments proposed.
830576	Taylor Wimpey	DEVELOPER	LP20151980	policy DM2.1 sets out the Council's proposed policy reflecting the NPPF presumption in favour of sustainable development. The policy is positively worded and is supported as part of these representations.		DM 2.1 Presumption in Favour of Sustainable Development	Support noted	No amendments proposed.
396511	GVA	PLANNING CONSULTANCY	LP20152003	The consortium fully supports Policy DM2 which seeks to promote sustainable development in accordance with NPPF.		DM 2.1 Presumption in Favour of Sustainable Development	Support noted	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152018	Policy DM2.1 the presumption in favour of sustainable development is supported and seems to accord with the PINS advice on including a specific policy to reinforce the NPPF overarching policy drive.		DM 2.1 Presumption in Favour of Sustainable Development	Support noted	No amendments proposed.
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015497	Paragraph 118 of NPPF requires that if significant harm resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated, or, as a last resort, compensated for, then planning permission should be refused. Point 118 of this policy states that "wherever possible [to] address identified impacts of a proposal upon designations that seek to protect and/or enhance the Borough's natural environment". To include the words "wherever possible" would therefore be contrary to NPPF. We welcome the removal		DM 2.2 General Development Principles	Support noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				of the statement "wherever possible€".				
755686	Home Builders Federation		LP20151726	14. The HBF support the removal of the prioritisation of brownfield land from the previous version of this policy. This is considered in conformity with our previous comments and the NPPF.		DM 2.2 General Development Principles	Support noted	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151936	Natural England supports this policy.		DM 2.2 General Development Principles	Support noted	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152140	Policy DM2.2 (now S1.4)(e) refers to the need to address impacts upon designations which seek to protect/enhance the Borough's heritage assets. It should be noted that not all heritage assets are designated as such. Paragraph 4.52- some brownfield sites are important for their heritage value. However, this in itself may not be an impediment to development if approached in a manner which respects this value. Policy DM8.1 5 should explicitly acknowledge this.		DM 2.2 General Development Principles	Comments noted. Agreed that not all assets, built, natural or heritage, will necessarily have a designation. This will be amended.	Criterion e changed to "Have regard to and address any identified impacts of a proposal upon the Borough's heritage assets, built and natural environment."
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151326	Policy DM 2.2 The proviso "subject to economic viability" in the second para seems superfluous.		DM 2.2 General Development Principles	Comment is noted but reference at this point is considered key to ensuring recognition that economic viability is a key component in considering development in North Tyneside.	No amendments proposed
464572	Landowner	PLANNING CONSULTANCY	LP20151486	Support expressed for the policy. As a general comment it is noted and supported that the development of previously developed sites that are not of high environmental value are encouraged where proposals accord with the strategic, development management and / or area specific policies in the Plan. This approach needs to be followed through into the Plan and in particular into policy S7.3		DM 2.2 General Development Principles	Comment noted and support welcomed. The specific details of the site to the rear of Midhurst Road will be considered within the response to policy 7.3 (now Policy S4.3).	No amendments proposed.

				which proposes the allocation of a number of Greenfield sites but does not propose the allocation of previously developed land to the rear of Midhurst Road, Benton (SHLAA ref 298). This is addressed in more detail in the response to policy S7.3.				
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151794	Moving on, we are pleased to see that the General Development Principles of the LPCD (DM2.2 (now S1.4)) include reference to both climate change mitigation (b) and infrastructure capacity (f). Having said this, we would like to see specific reference to the reduction of flood risk from all sources, which is omitted from this section. Equally, whilst the importance of the provision for new or additional infrastructure requirements is recognised within this section, we would emphasise the need for early consultation and phasing plans as part of this principle.		DM 2.2 General Development Principles	Comment noted and the suggested amendments will be incorporated into the Plan as it progresses to the next stage of public consultation.	Reference to supporting a reduction to flood risk from all sources has been added to criteria b of this policy.
830576	Taylor Wimpey	DEVELOPER	LP20151981	policy DM2.2 (now S1.4) setting out the general development principles is also positively worded and is supported as part of these representations.		DM 2.2 General Development Principles	Support noted	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152019	Policy DM2.2 (now S1.4), The initial part of this policy seems sensible in that applying a preference to development sites that are identified and allocated via the plan however the latter part raises some concerns in relation to how this policy would be applied via the development management process as such the following questions need answering as to the function and usability of this policy in line with the requirement of the NPPF paragraph 154 "only policies that provide a clear indication of how a decision maker should react to a development proposal		DM 2.2 General Development Principles	Comments are noted. The stated concerns with the application were not the stated intention... for example concerns regarding making a positive contribution towards evidence based needs for development could be considered with reference to the minimum delivery that is set out for housing, employment and retail provision in the local plan... i.e. the Local Plan is seeking to support development of at least 828 new homes per year.  However, in seeking to clarify its future	The policy has been reclassified as a strategic policy that sets out principles to be guided through the rest of the Local Plan. The policy wording has been revised as follows "Proposals for development will be considered favourably where it can be demonstrated that they would accord with the

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>should be included in the plan"¶. 1. Would any other development proposal (other than those permitted by the initial part of this policy) have to demonstrate compliance with all 6 sub criteria of the policy or would this be a sequential preference applied? 2. Sub criteria (a) states "Make a positive contribution to evidence based need for development"¶ which seems to imply that certainly for residential development once the LPA can demonstrate a deliverable 5 year supply of development, no other development will be permitted, is this the intention of this policy? Persimmon Homes have significant reservations at the usability and intent of this policy as firstly it seems vague and very wide reaching and seems to provide a cap on development which could continue to provide positive development within the North Tyneside area over and above that planned for within this document. The NPPF is clear that housing targets should not be a cap on development and should in all cases be applied as a minima, with that in mind at the very least we would object to the inclusion of sub criteria (a) as this would not allow any development over and above that required (as a minimum) by the Council's 5 year supply or otherwise. This policy as currently worded is confusing and needs additional clarification on its usability and ensure that it does act to restrict or frustrate development which could provide sustainable development in the future.</p>			<p>application between varying types of development the policy has been amended.</p>	<p>strategic, development management or area specific policies of this Plan. Should the overall evidence based needs for development already be met additional proposals will be considered positively in accordance with the principles for sustainable development. In accordance with the nature of development those proposals should:</p> <p>a. Minimise the impact and mitigate the likely effects of climate change and support reduction in flood risk from all sources."</p> <p>Subsequent criteria remain unchanged.</p>
807177	Barmoor Ltd	LANDOWNE R / BUSINESS	LP20152093	RE New Sites: Land to rear of Front Street, Seaton Burn Our client supports the revision		DM 2.2 General	Comments noted. This site lies wholly in the Green Belt. The Council has undertaken a	No amendments proposed.

809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151328	Policies S3:1 and DM3:2 Green Belt. CPRE strongly supports these policies. S3.1 could usefully include maintaining the openness of the countryside as an objective of Green Belt, in line with NPPF. CPRE particularly welcomes the decision reported in paragraph 4.61 not to propose any alterations to or deletions from the Green Belt. We also support Policy AS 3:5 Killingworth Open Break.		S 3.1 The Green Belt	Support for the approach taken is noted. Policy S3.1 (now S6.1) will be amended, with the wording of criteria e) being amended to explicitly refer to the openness of the countryside, as well as encroachment.	Minor amendment to criteria (e) to include openness of countryside.
442914	Big Tree Planning Ltd	PLANNING CONSULTANCY	LP20151515	I write to make representations to the above document (the 'Plan') on behalf of Mrs Jean Burke, who together with North Tyneside Council is the landowner of a potential development site at land east of Kirklands, Burradon (the 'Site'). The Site has previously been submitted to the Strategic Housing Land Availability Assessment ('SHLAA') and forms site reference 305 in that document. It is considered that the Site is suitable for a residential-led development comprising approximately 500 dwellings with associated infrastructure improvements and local service provision possibly including an extension to		S 3.1 The Green Belt	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now DM 4.5). Supply from these sources will continue to	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the Burradon Community Primary School and Recreation Centre located to the west. A site location plan is attached to this letter. Practically all land within the existing urban area is proposed within the Plan to be developed with the exception of the retention of much-needed areas of open space; the loss of which would have a significant detrimental impact on the quality of life of residents throughout the Borough. As practically all developable land outside the existing urban area is designated as Green Belt it is evident that some Green Belt releases are unavoidable if the Council are to meet the objectively assessed housing need. Whilst the NPPF stresses the great importance of Green Belts as a means of preventing urban sprawl by keeping land permanently open, the overarching presumption in favour of sustainable development requires local plans to meet objectively assessed needs. The NPPF allows for Green Belt boundaries to be altered "in exceptional circumstances" as part of the preparation or review of a local plan, with the focus on promoting sustainable patterns of development. It requires consideration of the consequences of channelling development towards non-Green Belt locations, and also allows land to be excluded from the Green Belt which is unnecessary to be kept permanently open. As discussed above, there is not sufficient land available outside of the Green Belt in North Tyneside to meet the Council's objectively assessed housing need. If existing Green Belt boundaries are to remain unaltered the only option is for the adjoining</p>			<p>come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 305). A Review has been undertaken to support the Local Plan, this concludes that there are currently no exceptional circumstances evident to require the release of Green Belt land for development. The boundaries identified are considered to be permanent and able to endure beyond the plan period. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.</p>

				<p>authorities of Northumberland County Council and Newcastle City Council to accommodate the undersupply. However, Newcastle City Council has just adopted its new local plan, and Northumberland County Council is at a similar stage to North Tyneside. What's more, both adjoining authorities are relying on significant Green Belt releases in order to accommodate their own objectively assessed housing need. As such, the displacement of North Tyneside's housing requirement to its neighbouring authorities is no more preferable in terms of Green Belt policy. In addition, it is not considered that channelling development to locations outside of North Tyneside would represent a significantly more sustainable option. The Government has made abundantly clear, both in the NPPF and in Ministerial statements; the urgent need to boost significantly the supply of housing and, as far as is consistent with other policies, to meet fully the needs of the relevant housing market area. Set against this is the great importance attached to preserving North Tyneside's Green Belt. Inspectors appointed to examine other local plans, such as the Reigate and Banstead Core Strategy Local Plan and the County Durham Plan, have indicated that the exceptional circumstances required to justify Green Belt releases through the plan-making process only exist if there is an overriding need for development to achieve the strategic objectives and policies of the plan, and either (1) all possible options for development outside the Green Belt have been exhausted,</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>or (ii) the development would represent a significantly more sustainable option than development on non- Green Belt land. In addition, Inspectors have indicated that there should be either no conflict with the purposes and integrity of the Green Belt or, at worst, limited conflict. As explained above, the overriding need for housing is required to achieve the strategic objectives of the Plan and all possible options for development outside the Green Belt have been exhausted. As such, some strategic Green Belt releases will be required in order for the Council to meet their strategic objectives. Potential Green Belt release sites should be considered individually to determine whether there would be any conflict with the purposes and integrity of the Green Belt. The development of the Site east of Kirklands, Burradon would not lead to the unrestricted sprawl of large built-up areas or neighbouring towns merging into one another; and it would not result in significant encroachment into the countryside. It would have no impact on any historic town, and as mentioned above there is not sufficient derelict and other urban land available within the Borough. As such, if it were developed, there would be no conflict with the purposes and integrity of the Green Belt. The Site could accommodate approximately 500 dwellings, and it would be proposed to maintain a large area of open space towards the centre of the Site, where there is an existing pond. A view of the proposed alteration to the Policies Map is attached to this letter, which shows the Site</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				as a Preferred Housing Development Site as well as the creation of a large triangular area of green or open space at the Site's centre. There is a legal agreement in place between North Tyneside Council and Mrs Jean Burke which stipulates that the Council's land would be developed and used to provide access thus generating a very significant capital receipt for the Council A full Transport Assessment carried out by Fairhurst has shown that a suitable access can be achieved from the existing roundabout to the south of the Site without the need for any other 3rd party land.				
803900	Northumb erland County Council	LOCAL AUTHORITY	LP20151528	The Council supports the inclusion of references to preventing the merger of Killingworth with Wideopen Dudley/Annitsford and Seghill; Shiremoor/Backworth with Seghill and Seaton Delaval/Holywell; Whitley Bay with Seaton Delaval/Holywell and Seaton Sluice in criteria b of Policy S3.1. We would however welcome reference to the role of the Green Belt in preventing Dudley and Seaton Burn merging with Cramlington in criteria b.		S 3.1 The Green Belt	The importance of preventing merger of urban areas in North Tyneside and Northumberland is reflected in criteria b) of S3.1 (now S6.1). However it is acknowledged that there is no reference to Cramlington in the policy, therefore criteria b) will be amended with the addition of Seaton Burn/Dudley/Cramlington.	Reference to Seaton Burn/Dudley/Cramlington added to criteria (b)
755686	Home Builders Federation		LP20151727	15. The Green Belt section of the plan indicates that there are no exceptional circumstances to warrant a change to the Green Belt boundary. Paragraph 4.54 notes that there are sufficient sustainable and suitable areas outside of the Green Belt to accommodate the preferred growth strategy until 2032. Providing that the land is also deliverable this would appear a logical conclusion. 16. The HBF does, however, have concerns with regards the level of housing provision within the plan and recommends a		S 3.1 The Green Belt	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032 in order to meet the OAN. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when	No amendments proposed.

				higher overall housing requirement. It is noted that further capacity still exists outside of the Green Belt and as such any further uplift in the housing requirement may not warrant a release of Green Belt, although this would obviously be subject to the level of any uplift.			judged against the criteria of Policy DM7.5 (now 4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. Given the identified OAN, there are no exceptional circumstances to require release of Green Belt land for development. This is the Council's preferred and evidenced housing requirement to 2032. This position will continue to be monitored through the plan period.	
808917	BDW North East	LAND DEVELOPER	LP20151772	BDW note that the council have undertaken an assessment of Green Belt boundaries. We are supportive of the council undertaking the Green Belt review and note that the council has concluded that "no exceptional circumstances exist to require amendments to the existing extent of North Tyneside's Green Belt". The plan states that there are sufficient sustainable and suitable areas to accommodate the preferred growth strategy until 2032, outside of the Green Belt. BDW believe a Green Belt review is needed. The council should consider releasing Green Belt land to plan for a higher housing requirement than proposed in the LPCD and to meet targets. The council must review the Green Belt boundaries to meet the current target and allow them to plan for a higher housing requirement.		S 3.1 The Green Belt	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032 in order to meet the OAN. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now 4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. 				in this representation.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152069	<p>RE New Site: Russell Square On behalf of our client Barmoor Limited we are pleased to provide these representations to the North Tyneside Local Plan Consultation 2015 (February 2015). These representations aim to provide assistance to North Tyneside Council as you continue the preparation of the Local Plan and relate specifically to our client's landholdings west of Russell Square, Seaton Burn (please see attached plan at Appendix A). Our client (Barmoor Limited) considers that their site should be removed from the Green Belt and allocated for residential development, given the inappropriate and unjustified Green Belt boundary, as well as the site's sustainable location in Seaton Burn. These representations have been prepared in this context. Paragraph 83 of the NPPF is clear that Green Belt boundaries can be reviewed during the preparation or review of a Local Plan and that at this time, authorities "should consider the Green Belt boundaries having regard to their intended permanence in the long term". Furthermore, paragraph 85 of the NPPF states that when defining Green Belt boundaries local planning authorities should, inter alia, define boundaries clearly using physical features that are readily recognisable and likely to be permanent and not include land which it is unnecessary to keep permanently open. Paragraph 4.54 of the supporting text to Policy S3.1 states that due to the use of previously safeguarded land for</p>		S 3.1 The Green Belt	<p>The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (DM4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 148). The SHLAA currently concludes that this site is unsuitable for residential development. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. The boundaries identified are considered to be permanent and able to endure beyond the</p>	No amendments proposed.

				<p>potential new allocations in the emerging Local Plan, there is no requirement to review Green Belt boundaries in North Tyneside. However, our Client considers that the opportunity remains to scrutinise the existing Green Belt boundaries and make appropriate amendments. This is to ensure that the defined boundaries meet the requirements of paragraph 85 of the NPPF and to ensure that flexibility is provided to meet development needs without revising the Green Belt boundary immediately after this plan period. An assessment of the Green Belt boundaries around Seaton Burn confirms that it is necessary to amend the boundaries to meet the requirements of paragraph 85 of the NPPF. Although our Client's site currently lies within the Green Belt, it clear that its inclusion is not necessary to keep the Green Belt permanently open by virtue of its location, which is surrounded on three sides by residential development. As such, the existing Green Belt boundary is not appropriate and should be revised in order to ensure consistency with paragraph 85 of the NPPF, which states that land should not be included if it is unnecessary to keep it permanently open. In addition, there are no justifiable reasons to retain the Site within the Green Belt in the context of the purposes of the Green Belt, in line with national planning policy (NPPF paragraph 80). Development of the site would not affect the purposes of the Green Belt as defined in paragraph 80 of the NPPF, or conflict with Policy S3.1 which seeks to ensure "the separate character of Seaton</p>			<p>plan period. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Burn". It should also be highlighted that the Council's own Green Belt Review 2015 assessed the site as making "a very limited contribution to Green Belt objectives" outlined in NPPF paragraph 80, and that at most, it may make a partial contribution towards directing development towards brownfield sites. It was acknowledged that the site presents potential for removal from the Green Belt. Our Client therefore recommends that the Green Belt boundary around Seaton Burn is appropriately revised in order to exclude our client's site and provide an opportunity for a suitable and deliverable housing site to come forward. [Conclusion] In summary, our client requests that land west of Russel Square is removed from the Green Belt and allocated for housing in the Local Plan. The inclusion of the site within the Green Belt is clearly unjustified, as it is not necessary to keep it permanently open, given that it is surrounded by residential development on three sides. The Green Belt boundary should therefore be appropriately revised to exclude our client's site. Exclusion of our client's site from the Green Belt would enable a sustainable site for housing to come forward and contribute towards meeting the needs of the local area and Borough. Exceptional circumstances exist for the site's removal from the Green Belt, including the need to meet housing requirements, a lack of suitable sites in Seaton Burn and the opportunity to remove current anti-social behaviour at the site. Our Client trusts that these representations will be</p>

				<p>intended permanence in the long term".</p> <p>Furthermore, paragraph 85 of the NPPF states that when defining Green Belt boundaries local planning authorities should, inter alia, define boundaries clearly using physical features that are readily recognisable and likely to be permanent and not include land which it is unnecessary to keep permanently open. Paragraph 4.54 of the supporting text to Policy S3.1 states that due to the use of previously safeguarded land for potential new allocations in the emerging Local Plan, there is no requirement to review Green Belt boundaries in North Tyneside. However, our Client considers that the opportunity remains to scrutinise the existing Green Belt boundaries and make appropriate amendments. This is to ensure that the defined boundaries meet the requirements of paragraph 85 of the NPPF. An assessment of the Green Belt boundaries around Seaton Burn confirms that it is necessary to amend the boundaries to meet the requirements of paragraph 85 of the NPPF. Our Client's site currently lies within the Green Belt. However, it is not necessary to keep this area of the Green Belt permanently open, given that the site is surrounded on three sides by the A1, the A19 and Front Street, with the urban area of Seaton Burn to the immediate south east. A more appropriate and defensible western boundary to the Green Belt would be Front Street, with an option to exclude all of the land to the east of the A1/west of Seaton Burn from the Green Belt or just exclude our Client's site with the footpath and woodland</p>			<p>small number of areas are designated as such, through S3.3 (now S1.7) and on the Policies Map and these areas will potentially be required to meet the development needs of the borough post-2032. However, for the reasons set out in the Green Belt Review, it is considered that this land should remain designated as Green Belt over the plan period.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>to the south remaining within the Green Belt. There are no justifiable reasons to retain the Site within the Green Belt in the context of the purposes of the Green Belt, in line with national planning policy (NPPF paragraph 80). It is proposed that the site is excluded from the Green Belt to form part of the A19 Economic Corridor. The exclusion of the site would represent a modest local review of the Green Belt boundary that will create a sustainable extension to an existing settlement and provide sufficient land for future economic use. The exclusion of our Client's site from the Green Belt would not affect the purposes of the Green Belt as defined in Policy S3.1 of the Local Plan. It is considered that the proposed amendment to the Green Belt boundary would still ensure the "separate character of Seaton Burn" and would not represent an encroachment into the countryside given that it is bounded on three sides by the A1, A19 and Front Street. Despite expensive security measures put in place by the owners, the site is subject to anti-social behaviour on a regular basis, including the unlawful use by motor vehicles, vandalism, unlawful grazing and fly-tipping. This has proven expensive to deal with and is detrimental to the operation of neighbouring businesses and the setting of Seaton Burn. In addition, it is important to highlight that the Council's own Green Belt Review 2015 demonstrates that the site makes little contribution towards the objectives of the Green Belt outlined in NPPF paragraph 80 and as such recognises that the site makes a</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>limited contribution to the Green Belt. It therefore identifies the site as having potential for removal from the Green Belt. Exceptional circumstances exist for the release of the site from the Green Belt. These include the unique strategic location of the site, specific demand from Nixon Kitchens and others, a lack of alternative sites, and the opportunity to remove the unsightly effects of anti-social behaviour. Our Client therefore recommends that the Green Belt boundary around Seaton Burn is amended to remove the site and provide an opportunity for sustainable economic development to deliver the needs of the Borough and local area. If the site is not to be removed from the Green Belt, then it is considered that it should be identified as safeguarded land. This will provide flexibility for the site to come forward for employment uses at an appropriate time in the longer term, and in response to the market, whilst ensuring compliance with paragraph 85 of the NPPF. [Conclusion] To summarise, our Client requests that land to the rear of Front Street, Seaton Burn be removed from the Green Belt and allocated for economic development in the North Tyneside Local Plan. The site is in a unique and advantageous location for employment development due to it being adjacent to the A1/A19 junction. There are no justifiable reasons to retain the Site within the Green Belt in the context of the purposes of the Green Belt, in line with NPPF paragraph 80 and exceptional circumstances exist. The exclusion of the site from the Green Belt</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				would represent a modest local review of the Green Belt boundary that will provide a suitable and attractive opportunity for employment uses. If the site is not to be removed from the Green Belt, then in accordance with the Council's Green Belt Review it should be identified in the revised Local Plan as safeguarded land, to provide appropriate flexibility for it to come forward at an appropriate time in the longer term, and in response to the market. Our Client trusts that these representations will be taken into account during the continued preparation of the North Tyneside Local Plan, and looks forward to containing the proactive engagement with the Council during future consultations. . ADDITIONAL SUPPORT PROVIDED BY Nixons Kitchens and Maclean Electrical - statement provided as response to Policy S5.2.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152099	RE New Site: Land to south of Meadow Drive, Seaton Burn. On behalf of our client Barmoor Limited we are pleased to provide these representations to the North Tyneside Local Plan Consultation 2015 (February 2015). These representations aim to provide assistance to North Tyneside Council as you continue the preparation of the Local Plan and relate specifically to our client's landholdings south of Meadow Drive, Seaton Burn (please see attached plan at Appendix 1). Our client (Barmoor Limited) considers that their site should be removed from the Green Belt and allocated for residential development, given the site's sustainable location in Seaton Burn. These		S 3.1 The Green Belt	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. 				<p>representations have been prepared in this context. Policy S3.1 Paragraph 83 of the NPPF is clear that Green Belt boundaries can be reviewed during the preparation or review of a Local Plan and that at this time, authorities "should consider the Green Belt boundaries having regard to their intended permanence in the long term". Further more, paragraph 85 of the NPPF states that when defining Green Belt boundaries local planning authorities should, inter alia, define boundaries clearly using physical features that are readily recognisable and likely to be permanent and not include land which it is unnecessary to keep permanently open. Paragraph 4.54 of the supporting text to Policy S3.1 states that due to the use of previously safeguarded land for potential new allocations in the emerging Local Plan, there is no requirement to review Green Belt boundaries in North Tyneside. However, our Client considers that the opportunity remains to scrutinise the existing Green Belt boundaries and make appropriate amendments. This is to ensure that the defined boundaries meet the requirements of paragraph 85 of the NPPF and to ensure that flexibility is provided to meet development needs without revising the Green Belt boundary immediately after this plan period. An assessment of the Green Belt boundaries around Seaton Burn confirms that it is necessary to amend the boundaries to meet the requirements of paragraph 85 of the NPPF. Our Client's site currently lies within the Green Belt. However it is not necessary to</p>			<p>analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 308). The SHLAA currently concludes that this site is unsuitable for residential development. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. The boundaries identified are considered to be permanent and able to endure beyond the plan period. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>keep this area of the Green Belt permanently open. The Site is adjoined by housing to the north and west. Development of the Site would not extend the settlement further south than the residential area to the west along Burnbridge Road. Therefore, the release of the Site from the Green Belt would not compromise the purposes of the Green Belt defined in Policy S3.1, which includes ensuring the "separate character of Seaton Burn". It is therefore considered that the Green Belt boundary should be revised so that it runs adjacent to the Seaton Burn. This would ensure that the separate character of Seaton Burn is maintained whilst enabling suitable land to come forward to contribute towards delivering future housing needs. There are no justifiable reasons to retain the Site within the Green Belt in the context of the purposes of the Green Belt, in line with national planning policy (NPPF paragraph 80). It is proposed that the Site is excluded from the Green Belt to provide a modest sustainable extension to the settlement and contribute towards meeting housing needs over the plan period. It should also be highlighted that the Council's own Green Belt Review 2015 assessed the site as making "a limited contribution to Green Belt objectives" as outlined in NPPF paragraph 80. The review recognised the opportunity to revise the Green Belt boundary to run adjacent to the Seaton Burn. As such, it was acknowledged that the site presents potential for removal from the Green Belt. Exceptional circumstances exist for the release of the site from the Green Belt.</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>In addition to the need to meet housing requirements, these circumstances comprise the lack of suitable alternative sites in Seaton Burn, along with removing the existing anti-social behaviour problems. Our Client therefore recommends that the Green Belt boundary around Seaton Burn is amended to remove the site and provide an opportunity for sustainable residential development to contribute towards the delivery of the housing needs of the Borough and local area. Conclusion To summarise, our Client requests that land South of Meadow Drive, Seaton Burn be removed from the Green Belt and allocated for residential development in the North Tyneside Local Plan. The site's inclusion within the Green Belt is not justified in the context of the purposes of the designation, in line with NPPF paragraph 80. The exclusion of the site from the Green Belt would represent a modest local review of the Green Belt boundary and would not compromise the separate character of Seaton Burn. Removal of the site from the Green Belt and allocation for housing would provide a sustainable location for residential development, which will ensure that a sufficient supply of new homes is provided in Seaton Burn over the plan period. Exceptional circumstances exist for the site's removal from the Green Belt, including the need to meet housing requirements, a lack of suitable sites in Seaton Burn and the opportunity to remove current antisocial behaviour at the site. Our Client trusts that these representations will be taken into account during the preparation of</p>

				document in this chapter. Whilst it is recognised there has been an alteration to this policy and the recognition of the green belt as a biodiversity resource, this policy still does not meet the requirements of Paragraph 81 of NPPF states that LPAs should plan positively to enhance the beneficial uses of Green Belt, such as "biodiversity. Recent issues at Backworth, which resulted in significant damage to a Local Wildlife Site, highlight that a pro-active approach to Green Belt enhancements by the LPA, must be included as part of the strategic planning approach if the Green Belt is to provide multi-functional benefits as suggested. Current plan policies will fail to address this i.e.; agricultural land use.			there are currently no exceptional circumstances evident, as required by NPPF, to support any change to the current Green Belt boundaries, either deletion or addition . The boundaries identified are considered to be permanent and able to endure beyond the plan period.	
638268	Natural History Society of Northumbria		LP20151899	Whilst we recognise the significant alteration to this policy and the recognition of the green belt as a biodiversity resource, this policy still does not meet the requirements of Paragraph 81 of NPPF states that LPAs should plan positively to enhance the beneficial uses of Green Belt, such as biodiversity. Recent issues at Backworth, which resulted in significant damage to a Local Wildlife Site, highlight that a pro-active approach to Green Belt enhancements must be included as part of the strategic planning approach if the Green Belt is to provide multi-functional benefits as suggested. In particular if there is to be large scale building on green sites in North Tyneside then there will need to be equally large scale sites for ecological mitigation, these could be targeted in the Greenbelt.		DM 3.2 Positive uses within the Green Belt	Policy DM3.2 (now Policy DM1.6) encourages appropriate and beneficial proposals within the Green Belt. As highlighted through the Green Belt Review, there are currently no exceptional circumstances evident, as required by NPPF, to support any change to the current Green Belt boundaries, either deletion or addition . The boundaries identified are considered to be permanent and able to endure beyond the plan period.	No amendments proposed.

				<p>sentence of the policy states that; "These strategic areas of land will be maintained in there open state for at least the plan period' 18. Whilst it is recognised that this is the intention of the plan such a statement within policy provides very little flexibility for an early review of the plan, if required. The NPPF, paragraph 85, identifies that safeguarded land can be released upon plan review. To provide greater flexibility the HBF considers the plan should consider what conditions would trigger a review to enable safeguarded land to be released. The plan currently does not indicate any triggers for such a review. 19. To promote greater flexibility within the plan the Council may wish to consider re-designating some of the safeguarded land as contingency land. This is land which can be brought forward, subject to criteria, to provide additional land within the plan period without the need for a full review. This land can then provide flexibility to support lower rates of delivery than anticipated from the allocations or in reaction to higher than anticipated rates of housing growth. Such an approach has been</p>			<p>land in the supporting text. The NT Population and Household Forecasts provide the latest available evidence of housing need over the plan period from 2011 to 2032. The Council must plan to meet this need by allocating sites for development. It is considered that these allocations are deliverable/developable over the plan period to 2032. However, it is acknowledged that this position needs to be reviewed throughout the plan period through appropriate monitoring indicators, any future amendment to the Green Belt or safeguarded land would have to be made through a review of the Local Plan.</p>	
808917	BDW North East	LAND DEVELOPER	LP20151773	<p>We note that the council has identified an area of safeguarded land between the Green Belt and main urban area. The provision of safeguarded land is in accordance with NPPF, para 85. It is important that the level of safeguarded land and its location is adequately justified. The council fails to set out the level of safeguarded land and its location. The council must set out the level of safeguarded land identified and the locations</p>		S 3.3 Safeguarded Land	<p>Whilst the location of the safeguarded land is not outlined on a site-specific basis in Policy S3.3 (now 1.7), the areas proposed for this designation are identified on the Policies Map. 				successfully in a number of Local Plans, including North Lincolnshire. The council should consider re-designating some of the safeguarded land as housing allocations or contingency land.				
396253	Northumberland Estates	DEVELOPER	LP20151809	<p>Policy S3.3 states that there is an area of safeguarded land between the Green Belt and Main Urban Area that is not required for development within the Local Plan period. This safeguarded land is located on the Policies Map adjacent to the A19, directly north of Site 28 West Shiremoor North which has been granted planning permission for 290 dwellings (14/01687/OUT), and Backworth Park which has been granted planning permission for 590 dwellings (13/00781/OUT). The Northumberland Estates consider that this area of land should not be allocated as a Safeguarded Area, as it is likely to be required to meet development needs within the plan period to 2031. The Local Plan emphasises the importance of the A19 Corridor as a key area for growth (Policy S5.1 and Policy AS5.6), given its strategic location for employment and housing land. The Local Plan Policies Map indicates that along the west of the A19 there is significant housing development (West Shiremoor North and Backworth Park), and along the east of the A19 there is the strategic site allocation "'Killingworth Moor' which will include housing and employment land. The safeguarding of this area would effectively sterilise an important area of land outside the Green Belt within the A19 Corridor which is of regional economic significant and a key driver of future growth within North Tyneside. It is</p>		S 3.3 Safeguarded Land	<p>The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032, including the sites specifically highlighted in this representation. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now DM4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. This land is included in the SHLAA (Site 11 now Site E0101) but has been assessed as unsuitable for residential development and therefore undevelopable. This conclusion is due to the site being the location of a 'category 1 designation' in the form of the Backworth Medieval Village Scheduled</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				considered that safeguarding this site for the duration of the plan period limits the development potential of the site, and also limits the key benefits that releasing the site and allocating additional housing or employment land would have upon the area. The Northumberland Estates suggest that the Local Plan includes a more flexible policy that promotes this site as an opportunity site for needs that may arise in the plan period, for example educational provision, leisure, or tourism use, which are not provided for elsewhere in the Plan.			Ancient Monument (SAM). It is considered that development would harm the fundamental character of this feature and that it would not be possible to deliver a development which would be appropriate. Therefore, this site has not been considered for residential allocation.	
591119			LP20151890	I am pleased that the small areas marked as site 4 and site 8 are now to be designated as Safeguarded land. Small compensation for the huge loss of all the other open spaces, most recently Whitehouse Farm "" a travesty of justice. Let's hope that really does mean it can't be developed unless there is nowhere else! To, once again imitate the words you used when describing your aims for Whitley Bay, " the aim is to reduce the concentration of these developments and support WEST MOOR to become / continue to be a sustainable community".		S 3.3 Safeguarded Land	Support for proposed designation of safeguarded land noted. Sites 4 and 8 are included for assessment in the SHLAA (Sites 333 & 056) and were considered as potential allocations for development through the Local Plan process. However, on consideration of a range of evidence, expert advice and comments received through the consultation process, it has been determined that it would be best to be retain as safeguarded land, potentially meeting the development needs of the borough post-2032.	No amendments proposed.
638268	Natural History Society of Northumbria		LP20151895	As it stands the rate of proposed growth is so considerable that there is no evidence based justification for the safeguarding of additional land for development beyond the Plan period, therefore all safeguarded sites should be removed from the Plan. We know that the use of the term "safeguarded land" is confusing to the public who assume that it is safeguarded FROM development, not		S 3.3 Safeguarded Land	The levels of growth identified in the Local Plan are not considered to be over-ambitious but are realistic, having been fully evidenced by an in-depth analysis of need. The NT Population and Household Forecasts provide the latest available evidence of housing need over the plan period from 2011 to 2032. The Council must plan to meet this need by allocating sites for	This policy is now S6.3. The following paragraph has been added in order to clarify the role of safeguarded land: "As a result, through this Local Plan the remaining areas of land that are located between the urban area

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				safeguarded FOR development after the plan period. We know this because the residents of West Moor made this mistake during the production of the last local plan. If NTDC wishes to continue to include "safeguarded" land in the plan then it should change the wording used so that it is clear to the public, for example a clearer definition would be "Proposed for future development".			development. It is considered that these allocations are deliverable/developable over the plan period to 2032. Having defined the Green Belt and the preferred sites to meet the identified development requirements, it is considered necessary to identify areas of safeguarded land that will potentially be required to meet the development needs of the borough post-2032. The designation of this land will offer the flexibility in the long-term strategic planning process. The term 'safeguarded land' is a formal planning policy designation the role of which, as outlined in paragraph 85 of NPPF, is land that is "between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period"	and the Green Belt are identified as safeguarded land. In line with national policy requirements, the safeguarded land identified on the Policies Map is identified to meet development needs beyond the plan period and therefore is not allocated for development at the current time."
830571	Persimmon Homes	DEVELOPER	LP20152022	Policy S3.1 The Green Belt is generally supported alongside policies DM3.2-4 for related uses. Having reviewed the Green Belt review however the final conclusion of this report is to ensure suitable flexibility that should any future monitoring within the plan process identify the exceptional circumstances for revisions to the Green Belt this would trigger the need for an early plan review process. This identified in paragraph 10.4 on page 47 of your report recommends 3 such example situations where this could happen: " A shortage of available, developable land for housing and employment purposes in order to meet the growth requirements set out in the local plan: " A significant encroachment into the parcel		S 3.3 Safeguarded Land	As highlighted through the Green Belt Review, there are currently no exceptional circumstances evident, as required by NPPF, to support any change to the current Green Belt boundaries. The boundaries identified are considered to be permanent and able to endure beyond the plan period. However, it is acknowledged that this position needs to be reviewed throughout the plan period through appropriate monitoring indicators, any future amendment to the Green Belt or safeguarded land would have to be made through a review of the Local Plan. 							closely with both Northumbrian Water and the Environment Agency.	
						AS 3.5 Killingworth Open Break	It has been assessed that Killingworth Open Break would be a suitable Local Green Space. Local Green Space designation is similar to the Open Break designation that originated in the UDP 2002.	Policy amended to "Local Green Space at Killingworth Open Break" with wording changes to reflect the change in status.
805490		RESIDENT	LP20151043	Killingworth Open Break. This is very welcomed for the open aspect and wild life corridor it brings.		AS 3.5 Killingworth Open Break	Support noted.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151330	Policies S3:1 and DM3:2 Green Belt. CPRE strongly supports these policies. S3.1 could usefully include maintaining the openness of the countryside as an objective of Green Belt, in line with NPPF. CPRE particularly welcomes the decision reported in paragraph 4.61 not to propose any alterations to or deletions from the Green Belt. We also support Policy AS 3:5 Killingworth Open Break.		AS 3.5 Killingworth Open Break	Support noted.	No amendments proposed.
805535			LP20151562	Killingworth Open Break. This is very welcome for the open aspect and wild life corridor it brings. Could we have another open break plus a re-designated wild life corridor between the housing estates that back on to Killingworth Lane (B1317) and the Proposed developments on K / Moor and Holystone, or redefine the open break(-the only reason the break is as defined on the map is because of the issues with Methane gas caused because of the filling in of the old tip, which again you cannot build on!).		AS 3.5 Killingworth Open Break	Comments noted. The Killingworth Open Break was designated in the UDP due to the contribution it makes to the character and appearance of the Killingworth Village conservation area. It is proposed to designate it as a Local Green Space in the Local Plan. As part of the masterplanning associated with the potential development of Killingworth Moor, and as set out in the "Strategic Site Allocations" policy, the site will be subject to full assessment regarding green space provision and impact on landscape character.	No amendments proposed.
473231		LANDOWNER / BUSINESS	LP20151598	Policy AS3.5 relates to the Killingworth Open Break and states that development within that area will not be permitted where it		AS 3.5 Killingworth Open Break	Comments noted. The role and continue status of the Killingworth Open Break has been reviewed as part of this Local Plan	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				would adversely affect the open character of the area and the special setting of the Killingworth Village conservation area. As suggested above, the extent of the Open Break should be amended to enable a Preferred Housing Development Site whilst retaining a significant and more defensible break between Killingworth Village and the built up areas to the south.			process. The existing extent of the break is considered robust and necessary to maintain the overall sense of openness to safeguard the setting of Killingworth Village conservation area. As such no amendment is proposed to the already identified extent of the open break. It is proposed to be designated in the Local Plan as a Local Green Space.	
755686	Home Builders Federation		LP20151729	20. The importance of maintaining an open break between settlements to stop coalescence and protect the setting of heritage assets is acknowledged. The policy does, however, suggest a moratorium on development within this area without any assessment of the importance that various pieces of land within the open break make to these objectives or consideration of the sustainability credentials of such parcels of land. To justify the policy the HBF recommends that the Council undertake further work to ascertain the importance of the various land parcels which form the open break.		AS 3.5 Killingworth Open Break	The Killingworth Open Break designation is a specific policy tool included in the UDP designed to protect the character of Killingworth Village and represents a relatively small area of the Borough as a whole. Further review of the break has been undertaken to further define its role and importance. It has been assessed that the open break be designated as a Local Green Space in line with NPPF guidance.	No amendments proposed.
805556			LP20151974	Killingworth Open Break. This is very welcomed for the open aspect and wild life corridor it brings. Could we have another open break, wild life corridor between the housing estates that back on to Killingworth Lane (B1317) and the Proposed developments on K / Moor and Holystone. Running from the Seaton Burn waggon way wildlife corridor along the side of the B1317 road to the old R.E.M.E. site which has planning permission for Bellway housing. This would stop the merging of communities and retain a measure		AS 3.5 Killingworth Open Break	Comments noted. The Killingworth Open Break was designated in the UDP due to the contribution it makes to the character and appearance of the Killingworth Village conservation area. It is proposed to be designated in the Local Plan as a Local Green Space. As part of the masterplanning associated with the potential development of Killingworth Moor, and as set out in the "Strategic Site Allocations" policy, the site will be subject to full assessment regarding green space provision and impact on	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				of green open space on the upper East side of Killingworth Moor, and fulfil objectives of AS7.4 (d.& e.)			landscape character.	
396511	GVA	PLANNING CONSULTANCY	LP20152004	Policy AS3.5 proposes to retain the Killingworth Open Break (from that set out in the North Tyneside UDP) principally to protect Killingworth Conservation Area. The consortium supports the retention of the settlement break in its current alignment but would object to any increase in its extent into the land identified as a strategic allocation at Killingworth Moor under Policy AS7.4. A master planning exercise will be undertaken by the consortium for the Killingworth Moor site with the Council and in line with Policy AS7.4. However, as set out in specific comments to AS7.4 below, the extent of any additional separation of existing built up areas should be determined through that masterplan and not within an expanded Settlement Break or defined on the proposals map. The consortium therefore supports the settlement break in its current form but would resist any eastwards expansion of the policy.		AS 3.5 Killingworth Open Break	Comments noted. The Killingworth Open Break was designated in the UDP due to the contribution it makes to the character and appearance of the Killingworth Village conservation area. It is proposed to be designated in the Local Plan as a Local Green Space. As part of the masterplanning associated with the potential development of Killingworth Moor, and as set out in the "Strategic Site Allocations" policy, the site will be subject to full assessment regarding green space provision and impact on landscape character. Decisions on where any green space provision is proposed will be subject to full assessment and consultation with relevant stakeholders.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152143	Policy AS3.5- English Heritage welcomes this policy.		AS 3.5 Killingworth Open Break	Support noted.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151331	Policy S4:1. Neighbourhood Plans. CPRE supports this policy and is willing to advise communities that wish to establish Neighbourhood Plans.		S 4.1 Supporting Neighbourhood Planning	Support noted.	No amendments proposed.
898630			LP2015903	I support any initiative to increase the skills of local people to help them into jobs. We do not need an influx of people into the borough that will turn it into one big housing estate		Business support, skills, training	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				with unsightly industrial units, but we do need to support the people who already live here into long term employment.			positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough.	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151338	Typo: para 5:42 reference should be to policy DM5.7 not DM5.6		Business support, skills, training	Comment noted. Wrong policy reference, this will be amended.	Para 5.42 new refers to policy DM5.7.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151332	Para 5.7 notes that 50% of the residents of North Tyneside commute out of the Borough for work. Given that the Newcastle-Gateshead Plan has recently been approved with high housing provision partly stemming from a strategic commitment to house their growing workforce in their plan area, modelling for North Tyneside employment and housing needs is unlikely to follow past trends. It is not clear that this policy intervention has been taken into account.		Economic Development	Comment noted. The numbers of jobs are based on the work of economic analysts who have produced an Employment Land Review (ELR) for North Tyneside (2015). This analyses many contributing factors but draws upon the economic forecasts from the North East Local Economic Partnership and has considered the relationship of jobs between North Tyneside and its neighbouring authorities including the employment Land Position Statement agreed in preparation of the NewcastleGateshead Local Plan. The Council have worked closely with its neighbouring authorities to ensure that planned growth across the authorities is complementary and the growth for North Tyneside would require a change not only in the level of migration from Newcastle to North Tyneside, but also in the proportion of residents living and working within North Tyneside.	No amendments proposed.
805615	Lambert Smith	PLANNING CONSULTAN	LP20151657	Finally, it is worth reiterating that the Port has previously suggested that the emerging plan		Economic Development	Comment noted. The potential for a specific Port of Tyne policy has been considered.	No amendments proposed.

	Hampton	CY		<p>include a standalone policy relating to its land holdings which could simplify the overall policy approach. The suggested wording is set out again below for ease of reference. This is as you are aware also something that has been discussed with South Tyneside's planning authority given the Port's land interests within its administrative area. The Port would welcome further discussions with the Council in this regard. Supporting the economic growth and prosperity of North Tyneside through the future development of the Port of Tyne on the north bank of the River Tyne to enable it to adapt and operate efficiently as a key strategic gateway to trade, including support for port related development and expansion for port-related uses. The Port of Tyne plays a significant role in the economic growth, investment and prosperity of North Tyneside, both directly and indirectly. The port benefits from "permitted development" rights to approve port related development on land in their ownership. However, it is recognised that as the Port continues to evolve it may wish to expand its port related activities onto newly acquired land. In the future it is also acknowledged that the Port, or its tenants, may come forward with proposals for industrial and business type uses that cannot be classed as port related development. The Council supports the development of the Port but will assess any proposals on their own merits as they come forward having regard to the more general policies in the plan that support advanced engineering, low carbon,</p>			<p>However, as is expressed within the comment here the Port benefits from permitted development rights for port related uses. The Council has expressed its support for the role of the Port and its importance for the economic prosperity of North Tyneside within the Local Plan. Proposals for development that fall outside of the permitted development rights of the Port are also actively supported through the wider economic development policies of the Local Plan. Re-emphasising this through an additional policy is not considered necessary and would not add materially to the future delivery of development on Port of Tyne land.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				renewable, marine and offshore technology, manufacturing and the oil and gas sectors. More generally, however, the Port welcomes the revisions made to the emerging plan to reflect its business operations in the Borough and requests that the amendments suggested above are also included to ensure consistency of approach.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152144	Paragraph 5.9- there is a grammatical error on the first line.		Economic Development	Comment noted and paragraph amended.	Para 5.8 refers to the 'modelled requirements for Employment Land Provision' and para 5.9 first sentence now reads 'The Employment Land Review draws on views from the business sector.....'
898630			LP2015904	No more out of town developments. Silverlink is hell. Hell to get into and out of (realistically only by car), hell to look at and dead at night. It's my last resort as a shopping destination and it's not a place to linger (and spend more) such as town and village centres. I'd rather go to Byker.		Future edge and out of centre developments	Comments noted. As outlined in National Planning Policy, North Tyneside Local Plan follows a 'town centre first approach' but must accommodate the retail needs of the Borough. The Local Plan outlines the requirements any proposals for edge or centre or out of centre developments must meet in order to ensure no harm to the Borough's identified centres.	No amendments proposed.
900234		RESIDENT	LP20151763	- Para. 6.64 doesn't say, even very approximately, how much future 'comparison' retail demand (or leisure and convenience retail) may not be able to be fully accommodated in North Tyneside's three largest town centres. - It is also not clear where predict		Future edge and out of centre developments	Comment noted. Further detail on the occupancy and vacancy of town centres can be found in the Retail and Leisure Study (2014). The study it found that the total amount of vacant floorspace in the town centres would be able to accommodate the medium growth outcomes for future retail provision. However, the size of retail floorspace available is predominantly small units (95% of those available have a gross floorspace less than 300sqm). It is crucial for	Additional detail added into the supporting text and Policy S3.3.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							the Council to support the existing town centres to attract future investment and it is hoped through the recent investment by the Council and the owners of the Beacon Shopping Centre in North Shields and The Forum in Wallsend this will lead to greater occupancy levels and a greater variety of town centre floorspace, leading to more town centre businesses moving in.	
396421	Station Developments	OTHER / LOCAL ORGANISATION	LP20151778	<p>On behalf of Station Development Ltd (Respondent ID: 396421) representations are made to the North Tyneside Local Plan-Consultation 2015 and supporting documents relevant to the preparation of the Local Plan. The comments in this letter follow representations made to the Local Plan Consultant 2013 by Station Developments Ltd in respect of Tynemouth Station and the council's response to those comments at Comment Reference: LPCD4418 and LPCD4425. Previous representations In summary, the representations to the Consultation 2013 stated the council should allocate the eastern concourse area of the station for retail development in line with planning permission and listed building consent secured via appeal in February 2011. Furthermore, the 'pod' type units on the western concourse, whilst not included in the appeal decision, are vacant and given their size should be allocated for a range of uses (A1, A2, A3, D1 and D2) to assist in bringing the units back into viable economic use. As the station is within the designated district centre boundary of Tynemouth, the council stated: "it is not considered necessary to</p>		Future edge and out of centre developments	Comment noted. Tynemouth Station now recognised as floorspace that contributes to the overall retail need of the Local Plan in Policy.	Additional sites in town centres allocated for retail development are highlighted in Policy S3.3.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>identify the site for retail use but that it would be supported for town centre uses as with any other appropriate site within the town centre boundary."Representations to Consultation 2015 Station Developments Ltd continue to support the designation of Tynemouth as a district centre and inclusion of the station site within the defined boundary. The planning appeal decision permitted a range of uses within Use Classes A1 and D1 throughout the station bringing community benefit including retail units, a heritage centre, photographic society, community meeting rooms, public library and station manager's office with associated storage. The benefit of this permission should not be lost as the station contributes significantly to the vitality and viability of Tynemouth particularly through the arts, culture and market programme. The market attracts many thousands of visitors to Tynemouth who spend time and money throughout the centre. The development potential at the station site will enhance the station further for community benefit. It is considered therefore in accordance with the National Planning Policy Framework (NPPF) that the eastern concourse area of the station should be allocated for retail development to reflect the planning permission. The NPPF states clearly that local planning authorities should allocate sites in town centres to ensure a sufficient supply of suitable sites. The planning permission demonstrates the site is suitable, available and deliverable for retail use. The council's reliance on the site</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>being within the defined centre boundary is not sufficient and does not accord with the NPPF in that it does not demonstrate the plan is sound i.e. positively prepared, justified and consistent with national policy. In order to remedy the situation and for the plan to be sound, the site should be allocated with reference to the following paragraphs of the NPPF: ~ At paragraph 17, the core planning principles underpinning planning states: plans should set out a clear strategy for allocating sufficient land which is suitable for development in their area; the effective use of land should be encouraged by reusing land that has been previously developed; and mixed use developments should be promoted, and multiple benefits from the use of land encouraged. ~ Paragraph 23 states local authorities should allocate a range of suitable sites to meet the scale and type of retail, along with other town centre uses, in town centres. It is important development is not compromised by limited site availability and local authorities should ensure a sufficient supply of suitable sites. ~ Paragraph 70 states planning policies should plan positively for the provision and use of community facilities, such as local shops, to enhance the sustainability of communities and residential environments. ~ Paragraph 157 is clear in stating, crucially, Local Plans should allocate sites to promote development and flexible use of land. The Retail and Leisure Study (2014) as the evidence base supporting the Consultation Plan is clear at paragraph 7.28 in concluding the council should identify</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>retail opportunities in town centres and edge of centre before out of centre locations are considered. Indeed, this is crucial given a large proportion of retail spending occurs outside the Borough and Policy 56.3 specially seeks to increase the retention of expenditure currently leaking out to ensure centres remain vital and viable. This applies to Tynemouth district centre where the allocation of the station site will support the council's strategy. Investment decisions require a degree of certainty to proceed, with developers / occupiers citing planning as a high risk, and one which prevents investment from happening unless that certainty exists. Allocation of the site will provide certainty and attract investment. Conclusion The council should in accordance with national policy and the conclusions of the Retail and Leisure Study (2014) allocate the eastern concourse area of the Tynemouth Station site, approved by an appeal decision, for retail use to ensure the Local Plan is sound, in that it is positively prepared, justified and consistent with national policy.</p>				
797386			LP20151051	<p>For all the four main centres, there is a problem of sprawl, i.e. the shops and other retail outlets are too spread out . It may be worth setting up a group to see if shops on the outskirts of the main streets can be persuaded to move into vacant units closer in, so that shoppers can more easily see what's on offer. In North Shields, there is a need for the centre to leverage off the great recent success of the Fish Quay. But there is no easy transport connection between the two. For all</p>		Future retail demands and requirements	<p>Comments noted. The relocation of retail outlets within the town centre is not something that can be enforced through planning policy however DM6.4 (now DM3.5) sets out a number of development requirements which seeks to support retail development and investment in the retail core. AS1.3 (now AS8.11) states that within the North Shields Priority Investment and Regeneration Area... (c) opportunities should be taken to improve pedestrian and</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				packaging waste. Retail facilities must have stricter waste controls placed upon them, which are then enforced.			<p>needs of the new unit. Generally speaking the Council would normally insist upon the following condition;</p> <p>'No development shall take place until details of facilities to be provided for the storage of refuse at the premises have been submitted to and approved in writing by the Local Planning Authority. The facilities which should also include the provision of wheeled refuse bins shall be provided in accordance with the approved details, prior to the occupation of any part of the development and thereafter permanently retained.</p> <p>Reason: In order to safeguard the amenities of the area having regard to policy H13 of the North Tyneside Unitary Development Plan 2002.'</p> <p>This is primarily to ensure that refuse facilities are provided and that they can be adequately stored on the site and easily accessed by suitable refuse lorries. The Council wants to avoid the need for bins to be stored permanently on the public highway, which would be unsightly. The aim is that by providing adequate refuse facilities, it will ensure that waste is disposed of properly and avoid littering. Clearly, ultimately it is the responsibility of the operator of the retail unit to ensure that they dispose of their rubbish properly and to avoid littering. Planning powers do exist under Section 215 of the Town and Country Planning Act 1990 for local planning authorities in certain circumstances to take</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							steps requiring land to be cleaned up, when it's condition adversely affect the amenity of the area. If you are particularly concerned regarding a particular area, then please make contact with the Council Planning Enforcement Team who will investigate further <a href="http://www.northtyneside.gov.uk/browse-sub-cat.shtml?p_subjectCategory=33">http://www.northtyneside.gov.uk/browse-sub-cat.shtml?p_subjectCategory=33</a> .	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151340	CPRE welcomes the focus on town centres and the restrictions on out of town shopping centres.		Retail and Town Centres	Support noted.	No amendments proposed.
805689			LP2015892	All of our region's town centres are impacted negatively by masses of litter and ugly shop signage. Why were/are shops given planning permission for such gaudy and cheap looking signage? My heart sinks when I look at what has happened to the area in the last 30 years. In Whitley Bay, Park View appears to be finally on the up with some lovely little shops and cafes, but Whitley Road and the centre itself looks dirty and tacky. Walking from West Monkseaton into Whitley Bay centre, I see litter every step of the way. Why are commercial premises not cleaning up outside their properties? If each one of them spent five minutes each morning to pick up litter - what a huge difference could be made very quickly. No amount of flower displays and street furniture is going to improve the look and feel of the area if we (and I recognise 'we' means residents, businesses, schools, hospitals etc. - not just council staff) don't tackle the fundamental issue of our lovely North Tyneside looking like one giant landfill site.		Supporting competitive town centres	Comments noted. With regards to shop frontages, much shopfront work does not require planning permission and therefore out of our control. However, in recognising the issue, the Local Plan does include policies that aim to ensure good quality shop fronts in those occasions where planning permission is required. With regards to litter, the Planning system primarily deals with the built environment. The Local Plan contains a policy to ensure that new developments provide sustainable waste management (during construction and use) through the provision of recycling facilities and ensure a suitable location for the storage and collection of waste (policy DM7.9 New Development and Waste). However, the Local Plan or Planning system are otherwise not able to manage litter. The Council have a Streetcare team who deal with litter issues and they are aware of your concerns. Residents are encouraged to report issues by calling the team or via an online form:	No amendments proposed.

						Growth Strategy	set, the multiplier is set by central government.	
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015467	We note North Tyneside's strategic aspirations and updated assessed needs for growth in policies S5.1-5.2, S6.1-6.3 and S7.1 (now S4.1)-7.2 plus DM7.6		S 5.1 Economic Growth Strategy	Comment noted.	No amendments proposed.
685823	North Tyneside Green Party		LP20151097	Green Party Nowhere in this section is there is any mention of agriculture or related economic activity. And yet there are several farms and a considerable amount of agricultural land and activity in the borough. Land under cultivation is not just in the Green Belt, but also in much of the green sites earmarked for development e.g. Killingworth Moor and Murton. There is opportunity here for the Borough to develop a food-growing economy which could provide fresh fruit and vegetables to the local hospital, schools, residential homes etc; recycle food waste with an anaerobic digester which could also provide heat for greenhouse produce; and provide resources for schools relating to food growing and preparation. The land hubs could also support urban food growing schemes in schools, gardens and backyards etc (there are an increasing number of such schemes such as that in Middlesbrough).		S 5.1 Economic Growth Strategy	Comment noted. Although agricultural land forms part of the landscape within North Tyneside its economic importance is not forecast to be a significant sector of the Boroughs future economy. The Local Plan cannot control the procurement of locally grown food to local hospitals, schools, residential homes etc. Having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional circumstances exist to amend its boundary, thereby ensuring no pressure for future development is placed on agricultural land within the green belt. Further evidence on the agricultural land classification for North Tyneside has been requested from Natural England to help determine the importance of the agricultural land within the Borough. Within the two large areas of development at Murton and Killingworth Moor Policy AS7.4 (now 4.4 a-c) outlines that further comprehensive master planning will be required. This includes the importance of providing a green space strategy, which could include future provision of allotments to encourage local food production. The Local Plan advocates the minimisation of waste production and the re-use and recovery of waste materials e.g. recycling,	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							composting and energy from waste recovery (Policy S10.11 now S7.7) but there are currently no proposals for an anaerobic digester within the Plan.	
899459			LP20151286	The selected growth option of High is not consistent with the response to the 2013 plan consultation where 84% of respondents stated that they wanted lower growth options. The difference in housing numbers required between the low (community response favoured) and high growth models is approximately 5000 homes - the same as the number of homes outlined for the two development sites at Killingworth and Murton. North Tyneside does not need more housing, and particularly not executive style high value housing which will typically be built by the developers who own the plots in question.		S 5.1 Economic Growth Strategy	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The evidence produced from independent consultants on levels of growth in North Tyneside and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth being forecast. This is a recommendation from national government guidance in the National Planning Policy Framework. Through the Local Plan the Council intends to develop a Plan led approach to future growth so the issues of new development (such as affordable housing and executive housing) can be considered together to deliver the best possible solutions.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151333	Policy S5:1. Economic Growth Strategy. CPRE can support this policy, given the restraints on development imposed by the decision on the Green Belt. The value of the Metro in providing workforce mobility should be explicitly recognised in the policy.		S 5.1 Economic Growth Strategy	Comment noted. The value of the Metro and encouraging sustainable access is recognised in Policy S5.2 (now 2.2), S1.1 and following comments received further emphasised in Policy DM5.4 (now 2.4).	No amendments proposed.

899323			LP20151594	As per our previous representations, submitted in January 2014, NewRiver Retail agrees that retail and leisure development have a role in facilitating economic growth and generally supports Policy S5.1 which seeks to "Attract a range of innovative and creative businesses to retail, leisure and office development within the Borough's town centres". Notwithstanding that, our Client is concerned that the Policy contains a new reference to "other sustainable locations" may facilitate retail and leisure development to out-of-town locations, what would have a harmful effect on the town centres. NewRiver Retail considers that the reference "and other sustainable locations" should be removed in order to fully comply with the "town centre first' approach set out in the NPPF.		S 5.1 Economic Growth Strategy	Comment noted. Reference to 'other sustainable locations' will be removed to support town centres first and the Councils objective to revitalise its town centres. Development that cannot be accommodated within a town centre would need to be considered by policies for town centre development in edge or out of centre locations.	Remove reference to 'and other sustainable locations' from Criteria (a) (i)
805615	Lambert Smith Hampton	PLANNING CONSULTANCY	LP20151653	The introduction of the words "Port related activity and manufacturing' at criteria b) of Policy S5.1 "Economic Growth Strategy' is welcomed as it introduces support to traditional port related activity and B2 and B8 uses within the overarching policy. The introduction of this wording is critical to the future role of the Port, including its estates work leasing buildings and land to a number of general business and industrial operations. The Port also remains supportive of the focus of new marine and renewable sectors on its land. However, this should not be to the detriment of other traditional businesses and activities and it is considered that the rewording of the policy addresses this.		S 5.1 Economic Growth Strategy	Support noted.	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151937	Natural England would encourage a reference to policy DM8.6 in relation to this policy to		S 5.1 Economic	Comment noted. Reference will be added.	"This policy has been identified as having the

				ensure that it is compliant with the Habitats Regulations as it supports "the creation, enhancement and expansion of tourist attractions, visitor accommodation and infrastructure, capitalising on the Borough's exceptional North Sea coast" and so there is potential for an impact on Northumbria Coast SPA/Ramsar. Although it is understood that there are other more specific policies elsewhere, referencing DM8.6 would ensure consistency with these policies.		Growth Strategy		potential to cause adverse impacts on internationally protected wildlife sites. When implemented, regard should be had to policy DM8.6 that sets out the requirement for appropriate avoidance or mitigation of, or compensation for, any adverse effects." has been added at 5.19. This policy is now 5.6.
396511	GVA	PLANNING CONSULTANCY	LP20152005	Policy S5.1 sets out the economic growth strategy for the plan period which the consortium broadly support whilst maintaining the right to undertake a further assessment of the quantum of land and sites identified for employment use under Policy S5.2. The consortium specifically supports recognition of the need for new office and business investment including national scale office development and the importance of the A19 corridor. Policy S5.1 " Economic Growth Strategy In commenting on the Economic Growth Strategy, the consortium has considered the Employment Land Review 2014 (" ELR") and the content of the Local Plan. The consortium has not undertaken its own detailed assessment of the ELR or of the sites identified to be available for employment use for the plan period. They do, however, reserve the right to do so. Notwithstanding this, the consortium broadly supports the identification of 146 hectares of available employment land for the plan period		S 5.1 Economic Growth Strategy	Comment noted. The Employment Land Review (ELR) was undertaken in 2014 and covers the period of the Local Plan to 2032. The ELR provides a basis for an employment land trajectory for the next 18 years, covering the time taken for the Local Plan to be adopted (2017) and then 15 years thereafter.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>(15 years) based on the evidence set out in the ELR. The employment land supply is set out in the Local Plan for the period of 2014 "“ 2032 (18 years) yet that does not align with the plan period set out in paragraph 3.1 of the local plan which suggests a 15 year period between adoption (circa 2016/17) and 2032. Based on a 15 year plan period the supply of 146 ha would equate to approximately 10 ha per annum which is in line with historic average land take up. It is noted that a further 36 hectares of reserved land is also available for the plan period, on top of the 146 ha of available land identified. Part of the 146 ha of supply is a single new allocation of employment land for 17 ha at Killingworth Moor (Site 26). This land falls within the consortium's control and is supported for inclusion in a masterplan to be prepared by the consortium in agreement with the Council. The location of employment land within the wider Killingworth Moor allocation under Policy AS7.4 is proposed to lie within easy proximity and access to the A19 but will be established within the agreed masterplan and is subject to ongoing assessment and evaluation of the site and surroundings. The consortium supports the allocation but reserves the right to identify a preferred location (within Killingworth Moor) and also an alteration to the overall quantum of employment subject to the outcome of the ongoing masterplanning of the site. In principle the consortium supports the location of the new employment at Killingworth Moor as it represents a strategically important</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>location as an expansion to the A19 economic corridor (as shown on the proposals map) and is also well related for access not only onto the A19 but also to Northumberland Park Metro via a link under the A19. In particular, Killingworth Moor offers the opportunity to provide a large scale site of strategic significance, adding to both the quality and quantity of employment land in the Borough. Well related to Cobalt, it represents a deliverable employment site in the plan period and at this stage a flexible employment allocation including B1, B2 and B8 uses should be applied, subject to any development being compatible with adjoining proposed housing. This will increase employment opportunities and retain more residents of the Borough also working in North Tyneside. As a major investor and developer within North Tyneside the Northumberland Estates is committed to delivery of the employment land within the plan period. It is noted from the ELR that a significant proportion of future demand for employment land will be for B1 uses, particularly B1 (a) offices. Given the successes of Cobalt and Quorum in delivering new B1 (a) office space the ELR identifies a need for further land for this use. The consortium considers that whilst not expressly stated within Policy S5.1, that the land at Killingworth Moor should be identified for B1(a) led development but that it should not be restricted only to that use and should include the potential for a range of business uses and some ancillary and complementary retail and potential small scale leisure uses.</p>

901136		LOCAL AUTHORITY	LP20152062	<p>As part of the evidence base to inform the North Tyneside Local Plan consultation , North Tyneside has published a Employment Land Review (ELR) which has been aligned with the targets of the Strategic Economic Plan (SEP). The ELR acknowledges that the Cobalt and Quorum Business Parks will become occupied as job growth increases. This accords with Newcastle's ELR which acknowledges that our under supply of employment land in the short term could be accommodated in North Tyneside at Cobalt and Quorum Business Parks. The job growth forecasts in North Tyneside's ELR and focus on the Strategic Economic Plan (SEP) for the North East LEP is considered to be an acceptable position, planning for a medium growth scenario of 707 jobs per annum. North Tyneside's previous ELR identified 210ha of available employment land, this up to date position in the ELR recommends at least 146ha general employment land, an average of 8ha per year 2014 to 2032. A further 36ha of reserved land, that is controlled by existing businesses on site and available solely as potential expansion land, is also recognised. Newcastle support North Tyneside's position that jobs growth will be in B-use class along the river facilitated by the Low Carbon Enterprise Zone. This approach reflects Newcastle's allocation of Walker Riverside as a Key Employment Area in The Core Strategy and Urban Core Plan for Gateshead and Newcastle (CSUCP). Walker Riverside has Enterprise Zone status and the riverside can accommodate a cluster of engineering and environmental</p>		S 5.1 Economic Growth Strategy	Comment noted.	No amendments proposed.

				technologies which benefit from locating in close proximity to similar companies and suppliers.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152095	RE New Site: Land to rear of Front Street, Seaton Burn. Our client acknowledges and supports Policy S5.1 d)i, which recognises the potential for major logistics facilities for goods and materials on sites which take advantage of the Borough's excellent road connections. Policy S5.1 c)v. recognises the potential for office and business investment development in the A19 (T) economic corridor. This corridor is defined on the Policies Map and does not include our Client's site at Seaton Burn. It is considered that there are other locations, such as our Client's site, which are appropriate for office and business development investment and therefore, in this context, it is recommended that the policy is amended as follows: "support investment opportunities for regional and national scale office, research and development and manufacturing in the A19 (T) economic corridor which includes the former Enterprise Zone area and other locations which can take advantage of the Borough's excellent national and international transport connections by road, rail, air and port connections" [NLP emphasis]. Under the above policy context, it is considered that the development of our Client's site adjacent to the A1/A19 junction would deliver sustainable economic growth as sought by this Policy S5.1.		S 5.1 Economic Growth Strategy	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. Having considered the extent of development required to 2032 there remains sufficient land to meet the development needs of the Borough for at least the current Plan period without requiring a further review of the Green Belt. It is therefore concluded that there are no exceptional circumstances to consider development within the Green Belt.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152148	Policy S5.1 - English Heritage welcomes acknowledgement that Segedunum and other		S 5.1 Economic	Comments noted, an amendment will be made to the supporting text to acknowledge	"Much of the Borough's heritage assets have

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				heritage assets are important in terms of economic growth. This being the case it is disappointing that apart from a passing reference to the World Heritage Site there is no accompanying commentary in this chapter explaining how the historic environment will be positively utilised as a driver for economic progress. This is somewhat at odds with the clear interconnection described in paragraph 9.50.		Growth Strategy	the role of the historic environment to the Borough's economy.	significant potential to contribute to the economy of the area through, for example, being part of regeneration schemes or attracting visitors." has been added to para 5.11 (now para 5.13)
396269	English Heritage	GOVERNMENT AGENCY	LP20152148	Development should only be allowed where it does not cause unjustified harm to, or loss of, the significance of any heritage assets. Even 'less than substantial' harm is unacceptable if it cannot be outweighed by public benefits. Paragraph 5.17- development at the former shipyards has the potential to affect both designated and non-designated heritage assets and should be planned with this in mind.		S 5.1 Economic Growth Strategy	Comments noted. "Development should be of an appropriate scale and be located where the environment and infrastructure can accommodate the visitor impact without significant adverse impact." was included in the policy to take into account the potential impact that economic growth could have on the natural environment and the area's infrastructure. We agree that it appeared to refer to the historic environment and its inclusion was unclear. It should be removed to avoid confusion and we believe that issues concerning the natural environment, the historic environment and infrastructure are covered adequately in their respective chapters/policies to be applied across the Plan's proposals. Comments regarding shipyards are noted - the Plan's heritage policies will be applied to development effecting the shipyards.	"Development should be of an appropriate scale and be located where the environment and infrastructure can accommodate the visitor impact without significant adverse impact." removed from criterion aiii.

				Gosforth Nature Reserve and it has a variety of wildlife on - deer, herons, partridges, wild birds and a sparrow hawk. I would like it left wild, for the creatures who inhabit it. This piece of land has a diverse array of wildlife including silver birch trees, oak trees, pine trees and in the summer wild orchids grow on it. There is a vast amount of wild birds, various tits, partridges build nests in the field, foxes live on it. It is a wonderful piece of wild land that needs to be left wild. There are other areas around it that can be used for building on. I ask that any planning permission is refused and it is left for the wildlife.		Land for Employment Development	not a designated wildlife site. However it is within close proximity to Gosforth Park which is a SSSI and further understanding of potential impact on protected species or valuable habitat will be considered as the Local Plan progresses.	
890920		RESIDENT	LP2015184	I think that the development of employment sites has to come with a guarantee that it is long-term, sustainable employment that utilises the sites. Too often in the past, sites have sprung up only for them to close in just a few years and for them to become derelict.		S 5.2 Provision of Land for Employment Development	Comment noted. The Local Plan draws upon the evidence of the Employment Land Review (2015), which outlines the level of economic growth over the next 15 years. It is incredibly difficult to predict the economy over a 15 year time frame but it is a requirement of the Local Plan to plan for the level of growth that is intended over this period. The evidence suggests that North Tyneside needs to allocate land for the employment growth predicted, but the take up and success of this land for employment purposes will ultimately be decided by market forces. The role of the Local Plan is to ensure that the land is available, deliverable and viable to be brought forward for development during the course of the Plan.	No amendments proposed.

				make congestion worse. With the abundance of empty units and employment land at Balliol, Gosforth, Annitsford and Cobalt business parks, to name a few sites, I question whether development of this site for employment is necessary.			employment land and how much is required over the next 15 years to meet the levels of growth. The suggested sites in the consultation make provision for this predicted provision. The sites for housing and employment use have been considered in the transport modelling work for North Tyneside and have helped secure around £150million highways funding, which will make it easier and safer to travel in the Borough. In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. National planning policy requires LPAs to identify areas of habitat that connect wildlife and the Local Plan seeks to encourage development which helps to maintain and enhance these links. Wildlife corridor designation does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield.	
894270		RESIDENT	LP2015388	We wish to register our concern about the amount of green field land being given over to industrial use in North Tyneside.		S 5.2 Provision of Land for Employment Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Trembles Yard site contributes towards the overall employment land provision and if this were to built for housing another area of land would be required to meet future employment land needs. Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough.	
894375		RESIDENT	LP2015397	Site 20: Although it would appear to be too late to save some of the green fields stretching along Whitley Road from Asda to Darsley Park I object to any further development on the fields that have not already been given full planning permission. All these fields should have been considered as, and indeed are shown on the map as a natural wildlife corridor /extension of the Rising Sun Country Park ,an area which was created for that very purpose by North Tyneside Council. A success story that they themselves herald and advertise as one of the "Jewels in the Crown" of North Tyneside ,and yet now seem to be restricting in its natural		S 5.2 Provision of Land for Employment Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment and enhance the image of the Borough. The Trembles Yard site contributes towards the overall employment land provision and if	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				wildlife benefits. If these fields are built on then there will not be any effective "buffer zone" between existing communities such as Benton and Wallsend. The volume of traffic existing on Whitley Road is already more than it can cope with without further residential development. If any land should be given over to residential development then it should be the area covered by the ramshackle collection of so called industrial units known as the "Trembles Garage" industrial site on Whitley Road.			this were to built for housing another area of land would be required to meet future employment land needs. Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough.	
894718		RESIDENT	LP2015437	Create more jobs - employment via regeneration - North West, Cobalt and Whitley Bay should be number one priority		S 5.2 Provision of Land for Employment Development	Comment noted and reflected in Policy AS1.5 (now 8.15), AS1.6 (now 8.24) and S5.1 (2.1).	No amendments proposed.
894730		RESIDENT	LP2015442	More should be used to regenerate jobs and business in the area.		S 5.2 Provision of Land for Employment Development	Comment noted. Economic development is one of the key themes running through the Local Plan and the vision sets outs how by 2032 it wants to see a 'flourishing economy' and North Tyneside to be a 'place where local businesses are able to thrive and is attractive to inward investment' and an objective for the Local Plan is to 'provide excellent job opportunities for everyone' and to revitalise the town centres, regenerate the coast and regenerate the riverside. The Plan sets out policies that seek to achieve this vision and meet those objectives.	No amendments proposed.
894746		RESIDENT	LP2015445	Create more jobs and support business start-ups - focus on North West, Cobalt Business Park and Whitley Bay		S 5.2 Provision of Land for Employment Development	Comment noted and reflected in Policy AS1.5 (now 8.15), AS1.6 (now 8.24) and S5.1 (2.1).	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015468	We note North Tyneside's strategic aspirations and updated assessed needs for growth in policies S5.1-5.2, S6.1-6.3 and S7.1 (now S4.1)-7.2 plus DM7.6, including: i,- to provide for up to (a revised down) 146.09ha of general employment land between 2014-2032 (at an annual average 8ha per annum), plus a further 35.94ha of reserved expansion land, representing a reduction from the previously proposed 170ha provision;		S 5.2 Provision of Land for Employment Development	Comment noted.	No amendments proposed.
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015495	Site 109: The LPA should be planning positively for biodiversity, seeking net gain and producing a coherent and functioning wildlife corridor network. Many of the current allocations for development, such as sites 22-26, 35-41 and 109 do not meet this and will ultimately result in a net loss of biodiversity with fragmented small areas of habitat, not linked by a workable network of wildlife corridors. Furthermore, NWT consider that the LPA are not planning positively for biodiversity and not meeting the requirements of NNPF by failing to produce a strategic map of identified areas for biodiversity off-setting, mitigation, compensation and wildlife habitat creation. Indeed NWT has met with Council representatives and proposed this prior to the publication of this and this has not been included.		S 5.2 Provision of Land for Employment Development	Comment noted. Policies S8.4 (now 5.4), DM8.5 (now 5.5) and DM8.6 (now 5.6) are consistent with the guidance set out in the NPPF that advises planning authorities to minimise impacts on biodiversity and geodiversity and provide net biodiversity gains where possible. Although sites 22-26, 35-41 and 109 have wildlife corridors running through them there is no reason to consider why these sites could not accommodate future development whilst adhering to the policies and maintaining a linked workable network of wildlife corridors. The Council officers comment on site 109 were that 'Development would not be supported if adequate and good quality wildlife corridors were not incorporated into any scheme'. The Council are keen to work with NWT to consider areas for biodiversity off-setting, mitigation, compensation and wildlife habitat creation and will look forward to further dialogue.	No amendments proposed.
895180		RESIDENT	LP2015517	Site NT030: Again more employment in Cobalt, what are the proposals for traffic management? Cobalt is extremely busy for access.		S 5.2 Provision of Land for Employment	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of public transport users, cyclists	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
						Development	and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	
895338		RESIDENT	LP2015522	The figures for the number of new homes (and the assumed new inhabitants of these) seems far greater than the number of new jobs. Where will the additional inhabitants work? Where is the land that will be used to create new jobs? This has not been explained.		S 5.2 Provision of Land for Employment Development	The Local Plan outlines the need for 10,200 new homes in addition to the 5,000 homes already with planning permission. The estimated level of job growth is expected to be at least 12,700 jobs. The amount of new jobs and new homes has been considered in relationship to each other as part of the evidence in the future growth forecasts for North Tyneside. Sites to accommodate this level of employment growth are outlined in Policy 5.2 (now 2.2). The Local Plan seeks to increase the provision employment opportunities within the Borough to help create sustainable communities. Identifying a flexible supply of land that offers a variety of potential employment uses allows new and existing businesses the opportunity to deliver future economic growth.	No amendments proposed.
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015576	Site 109: Objection: This site along with the allocation of site 4 will effectively cause the isolation of Gosforth Park SSSI and Local Wildlife Sites. Not only could this adversely impact upon a statutorily protected site (contrary to paragraph 118 of NPPF) but this would also have significant adverse effects upon the Wildlife Corridor, as such not meeting the requirements of paragraph 114		S 5.2 Provision of Land for Employment Development	Comment noted. The wildlife corridors have been mapped on the Policies Map and the Council are keen to work with partners such as Northumberland Wildlife Trust to identify areas for habitat restoration or creation and this is reflected in policy DM8.5 (now 5.5) 'maximise opportunities for creation, restoration, enhancement, management and connection of natural habitats'. Policies	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>of NPPF to plan positively for the creation, protection and enhancement of networks of biodiversity. Furthermore, this site is within the Wildlife Corridor and development within this would be adverse to the aims of the designation. This site has also been noted by the Northumberland Wildlife Trust to have developed habitats suitable for ground nesting birds (including farmland birds; BAP priority species) and wading birds. The loss of this could impact upon the aims of the Local BAP. The development of this site appears to be going ahead. NWT has seen the outline plans for the area "" Indigo Business Park. However, these plans did not include the most eastern end and NWT was assured that this area would remain open as a wildlife corridor to link Gosforth Park SSSI to Weetslade Country Park. This does not appear to be the case from the Local Plan, as the entire area is allocated. It is very difficult to see how the plans, in their current form, allow for any wildlife movement in and out of a nationally designated site and into the wider area, including Weetslade Country Park. Furthermore, as with many of the site allocations a wildlife corridor has been allocated across this area, but again there is no actual provision for this on the ground and such an allocation therefore appears untenable.</p>			<p>S8.4, DM8.5 and DM8.6 (now 5.5, 5.6, 5.7) are consistent with the guidance set out in the NPPF that advises planning authorities to minimise impacts on biodiversity and geodiversity and provide net biodiversity gains where possible. Although sites are suggested for development in the Plan that have wildlife corridors running through them, the precise location of development within these sites has not been determined and the policies of the Plan highlighted the need for wildlife corridors to be accommodated within future development. Council officer's comment on site 109 was 'Development would not be supported if adequate and good quality wildlife corridors were not incorporated into any scheme'.</p>	
897295		RESIDENT	LP2015602	<p>Site NT031: Development sites are proposed which are inappropriate and contrary to planning policy. For example Site 11 now Site E010 contains a Site of Local Wildlife Interest.</p>		<p>S 5.2 Provision of Land for Employment Development</p>	<p>Comment noted. 							site 109 was 'Development would not be supported if adequate and good quality wildlife corridors were not incorporated into any scheme'.	
897407		RESIDENT	LP2015626	Site 11 now Site E010: I wish to strongly object to the proposal of development of the greenfield site. This area provides a mini-greenbelt between Benton and Wallsend and provides both areas with separate identities. Local infrastructure would struggle to cope as is already the case on Whitley Road. This results in increased traffic (at significant speed) through Grange Avenue / Thornhill Road (both residential roads). Development of these sites would lose the view from Whitley Road across to Gateshead further detracting from the area.		S 5.2 Provision of Land for Employment Development	Comment noted. A large proportion of this site is already developed for employment purposes by Proctor and Gamble. The surrounding fields next to the P&G site are allocated as reserve employment land. This is land controlled by the existing business and is available solely as potential expansion land to the current business. The evidence on employment growth for North Tyneside over the next 15 years is positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and enhance the natural environment with coherent ecological networks. The importance of views in the local area are not a planning consideration in the Local Plan as there is no individual right to a view. In respect to the concerns of the transport infrastructure coping with the levels of growth, the Council has around £150million to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed investment in junction improvements will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the	No amendments proposed

							emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	
804813			LP2015633	From what we have already seen, the proposed increase in housing is planned on the basis that there will be approximately 800 new jobs a year in North Tyneside between now and 2032. On the basis of this highly ambitious and (we think) unrealistic forecast, much that is of value in green and open space which enhance the quality of life will be permanently lost. What will happen if these jobs do not materialize and the demand for housing is much lower? Apart from the building contractors, who will profit from the unoccupied rows of quick-build housing and who will maintain them in the future?		S 5.2 Provision of Land for Employment Development	Comment noted. The Local Plan suggests a job growth forecast of 707 jobs per year, which was recommended within the Employment Land Review (ELR). The consultants who produced the ELR used a variety of different sources of evidence and experience from a national, regional and local level. The numbers of homes to be needed during the course of the Local Plan are not just determined by economic growth but also population projections and migration trends. The Policies and the evidence in the Local will be monitored and updated to ensure they are being implemented. If they are not then the Policy and/or evidence will be reviewed to establish the issues affecting its delivery (Policy S11.1 now 9.1). There are many variables that are beyond the influence of planning but the Council has to provide for the future needs of the Borough. This has to be based on robust evidence available at the time of making that decision. The current evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with the objective to also protect and	No amendments proposed.

							protected for its biodiversity value. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence.	
898375		RESIDENT	LP2015763	Site NT058: Development sites are proposed which are inappropriate and contrary to planning policy. For example site 109 is located on a wildlife corridor.		S 5.2 Provision of Land for Employment Development	Comment noted. Policies S8.4 (now 5.4), DM8.5 (5.5) and DM8.6 (5.6) are consistent with the guidance set out in the NPPF that advises planning authorities to minimise impacts on biodiversity and geodiversity and provide net biodiversity gains where possible. Although sites are suggested for development in the Plan that have wildlife corridors running through them, the precise location of development within these sites has not been determined and the policies of the Plan highlights the need for wildlife corridors to be accommodated within future development. Council officer's comment on site 109 was 'Development would not be supported if adequate and good quality wildlife corridors were not incorporated into any scheme'.	No amendments proposed.
898375		RESIDENT	LP2015765	Site NT055: Of particular concern is the potential development of a large private leisure centre by Max-a-Millions on Salters Lane, West Moor, directly opposite Gosforth Park Nature Reserve, a significant local wildlife area. I am also concerned that it may be the intention to commence land clearance on March 19th without full assessment by the		S 5.2 Provision of Land for Employment Development	Comment noted. The potential Max-a-Millions development will be subject to a planning application that will determine whether it is acceptable development and will involve the consultation with the relevant bodies. The site is currently allocated for employment use within the Unitary Development Plan and the site	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				relevant bodies never mind the imposing visual distraction of the development from information currently online. The site is undoubtedly a wildlife support/corridor for the main reserve with a number of breeding birds already there. This should be taken account of in any future redevelopment.			analysis for the Local Plan recognises the proximity to Gosforth Park SSSI. This does not lead to a conclusion that the site could not accommodate future appropriate development but would require adequate survey and mitigation work to be carried out as well as consideration of adjacent watercourses and ditches re: flooding and pollution.	
791057		RESIDENT	LP2015770	I don't see any evidence of the 12,700 new jobs can you tell me the companies planning to set up manufacturing in the area? I doubt it. If you say "Hitachi" "Nissan" these are not in our catchment area. You are just creating short term employment for construction companies, leaving us to deal with the mess.		S 5.2 Provision of Land for Employment Development	Comment noted. The numbers of jobs are based on the work of economic analysts who have produced an Employment Land Review (ELR) for North Tyneside. There are many contributing factors that have helped feed into the work on the ELR and it draws on the economic forecasts from the North East Local Economic Partnership. The ELR considers previous take up rates of employment land from an annual monitoring survey and considers the market perception of the Borough and market signals to indicate future demand in occupancy or investment. It does not reference future companies seeking to invest in the area but the overall conclusion of the ELR is the amount of employment land that is required to be accommodated in the Borough for the next 15 years.	No amendments proposed.
792546		RESIDENT	LP2015774	I agree completely with the figure for employment growth.		S 5.2 Provision of Land for Employment Development	Support noted.	No amendments proposed.

							site, will be shown on the Policies Map and in the site analysis. This will provide a more accurate picture of the overall development proposed. The Site of Local Conservation Importance (SLCI) to the north of Site 11 now Site E010 (NT031) will be protected for its biodiversity value. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence.	
898912		RESIDENT	LP2015976	Site 109: Development sites are proposed which, I am told, are contrary to planning policy. For example site 109 is located on a wildlife corridor.		S 5.2 Provision of Land for Employment Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan setting out future land allocations and policies that will guide planning decisions. The independent Employment Land Review (2015) was produced by a team of specialists who considered the existing employment land and how much is required over the next 15 years to meet the levels of growth. The suggested sites in the consultation make provision for this predicted provision. In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. National planning policy requires LPAs to identify areas of habitat that connect wildlife and the Local Plan seeks to encourage development which helps to maintain and enhance these links. Wildlife corridor	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							<p>designation does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including site layout and the proposed area for development. Policies S8.4, DM8.5 and DM8.6 (now 5.4, 5.5 and 5.6) are consistent with the guidance set out in the NPPF that advises planning authorities to minimise impacts on biodiversity and geodiversity and provide net biodiversity gains where possible. Although sites are suggested for development in the Plan that have wildlife corridors running through them, the precise location of development within these sites has not been determined and the policies of the Plan highlights the need for wildlife corridors to be accommodated within future development. Council officer's comment on site 109 was 'Development would not be supported if adequate and good quality wildlife corridors were not incorporated into any scheme'.</p>	
898912		RESIDENT	LP2015978	<p>I have a particular interest in Gosforth Park Nature Reserve, which is in danger of becoming enclosed by development. The reserve lies just outside North Tyneside, but needs co-operation from North Tyneside Council, to ensure it is connected to the wider world via Wildlife Corridors. The Max-a-Millions development on the other side of the boundary seems to make no concessions to the need for such corridors.</p>		S 5.2 Provision of Land for Employment Development	<p>Comment noted. The Council recognises Gosforth SSSI within the Local Plan and development proposals in North Tyneside that could impact a nationally designated site are covered within Policy DM8.5 (now 5.5). The Council have worked with adjoining Councils biodiversity officers to consider the wildlife corridors in the Borough and how they connect with the neighbouring authorities. These wildlife corridors are shown on the Policies map and considered in Policy S8.4 (now 5.4)</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
898630			LP20151270	I object to the use of Site 11 now Site E010/NT012 for industrial use and certainly the part alongside Whitley Road. This will make the traffic congestion on Whitley Road even worse, it will remove the last remaining green area north of the road with a corresponding impact on wildlife - the bottom end of the site is part of a 'wildlife corridor', and it will reduce the quality of life for residents in the area. Generally, please provide evidence of the new jobs that are going to be coming and please use empty space and brownfield sites first before building more units on greenfield sites.		S 5.2 Provision of Land for Employment Development	Comment noted. Site NT012/110 is currently an employment site, which is occupied by Proctor and Gamble. The remaining area of the employment site that is undeveloped is classified as reserved land, which is available solely as potential expansion land. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest sites for development, including those employment areas that are already developed, such as Site 11 now Site E010, whilst balancing many issues such as protecting and enhancing the natural environment and to enhance the image of the Borough. Wildlife interests are considered in Policy S8.1, DM8.2, DM8.4 and DM8.5 (now 5.1, 5.2, 5.4 and 5.5). The transport infrastructure will need to be capable of delivering the growth projections of the Local Plan and this has been considered within the transport modelling work that has led to £150million funding allocated for junction improvements over the next five years.	No amendments proposed.
899455			LP20151281	I object to the use of Site 11 now Site E010/NT012 for industrial use and certainly the part alongside Whitley Road. This will make the traffic congestion on Whitley Road even worse, it will remove the last remaining		S 5.2 Provision of Land for Employment Development	Comment noted. Site NT012/110 is currently an employment site, which is occupied by Proctor and Gamble. 							wildlife corridors were not incorporated into any scheme'. the boundary of Site 11 now Site E010 will be amended to clearly show the Site of Local Conservation Importance that lies to the north of the site. The ecological compensation agreed from the recent planning appeal at Station Road will need to be considered as part of the Masterplan work for sites 35-41.	
805211		RESIDENT	LP20151429	I would like to make the following broad objections to the North Tyneside Local Plan: The Plan is based on growth rates which are unrealistic, despite earlier consultation demonstrating that North Tyneside residents wanted to aim for lower rate of growth in order to save valued green spaces. The ceding of population to Newcastle and Gateshead is not adequately reflected in the growth figures. The proportion of employment land proposed in the Local Plan is currently too high but housing development on some of the proposed employment sites (other than those outlined above) could help to achieve a sufficient growth is housing stock over the planned time horizon.		S 5.2 Provision of Land for Employment Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The evidence produced from independent consultants on levels of growth in North Tyneside and the reality of recent planning appeals at places such as Scaffold Hill near Holystone, Whitehouse Farm, near West Moor and Station Road at Wallsend have all reinforced the need for the Council to bring forward additional sites to meet the levels of growth being forecast. This is a recommendation from national government guidance (NPPF) and the Council is working with its neighbouring authorities to reflect the levels of population growth between the different authorities in the Local Plan.	No amendments proposed.
805211		RESIDENT	LP20151430	Site 11 now Site E010: This site is designated as a Site of Local Wildlife Interest (West Moor meadow) and also forms part of a key wildlife corridor providing an important link which allows the movement of wildlife between		S 5.2 Provision of Land for Employment Development	Comment noted. Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Killingworth and Gosforth. Development on this site would destroy a Site of Local Wildlife Interest and would therefore be contrary to other policies in the Plan and the NPPF. In particular, there is a presumption that Local Plans will direct development to locations where there will not be an adverse impact on biodiversity when there are less damaging alternatives available (otherwise the Plan could not be considered sustainable). It is clear that there are other sites which would not involve destroying a site of conservation interest and therefore this site should be excluded from the Plan. Given the proximity of existing housing and the Balliol Business Park, development would curtail the existing wildlife corridor and fragment local wildlife populations. There is already adequate employment land adjacent to Site 11 now Site E010 and therefore, further development in this vicinity is unnecessary as well as unwelcome. For these reasons Site 11 now Site E010 should be removed as a development site from the Local Plan.			the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as Site 9, now Site E008, & 11, now Site E010) , but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. This will provide a more accurate picture of the overall development proposed. The Site of Local Conservation Importance (SLCI) to the north of Site 11 now Site E010 (NT031) will be protected for its biodiversity value. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence.	
805211		RESIDENT	LP20151431	Site 109: o This proposed development site is in close proximity to a local wildlife site (Weetslade Country Park) and would be detrimental to nearby wildlife which uses the proposed site for forage, cover and breeding opportunities. o The site is also part of a key strategic wildlife corridor, linking wildlife in Newcastle and North Tyneside (and especially		S 5.2 Provision of Land for Employment Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan setting out future land allocations and policies that will guide planning decisions. 803900	Northumberland County Council	LOCAL AUTHORITY	LP20151529	In relation to map reference 109 "" Weetslade, Sandy Lane, The Council notes that proposals to dual Sandy Lane, which featured in the UDP, have been replaced by proposals for ""targeted improvements' in Policy S10.3 Transport. Through our Duty to Cooperate discussions we would welcome further dialogue in relation to the potential impact of increased traffic movements on the A19, in particular on the Moor Farm Roundabout.		S 5.2 Provision of Land for Employment Development	Comment noted. This issue will be covered within the ongoing Duty to Cooperate meetings.	Discuss within the next Transport related Duty to Cooperate meetings.
805535			LP20151571	Site 109: Indigo Park is welcomed but could another employment park be sited on the northern border ?		S 5.2 Provision of Land for Employment Development	Comment noted. There are no new employment sites to be allocated north of Indigo Park but the existing employment sites in Seaton Burn and Dudley (Shasun) will remain in the Local Plan. Northumberland County Council are promoting Northumberland Business Park, next to Moor Farm roundabout, for high quality office accommodation.	No amendments proposed.
898777			LP20151658	Site 102 - reallocation for housing. The site is currently in employment use with this predominantly being B2 use, with the North Tyneside Local Plan Consultation seeking to retain the site moving forward for this current use. These representations seek to de-allocate this site from its employment use and re-allocate for residential which, it is considered, is more appropriate in planning terms, both in the context of the site itself and also the employment and housing land demand/supply position within North Tyneside. North Tyneside Council appointed Arup to prepare an updated Employment Land Review (ELR) as part of the evidence base to support the emerging Local Plan for		S 5.2 Provision of Land for Employment Development	Comment noted. Site 102 is currently an employment site and is considered a suitable site to deliver the overall employment land provision in the new Local Plan. The site has the potential to expand and with easy access to the A19 it is considered to be a suitable site for continued employment land provision.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the Borough. The ELR considers the period from 2014-2032 in line with the emerging Local Plan that is likely to be adopted in 2016. It forms the basis of planning policies for the retention, regeneration, or reuse of existing employment land, and for allocations for new employment land for B1, B2 and B8 uses. It also advises on the appropriate overall amount, type and distribution of employment land including an assessment of existing provision. The approach applied in the ELR is based on a combination of labour demand forecasts and targets adopted by the Local Enterprise Partnership (LEP) which are considered in the context of evidence on historic market take-up. Overall, the approach is based on the consideration of a range of evidence, both quantitative and qualitative, in order to inform the development of alternative scenarios for future growth. The ELR has run a series of employment growth scenarios, with these comprising the following: Employment Growth Scenario Job Creation High + 26,163 High 17,442 Medium + 16,443 Medium 12,730 Low 6,480 Following an analysis of each Employment Growth Scenario, including the historic relationship between job growth and employment land take-up of circa 690 jobs and 10 ha per year, and analysis of the potential employment capacity of available land within North Tyneside, an overall employment land portfolio of at least 146ha is recommended within the Consultation Local Plan in order to ensure that at least the "'Medium' scenario of 707 jobs per annum is met. The Council's</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>ambitions to achieve employment growth identified at the upper end of the Growth Scenarios is welcomed and is reflective of the overall strategy for economic growth promoted within the NPPF. However, as part of the Employment Land Review, the employment demand driven scenarios anticipate the continued transition of the economy toward the service and knowledge-based sectors and contraction in the manufacturing sector, as indicated by independent forecasts produced by the LEP area. An outcome of this transition is that a greater proportion of future demand will be for office based uses rather than industrial space. Indeed, the ELR predicts a contraction in net land requirements for industrial space (B1c/B2) across all of the Employment Growth Scenarios with this negative requirement increasing the higher the employment growth targets are. In addition, and comparing against past take-up rates (circa 10 ha per annum), suggesting a potential need of 180 ha over the course of the 18 year Plan Period, the ELR also concludes that there is sufficient employment land supply (146 ha), in addition to the 36 ha of "reserve land" identified, providing a total of 182 ha. As part of the Employment Land Review, as highlighted above, a review of existing employment sites was undertaken. The Site Survey Data Base (February 2015) provides details of the latest site assessments. With regard to Swales Industrial Estate the assessment concluded the following: "Currently an employment site that is close to an area of regeneration and</p>

				potentially could be developed for uses other than employment."□				
808917	BDW North East	LAND DEVELOPER	LP20151774	<p>The council must ensure that the council's employment strategy and housing strategy align. BDW believes the housing requirement should be increased to take account of opportunities for employment growth. The Local Plan states that the Cobalt Business Park and Quorum Business Park are completing soon and will become fully occupied, alongside new opportunities for growth through the North East Low Carbon Enterprise Zone. The council must ensure the housing target is sufficiently aspirational to take account of the proposed employment growth. Providing new housing for workers will attract companies to these new employment areas. NPPF, paragraph 17 states that planning should "proactively drive and support sustainable economic development to deliver the homes, businesses and industrial units, infrastructure and thriving local places that the country needs"□. It is essential that the council provide the homes to support economic growth. The figures put forward by the council in the Local Plan to meet the council's preferred approach, medium employment growth, demonstrate an oversupply of employment land: i. Net employment land requirement = 46.3ha (2.57ha per annum) i. Land available for development to 2032 = 146ha (8ha per annum) and a further 36ha of reserved land This gives a surplus of 136ha of employment land. BDW would urge the council to consider whether some of this employment land could</p>		S 5.2 Provision of Land for Employment Development	<p>Comment noted. The numbers of jobs are based on the work of economic analysts who have produced an Employment Land Review (ELR) for North Tyneside. There are many contributing factors that have helped feed into the work on the ELR and it draws on the economic forecasts from the North East Local Economic Partnership. The ELR considers previous take up rates of employment land from an annual monitoring survey and considers the market perception of the Borough and market signals to indicate future demand in occupancy or investment. The housing growth has drawn upon a combination of forecasts and scenarios that are considered deliverable.</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>be re-allocated as housing land. As it stands the council's preferred employment land strategy is more aspirational than the housing strategy being proposed. It is important that the council ensure the two strategies align. BDW would like the council to review the employment strategy and provide justification for such an oversupply of employment land against the requirement. We would urge the council to consider whether some of this employment land could be re-allocated for housing to increase the housing numbers. The council must also ensure the housing and economic strategy align. The plan proposes an employment target of 707 additional jobs per annum. There are only 3 scenarios that plan for sufficient job growth per year to meet the requirement proposed: The proposed housing requirement of 792 homes per year only provides for 654 jobs per annum. This means using the proposed housing requirement would result in an undersupply of 53 jobs per annum or 1,113 jobs over the housing requirement period 2011-2032. This proposed requirement of 792 homes requires 46ha of employment land. This is 114ha less than currently available. Indicating a mismatch between the employment land allocations and the targets. BDW would urge the council to review the amount of land allocated for employment. The council should review the amount of land allocated for employment.</p>				
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151795	We note reference to a significant number of key sites identified for employment development over the plan period within Policy S5.2. The sites identified vary in terms		S 5.2 Provision of Land for Employment	Comment noted.	Keep NWL informed of future employment uses on the sites.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				of both scale and location, and as sites come forward for development we would recommend early consultation with NWL. This is particularly important where proposed land uses may require large volumes of water, or produce significant effluent during operation. Furthermore, we would urge all new economic development proposals to seek to adopt sustainable surface water management principles in the planning and design stages.		Development		
396253	Northumberland Estates	DEVELOPER	LP20151810	Paragraph 5.10 of the Local Plan indicates that the Plan intends to support and promote the 'Medium' scenario of 707 jobs per annum (12,750 over plan period). The Northumberland Estates support the creation of jobs in North Tyneside and the importance that this has for a strong and sustainable economy. It is considered that the Local Plan should follow the job growth forecasts in the Employment Land Review (para. 5.8), and the 'Medium +' scenario be the scenario that the Local Plan pursues. It is considered that the 'Medium +' scenario offers a greater level of economic growth than the 'Medium' scenario, and that this scenario would be a more ambitious level of job creation that North Tyneside should be aiming for over the next plan period. There are several key job creating opportunities in North Tyneside. There are extensive opportunities relating to the river Tyne/port, as well as the A19 strategic growth corridor which includes major planning trunk road improvements over the plan period. North Tyneside has the capacity and infrastructure to attract significant investment from outside the		S 5.2 Provision of Land for Employment Development	Comment noted. The numbers of jobs are based on the work of economic analysts who have produced an Employment Land Review (ELR) for North Tyneside. There are many contributing factors that have helped feed into the work on the ELR and it draws on the economic forecasts from the North East Local Economic Partnership. The ELR considers previous take up rates of employment land from an annual monitoring survey and considers the market perception of the Borough and market signals to indicate future demand in occupancy or investment. It does not reference future companies seeking to invest in the area but the overall conclusion of the ELR is the amount of employment land that is required to be accommodated in the Borough for the next 15 years. Policy S5.2 (now 2.2) has been amended to clarify those sites that have available or reserved land and Backworth Business Park and Cottages will now be considered in the housing section as a mixed use site.	Policy S5.2 (now S2.2) amended to include only sites with available or reserved land

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>region, and it also benefits from its physical relationship with the city of Newcastle. All of these factors contribute to North Tyneside's capacity for employment growth and job creation. In comparison to its neighbouring Local Authorities, North Tyneside's projection of 12,750 jobs is significantly lower than Newcastle's 22,000 ('Core Strategy and Urban Core Plan for Newcastle and Gateshead') and only slightly higher than Northumberland's 10,000 ('Local Plan Core Strategy'). It is considered that North Tyneside's Local Plan should increase its job creation figure from 12,750 in order to be at a more similar level to Newcastle, since this neighbouring Authority is more similar to North Tyneside in terms of size, infrastructure, and opportunities than neighbouring Northumberland. Policy S5.2 of the Local Plan identifies Backworth Business Park and Cottages (ELR ref. no. NT036) as a site that is available for employment land development over the plan period. However, it states that the total area of available land is 0 hectares. This is incorrect, since the site is available and has an area of approximately 6.3 hectares. The Northumberland Estates support this site as an available site for mixed use including employment throughout the plan period, and consider that the Local Plan should promote development of the site through its policies. It is also noted that the table in Policy S5.2 is not particularly clear, with the majority of development sites being detailed as having 0 hectares of available or reserved land. It is not</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				clear what this means, as the sites are allocated and identified by the plan as being suitable for development, but then stated as being neither available nor reserved.				
789566	Environment Agency	GOVERNMENT AGENCY	LP20151829	A number of the potential development sites are located in Flood Zones 3 and 2 and as such are at high/medium flood risk. We support that the proposed allocations within these flood risk areas are supported by a Flood Risk Sequential and Exception Test. Welcome that in allocating these sites a sequential, risk-based approach to the location of development has been undertaken to avoid where possible flood risk to people and property and manage any residual risk, taking account of the impacts of climate change.		S 5.2 Provision of Land for Employment Development	Comment noted.	No amendments proposed.
789566	Environment Agency	GOVERNMENT AGENCY	LP20151832	Site 11 now Site E010: The site is adjacent to Longbenton Letch watercourse. Development that encroaches on watercourses has a potentially severe impact on their ecological value and the land alongside watercourses is particularly valuable for wildlife and it is essential this is protected. We consider that there is a need to provide coherent ecological networks that are more resilient to current and future pressures. In developing the site there are opportunities to incorporate biodiversity in and around the development. On this basis, we consider that any allocation should ensure the protection of the watercourse through providing an appropriate buffer zone to the watercourse that is free from development. As outlined urban diffuse pollution is a particular pressure on the water quality of urban watercourses in North Tyneside. We consider that any		S 5.2 Provision of Land for Employment Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as Site 9, now Site E008, & 11, now Site E010) , but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. 638268	Natural History Society of Northumbria		LP20151916	Site 109: Objection The development of this site when combined with the recently approved development to the south-east at Whitehouse Farm will effectively isolate Gosforth Park SSSI and Local Wildlife Sites to the east and north. Not only could this adversely impact upon a statutorily protected		S 5.2 Provision of Land for Employment Development	Comment noted. The Local Authority has a responsibility to produce a Local Plan setting out future land allocations and policies that will guide planning decisions. The independent Employment Land Review (2015) was produced by a team of specialists who considered the existing	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>site (contrary to paragraph 118 of NPPF) but this would also have significant adverse effects upon the Wildlife Corridor, as such not meeting the requirements of paragraph 114 of NPPF to plan positively for the creation, protection and enhancement of networks of biodiversity. Site 109 also has populations of ground nesting birds (including farmland birds; BAP priority species). The unmitigated loss of this would impact upon the aims of the Local BAP. Site 109 is located on an important north-south wildlife corridor and therefore if planning positively for biodiversity and creating coherent ecological networks this site would not be allocated for development. For these reasons it is not appropriate to fully develop all of site 109. However we understand that the land is owned by the Council who wishes to make some money out of it and that there is already some business use in the area that was developed on brownfield land (former colliery). There is agreement on all sides that if Site 109 is to be developed then it should be accompanied by a master plan (it is potentially the largest proposed new employment site in the plan), which would replace the current (out-of-date) master plan and which would incorporate north-south wildlife corridors. We would accept this approach as being a compromise which will allow employment use and retain significant wildlife corridors. The plan should be amended to show that a master plan is required for Site 109 and that it will incorporate significant north-south wildlife corridors. The only alternative is to clearly</p>			<p>employment land and how much is required over the next 15 years to meet the levels of growth. The suggested sites in the consultation make provision for this predicted provision. In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. National planning policy requires LPAs to identify areas of habitat that connect wildlife and the Local Plan seeks to encourage development which helps to maintain and enhance these links. Wildlife corridor designation does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including site layout and the proposed area for development. Policies S8.4, DM8.5 and DM8.6 (now policy 5.4, 5.5 and 5.6) are consistent with the guidance set out in the NPPF that advises planning authorities to minimise impacts on biodiversity and geodiversity and provide net biodiversity gains where possible. Although sites are suggested for development in the Plan that have wildlife corridors running through them, the precise location of development within these sites has not been determined and the policies of the Plan highlights the need for wildlife corridors to be accommodated within future development. Council officer's comment on site 109 was 'Development would not be supported if adequate and good quality wildlife corridors</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				show the wildlife corridors (i.e. areas not to be developed) on the proposals map (as we have suggested above). This would also provide some actual evidence that the LPA is planning positively to create coherent ecological networks and achieve biodiversity gain (rather than ecological networks which run through development sites and are therefore not coherent!).			were not incorporated into any scheme'.	
638268	Natural History Society of Northumbria		LP20151917	Site 34: Objection This site is partly Local Wildlife Site and mitigation for the developments at Cobalt Business Park. There is little point in site mitigation if it is to be allocated for development further down the line. This ultimately does not mitigate for the permanent impacts of the previous development. Indeed it would be contrary to NPPF requirement for no net biodiversity loss. To develop the Local Wildlife site would be contrary to paragraph 110 of NPPF to "minimise" adverse effects on the local and natural environment, to paragraph 114 to "plan positively for the creation, protection and enhancement of networks of biodiversity" and to paragraph 117 of NPPF to "promote the preservation of, or priority habitats" as this site supports neutral/basic semi-improved/unimproved grassland, a BAP habitat. It would also be in contradiction to the Local Plan policy S/8.4c to conserve and enhance Local Sites. We also note that this area of land provides important grassland habitats that complements the largely wooded adjacent Country Park and also provide an important ecological buffer.		S 5.2 Provision of Land for Employment Development	Comment noted. This site is not a designated Local Wildlife Site but does lie adjacent to the Silverlink biodiversity park so appropriate considerations to the neighbouring wildlife would need to be considered in accordance with the Local Plan e.g. Policies S8.4, DM8.5 and DM8.6 (now policy 5.4, 5.5 and 5.6)	No amendments proposed.

638268	Natural History Society of Northumbria		LP20151918	Site 11 now Site E010: Objection The development on land allocated as an SLCI would be contrary to paragraph 110 to minimise adverse effects on the local and natural environment or paragraph 114 plan positively for the creation, protection and enhancement of networks of biodiversity. This site is also indicated as a wildlife corridor. We also note that this area is of semi-improved neutral grassland (potentially mitigation for an earlier residential development). This habitat is a Local BAP priority and to develop is would be contrary to policy S/8.4 in the Local Plan and to paragraph 117 of NPPF to "promote the preservation of priority habitats". For this reason we believe that it would be inappropriate to develop all of this site. The SLCI should not be developed and an east-west wildlife corridor retained across the site. This could be easily shown on the map (as we have suggested above). This would also provide some actual evidence that the LPA is planning positively to create coherent ecological networks and achieve biodiversity gain.		S 5.2 Provision of Land for Employment Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as Site 9, now Site E008, & 11, now Site E010) , but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. 							promoting Northumberland Business Park, next to Moor Farm roundabout, for high quality office accommodation.	
900788		DEVELOPER	LP20151988	<p>Wallsend Road Industrial Area: Our client objects to the allocation of 146ha of general employment land (with a further 36ha of expansion land) as proposed under Policy S5.2 and- in particular- to the proposed inclusion of 1.55ha of employment land at Wallsend Road (NT006). This appears to be inconsistent with- and unduly bullish when considered in the context of- the three Growth Options set out in Section 7 of the Plan. The most ambitious of the three options, Growth Option A, generates a need for 953 homes per annum and is underpinned by an employment land requirement of "at least 60ha". Using the Council's own analysis, this requirement is estimated to correspond to 1 00ha less land than is currently available (Local Plan Consultation , Paragraph 7.18). On this basis, it is considered that the portfolio of land proposed under Policy S5.2 is inappropriately high and gives rise to an internal inconsistency in the Plan's strategy in relation to housing and employment. The text which precedes Policy S5.2 suggests that the Council's Employment Land Review (ELR) recommended the level of employment land provision proposed in Policy S5.2 (Local Plan Consultation , Paragraph 5.22). A review of the Council's 2015 ELR, raises further concerns regarding the scale of demand being planned for. Our clients concerns can be summarised as follows: The job growth scenarios considered within the ELR apply</p>		S 5.2 Provision of Land for Employment Development	<p>Comment noted. The numbers of jobs are based on the work of economic analysts who have produced an Employment Land Review (ELR) for North Tyneside. There are many contributing factors that have helped feed into the work on the ELR and it draws on the economic forecasts from the North East Local Economic Partnership. The ELR considers previous take up rates of employment land from an annual monitoring survey and considers the market perception of the Borough and market signals to indicate future demand in occupancy or investment. Site NT006, now Site E031, is still considered a suitable employment site and half the site is already occupied. The site is not considered to be an attractive site but this lends itself towards particular types of employment provision and its location is seen to be strategically important for future employment development. Its close proximity to existing established and growing industrial areas, next door to a facility that plays a strategic role of waste transfer within the Borough and also within the A19 economic corridor with excellent transport connections the site should be promoted for future economic development.</p>	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>simple pro-rata adjustments to baseline economic forecasts and job growth targets modelled at the LEP level. They are unlikely, therefore to fully and accurately reflect the growth trajectory and patterns of sectoral change anticipated in North Tyneside over the Plan period; and The ELR recommendation to plan for the land portfolio outlined in Policy S5.2 appears to have been derived from an unrealistically ambitious job growth scenario. Section 6.2.1 states that: "When comparing the 'High+' demand scenario (95.1ha) with the employment land supply (146ha) it is concluded that ... there is sufficient identified employment land to meet forecast demands." The High+ Scenario is understood to assume an increase of 26,163 jobs in North Tyneside over the Plan period -equivalent to 1,450 jobs per annum. This is significantly higher than past trends observed in North Tyneside. It is considered that, without detailed and robust evidence to the contrary, it is difficult to have confidence in the authority's ability to deliver growth on this scale. Having regard to the above, our client believes that it is likely to be more appropriate to plan for a lower level of demand for employment land, which better reflects local economic prospects. As a consequence, our client considers that scope exists to remove site NT006 (and possibly additional sites beyond this) in order to more closely align the demand for and supply of employment land. Site NT006 is vacant and scores poorly within the site assessment work undertaken to inform the Council's ELR. Indeed the ELR Site Survey Database states</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>that the wider industrial area is "not an attractive site, limited parking. Industrial buildings not in excellent condition ". The database indicates that the site has been assessed against twelve individual criteria, and was awarded a red or amber with respect to seven of them. Furthermore, Appendix D of the ELR provides a RAG (Red, Amber and Green) analysis and summary of initial recommendations on a site-by-site basis. This initially classifies site NT006 (Wallsend Road Industrial Area) as amber with a recommendation to "Retain/Release", whilst the majority of sites proposed for allocation in the table accompanying Policy S5.2 are classified as green with a recommendation to "Retain." This suggests that the decision regarding the future use of the site in question was a marginal one. In addition, there are two industrial estates of far superior quality located in close proximity to the site and providing more than 25ha of employment land. This is considered to represent sufficient employment land to meet needs in the immediately surrounding area over the Plan period: "ç The Tyne Tunnel Trading Estate (NT001) comprises of 17.25ha of general employment land, in addition to a further 7.11 ha of reserved land. The site was classified as green with respect to ten of the twelve assessment criteria. The Site Survey Database commented on the "very good" quality of the existing portfolio of premises and concluded that it is a "well established and growing industrial estate that is seen as important for future employment provision";</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				and "ç West Chirton North Trading Estate (NT003) comprises of 0.74ha of general employment land, in addition to a further 1.56ha of reserved land. The site was classified as green with respect to nine of the twelve assessment criteria in the Site Survey Database, which concluded that the location represents a "well established industrial estate. "				
396511	GVA	PLANNING CONSULTANCY	LP20152006	<p>Killingworth Moor - Policy S5.1 sets out the economic growth strategy for the plan period which the consortium broadly support whilst maintaining the right to undertake a further assessment of the quantum of land and sites identified for employment use under Policy S5.2. The consortium specifically supports recognition of the need for new office and business investment including national scale office development and the importance of the A19 corridor. Policy S5.1 "" Economic Growth Strategy In commenting on the Economic Growth Strategy, the consortium has considered the Employment Land Review 2014 (" ELR" ) and the content of the Local Plan. The consortium has not undertaken its own detailed assessment of the ELR or of the sites identified to be available for employment use for the plan period. They do, however, reserve the right to do so.</p> <p>Notwithstanding this, the consortium broadly supports the identification of 146 hectares of available employment land for the plan period (15 years) based on the evidence set out in the ELR. The employment land supply is set out in the Local Plan for the period of 2014 "" 2032 (18 years) yet that does not align with</p>		S 5.2 Provision of Land for Employment Development	Comment noted. The Employment Land Review (ELR) was undertaken in 2014 and covers the period of the Local Plan to 2032. The ELR provides a basis for an employment land trajectory for the next 18 years, covering the time taken for the Local Plan to be adopted (2017) and then 15 years thereafter.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the plan period set out in paragraph 3.1 of the local plan which suggests a 15 year period between adoption (circa 2016/17) and 2032. Based on a 15 year plan period the supply of 146 ha would equate to approximately 10 ha per annum which is in line with historic average land take up. It is noted that a further 36 hectares of reserved land is also available for the plan period, on top of the 146 ha of available land identified. Part of the 146 ha of supply is a single new allocation of employment land for 17 ha at Killingworth Moor (Site 26). This land falls within the consortium's control and is supported for inclusion in a masterplan to be prepared by the consortium in agreement with the Council. The location of employment land within the wider Killingworth Moor allocation under Policy AS7.4 is proposed to lie within easy proximity and access to the A19 but will be established within the agreed masterplan and is subject to ongoing assessment and evaluation of the site and surroundings. The consortium supports the allocation but reserves the right to identify a preferred location (within Killingworth Moor) and also an alteration to the overall quantum of employment subject to the outcome of the ongoing masterplanning of the site. In principle the consortium supports the location of the new employment at Killingworth Moor as it represents a strategically important location as an expansion to the A19 economic corridor (as shown on the proposals map) and is also well related for access not only onto the A19 but also to Northumberland Park</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Metro via a link under the A19. In particular, Killingworth Moor offers the opportunity to provide a large scale site of strategic significance, adding to both the quality and quantity of employment land in the Borough. Well related to Cobalt, it represents a deliverable employment site in the plan period and at this stage a flexible employment allocation including B1, B2 and B8 uses should be applied, subject to any development being compatible with adjoining proposed housing. This will increase employment opportunities and retain more residents of the Borough also working in North Tyneside. As a major investor and developer within North Tyneside the Northumberland Estates is committed to delivery of the employment land within the plan period. It is noted from the ELR that a significant proportion of future demand for employment land will be for B1 uses, particularly B1 (a) offices. Given the successes of Cobalt and Quorum in delivering new B1 (a) office space the ELR identifies a need for further land for this use. The consortium considers that whilst not expressly stated within Policy S5.1, that the land at Killingworth Moor should be identified for B1(a) led development but that it should not be restricted only to that use and should include the potential for a range of business uses and some ancillary and complementary retail and potential small scale leisure uses.</p>

				<p>the effect that house building has on the economy, new economic development must be underpinned by sufficient housing to support the proposed level of job growth for the approach to be considered sustainable. Section 5 in paragraph 5.22 highlights the Council's intent to deliver 707 new jobs Per Annum across the plan period and that this is supported by the ELR. While this representation does not go into the details of deliverability for each site identified in policy S5.2 as stated above delivery of economic development should not just be a question of sufficient land available for that use. As stated later on in this representation there seems insufficient land or housing numbers planned for to sustain this level of economic growth at a viable and sustainable pace across the plan period. Given the aging demographic profile of the area and affordable housing requirement an annual target of 792 is far too low to sustain this level of economic growth. The Council's own preferred option for housing growth states that the planned 792 dwellings per annum will only support 654 jobs per annum. We would like to take the opportunity to identify this issue early and avoid the issues which were encountered during the recent Durham EIP process where the entire plan has been brought into question, we suggest that this is investigated more thoroughly and a revised housing figure or economic job figure proposed and ensure that the figures provided are both robust and defensible during an EIP process.</p>		Development	<p>many contributing factors that have helped feed into the work on the ELR and it draws on the economic forecasts from the North East Local Economic Partnership. The ELR considers previous take up rates of employment land from an annual monitoring survey and considers the market perception of the Borough and market signals to indicate future demand in occupancy or investment. The housing growth has drawn upon a combination of forecasts and scenarios that are considered deliverable.</p>

901015		RESIDENT	LP20152029	Site 11 now Site E010: Adjacent to Proctor and Gamble I am writing to all 3 of you to register my deep concern regarding the proposed building on current green fields between Benton, Wallsend & Palmersville. Since I moved into this area 8 years ago the amount of building that has taken place has been quite extraordinary. This, together with the resultant loss of green space, the increase in traffic and the lack of appropriate infrastructure already struggling to cope with existing demands, means that the whole area is changing "" in my opinion "" for worse not for better. If you believe the current resident's opinions and wishes mean anything "", please do everything you can to stop this impingement on green field areas.		S 5.2 Provision of Land for Employment Development	Comment noted. Site NT012/110 is currently an employment site, which is occupied by Proctor and Gamble. The remaining area of the employment site that is undeveloped is classified as reserved land, which is available solely as potential expansion land. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest sites for development, including those employment areas that are already developed, such as Site 11 now Site E010, whilst balancing many issues such as protecting and enhancing the natural environment and to enhance the image of the Borough. Wildlife interests are considered in Policy S8.1, DM8.2, DM8.4 and DM8.5 (now policy 5.1, 5.2 5.4, 5.5). The transport infrastructure will need to be capable of delivering the growth projections of the Local Plan and this has been considered within the transport modelling work that has led to £150million funding allocated for junction improvements over the next five years.	No amendments proposed.
396238	North Tyneside Council	COUNCILLOR	LP20152094	New Site: Land to the North and West of Nixon's Kitchen lying between the A 1 and A 19 and adjacent to the Holiday Inn roundabout is in the Green Belt but has been a source of nuisance and misuse for many		S 5.2 Provision of Land for Employment Development	Comment noted. 				<p>years which has had to be dealt with by the Police and the Council. Ward Councillors were approached by the owner of the land with change of use proposal to use it for small industrial and manufacturing units. We understand that an outline business proposal has already been sent to the Council and we ourselves were given a plan. Without prejudice we have raised this informally with local people. Not only do those we have asked support this proposal from the point of view of local jobs but also feel it would put an end to the illegal use which they have had to put up with for many years. It is recognised that this is Green Belt land but having studied the Northumberland Local Plan where that Council is considering adding to their Green Belt land, could consideration be given to a reciprocal exchange approach to the Green Belt? It has been suggested by the Council that there is already enough land being proposed for Industrial use and this could have an impact on Indigo Park. We are led to believe the proposed Business Plan submitted by the site owner would provide for a different type of use with smaller units so would not be in conflict with other sites. In Newcastle's local Plan there are proposals for 400 houses to be built next to Brunswick Village (and we believe from local knowledge that movement is already in hand to start this development sooner than anticipated), a further 100 on Coach Lane in Hazlerigg and more recently a proposal for an extension to the Great Park of 5,000 houses. In the Northumberland Plan there are proposals for</p>			<p>the authority to plan for this growth. Having considered the extent of development required to 2032 and the capacity of existing Safeguarded Land in the Borough, there remains sufficient land to meet the development needs of the Borough for at least the current Plan period without requiring a further review of the Green Belt to accommodate future provision.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				a further 3,000 houses immediately to the North of Seaton Burn. This will increase the demand for more job opportunities near to where these houses are to be built. I have also seen letters of support from the two existing successful business units next to where this land is situated. Without prejudice ward Councillors support this change of use.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152097	RE New Site: Land to rear of Front Street, Seaton Burn. Supporting text to the policy (paragraph 5.20) highlights the need to identify a sufficient and flexible supply of land for economic development, which is attractive to new and existing businesses. Due to the unique location of our Client's site, it offers an attractive and deliverable opportunity to new and existing businesses which would contribute towards the delivery of the Council's strategy for economic prosperity and job growth. As such, it is considered that the site should be included as an employment allocation, delivering around 250,000 sq ft of employment floorspace. Support for employment uses at the site has been expressed by operators, including Nixons Kitchens (see Appendix 2). The site is assessed in the Council's recent Employment Land Review (ELR) (February 2015) for its potential as an employment location. The site (ELR reference 95) scores well against a number of site assessment criteria, including: strategic accessibility; local accessibility; and site characteristics & development constraints. It is also important to highlight that the ELR recognises that the site is "within a strategic location close to the A1 and A19".		S 5.2 Provision of Land for Employment Development	Comment noted. Having undertaken an assessment of the existing boundaries of the Green Belt in North Tyneside, it is determined that no exceptional circumstances exist to amend its boundary. Having considered the extent of development required to 2032 and the capacity of existing Safeguarded Land in the Borough, there remains sufficient land to meet the development needs of the Borough for at least the current Plan period without requiring a further review of the Green Belt.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				This demonstrates the suitability of the site for employment uses. The site is regarded in the ELR to be unsuitable for employment use solely as a result of its location within the Green Belt. However, as discussed above, there is no justification for the site's inclusion within the Green Belt and exceptional circumstances exist to support its removal. Its removal from the Green Belt would release a site which provides an excellent employment opportunity within a strategic location to meet specific identified needs.				
808201		RESIDENT	LP20152109	Site 11 now Site E010: Land at Whitehouse Farm to be developed by Bellway - Bell way are obliged to provide an alternative site for wildlife in accordance with their planning application. The land to replace the loss of farmland which was home to wildlife is to be relocated at Seghill. Could Site 11 now Site E010 not be marked for this thereby keeping an open space for wildlife in West Moor? Is it fair that West Moor loses green field sites and Seghill gains? Also see comment (3) below re Site 11 now Site E010. As the identities of Murton and Killingworth villages are to be protected from merging with others, so does the identity of West Moor need protecting to prevent merging with the surrounding communities. At the moment Site 11 is a farm/riding school with fields and provides the community (and the borough) with a popular leisure facility. Developing Site 11 now Site E010 will merge West Moor with Longbenton. At peak times the roads through West Moor, Salters Lane and Benton Lane are deadlocked with the traffic often backed up		S 5.2 Provision of Land for Employment Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as Site 9, now Site E008, & 11, now Site E010) , but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. This will provide a more accurate picture of the overall development proposed. The Site of Local Conservation Importance (SLCI) to the north of Site 11 now Site E010 (NT031) will be protected for its biodiversity value. Wildlife corridors do	Site allocations on the Policies Map with constraints and/or other issues, will be clarified.

				from Killingworth right through to South Gosforth and beyond and Four Lane Ends and beyond.			not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence.	
396269	English Heritage	GOVERNMENT AGENCY	LP20152151	Policy S5.2 - I would suggest the following amendment: ' ... taking into account[ ... ] the potential for delivery to avoid or mitigate any impacts .... ' (see Policy S10.11)		S 5.2 Provision of Land for Employment Development	Comment noted, will amend as suggested.	"avoid or" added to criterion c.
808545		RESIDENT	LP20152246	Site 107: Why not develop this brown field site for housing? Not shown for development but good access to Earsdon bypass		S 5.2 Provision of Land for Employment Development	Comment noted. The site is occupied by Formica and contributes to the overall employment land provision within the Local Plan, thereby reducing pressure for employment development on Greenfield sites. Formica has developed the site as a specialist facility and is within the A19 economic corridor with excellent access to the strategic highway network. The land surrounding the site is classified as 'reserved land', which is recognition of the land being linked to the adjacent user and ensuring that if it is brought forward for development it is for an extension of the existing site.	No amendments proposed.
589431			LP20152251	Site 11 now Site E010: I wish to make the following objection to proposals for development in the Local Plan Consultation 2015 in and around West Moor, in the North West of the County. Site 11 now Site E010 on the plan (adjacent to Quorum) is marked as available employment land, yet a closer site inspection would show it to be a site of Local		S 5.2 Provision of Land for Employment Development	Comment noted. Building here would destroy the green corridor between West Moor and Quorum and would result in them merging into each other. Since the preservation of local identity is such a priority in Murton and Killingworth in the plan, we wonder why, the people of West Moor cannot be afforded the same privileges. We would also like to highlight the sensitivity of land at Point 9 on the map which is adjacent to an SSSI site of conservational importance (in Newcastle) and serves as habitat for many rare species spilling out of the site. Our area in the north west will see enormous amounts of development in the forthcoming years due to existing commitments that will result in large increases in traffic and pollution and we wish to vigorously protect what little green space we have left.		S 5.2 Provision of Land for Employment Development	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as Site 9, now Site E008, & 11, now Site E010) , but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. This will provide a more accurate picture of the overall development proposed. The Site of Local Conservation Importance (SLCI) to the north of Site 11 now Site E010 (NT031) will be protected for its biodiversity value. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence.	Site allocations on the Policies Map with constraints and/or other issues, will be clarified.

				<p>2015 in and around West Moor, in the North West of the County. Site 11 now Site E010 on the plan (adjacent to Quorum) is marked as available employment land, yet a closer site inspection would show it to be a site of Local Wildlife Importance and a site of beauty and significance to local people. Building here would destroy the green corridor between West Moor and Quorum and would result in them merging into each other. Since the preservation of local identity is such a priority in Murton and Killingworth in the plan, we wonder why, the people of West Moor cannot be afforded the same privileges. We would also like to highlight the sensitivity of land at Point 9 on the map which is adjacent to an SSSI site of conservational importance (in Newcastle) and serves as habitat for many rare species spilling out of the site. Our area in the north west will see enormous amounts of development in the forthcoming years due to existing commitments that will result in large increases in traffic and pollution and we wish to vigorously protect what little green space we have left.</p>		Employment Development	<p>North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development (such as Site 9, now Site E008, &amp; 11, now Site E010) , but with objective to also protect and enhance the natural environment and enhance the image of the Borough. As part of the review of the Local Plan, physical constraints and/or other designations, which restrict the size of a site, will be shown on the Policies Map and in the site analysis. This will provide a more accurate picture of the overall development proposed. The Site of Local Conservation Importance (SLCI) to the north of Site 11 now Site E010 (NT031) will be protected for its biodiversity value. Wildlife corridors do not outline a defined boundary for future wildlife provision on a site but it does identify the importance of wildlife movement through a site. The designation of a wildlife corridor would require a development proposal to maintain and enhance the network of wildlife sites and links between them with the appropriate ecological evidence.</p>	<p>issues, will be clarified.</p>

The planning team have been in discussion with the Councils education officers and health officials to determine the impact of the proposed level of growth on the area. The Employment Land Review (ELR) was recently updated (2015) and forms an important part of the evidence base for the Local Plan. The ELR considers which areas of employment land are likely to see future demand in occupancy or investment. All these factors are considered in the future provision of employment land in the Local Plan so that it is able to accommodate future investment. Site NT012/110 is currently an employment site, which is occupied by Proctor and Gamble. The remaining area of the employment site that is undeveloped is classified as reserved land, which is available solely as potential expansion land. The transport infrastructure will be developed in the future Masterplan for Murton and Killingworth, but the traffic impacts from the amount of economic growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements to make it easier and safer to travel throughout the Borough. The Council tried to make as many people aware of the consultation as possible so they can make a contribution to the preparation of the Local Plan and the</p>

	ring Ltd.)			property being allocated for industrial/commercial use. Indeed we believe that it would afford us some additional security over what we currently have. We are in the process of completing an extension to the existing factory on our site which has used up all of our land. Releasing this land from it's current use may also be of benefit to us in allowing us to consider expanding our operation further if this was permitted to proceed rather than us having to consider moving production to our larger facility in Washington, Tyne & Wear at some date in the future. This would not be something that we would lightly consider as we value highly the different methods of production at each facility.		Development	circumstances exist to amend its boundary. Having considered the extent of development required to 2032 and the capacity of existing Safeguarded Land in the Borough, there remains sufficient land to meet the development needs of the Borough for at least the current Plan period without requiring a further review of the Green Belt.	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151335	Policy DM5:3 Development affecting employment land and buildings. CPRE can support this policy.		DM 5.3 Development Affecting Employment Land and Buildings	Support noted.	No amendments proposed.
900788		DEVELOPER	LP20151989	Our client welcomes the positive wording of Policy DM5.3 which allows proposals to come forward for alternative uses on identified Employment Land, providing they would satisfy the four criteria (ad). Whilst our client supports policy criteria (b) (c) and (d), the wording of policy criteria (a) is deemed to be fundamentally contradictory to the purpose of DM5.3, which seeks to enable flexibility in the use of employment land whilst ensuring that developments support the overall growth and prosperity of North Tyneside. As it stands, applications for alternative uses could be		DM 5.3 Development Affecting Employment Land and Buildings	Comment noted. The Policy seeks to ensure that applications on employment land are considered on the basis of their impact on the economic prosperity of North Tyneside and allowing flexibility for other employment uses outside of the planning use classes of B1, B2 and B8. Criteria (a) should be retained as it is reasonable to consider the impact of an application which would harm the regeneration or development of employment sites for economic development. NPPF paragraph 14 makes it clear that the Local Authorities	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				considered to fail to satisfy policy criteria (a) as the loss of an employment site would by definition harm the development of employment sites. This loss should be considered against the overall supply and need for employment land in the Borough. As set out above, policy criteria (a) does not enable flexibility in line with DM5.3 and is also contradictory to NPPF Paragraphs 14 and 22. As such, we recommend that policy criteria (a) is removed.			should seek opportunities to meet the development needs of its area and paragraph 22 also states that land allocations should be reviewed regularly. The policy is supporting the provision of development needs that have been identified in the Borough and these policies will need to be reviewed along with evidence to ensure that the Plan is being delivered.	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151336	Policy DM5:4 Clause c) should include provision of public transport and active travel options as well as vehicular (car) access. Green travel plans could be required. This would be in line with the sustainability appraisal carried out for the sites identified in S5:2		DM 5.4 Employment Land Development Outside Identified or Existing Employment Land	Comment noted. The Policy will be amended to include reference to sustainable transport connections.	Policy DM5.4 (now Policy DM2.4) criteria (c) amended - 'Can be provided with appropriate vehicular access, <b>and supports access to sustainable transport connections, and'</b>
396269	English Heritage	GOVERNMENT AGENCY	LP20152152	Policy DM5.4(d)- development should not be contrary to other plan policies or objectives.		DM 5.4 Employment Land Development Outside Identified or Existing Employment Land	Comment noted. The Local Plan should be read as a whole and therefore the wording in criteria (d) will be amended.	Wording in criteria (d) 'or otherwise be contrary to other policies within this Local Plan' will be deleted as the Local Plan is to be read as a whole and therefore does not need to refer to any contradiction with other policies in the Plan
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151337	Policy AS5:5 CPRE can support this policy but is concerned about the danger of internationally protected wildlife sites pointed out in para 5:35.		AS 5.5 River Tyne North Bank	Comments noted. The potential effects on international sites is noted, hence the reference to policy DM8.6 (now Policy DM5.6) that sets out the requirement for appropriate avoidance or mitigation of, or compensation for, any adverse effects.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
805615	Lambert Smith Hampton	PLANNING CONSULTANCY	LP20151654	It is also acknowledged that the 'River Tyne North Bank' Policy AS5.5 has expanded to support proposals for all forms of employment development that will 'enable economic growth, investment and regeneration of the area where they do not restrict riverside access that could compromise the capacity of the River Tyne North Bank to support marine and off-shore related industry'. This addition is welcomed by the Port as it again more generally supports economic growth and traditional business and Port activities in the area. Whilst the policy goes onto particularly encourage and support development and investment in advanced engineering, manufacturing and renewables sector, with particular reference to the Port of Tyne as part of the North East Low Carbon Enterprise Zone, it is acknowledged that this reflects the work of the Council and its stakeholders in recent years and does not preclude other economic development at the Port.		AS 5.5 River Tyne North Bank	Comment noted.	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151938	Natural England supports the requirement of this policy to be compliant with policy DM8.6 in order to ensure that there are no adverse effects on internationally designated sites.		AS 5.5 River Tyne North Bank	Support noted	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152153	Paragraph 5.35- this policy has the potential to cause harm to the historic environment. This issue could be addressed if Policy AS5.5 were directed to also promote Segedunum and the World Heritage Site as a means of contributing to economic growth and regeneration.		AS 5.5 River Tyne North Bank	Comments noted. This policy supports development and investment in employment uses at the River Tyne North Bank, which is part of the Northeast Local Enterprise Zone. A further policy in the Plan "Wallsend: Segedunum Roman Fort and Hadrian's Wall WHS" provides support to the protection, enhancement and promotion of the WHS. The Plan also	No amendments proposed.

							includes a suite of policies that support the preservation and enhancement of heritage assets. The Plan will be implemented as a whole.	
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015463	We also note the cross-river A19(T) Tyne Tunnels and Shields Ferry strategic infrastructure connections, and the River Tyne wildlife corridor illustrated on Maps 1 and 2. However, there appears to be no mention in the Plan document or on its accompanying Policies Map of the strategic Grade II-listed cross-river pedestrian-cycle tunnels. In this context we support the associated A19(T) Economic Corridor Policy AS/5.6 and supporting text, together with the need to enhance road and public transport infrastructure throughout this strategic growth corridor. We would suggest it may be useful to illustrate this corridor on one of the planar€™s introductory maps.		AS 5.6 A19(T) Economic Corridor	Comment noted. The planning team will review the opportunity to illustrate the A19(T) Economic Corridor on a Map in the Plan, but it is identified on the Policies Map. The pedestrian and cycle tunnels are specifically referred to in paragraph 2.18 with emphasis on the links they provide to both North and South Tyneside.	No amendments proposed.
805615	Lambert Smith Hampton	PLANNING CONSULTANCY	LP20151655	It is our understanding that Policy AS5.6 'A19 Economic Corridor' no longer extends to cover the Port's land holdings at Morston, Howdon Yard and land to the east. This is welcomed given that the policy retains its focus on office development and that the Port's land interests are now adequately covered by policies S5.1 and AS5.5 and need not be included within this policy.		AS 5.6 A19(T) Economic Corridor	Comment noted. The Ports Land holdings at Morston and Howdon Yards are covered by policy AS5.6 (now Policy S2.6), but also Policy S5.1 (now Policy S2.1) and Policy AS5.5 (now Policy S2.5). It must be stressed that the other policies in the Local Plan would need to be considered depending on the future development plans for the site and Policy AS5.6 (now Policy S2.6) does specify that a mix of employment uses would be prioritised and not just offices for the areas towards the south of the A19.	No amendments proposed.
900788		DEVELOPER	LP20151990	Our client broadly supports the Council's aspiration to promote and support further development and investment in a range of B1, B2 and B8 employment activities across the		AS 5.6 A19(T) Economic Corridor	Comment noted. The boundary of the A19 economic corridor will be considered as the Plan progresses to the next stage of consultation but currently the sites to south	Policies Map amended so that it includes the transport areas of the proposed Metro route and

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>A 19 (T) economic corridor, as identified on the Policies Map. In addition, our client also understands that the A 19 (T) economic corridor will continue to play a central role in growth in employment in North Tyneside over the life of the plan. However, the boundary of the A 19 (T) economic corridor, as identified on the Policies Map should be amended. Specifically, the south-east boundary of the A 19 (T) economic corridor which currently incorporates a residential area, community allotments and our client's site, should be removed from the designation to ensure conformity with the objectives of policy AS5.6. The eastern boundary should be brought in to align with Alnwick Avenue; should then follow the wagon way (southwards) down to the A 193; and should then follow the A 193 (westwards) until it intersects with the A 187. The boundary should then follow the A 187 southwards. There are sufficient sites already identified in the A 19 (T) economic corridor to deliver the planned growth, which are more suitable for economic purposes than our client's site. In this context, we request that this site is removed from this designation. The suggested amendments will allow the A 19 (T) economic corridor to be supported by defensible boundaries and will ensure accordance with the objectives of policy AS5.6 by removing sites that are not needed for economic development.</p>			<p>of the A193 and east of the A187 are identified for future employment provision in the Employment Land Review (2015) and Policy AS5.6 (now PolicyS2.6) would also be applicable to the area identified.</p>	<p>the employment land at Killingworth.</p>
830571	Persimmon Homes	DEVELOPER	LP20152030	<p>This Rep details a policy that does not exist but relates to Policy DM5.7 hence it has been input into this category: DM/4.6: Employment</p>		DM 5.7 Employment and Skills	<p>Comment noted. 				keep it that way.			report untidy street or overflowing litter bins - <a href="http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins">http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins</a>	
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015469	We note North Tyneside's strategic aspirations and updated assessed needs for growth in policies S5.1-5.2, S6.1-6.3 and S7.1 (now S4.1)-7.2 plus DM7.6,		S 6.1 Competitive Centres	Comment noted.	No amendments proposed.
898920	Sustrans		LP2015981	Residential development within town and district centres in particular adjacent to or on top of Tyne & Wear Metro stations should be encouraged. Car free development has successfully been permitted in dense urban locations elsewhere in the UK and would be appropriate for a number of transit rich locations in North Tyneside.		S 6.1 Competitive Centres	Comment noted. The Local Plan does not recognise residential development as a main town centre use but it does acknowledge its importance to a healthy and vibrant town centre. The Local Plan advocates this in Policy DM6.4 (now 3.4) criteria (b) 'Promote the vitality and viability of the centre, including proposals for residential development and conversion of upper floors.'	No amendments proposed.
899444	George F White		LP20151252	S6.1 Competitive Centres Our Client supports the Consultation Document Policy S6.1. This comment relates mainly to: "ç a. 'Contribution to the protection and enhancement of the vitality and viability of the centre'; and "ç f. ""Enhance accessibility by all modes including public transport, walking cycling and by car'. If town centres are clean, safe and easily accessible local people are likely to use their local town centre for services. All existing and new residential development should have safe and suitable access to their local town centre through sustainable modes of transportation, giving local people the choice of how to travel, for example: if they do not have a car, or they would like to walk or they choose to travel by		S 6.1 Competitive Centres	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				car due to weather conditions or for time saving. Therefore, if enhanced accessibility is created local people are likely to use their local town centre, which in turn will protect and further enhance the vitality and viability of the centre, due to increased local expenditure. It also makes the area a more vibrant place to want to live, work, invest or carry out leisure activities. The NPPF (22) suggests that town centres should be at the heart of communities and that residential development can play an important role in ensuring vitality of centres, where residential development is encouraged on appropriate sites.				
898630			LP20151271	I'm afraid that I don't see what you are actually going to do to help these areas apart from set aside land for more development. In my area, Forest Hall, there are plenty of empty shops, and I know one, the café, closed because of a combination of a rent increase and high business rates. I'd like to see what practical measures you will implement to help fill empty shops. There are now no shops in Forest Hall that have a toilet The public convenience is not open for very long, so people who might linger are less likely to do so, which affects footfall. Also, turn the office building in Forest Hall into flats, that would help with housing and be a boost the shopping area.		S 6.1 Competitive Centres	Comment noted. The Local Plan supports residential development in town centres to promote the vitality and viability of centres and the conversion of the upper floors to residential (Policy DM6.4 now 3.4), but rental levels or business rates are not a planning matter. The Council has recently invested in some improvements to Forest Hall with the intention to improve the public realm to try and create an environment people are more likely to visit and therefore create opportunities for new investment. Planning can support this work but ultimately the decisions to invest in a centre are market led.	No amendments proposed
			LP20151404	I object to the development and building of out of town retail parks. These will kill our town centres. Killing off town centres is contrary to your policies on community building. I would like to see the Town Centres		S 6.1 Competitive Centres	Comments noted. The National Planning Policy Framework states Local planning authorities should apply a sequential test to planning applications for main town centre uses that	No amendments proposed.

				centres, particularly North Shields and Wallsend, as discussed in Paragraph 6.7.				
396253	Northumb erland Estates	DEVELOPER	LP20151920	The Northumberland Estates broadly support the Council's overarching strategy for pursuing the growth of the Borough's defined centres, and in particular their support for the improvement of the range and quality of shops, services and facilities.		S 6.1 Competitive Centres	Support noted.	No amendments proposed.
510094	Natural England	GOVERNME NT AGENCY	LP20151941	Natural England would encourage a reference to policy DM8.6 in relation to this policy to ensure that it is compliant with the Habitats Regulations. The measures listed would encourage visitors to the competitive centres which in the case of Whitley Bay is adjacent to the Northumbria Coast SPA/Ramsar and Northumberland Shore SSSI and therefore the indirect effects of this policy in combination with those policies that encourage visitors to the coast should be considered in your Habitats Regulations Assessment (HRA) and SA.		S 6.1 Competitive Centres	Comment noted, reference to policy DM8.6 will be added. Please note DM8.6 has been renumbered to 5.6.	"This policy has been identified as having the potential to cause adverse impacts on internationally protected wildlife sites. When implemented, regard should be had to policy DM5.6 that sets out the requirement for appropriate avoidance or mitigation of, or compensation for, any adverse effects." added at 11.51
396269	English Heritage	GOVERNME NT AGENCY	LP20152157	Policy S6.1 - I welcome support for schemes which capitalise on the character, distinctiveness and heritage value of the Borough's town centres.		S 6.1 Competitive Centres	Support noted.	No amendments proposed.
809185	CPRE	NATIONAL/R EGIONAL/OR GANISATION	LP20151342	Policy DM6:10 CPRE is concerned that this policy should be as robust and stringent as NPPF will allow. Clause d) is counter-intuitive: one of the sequential tests justifying an out-of-town centre is surely poor access to an existing town centre. Good access and connections to an out-of-town centre from a failing town centre is likely to drain further trade from the town centre. Clauses g and h) should explicitly refer to adverse impact on		DM 6.10 Edge of Centre and Out of Centre Development	Comment noted. The Council is promoting a town centre first approach to revitalise its town centres in accordance with the NPPF. Clause (d) is a reflection of NPPF paragraph 24 'When considering edge of centre and out of centre proposals, preference should be given to accessible sites that are well connected to the town centre'. Clause (g) and (h) make specific reference to committed and planned public and private	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				projects regenerating existing town centres.			investment in a centre or centres, but deliberately not being explicit to certain regeneration projects so the policy can be flexible and therefore applicable to future projects over the lifetime of the Local Plan (15 years) that are not yet developed.	
899323			LP20151605	<p>We consider that the Council should take every opportunity of revising the Borough's planning policy framework to ensure long term sustainable growth of the established town centres. This should be executed by applying the below policy provisions required by the NPPF: i. The NPPF promotes a town centre first approach and seeks that planning policies should promote competitive town centres which are attractive to the whole community as places to work, shop and visit. Paragraph 23 of the NPPF requires that in drawing up Local Plans, local planning authorities should recognise town centres as the heart of their communities and pursue policies to support their viability and vitality. The NPPF further requires that where town centres are in decline, local planning authorities should plan positively for their future to encourage economic activity (Paragraph 23). Page 3 of 7 i. The new Local Plan should further require a sequential test to planning applications for main town centre that are not in an existing centre. Applications for main town centre uses to be located in town centres, then in edge of centre locations and only if suitable sites are not available should out-of-centre sites be considered. When considering edge of centre and out-of-centre proposals, preference should be given</p>		DM 6.10 Edge of Centre and Out of Centre Development	<p>The Council adopts a town centre first approach in the Local Plan and this is reflected in its objectives and policies. The Local Plan seeks to deliver the objective to 'revitalise its town centres' and support the protection and enhancement of the vitality and viability of its centres. The Local Plan has a specific policy for each town centre (except for Killingworth), with the intention to provide confidence and direct future regeneration to its centres. The Local Plan adheres to the guidance provided in NPPF for applying the sequential test and the Council has adopted a locally set floorspace threshold for an impact assessment, based on the evidence in the updated Retail and Leisure Study (2014). There is no evidence to justify a lower threshold for determining impact of convenience floorspace than the level proposed. The local floorspace threshold for North Tyneside is a reflection of the Councils intention to ensure that future planning applications reflect the local market conditions in its centres that are of a smaller scale than the national thresholds. The details of the recent planning application for the Travelodge site on the Silverlink considered the arguments for and against the proposal in light of the latest available evidence and government</p>	<p>Amend Paragraph 6.57 (now para 6.30) to reference NPPF. Amend criteria (h) with the following and add an additional line at the end of the policy to reflect paragraph 27 in NPPF. (h) The <b>proposal would have no significant adverse impact</b> on the vitality and viability of a Town Centre, including consumer choice and trade in the Town Centre.</p> <p><b>Where an application fails to satisfy the sequential test or is likely to have significant adverse impact on one or more of the above factors, it should be refused.</b></p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>to accessible sites that are well connected to the town centre (Paragraph 24).            i. For assessing applications for retail, leisure and office development outside of town centres, the Local Plan should ensure the requirement for an impact assessment if the development is over a proportionate, locally set floorspace threshold (Paragraph 26).            ii. Where an application fails the sequential test or is likely to have significant adverse impact should it be refused (Paragraph 27). In the local context, we note that the Borough's Town Centres are under increasing pressure from out-of-centre retailing proposals. The recent officer recommendation to grant approval of the Silverlink expansion scheme (Ref: 14/01698/FUL) incorporating a 47% increase in retail provision of this already successful and popular out-of-centre shopping destination is a worrying example of the development that NewRiver Retail sees as unacceptable for an out-of-town location. Our Client is concerned that the developments such as the Silverlink have the following adverse effect on investment within the town centres:            i. Drawing large numbers of people from the catchment areas.            ii. Diverting significant volumes of trade from existing retailers in these centres, thereby reducing footfall in the town centres and weakening their vitality.            iii. Absorbing significant volumes of expenditure growth that should be directed to existing town centres, thereby undermining the viability of town centres.            iv. Removing any incentive to invest in these centres. The result of these effects incurs a significant adverse</p>			<p>guidance and the Councillors determined to approve the application. The Council recognises that improvements can be made in each of its centres and each has to adapt to encourage a greater number of visitors to help encourage future investment, this is reflected in the Local Plan in policy DM6.4, AS6.5, AS6.7, AS6.8 (now Policies DM3.4, AS8.13, AS8.2, AS8.3). Paragraph 6.57 (now para 6.30) and Policy DM6.10 (now Policy DM3.4) will be amended (criteria (g) and (h)) reflecting the comments suggested.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>impact on the vitality and viability of the Borough's town centres. Particularly in the context of the NewRiver Retail's asset locations, we note that North Shields and Wallsend town centres are experiencing an increasing difficulty in maintaining their due vitality. We consider that neither of these two centres is strong not enough to withstand the increasing diversion of trade to out-of-town locations, and we have set out the relevant evidence in our representations to the Silverlink proposals (Ref: 14/01698/FUL). In brief, the commercial condition of the two town centres can be summarised as: North Shields Town Centre (in relation to the wider town centre and not The Forum Centre only) i. Has experienced a significant slippage in the retail rankings. ii. Is experiencing worsening rents and yields. iii. Is experiencing diminishing levels of operator interest and rising vacancy rates. iv. The August 2013 Experian survey recorded high vacancy rates at 15%. v. The property offer throughout the centre is out-dated and out-moded. Wallsend Town Centre (in relation to the wider town centre and not The Beacon Centre only) i. Has declined significantly in the rankings. ii. Is experiencing decline in weekly footfall. iii. Is experiencing decline in rents and yields and a rise in vacancy rates. iv. Retail units are dated and in a poor condition. v. The quality of the physical environment is poor. vi. There are key deficiencies in the comparison retail focussed on discount retail offer. Page 4 of 7 The above findings are based on the 2011 Retail Study and there has been anecdotal evidence of</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>increasing footfall and lower vacancy rates. These are however understood to be the effect of the increased market confidence following NewRiver Retail's investment in the two Centres. Overall, despite the recent signs of improvement, it is considered that North Shields and Wallsend are poorly performing centres that are under risk of diversion of trade to out-of-centre locations. It is therefore clear that that the emerging planning policy must ensure that the viability and vitality of the town centres are protected and enhanced. In light of all the above, NewRiver Retail proposes the following amendments in relation to Policy DM6.10 Edge of Centre and Out of Centre Development: i. NewRiver Retail supports the locally identified threshold of 500 sq m gross of comparison retail floorspace and considers that this would also be appropriate for convenience goods meaning that all proposed for retail developments over 500 sqm that are not located within an existing centre should provide an assessment of impact. ii. The third part of the policy states: "The proposal would be supported when the necessary Impact Assessment has shown that: g. the proposal would have no significant adverse impacts, either individually or cumulatively, on existing committed and planned public and private investment in a centre or centres in the catchment area of the proposal; and h. the impact of the proposal on the vitality and viability of a Town Centre, including consumer choice and trade in the Town Centre." We note that in order to comply with the</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Paragraph 26 of the NPPF, point h. should read: "h. there will be no impact of the proposal on the vitality and viability of a Town Centre, including consumer choice and trade in the Town Centre and wider area, up to five years from the time the application is made. For major schemes where the full impact will not be realised in five years, the impact should also be assessed up to ten years from the time the application is made."</p> <p>ï. We would like to request that the following assertion, in accordance with the NPPF Paragraph 27, is added to the text of the policy: "Applications that fail to satisfy the sequential test or are likely to have significant adverse impact on one or more of the above factors will be refused."</p> <p>Finally, our Client would like to reconfirm its position on the below suggestions put forward in the January 2014 representations:</p> <p>ï. NewRiver Retail considers Policy DM6.10 should specifically protect from impacts on planned growth in centres from development which comes forward on edge of centre and out-of-centre sites. This would reinforce the "town centre first' approach advocated in the NPPF. The NPPF should be referenced in Paragraph 6.57 to emphasise this.</p> <p>ï. NewRiver Retail considers it necessary to strengthen Policy DM6.10. We would like to reconfirm our position on the proposed wording for this policy. The opening Paragraphs should be amended to state "Proposals for main town centre uses on sites not within the defined town and district centres will be permitted where will not normally be permitted unless</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				they meet the following criteria" (suggested change underlined).				
900234		RESIDENT	LP20151756	DM6.10 e, f, and para. 6.68 Support this approach compared to Government policy and the reasons given for it. Object to the word "unacceptable" in the last sentence of 6.68: should be "significant" to reflect the wording of DM6.10g, unacceptable is more open to interpretation and its significant impacts we want to avoid. Better still, both the policy and justification text should say "significant and/or unacceptable" to be clear.		DM 6.10 Edge of Centre and Out of Centre Development	Comment noted and paragraph 6.68 (now para 6.34) will be amended to change unacceptable to significant so therefore ensure consistency with the policy (DM6.10, now DM3.4) and national guidance (NPPF).	Amend Para 6.68 (now para 6.34) to change 'unacceptable' to 'significant' adverse impact.
900234		RESIDENT	LP20151757	DM6.10 b Object. Policy wording of "b" should end after the word "addressed". For North Shields at least, and I think for the other town centres, edge of centre is better than out of centre. If there were to be a big development proposed that was out of scale with a town centre I think it is better to be at the edge of centre rather than miles away out of town. Geography and site availability in practice means that there isn't space for anything massive at edges of towns anyway. The possible exception is the southern tip of Wallsend town centre but that land is "available employment land" and so presumably employment land protection policy should protect it. Even if not, wouldn't that location at the edge of Wallsend be a better and more accessible place than completely out of town? And retail or other town centre type uses like offices would be providing employment, quite likely at job densities as high as e.g. manufacturing and certainly warehousing.		DM 6.10 Edge of Centre and Out of Centre Development	Comment noted. The justification for maintaining 'edge-of-centre sites should be of a scale that is appropriate to the existing centre' is to acknowledge the differing impact of a large scale proposal against its neighbouring centre. The impact of a large scale edge of centre site against one of the Boroughs town centres (such as Wallsend) would likely have less of an impact than to a Local Centre (such as Howdon) and therefore considering the scale of a proposal in relation to the designated centre is considered appropriate.	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
806149	New River Retail	LANDOWNER / BUSINESS	LP20151881	However, although we support the wider objectives and strategy of the Plan, we believe that it should include a specific policy mechanism for testing the effects of application proposals that come forward outside the defined North Shields regeneration areas, in order to ensure that they will not have any material adverse effects on any aspects of the regeneration strategy. Safeguarding the defined areas in this way and guiding development activity will be an important part of securing the necessary investment in the regeneration areas and we object to the Plan's lack of specific policy framework on this point,		DM 6.10 Edge of Centre and Out of Centre Development	Comment noted. Policy DM6.10 (now Policy DM3.4) does outline criteria for town centre proposals outside of a defined centre. The sequential test would need to be applied and if the proposal is for development over the local floorspace threshold it would need to provide evidence of no significant 'adverse impacts, either individually or cumulatively, on existing, committed and planned public and private investment in a centre or centres in the catchment area of the proposal'. The intention of the Plan is put town centres first and support town centre investment opportunities. Policy DM6.10 will be amended to strengthen its approach towards town centres and refuse a proposal that fails to satisfy the sequential test or is likely to have significant adverse impact on criteria (g) and (h).	Amend criteria (h) with the following and add an additional line at the end of the policy to reflect paragraph 27 in NPPF. (h) The <b>proposal would have no significant impact</b> on the vitality and viability of a Town Centre, including consumer choice and trade in the Town Centre.  <b>Where an application fails to satisfy the sequential test or is likely to have significant adverse impact on one or more of the above factors, it should be refused.</b>
878656		RESIDENT	LP20158	Further housing in the Killingworth area; how can this be justified whilst the shopping facilities in the area are so poor? For example, apart from a small Greggs outlet the only food shop in the town is Morrisons. This would not be tolerated in Wallsend, North Shields or Whitley Bay, so why here? In addition to this, Killingworth has none of the following: Chinese takeaway, Indian Takeaway, Pizza Takeaway, Kebab Takeaway, Fish 'n' Chip Shop, Bank, Building Society, Butcher, Restaurant, Taxi Rank. Can you explain why it is impossible to buy a newspaper in Killingworth before 10am on a Sunday? Or why the local perception is that Morrisons own the town? Can you explain why there is no choice for the local residents? More		S 6.2 Hierarchy of Centres	Planning cannot control the 'quality' of retailing that occupies Killingworth town centre. Morrison's supermarket does offer a large selection of products and Killingworth is not considered to be poorly served by its retail offer. Wallsend has for a long time had no supermarket in its town centre (although it has had Iceland), but recently a planning application for a new Aldi supermarket has been approved. Morrison's are significant land owners of Killingworth town centre and therefore have a significant influence in determining future investment into the town centre. There are potential benefits with the suggested increase in housing in the area as this would place a greater demand for services that could include a	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				housing will only make the absence of proper shopping facilities worse, can you explain why this has not been taken into consideration? Many people in the area are simply getting old or are disabled and unable to travel, not everyone can drive or afford to own a car. It seems as if North Tyneside Council regards the people of Killingworth as second class and not deserving of the facilities taken as granted elsewhere in the Borough. Also, since the bus services have been cut back, it is now far more difficult for people to visit shops such as Aldi in Palmersville or the Benton Asda.			greater variety of shops and services. Bus timetables are not a planning matter but with a potential rise in the local population it may lead to increased services with increased demand – this would be something that would need to be discussed with the bus operators.	
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015470	We note North Tyneside's strategic aspirations and updated assessed needs for growth in policies S5.1-5.2, S6.1-6.3 and S7.1 (now S4.1)-7.2 plus DM7.6,		S 6.2 Hierarchy of Centres	Comment noted.	No amendments proposed.
899444	George F White		LP20151253	S6.2 Hierarchy of Centres Our Client supports proposed policy S6.2. Killingworth is listed as a main town centre, which supports its local catchment area, in line with the NPPF (22). Killingworth, unlike the other three town centres, has the capacity to expand and provide other town centre services as the town grows, this would be enhanced by an increase in population through new additional dwellings in accessible locations. Killingworth does not have a close-by out of town shopping centre to compete with, so its vitality and viability should be enhanced as a result.		S 6.2 Hierarchy of Centres	Support noted.	No amendments proposed.
464572	Landowner	PLANNING CONSULTANCY	LP20151488	Support the classification of Forest Hall as a District Centre.		S 6.2 Hierarchy of Centres	Support noted.	No amendments proposed.
803900	Northumberland	LOCAL AUTHORITY	LP20151530	The Council supports the town centre first approach and the proposed hierarchy of		S 6.2 Hierarchy of	Support noted.	No amendments proposed.

	County Council			centres, as this relates to our own hierarchy. The Council supports the continued definition of the Silverlink as an "out of centre" shopping area in paragraph 6.15.		Centres		
899323			LP20151603	NewRiver Retail supports the continued designation of the existing Town Centres as proposed under this Policy and the emphasis placed on the role of North Shields and Wallsend as the main retail destinations within the Borough. Paragraph 6.15 provides supportive text to this policy and notes that the Silverlink Retail Park is not currently designated as a centre within the retail hierarchy. NewRiver Retail also supports the continued non-designation of Silverlink Retail Park, as stipulated in Paragraph 6.15. Silverlink is an out-of-centre Retail Park and should continue to be considered and designated as such in order to prevent the increase in town centre uses that would have a harmful effect on the established Wallsend and North Shields town centres.		S 6.2 Hierarchy of Centres	Support noted.	No amendments proposed.
396253	Northumberland Estates	DEVELOPER	LP20151811	The Northumberland Estates support the Local Plan's emphasis on vibrant town centres. The Local Plan identifies a hierarchy of centres (Policy S6.2) in North Tyneside, including town centres, district centres, and local centres. Northumberland Estates support the inclusion of Northumberland Park within the second tier of this hierarchy as a designated district centre. Paragraph 6.13 outlines that Northumberland Park's status as a district centre depends on its expansion as identified on the Policies Map Site 30. Northumberland Estates supports the expansion of Northumberland Park within the		S 6.2 Hierarchy of Centres	Comment noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>plan period, and supports the Local Plan's identification of the area as a district centre based on its future development. Site 30 is identified on the Policies Map as Land at Backworth Metro, Northumberland Park, and is allocated as a preferred retail development site. The Northumberland Estates supports the identification of this site for retail use, and consider that priority should be given to a range of retail and town centre uses on the site. This site is approximately 3.9 hectares, and consists largely of undeveloped land. The site benefits from a very sustainable location, in close proximity to the adjacent Northumberland Park District Centre, and excellent public transport accessibility through the Northumberland Park Metro Station and Park &amp; Ride facility. The site is in close proximity to two identified "Large Sites with Planning Permission" "Scaffold Hill and Backworth Park. Both of these sites have planning permission for housing, and therefore Site 30 will fulfil an increasingly important role in contributing to Northumberland Park District Centre as a sustainable centre serving a major growth point and growing local population.</p>				
396253	Northumberland Estates	DEVELOPER	LP20151921	<p>The Northumberland Estates support the definition of Northumberland Park as a District Centre. This reflects the centre's current and future role in serving the existing and proposed residential and business communities in the surrounding area. The Northumberland Estates also support the recognition at Para. 6.13 of the Consultation 2015 that Northumberland Park District</p>		S 6.2 Hierarchy of Centres	Comment noted.	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Centre has the potential for future expansion, in order to help meet the Borough's overall need for retail provision. The Northumberland Estates are concerned, however that its identification as a District Centre is dependent on the delivery of the edge of centre site allocated in the Local Plan and that if this site is not delivered then Northumberland Park would be classed as a Local Centre. The Northumberland Estates is committed to submitting an outline application for the development of this site for retail use in the near future, securing its status as a District Centre.				
901136		LOCAL AUTHORITY	LP20152066	Newcastle acknowledge that North Tyneside's consultation recognises the significant role and function of Newcastle city centre as the regional centre and a key transport hub which is easily accessible to residents from all parts of North Tyneside. Consequently there is leakage of comparison goods retail spend from North Tyneside to Newcastle and we welcome the support for the allocation of East Pilgrim Street Key Site in the CSUCP. Newcastle support North Tyneside's approach to the retail hierarchy and the role and function of centres within North Tyneside. North Tyneside's Retail and Leisure Study (2014) recommends modest future retail growth over the next 5 years increasing towards the end of the plan period as growth in population and per capita spend increases. We support North Tyneside's approach to identifying centres which could accommodate future growth in accordance with the NPPF and the potential to identify additional		S 6.2 Hierarchy of Centres	Support noted.	No amendments proposed.

				centres as part of the strategic housing release.				
878767			LP201520	The projected additional required floor space for town centre retail units appears to be substantially over optimistic. At December 2014, it is quoted that the current shop unit vacancy in Whitley Bay was at 10%, North Shields at 15% and Wallsend at 16%. Indeed the Council already recognises that there is a need to convert a proportion of our existing and future vacant shops and the spaces above into residential units so that our town centres can become more economically viable, vibrant and sustainable. (See Policy DM6.4). If the projected required floor space for retail units does not materialise, this will provide additional sites for further residential use and could help reduce the need for developing some of the planned proposed greenfield housing estates.		S 6.3 Future Retail Demand	Comment Noted. Retail needs for North Tyneside are based on expert advice from consultants who have considered the growth projections for the Local Plan. The assessment also takes into consideration, the quality and attractiveness of the current retail offer, and existing levels of vacancy, and is informed by an approach that would increase the proportion of retail expenditure arising from residents of North Tyneside that is spent within the Borough. The policies in the Local Plan will need be monitored on an annual basis and will be reviewed if specific requirements for development are not being achieved.	Specific sites have been defined on the policies map.
890851		RESIDENT	LP2015167	We also need local shops		S 6.3 Future Retail Demand	Comment noted. The Local Plan seeks to support sustainable development in the Borough and the Plan supports the provision of small scale local facilities, helping to support local communities. The Plan also seeks to revitalise its town centres supporting vibrant centres that improve the range and quality of shops, services and facilities.	No amendments proposed.
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015471	We note North Tyneside's strategic aspirations and updated assessed needs for growth in policies S5.1-5.2, S6.1-6.3 and S7.1 (now S4.1)-7.2 plus DM7.6, including: i, -i, to provide for at least (a revised up) 6,378m2 of additional net convenience retail floorspace and (a revised down) 15,249m2 of additional		S 6.3 Future Retail Demand	Comment noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				comparison goods floorspace between 2014-2032;				
396253	Northumberland Estates	DEVELOPER	LP20151922	<p>The Northumberland Estates support the amendment to Policy S6.3 to refer to the provision of 'at least' the amount of additional retail floorspace set out in the policy. This goes towards addressing its objection to the 2013 Consultation which sought to impose limits on the quantum of convenience and comparison floorspace which can come forward in the Borough. Whilst the updated Study provides a helpful starting point in assessing the availability of expenditure capacity to support new development, individual proposals which emerge throughout the plan period will be subject to retail impact assessment at the point of planning application submission, and this may identify the potential for significant additional floorspace over and above that currently identified. It is noted that paragraph 6.16 of the Consultation 2015 states that, the updated Retail Study identifies no overarching need for major leisure developments during the plan period. This is surprising given that per capita spending on leisure activities is forecast to grow significantly over the next ten years, by around 14% (on the basis of forecasts provided by Experian). In the context of the need to plan for all development needs in full, as set out in the NPPF, it is important that the Council plans positively to provide new leisure facilities which meet the needs generated by this growth in spending. This is particularly the case given the new and emerging leisure</p>		S 6.3 Future Retail Demand	<p>Comment noted. Successful town centres can no longer rely on retail to be the only function in a town centre. Increasingly the role of leisure uses is an important component of a successful centre as visitor's aspirations for greater availability and choice rises. The recent retail and Leisure Study (2014) concluded that there was no qualitative requirement for further major leisure developments of a bingo or a cinema but there is scope for the development of restaurants, pubs and bars across the Boroughs centres to improve the evening economy – especially in Wallsend. The 2011 Study concluded that the process to determine a future quantitative need for additional food and drink outlets and other commercial leisure uses is difficult to predict so rather than taking an approach of defining an overall level of future need, the Local Plan seeks to support the development of leisure developments in the most appropriate sustainable locations meeting the necessary local and national policy requirements.</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				schemes coming forward in nearby local authority areas, including those in Newcastle City Centre, Gateshead Town Centre and Cramlington, and at Metro Centre- which are likely to attract customers from North Tyneside and contribute towards unsustainable travel patterns. Paragraph 6.25 notes that there is significant scope for the development of a further mix of restaurants, pubs and bars across the borough up to 2032. In this regard it is considered that the site to the south-west of Northumberland Park, identified to accommodate the expansion of Northumberland Park District Centre, offers potential, in both planning and commercial terms, to accommodate such uses, potentially alongside any new retail uses. This would also result in benefits, in terms of linked trips and spin-off business, for existing uses within the centre.				
878767			LP201521	The Policy to encourage the conversion of some of the existing and future vacant shop units and the space above to residential units is welcomed. However the resulting increase in housing units created by this conversion does not appear to have been taken into account when projecting the number of net new housing units that will be required across the region. Similarly the conversion of hotel/guest house (and other existing buildings) to residential units will also reduce the need for new housing. The conversions need to be taken into consideration when forecasting the future need for new housing. Such conversions may help defer or even avoid the need for developing out of town		DM 6.4 Primary Shopping Areas	The Local Plan does consider the amount of residential development that could be provided through the conversion of shop units and developing residential units above shops. However, the levels of residential development provided in town centres would not be of the scale to defer or avoid the need to develop out of town Greenfield sites for housing. The amount of homes required to provide for the growth of development needed in North Tyneside from 2011/12 to 2031/32 is 16,632. Of these, some sites have been granted planning permission (approx. 5,000 homes), some have been built between 2011/12 and December 2014 (approx 1,600) and some	No amendments proposed.

899323			LP20151610	As per our previous representations, NewRiver Retail supports the designation of the Primary and Secondary Shopping Frontages orientated at promoting vitality and viability of the centre in its principal role as an area of retail activity. We agree with designating the Beacon Shopping Centre and the Forum Shopping Centre frontages as Primary Shopping Frontage, as proposed in Maps 7 and 8 of the Consultation Document. We note that the Policy seeks to prevent		DM 6.4 Primary Shopping Areas	Comments noted. The designation of a percentage of A1 frontage within Policy DM6.4 (now Policy DM3.4) will be considered as the Plan is prepared to ensure the purpose of the Policy will deliver its objective to revitalise the Boroughs town centres. The work of the Town Centre manager and the Geographic Information Systems team and analysis from other authorities can be shared to help explain the reasoning of the percentage based policy if	Policy amended to 80% and now covers A1, A2 and A3 use class to allow for the greater mix of town centres uses that add to the vitality of a town centre, whilst also trying to offer some thresholds to encourage a healthy town centre

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>development in primary Shopping Frontage which would result in less than 70%. Whilst the additional considerations are welcome, NewRiver Retail considers a requirement for 70% of the frontage in Class A1 use to be too commercially restrictive and we are not aware of evidence that would back up the proposed policy. We note that, in the Consultation Response to our comments from January 2014, the Council refers to evidence drawn from the "work of the Town Centre Manager and Geographic Information Team and analysis from other authorities". We would like to kindly request that this information is made available to justify the proposed threshold. NewRiver Retail considers it necessary for Policy DM6.4 to be further amended to be more commercially flexible, or at least appropriately cross referenced to other relevant policies. The North Tyneside Retail and Leisure Study (December 2011) reports Wallsend noticeably underperforms in both "restaurant and cafes, and bars, clubs and pubs categories" which "highlights the extremely limited provision of such facilities in the town centre" (Paragraph 5.106). Whilst NewRiver Retail recognises the importance of maintaining the primary retail function of town centre, the policy should be amended to recognise that leisure pursuits such as eating out as part of a wider shopping trip are now far more common and contribute to the vitality and viability of the town centre. Paragraph 1.37 of the Retail Study indicates leisure services expenditure is expected to grow up to 148.8m by 2027, of which 63% will</p>			<p>it remains within the policy. The Council recognises the increasing role of leisure pursuits to the success of a town centre as the traditional high street is changing. Improving the quality and offer of restaurants, cafes, pubs/bars in the Boroughs town centres could increase in footfall and longer dwell time in a centre and also encourage people to visit outside the normal 9am-5pm opening hours for most shops.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				be eating and drinking establishments (Paragraph 8.39). It is recommended that capturing a sizeable proportion of this growth expenditure will be vital for the health of North Tyneside centres "In particular the provision of a wider and more appealing choice of restaurants, cafés and pubs/bars in Wallsend would support the growth of an evening economy in the centre, and it would enhance access to such facilities for the town's residents" (Paragraph 1.38). In order for Wallsend to benefit from this expenditure, Policy DM6.4 should be amended to allow a higher percentage of non-retail uses in the Primary Shopping Frontage based upon clear evidence. Alternatively, policies such as AS6.5 (North Shields Town Centre: Beacon Centre) and AS6.7 (The Forum Shopping Centre, Wallsend) should clearly take precedence over more 'generic' defined retail frontage policy.				
900234		RESIDENT	LP20151749	North Shields Town Centre boundary on inset proposals map Object. Town Centre boundary should include Site 64 (which should not be a housing site-see below). This site is in 'proper'/main town centre uses and should remain so, even if some of the uses on it change somewhat. It is close to the actual centre and to the Metro Station, e.g. compared with areas such as Norfolk Street and Stephenson Street.	DM 6.4 Primary Shopping Areas		Comment noted. The proximity of Site 64 to the town centre and sustainable transport links mean that it could support a variety of different uses. The Local Plan suggests that the site is suitable for a mix of residential and employment uses. These are both seen as supporting the town centre and therefore although not within the town centre boundary, they would be supported through the Local Plan. The reason for not extending the town centre boundary is because the Local Plan is trying to strengthen the retail heart of its town centres and creating a more vibrant town rather than dispersing its town centre offer. This followed the	Policy amended to 80% and now covers A1, A2 and A3 use class to allow for the greater mix of town centres uses that add to the vitality of a town centre, whilst also trying to offer some thresholds to encourage a healthy town centre

							recommendations of the Retail and Leisure Study 2011 and the recent update (2014).	
899323			LP20151611	We welcome the Council's support for revitalisation proposals for the Beacon Shopping Centre and the Forum Shopping Centre. We note that these policies are in compliance with Paragraph 23 of the NPPF which states that where town centres are in decline, local planning authorities should plan positively for their future to encourage economic activity. NewRiver Retail recognises the need for improvements in the quality of the retail environment of its assets and is considering investment and regeneration opportunities within the two Shopping Centres. Our Client will support a new Local Plan that ensures a supportive and flexible policy framework for promoting investment in the Beacon and the Forum. In relation to the expansion potential of North Shields and Wallsend, we note the amendment to Paragraph 6.12 (previously 6.17) and recommend further changes to this narrative. NewRiver Retail consider that greater recognition should be paid to the capacity of North Shields and Wallsend to absorb further town centre development and address the identified need for new retail floorspace in order to prevent inappropriate out-of-centre development.		AS 6.5 North Shields Town Centre: Beacon Centre	Comment noted. The Council supports a town centres first approach to appropriate investment into its town centres. We welcome the opportunity to work with the respondent to identify where the future retail needs can be accommodated in the town centres.	Contacted the agents to request any potential amendments to the policy that could further strengthen the town centres or if they are aware of any future regeneration proposals for the town centres. Amend wording in first line of paragraph 6.57 (now para 6.30) to add the words 'with national guidance.' which was missing from the previous version.
900234		RESIDENT	LP20151760	Para. 6.35 (and Plan policy AS6.5 wording consequences that need changing) Object. This approach is wrong, and can lead to bad outcomes. Housing is a component of healthy and vital town centres, yes. It was some of the post-war new towns which suffered from		AS 6.5 North Shields Town Centre: Beacon Centre	Comment noted. Town centre businesses should be the principle occupants of town centres but the increasingly diverse nature of towns means that housing can contribute towards the future of a centre. Striking the balance between town centre uses and	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>having town centres devoid of housing. But the primary uses in centres should be retail, offices business etc and leisure. With SOME housing, that is ancillary to those primary uses. There have been two recently completed small housing developments on Wellington Street West, after the sites have lain vacant for decades, that may it seems have potentially stymied one of the major redevelopment opportunities in North Shields. The wording of 6.35 is an open invitation for housing developers to put housing anywhere and everywhere they wish in a centre. Its just the argument they are looking for and its nearly always easy to make money out of housing. So para 6.35 and any tied Policy wording doesn't fit with the Plan's employment aspirations. And a sustainable place to provide employment is in town centres, especially as they are more likely to be close to the homes of poor people seeking employment. Also the nature of such employment provided in town centres might be more suitable to the unemployed most seeking it -from unemployed to shop or leisure assistant is probably an easier step than e.g. from the dole to skilled manufacturing. Its one of the ways regeneration needs to be integrated.</p>			<p>residential is crucial so that town centre uses remain the primary component to a centre. The Plan supports a greater range of uses in town centres such as offices, leisure and entertainment facilities that not only offer employment opportunities, but also add a greater vibrancy and vitality to a centre.</p>	
900234		RESIDENT	LP20151761	<p>North Shields town centre generally (plans, policies, text) Object Para. 6.37 What "Plan for North Shields"? The</p>	<p>Wording in paragraph 6.37 amended to 'Area Specific policies for North Shields have been based ....' (now para 11.54)</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				to a single Local Plan and abandon the Core Strategy with Area Action Plans approach has meant that the spatial area planning that the LDF system was invented, under the Labour Government, to facilitate (with an aim of tackling problems/issues of old urban areas and regeneration, not just new green field development) seems completely missing. I guess that staff resources are in short supply, but it seems unfortunately that there needs to be more imagination/spatial planning for the future in the Local Plan. Although there have been a number of studies done; relevant, practical and useful stuff should actually be in the Local Plan, not hidden away in a background study. (Some old studies are apparently of variable degrees of practical use e.g. a park and ride proposal near North Shields Metro Station that doesn't seem to recognise the vast difference in ground levels across the site).			wording of this paragraph will be amended for clarity. The Policy aims to shape future plans for the Beacon Centre through criteria that reflect earlier consultation responses and evidence from previous studies. Policies for North Shields identify regeneration sites in the town centre, improvements to the public realm, guidance for heritage assets and improved connections with the Fish Quay and Smiths Dock. The intention of Policy DM6.4 (now Policy DM3.4) is to encourage a concentrated retail heart to the town centre whilst allowing a more diverse mix of uses in the secondary shopping areas	
900234		RESIDENT	LP20151765	North Shields shouldn't just be left to go into further decline: heading more in the direction of a town of 'cheap end' shops with a few low value specialist shops. It needs revitalising as well as regenerating. Its not as if there is no demand for retail and leisure space. The plan in policy 6.10c says that retail developers should be flexible about business models and retail format, but if there aren't the sites available in Shields they are just going to develop their usual preferred formats. The Asda (ex Netto) store in North Shields is an example of how a modern town centre use can be developed to a high design standard in a town centre location, accessible by car and		AS 6.5 North Shields Town Centre: Beacon Centre	Comment noted. The Council is committed to supporting improvements to its town centres and maximising the opportunities to revitalise the town centres. The Local Plan seeks to encourage appropriate investment and development into the town centres through planning policies, but this investment often is dependent on securing funding and the availability of sites.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				on foot. Shields needs more of this approach (even if that location isn't perfect its pretty good given the constraints in an old town). Also, the Park View Shopping Centre was developed in Whitley Bay, another example of the sort of thing that would massively change the fortunes of North Shields and provide an antidote and alternative to out of town shopping. For economic development we might well need a combination of new edge or out of centre development, but also in-town development and regeneration. But we need to exploit all possible opportunities for the latter.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152158	Policy AS6.5 - I would suggest the following: 'The Council will support .....'. '(c) Enhancing the building's appearance ... '.		AS 6.5 North Shields Town Centre: Beacon Centre	Comments noted.	Amendments made as suggested.

396253	Northumberland Estates	DEVELOPER	LP20151812	Policy AS6.9 relates specifically to Northumberland Park's development as a district centre. Northumberland Estates support the Local Plan in having a policy		AS 6.9 Northumberland Park District Centre	Comment noted. The Local Plan reflects NPPF to 'allocate a range of suitable sites to meet the scale and type of retail.....It is important that needs for retail are not	Policy merged into S6.3 (now S3.3) and additional wording relating the comparison needs of the

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>specific to this development. The policy states that predominantly comparison retail use will be supported, however it is considered that whilst this is important, the policy should also support convenience retail use in Northumberland Park. As Policy S6.3 demonstrates, there is a significant demand for convenience retail floorspace across North Tyneside between 2014-2032 alongside comparison retail floorspace. It is considered that this should be encouraged across all of the borough's town and district centres, including Northumberland Park. It is also considered that not only should comparison and convenience retail floorspace be promoted in Northumberland Park, but there should also be a more flexible approach to providing a wide range of "town centre uses", such as restaurants, cafes, and bars. This would further promote Northumberland Park as a district centre in its own right, and also foster a greater community identity and sense of place.</p>		Retail Development	<p>compromised by limited site availability.'(Para 23). In response to the evidence in the Retail and Leisure Study 2014 there is a recognised need for comparison floorspace that typically requires a larger floorspace and due to predominance of small units within the boroughs town centres the Northumberland Park site offers the opportunity to meet the type of retail need identified. Policy AS6.9 has been merged into Policy S6.3 (which is now Policy 3.3) and allows for some flexibility in the type of retail on the type of use for the site.</p>	<p>borough added to the Policy to allow for changing retail needs through the Plan period.</p>
396253	Northumberland Estates	DEVELOPER	LP20151923	<p>The Northumberland Estates is strongly supportive of the Council's aspirations to expand Northumberland Park District Centre to include land south-west of Northumberland Park Metro Station. Para. 6.55 of the Consultation 2015 indicates that the Centre has the capacity for expansion, with a revised boundary increasing the overall area of the District Centre by approximately 4 ha, potentially capable of supporting 10,000sqm to 15,000 sqm of retail floorspace. Such growth can clearly not be accommodated within the existing District</p>		AS 6.9 Northumberland Park District Centre Retail Development	<p>Comment noted and support for the policy is welcomed. The suggested amendments to the criteria to allow any town centre use on the site fails to recognise the requirement on the Local Authority to determine the future retail needs for the Borough and once determined provide details of where the type of retail development could be allocated (NPPF Para 156, 157 and 161). The Local Plan is therefore seeking to provide clarity as to where retail needs will be allocated and the type of retail required, promoting a diverse retail offer (NPPF Para</p>	<p>Incorporation of Policy AS6.9 into Policy S6.3 (now Policy S3.3) with a more comprehensive list of sites that can accommodate the retail needs identified.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Centre boundary. The Consultation 's approach is therefore considered to be in line with the NPPF, which states at Para. 23 that, in drawing up Local Plans, local planning authorities should:" ... allocate appropriate edge of centre sites for main town centre uses that are well connected to the town centre where suitable and viable town centre sites are not available."The site to the south-west of Northumberland Park Metro Station is currently allocated for, inter alia, leisure development within the adopted UDP. However it is noted that criterion a) of Policy AS6.9 currently states that new development within the Centre will be permitted provided that it comprises "Predominantly comparison retail use based on net floorspace of the overall uses proposed in the extension". This wording would appear to be overly restrictive and contrary to Para. 23 of the NPPF, which states that, in drawing up Local Plans, local planning authorities should:" ... promote competitive town centres that provide customer choice and a diverse retail offer ... .</p> <p>"In the current economic climate, it is essential that the proposals set out in the Local Plan are sufficiently flexible to ensure the commercial viability and deliverability of development schemes. Moreover Para. 157 of the NPPF states:"Crucially, Local Plans should ... allocate sites to promote development and flexible use of land ... "The site should therefore be allocated in accordance with the NPPF to allow a full range of appropriate town centre uses. In this context it should be noted that the development of a pub/restaurant has</p>			<p>23). The Retail and Leisure Study has determined the floorspace requirements for the Borough as 15,249sqm comparison floorspace and 6,378sqm convenience floorspace. The policy does not seek to be overly restrictive, allowing for a variety of town centres uses, but it does seek to provide clarity by identifying where future floorspace could be accommodated and by the fact there is twice the amount of comparison floorspace required this is reflected in the policy.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>already been brought forward on the site. Taken together, and in order to ensure that Northumberland Park District Centre is well-placed to meet the future needs of the expanding residential and business communities in the local area, it is recommended that Policy AS 6.9 be amended to identify the potential for a full range of town centre uses on the site, as well as both convenience and comparison floorspace. The Northumberland Estates consider that, subject to the amendments set out below, Policy AS6.9 would represent a suitably flexible and aspirational policy to ensure the delivery of the extension to Northumberland Park District Centre."Proposals for new development(s) within the boundary of the Northumberland Park District Centre as identified on the Policies Map will be permitted provided that they meet all of the following criteria: a. It can contribute to meeting the convenience and comparison retail, and other main town centre use, needs of the surrounding community; b. The development of the extension to the District Centre on land to the south-west is fully integrated with the existing centre, surrounding neighbourhoods and Northumberland Park metro station, with particular attention paid to addressing pedestrian and cycle links; and c. The scale of any new f/floorspace reflects its position as a district centre."</p>				
630751			LP201527	<p>Could someone tell me please the point of asking North Tyneside residents for their opinions and wishes, if having done so to,</p>		Housing 7	<p>Comments noted. 				need for the large amount of housing planned. And what is needed can be accommodated on brownfield sites and other areas that do not interfere with green areas.			assessed needs for development. This means a range of brownfield and sustainable greenfield sites are required to be identified for development across the Borough. Alongside this the Local Plan sets out a range of policy seeking to protect the wildlife value, character and environment of the Borough.	
899278			LP20151110	When the new houses are built, consideration must be given to the fact that the houses will form a community and "design in" opportunities for members of the community to get to know each other and especially for children to make friends in their community. Spaces between the houses are very important for informal play. Young children need to play close to their home where they can be supervised. Doorstep play areas need to be built into the design of new estates. Doorstep play could involve small pieces of play equipment, but a space with suitable surface for bikes, scooters and "small world play" or where a play tent can be pitched can be equally valuable. Interesting and attractive landscaping such as low walls, granite boulders, grasses, daisies, pebbles and trees (for sticks) can all provide play opportunities for young children. Seating and bins are also important to support children's play and encourage social interaction. In bigger housing development, the house builders should support the development of supervised play provision such as the very successful Shiremoor Adventure Playground. Investment in skilled, qualified play workers can prevent unnecessary expenditure on anti-		Housing 7	Comments are noted. The local plan sets out a range of policy for design, provision of green space and new play areas in accordance with local evidence.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				social behaviour and reduce the number of occasions when bored children will seek less appropriate play opportunities. New housing also needs to be criss crossed with a network of footpaths and scooter/cycle ways to encourage children to cycle or walk to school and in so doing be more active and healthy.				
805471			LP20151136	I am dismayed by the proposed planning of 3500 house in such a small geographic area (little Benton farm, Whitley Road area) There have been significant developments already in this area and interestingly properties are still available for sale/rent. I agree that housing needs to be provided however why saturate one area to the detriment of the green environment, transport infrastructure and existing residents. I for one will consider moving from the area should this development go ahead. The majority of these developments are aimed at professionals in employment who can pick and choose where they reside. Do you really think they will choose to live in an area where there is limited green space and the traffic is horrific in a large saturated property development. I absolutely agree that affordable social housing and properties with one bedroom and for the retired should be a priority however ultimately property developers rely on the private sales for their profit margins to enable them to also offer social housing within their developments. Putting 3500 houses in the area could mean an increase in population of 10000 and another 5000 (est) cars on the road in that area alone. Which is an horrific contemplation when the existing		Housing 7	Comments noted, the Local Plan must respond to the identified objectively assessed needs for development. This means a range of brownfield and sustainable greenfield sites are required to be identified for development across the Borough. Alongside this the Local Plan sets out a range of policy seeking to protect the wildlife value, character and environment of the Borough.	No amendments proposed.

				mitigate climate change by spreading people around and increasing traffic (unless rigorous measures are taken for sustainable low carbon transport options.)				
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151343	General comment: There is a tendency among the local Plans we have scrutinised in the North-East for Local Planning Authorities overstate their likely population growth and therefore their housing need. Part of this stems, we believe, from looking at population trends and migration patterns on an authority-wide rather than subregional scale, part from ambitious but unrealistic economic growth and job creations, part from flawed modelling linking economic growth aspirations and housing requirement, and part in not taking into account the strategic policy interventions of neighbouring councils. Our current calculations suggest that aggregate levels of proposed housing provision in emerging Plans across the NECA area would accommodate in-migration of some 164,000 into the subregion over the next fifteen years. So far as we are aware, this level of in-migration has not been attained within the past fifty years and more.		Housing 7	Comments noted, the Local Plan must respond to the identified objectively assessed needs for development. This means a range of brownfield and sustainable greenfield sites are required to be identified for development across the Borough. Alongside this the Local Plan sets out a range of policy seeking to protect the wildlife value, character and environment of the Borough.	No amendments proposed.
890396		RESIDENT	LP2015129	I think that there are too many new houses proposed in the Council's plan especially around Palmersville. Great Lime Road is very busy already and would struggle to cope with much more traffic.		New Housing	Comments noted. There are a number of planned transport works planned within the borough to help the congestion problems North Tyneside currently faces. In addition to this traffic issues will be assessed through the planning application process.	No amendments proposed.
804904			LP2015256	In relation to the below sections.(7.15 etc) it seems that all three models - regardless of which model the council decides to eventually sell as the justification to the masses that		New Housing	Comments noted. The Local Plan has to plan for the Borough's objectively assessed housing needs. The Local Plan is supported by an Infrastructure Delivery Plan that has	No amendments proposed.

							specifically at town centres including allowing the conversion of office-to-residential (with exemptions) and allowing the change of use from retail to cafés and restaurants below 200sqm (gross) and subject to prior approval without the need for planning permission.	
804904			LP2015908	My mathematics is not the best, but points 7.31 and 7.32 seem to assume that over an 8 year period the number of 'people' moving to the area increased by 8000. Assuming we do not employ the strategies to reduce this mentioned in 7.32, then within the 21 year period between 2011 and 2032 this number will increase by 21000 . If we take the number of homes being planned between that period (16000) and divide it by the number of people emigrating do we not arrive at the figure of 1.131. This figure (in my simplistic logic means) that we either plan to build a boatload of 1 bedroom and 2 bedroom flats? If we take the 21000 volume once again and assume the standard 2.4 children principle of a traditional family, do we not arrive at a more realistic 4772 homes required? Even that is not factoring in the ambiguous statement of ' If successful this would reduce historic patterns of migration from Newcastle to North Tyneside and support the stable level of growth set out in Policy S7.1 (now S4.1)' however is slightly more realistic than the figures I have seen in this document!		New Housing	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	No amendments proposed.
898964			LP20151067	2. I live in Benton and I think the level of already approved and proposed housing development is completely excessive. The Rising Sun Country Park is being gradually		New Housing	Comments noted, the Local Plan must respond to the identified objectively assessed needs for development. This means a range of brownfield and	Indicative plans for potential development are included within the pre-submission policies map.

				on redeveloping run down property in the borough and work harder and more creatively to develop brownfield sites. Our infrastructure around the Wallsend/Benton/Holystone area can not cope with this level of development and I see no credible proposals that would deal with increased traffic, the number of families with school age children requiring school places etc . The narrow and silo approach to management of traffic means that only the immediate vicinity would be considered to attempt to manage traffic flow when the bottle necks would be created further along the chain e.g. station road A1058 roundabout, coast road, Whitley road and into the Newcastle authority area.				
898961			LP20151262	The need for additional housing should not be at the expense of the minimal, but very valuable areas of greenfield land that remain in the vicinity of Benton, Forest Hall and Wallsend. The network of tracks around, and leading to, the Rising Sun Country Park provide numerous benefits for people from the surrounding area. As a parent myself I know that they provide a safe environment for families to introduce their children to cycling and encourage families to 'get out for a walk'. The areas also allow many children the only opportunity they may get to experience a less 'built up', more natural environment. The unchecked development of the areas around the Rising Sun Park will undoubtedly put people off (or prevent them) making the most of the network of paths which can only have an adverse affect on		New Housing	Comments noted, the Local Plan must respond to the identified objectively assessed needs for development. This means a range of brownfield and sustainable greenfield sites are required to be identified for development across the Borough. 				housing estates but instead the challenge is to put ourselves in the shoes of the talent (& their spouses) who live in the affluent south east (or overseas) who we need to attract and what the brochure would need to look like to persuade them to move. I don't know how one, as a planner, creates components of somewhere like a Bath or an Islington closer to home. I don't know what standards can be written in that are quantifiable but it is critical to include these as developers (& some politicians) will push for maximum profit, which means maximum volume at lowest cost. So set the bar high. Something like, 'all housing will be of a standard that would be recognised by RIBA as reaching a level suitable for consideration for nomination for a regional award'. Presumably their team have criteria or guidance they use when they assess ? e.g. see <a href="http://www.architecture.com/RIBA/Awards/RIBANationalAwards/Judging2015.aspx">http://www.architecture.com/RIBA/Awards/RIBANationalAwards/Judging2015.aspx</a> . Could this be used ?			level ensuring residents have the skills to support innovation and the borough infrastructure, attractive environment, safety and quality of life are all maintained are crucial to working towards the Council's aim of creating a thriving, prosperous borough for residents.	
890457		RESIDENT	LP2015145	If new homes are acquired by buy-to-let landlords they will maintain house prices and not increase the number of affordable homes to buy. Will the Council exercise any power they might have to prevent this?		Type of Housing: Housing Provision for a Diverse Borough	Comment noted. There are no powers within planning to control this.	None.
890535			LP2015151	would also like to know how many of the proposed housing will be affordable or will they be more oversized overpriced 'Town houses'.		Type of Housing: Housing Provision for a Diverse Borough	Proposed policy on Affordable Housing sets out the aim for a Borough-wide target for at least 25% of all new homes to be affordable.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
685823	North Tyneside Green Party		LP20151099	Green Party Homes for Life and Carbon Neutral housing should be prioritised so that (a) people don't have to move if they develop mobility problems during their lives, and (b) insulation and energy generation are built into new homes reducing carbon emissions and energy bills for those who live in them.		Type of Housing: Housing Provision for a Diverse Borough	The Local Plan supports effective design to reduce climate change along with a SPD on Design. Housing standards are also managed through Building Regulations. A new policy will be introduced that reflects new Government requirements for housing standards, including making homes accessible and adaptable.	New policy "Housing Standards" added.
805471			LP20151125	With the growing older population there seems a significant lack of consideration in the provision of a larger percentage of suitable accommodation for this age group. With the right to buy scheme the local authority have sold its housing stock therefore social housing needs remain critical and this is not significantly addressed either. Finally the lack of single bedroom and two bedroom property requires more investment so that those on benefits do have choice. Mixing the proposed developments re social housing and private housing is sensible but may well prove a barrier to those who are able to afford their own properties and desire a better environment rather than buying on a huge estate or development.		Type of Housing: Housing Provision for a Diverse Borough	The Local Plan includes a range of policies to deliver a range of housing types and sizes to accommodate all needs, including regarding affordable housing, Council homes and a range of housing sizes based on the latest available evidence of housing needs. The SHMA has been used as part of the evidence base to inform housing tenure and type mix. A new policy will be introduced that reflects new Government requirements for housing standards, including making homes accessible and adaptable.	New policy "Housing Standards" added.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151352	Policy DM7:14. Protecting existing housing stock. CPRE broadly supports this policy.		S 7.1 Improving the Quality of Existing Housing Stock	Support noted.	No amendments proposed.
893226		RESIDENT	LP2015314	It is disgusting how you are planning on building more homes on such small amounts of green space nestled in amongst housing estates these small green spaces are used for children to play!		S 7.1 Strategic Housing	Comments noted. The Local Plan outlines North Tyneside's green space provision and standards requirements and aims regarding green infrastructure. In line with the NPPF, these policies support the loss of green space when there is sufficient green space	No amendments proposed.

				a foot apart so they can be sold as 'Detached' even though this is a complete waste of building materials. They are given small gardens, and there is very little green area included in the plans. Not only are houses being built in the wrong areas, they are very badly designed and poorly planned. We would like to specifically object to the plans to build houses near the Rising Sun Country Park for all the reasons listed above.			designed.	
898964			LP20151070	The plan mentions that there are 993 properties classified as long term vacant. These should be looked at before open space is irreversibly committed to new housing.		S 7.1 Strategic Housing	993 homes are approximately 1% of the total housing stock in North Tyneside. A long term vacant property is any home that is vacant for over 6 mnths. It is important that all such homes are brought back into use and the Council proactively works to tackle issues of long term vacant properites. However, there will always be an element of long term and vacant property as homes are left unoccupied folowing death, absentee or second home ownership, periods of refurbishment etc... As such it would not be a robust approach to calculating housing needs to assume there will no longer be long term vacant property in the Borough.	No amend ments proposed.
675953		RESIDENT	LP20151122	My wife and I [and many others] are extremely pleased to see that the allotment area behind Midhurst Road - site 14- is not now shown as a potential development area. We hope it remains this way and can be returned to a useful and productive space for the community.		S 7.1 Strategic Housing	Support noted.	No amend ments proposed.
899433			LP20151265	However we object strongly to the inclusion of sites 17 and 110 as housing and industrial land respectively. If these sites are built on, this will unacceptably reduce the green space		S 7.1 Strategic Housing	Comments noted, the Local Plan must respond to the identified objective assessed needs for development. This means a range of brownfield and	Within the Local Plan, allocations for mahjor development are also supported by indicative

				<p>between Benton/Forest Hall and Wallsend, especially as the large field to the east of Station Road (to be called "East Benton Rise" ) has already been allocated (in defiance of local opposition) to a large number of houses. It is essential to the physical and mental health of residents that green spaces between housing estates are protected, as all residents should have access to un-crowded green areas within a short walking distance of their homes. Such green spaces are also critical for wildlife in the borough. Furthermore, traffic problems are already bad, especially at rush hours, and will become increasingly severe when the currently approved additional housing is completed. We are aware that improvements are underway to some local junctions (e.g. Four Lane Ends) but these can only have a moderate beneficial effect. The Metro is already operating at virtually its maximum capacity at such times so cannot be relied upon to help further in this respect. In our opinion it is therefore absolutely essential that these areas are left as open green spaces. We realise that we need to suggest alternatives. As regards Site 11 now Site E010 (currently proposed for employment uses) we believe that this is unnecessary as it is a relatively small area whose removal from the plans would have minimal adverse effect on the overall area available. As regards housing on site 17, if additional houses are really required in the numbers proposed (about which we have some doubts) then we would recommend that all possible brownfield sites</p>			<p>sustainable greenfield sites are required to be identified for development across the Borough. It is important in bringing forward those developmetns that the right infrastructure and measures are in place to protect the character and environment of north tyneside and the Local Plan and infrastructure delivery plan set out a range of policies and requirements to secure this in a pro-active manner.</p>	<p>mapping showing potential access points and possible strategic areas of open space.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				should be used before any more green areas are lost. If that should really still be inadequate we would reluctantly suggest allocating an equivalent area of green belt land in the north of the borough. This goes against our instinct but, in our opinion, would be a lesser evil than removing more of the green "breathing space" which currently separates residential and industrial areas.				
899953		RESIDENT	LP20151555	The houses proposed by developers should meet the needs of the targeted housing stock shortfall and should include small terraced housing schemes with outside space which is affordable. Developers are maximising profit by building executive homes with large price tags and apartments with no or limited outside space. I feel that rather than implicating whole areas as development sites in the Local plan it would be more pertinent to allocate a number of smaller sites across the borough to avoid significant impacts. I would have hoped North Tyneside would want to avoid a situation like the developments around Kingston Park where developers have provided a large New town development where no-one wants to live as they are large executive houses with no amenities such as shop or schools. I hope my comments are taken in to consideration as I feel very strongly that this approach is not in the best interests of the residents of North Tyneside.		S 7.1 Strategic Housing	Comments noted. The mix of housing tenures and types that are supported by the Local Plan have been informed by evidence including the Strategic Housing market Assessment (SHMA). The Local Plan puts forward a range of housing sites of varying sizes. These have been identified through the Strategic Housing Land Availability Assessment (SHLAA). The SHLAA illustrates that there are not enough small sites throughout the Borough to meet our objectively assessed housing needs up to 2032 and sustainable available larger sites have to be looked to also. The two strategic sites in the Local Plan have had Concept Plans prepared and will be subject to further masterplanning to ensure they are well integrated and have the facilities required to support the population.	No amendments proposed.
755686	Home Builders Federation		LP20151730	21. The HBF support the amendments to part 'c' of this policy from the previous iteration in the winter 2013/14 consultation. These amendments conform to our comments at		S 7.1 Strategic Housing	Support noted.	No amendments proposed.

				this time.				
900308	Places for People		LP20151781	(Comments with input from Urban Splash) We agree with prioritising the use of brownfield land for development.		S 7.1 Strategic Housing	Support noted.	No amendments proposed.
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151796	We note with interest Policy S7.1 (now S4.1) "" Strategic Housing, and welcome its development principles, which state that the distribution of housing development will be guided by its impact on the environment and the requirements of essential infrastructure, amongst other criteria.		S 7.1 Strategic Housing	Support noted.	No amendments proposed.
469684		RESIDENT	LP20151843	Housing in North Tyneside has 'mushroomed' during the 19 years I have lived here. Do we really need to use up greenfield land?		S 7.1 Strategic Housing	The redevelopment of brownfield sites is prioritised through the Local Plan,. A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152032	Policy S7.1 (now S4.1) is generally supported however from the start this policy should be seeking in line with the requirements of the NPPF to meet the "FULL" objectively assessed housing needs for North Tyneside. While this seems minor the nuanced difference is to ensure full accordance and consistency with the NPPF. Sub section (c) of this policy however is of some concern. As previously stated in our reps last year the mixture of Brownfield development sites and		S 7.1 Strategic Housing	Comments noted... reference to a 5% or 20% buffer is not considered necessary within this policy. The buffer is a mechanism to ensure sufficient housing delivery and is clearly set out within NPPF.	Reference to "full" added to the policy. Reference to a "rolling five year land supply" seperated from the priority for brownfield development.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				achieving the 5 year land supply is miss leading and contrary to clear policy. The delivery of Brown Field development subject to viability should be a requirement and separate to this should be the requirement to ensure a 5 year rolling land supply in accordance with the NPPF. The 5 year land supply position within this policy should also make quite clear that in accordance with paragraph 47 of the NPPF the application of a buffer of either 5 or 20% should be applied dependent on the delivery rate as recorded in AMR.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152074	RE New Site: Russell Square. Our client supports the recognition in the supporting text to Policy S7.1 (now S4.1) (paragraph 7.4), as highlighted by local strategies and documents, of the importance of new housing development in the Borough. It is considered that, as the inclusion of the site within the Green Belt is not justified, the site provides suitable housing land, which is deliverable in the short term to help meet the objectively assessed needs of the Borough, and would reflect the key priorities outlined in Policy S7.1 (now S4.1).		S 7.1 Strategic Housing	The comment is noted. The Council has undertaken an assessment of its Green Belt as a whole. The Council has established that there are for this plan period no exceptional circumstances that would require an amendment to the Green Belt.	No amendments proposed.
878767			LP201517	It is pleasing that the Plan recognises there is a need to reduce the cumulative impact that the increasing number of residential institutions is having on Whitley Bay town centre. (Paragraph 7.82). It is also pleasing to note that "...the aim is to reduce the concentration of these developments and support Whitley Bay to become a sustainable community". The wording of the start of policy statement AS7.1 (now S4.1)3 should		AS 7.1 (now S 4.1)3 Residential Institutions in Whitley Bay	Comments noted. The aim of the policy is to better manage the numbers of residential institutions in Whitley Bay, not to impose a blanket refusal for applications for them in the town. The suggested policy amendments would not reflect the aim of the policy or be consistent with positive planning.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				therefore be amended to reflect this stated aim and should read, "Development of further residential institutions will not be acceptable within Whitley Bay and will only be acceptable in other locations provided they meet the following criteria:....."				
805252		RESIDENT	LP201543	I am dismayed and alarmed at the rapid amount of house building and road "improvements" taking place across the region. The loss of green space even if these are "only" fields has been dramatic since I moved to the area from Northumberland 20 years ago. But it is just as bad there. I feel completely hemmed in by concrete and every journey by car seems to be busy no matter which road I take out of Wallsend. This is only going to get worse over a 10 year period due to the development on Station road fields or East Benton Rise as it will soon be known. I am devastated that this has been overturned by Eric Pickles despite numerous objections. It will have a detrimental impact on every journey I take and the thought of years of mess, noise and delays is just awful. I feel like moving out of the area but to where?		S 7.1 (now S 4.1) Strategic Housing	Comments noted. The Local Plan encourages the use of brownfield land and contains many potential developments sites on brownfield land. However evidence on population growth and housing needs means that we also need to look towards sustainable green field sites	No amendments proposed.
444503		RESIDENT	LP201588	My comments regarding your plans , I have lived in Cullercoats over 40 years, you give flats in the village to the wrong people (check them out). My problem is to wait for what is happening in the future.		S 7.1 (now S 4.1) Strategic Housing	Comment noted.	No amendments proposed.
804904			LP2015254	Point C refers to the use of brownfield land, yet all of the land around Murton is (according to your own synthetic categorisation) greenfield. Is this not a contradiction to your own objectives? I believe your own documents in 9.39 suggest		S 7.1 (now S 4.1) Strategic Housing	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 and S7.1 (now Policies S1.4 and S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				that vacant land has been identified and is considered a problem in the borough yet building on the greenfield is obviously put forward ahead of it due to the cost differential of putting in place a policy of ensuring this vacant land was used or bought out by the council! Similarly, why is your primary objective to provide new homes when (according to your own stats) 3.3% of the homes in the borough are vacant, with ~1k LTV (Long Term Vacant). Although this will not solve your hyper-inflated problem of 'not having enough homes in the borough to meet your plan', having a strong policy in place to reduce this number would make a significant dent!			wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites. The role that long-term empty homes can play in providing additional housing is identified through the Local Plan and Policy S7.1 (now S4.1) includes the objective to bring empty homes back into use. An allowance for windfall development is made through the Local Plan, based on past trends and evidenced through the SHLAA, which provides a small proportion of the total housing requirement to 2032. This windfall allowance includes supply from bringing empty/vacant homes back into use.	
			LP2015296	Greenfield land is attractive because it does not need remediation. A debate needs to be had on whether to spend the money needed to remediate land. It would be better use of money than stupid wars, saving banks or foreign aid.		S 7.1 (now S 4.1) Strategic Housing	Comments noted.	No amendments proposed.
			LP2015310	The plan needs to support a full range of housing which is suitable for all ages. This includes ensuring new residential development is to 'lifetime homes' standards - it is important that residents have options available in later life, not just care homes or sheltered housing facilities, the housing stock needs to be flexible to allow people to stay in their own homes.		S 7.1 (now S 4.1) Strategic Housing	Comments noted. A new policy will be introduced that reflects new Government requirements for housing standards, including making homes accessible and adaptable.	New policy "Housing Standards" added.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
890859		RESIDENT	LP2015177	Renovating poor housing stock and/or empty homes prioritised in order to reduce numbers on Murton and Killingworth Moor.		S 7.1 Improving the Quality of Existing Housing Stock	Comments noted. Policy S7.1 (now S4.1) states that The Council will work to ensure the Borough's existing houses and residential areas remain healthy, safe, attractive and sustainable places in which to live.	No amendments proposed.
467670		RESIDENT	LP2015961	There are lots of poor housing still in Wallsend. Surely these can be update.		S 7.1 Improving the Quality of Existing Housing Stock	Comments noted. This is recognised and aimed for through this policy.	No amendments proposed.
805282			LP20151003	I am concerned and disgusted that you intend to build on small green spaces between existing housing that are used by local residents for recreation and wildlife for homes. Why not regenerate existing homes that are in need of redevelopment? To squeeze 400 homes onto the field at Annitsford Farm is madness when the existing 'new' homes by Gentoo on The Wyndings have not all sold yet despite the development being finished months ago! The impact of the noise, mess and extra traffic on local residents should also not be underestimated whilst the building is going ahead not to mention the increased traffic on local roads and stress on local services such as doctors surgeries after the homes are finished. I object in the strongest terms at the development of this site.		S 7.1 Strategic Housing	The redevelopment of brownfield sites is prioritised through the Local Plan,. A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites. An Infrastructure Delivery Plan has been prepared alongside the Local Plan to manage the delivery of necessary infrastructure for the future. A wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure.	No amendments proposed.
898981			LP20151115	The concept of a "sustainable green belt development" is a non-sequitur. A green belt location is a shared resource for the population of the borough, and a valuable		S 7.1 Strategic Housing	Comments noted. The Local Plan does not suggest any allocations for development in the Green Belt. In accordance with the NPPF, a policy is included to assess any	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				location for wildlife. Once built on, it does not magically "renew" - it is gone, and gone forever. How this can be seen as sustainable I'm not sure. As a result, I believe any council plan should work in priority order, starting with the worst brownfield sites and working towards the green belt sites only when all brownfield sites have been exhausted and there is clear evidence that there is still demand for housing and that increasing the population of the borough would increase the standard of living of people in the borough.			proposals that may come forward for development in the Green Belt; this policy has the presumption against development but acknowledges (again, in accordance with the NPPF) that some development that would not harm the objectives of the Green Belt may be acceptable.	
898981			LP20151116	I would certainly be grateful to see this plan address some of the core structural issues which underlie some of the need for housing stock. For example 1. Housing nationwide is grossly underused. There are significant numbers of homes going unoccupied and development companies often build whatever is most profitable in the long term (i.e. executive homes) rather than what is needed. Personally I would like to see the concept of affordable homes being brought under some form of public ownership or a framework to enforce that only the types of homes required are given planning permission. 2. Property is seen as an investment leading to an increase in buy to let and second homes. This is partly due to government policy driving down interest rates on savings through QE, leading to savers seeking yield through property investment. It would certainly be possible to combat this through taxation on buy to let properties, hopefully reducing the use of homes as an investment vehicle, before we follow the route of London. 3. Other countries		S 7.1 Strategic Housing	The Local Plan encourages and sets out requirements for the provision of affordable homes for development both as part of private developer led schemes, registered providers and the Council. Overall, the Local Plan must work within the national context for planning policy and the economy in order to be robust and secure the development that is needed for the residents of the Borough.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				do not have the obsession with owning homes, with large percentages of the population in European countries living in long term rental accommodation. Germany only has 39% home ownership compared with 60% plus in the UK as the state controls long term rents, meaning that it cannot be used as an investment vehicle through buy to let landlords. By considering some of these issues rather than blindly building more houses, we may be able to save more of the regions valuable green belt land.				
899452			LP20151279	The housing planned for Killingworth Moor still seems too much. The loss of land at is going to put more strain on the road system and apparently Holystone School is already oversubscribed. Will the waggonway still run through the new housing estate?		S 7.1 Strategic Housing	Comments noted. Killingworth Moor has been identified as a strategic site to deliver the homes North Tyneside requires to 2032. For the site, a Concept Plan has been developed that takes into account the infrastructure requirements and the constraints the site has.	An indicative Concept Plan has been identified for
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151344	Policy S7:1 Strategic Housing. CPRE can support this policy and welcomes the stress on identifying council owned land, brownfield sites and sustainable greenfield sites, and the earlier commitment not to delete any Green Belt.		S 7.1 Strategic Housing	Support noted.	No amendments proposed.
464572	Landowner	PLANNING CONSULTANCY	LP20151489	Land ownership should not be relevant to the identification of land for development. In turn land is either brownfield or greenfield, as such there is not a need to reference vacant and derelict land. It is therefore suggested the first sentence of the policy be revised to state;"The objectively assessed housing needs of North Tyneside will be met through the provision of sufficient specific deliverable housing sites whilst making best use of existing housing stock and reflecting the		S 7.1 Strategic Housing	The wording of policy S7.1 (now S4.1) is such that it identifies as a priority the delivery of brownfield land in accordance with national planning policy. Further amendments relating to stating the housing allocation is a minimum and should not prevent positive consideration of windfall site is not considered necessary. Policy setting out the overall housing requirement clearly establishes that this is a minimum target. Meanwhile additional	Reference to "vacant and derelict" removed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				following key priorities "It is suggested criterion c be revised to state;"The reuse of brownfield land in preference to the development of greenfield land, whilst taking into consideration the viability of land for development and ensuring the Borough maintains a rolling five year supply of deliverable housing sites". The above would accord with the key planning principle of encouraging the re-use of previously developed land in preference to greenfield land. The policy should additionally state that the housing allocation is a minimum and not a maximum. It should further state that the housing allocation should not provide the justification for the refusal of windfall housing proposals that fall within the guidance set out for Strategic Housing Land Availability Assessments.			policy is in place to guide the positive consideration of sites for development including those not allocated in the Local Plan.	
803900	Northumberland County Council	LOCAL AUTHORITY	LP20151531	The Council supports the reference to working closely with neighbouring authorities to ensure that planned housing growth across the three north of Tyne authorities is complementary. The Council would welcome the opportunity to continue to work together on population, housing and economic growth as part of the Duty to Cooperate discussions, to ensure that our finalised SHMAs and respective Local Plans recognise and reflect cross boundary relationships.		S 7.1 Strategic Housing	Support noted.	No amendments proposed.
899194	Northumbrian Water Ltd		LP20151645	NWL broadly supports the strategy of ensuring that an adequate range of sites is made available across the Borough for housing development. In particular, NWL supports criteria a), which seeks to ensure that enough new homes are provided to meet		S 7.1 Strategic Housing	Support noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				both current and future needs.				
830576	Taylor Wimpey	DEVELOPER	LP20151982	Policy S7.1 (now S4.1) deals with the Council's proposed strategic housing policy. The general principles of the policy are supported. although it is considered the opening sentence to the policy should confirm the Council will meet the 'full' objectively assessed needs. This avoids any potential ambiguity and is consistent with the wording contained within the NPPF.		S 7.1 Strategic Housing	Comment noted.	Reference to "full" added to the policy.
396511	GVA	PLANNING CONSULTANT	LP20152014	PLEASE NOTE FIGURES 1-10 ARE IN THE ATTACHMENT Policy S7.1 (now S4.1) "" Strategic Housing and Policy S7.2 "" Housing Figures Policy S7.1 (now S4.1) sets out a strategic housing policy and S7.2 sets out a requirement to deliver an average of 792 dwellings per annum between 2011/12 and 2031/32. However, we note that the plan period will be 15 years from 2016/17 to 2032. Paragraph 7.10 of the Local Plan states that the detailed population and economic modelling work which supports the requirement is set out in the 2014 SHMA. The scenarios assessed include household projections, economic-led projections and alternative migration sensitivities. Table 3 of the Local Plan summarises the results of the modelling work with annual requirements ranging from 282 dwellings per annum (dpa) needed to support natural change (i.e. no migration) up to 1,789 dpa needed to achieve the higher economic forecast. The chosen scenario is "closest to trend based OAN, and supports the forecast medium job growth, this is based on a combination of scenarios;		S 7.1 Strategic Housing	Comments providing a robust consideration of the proposed housing growth in North Tyneside are welcomed. 1) What do the latest household projections conclude should be the starting point for an objective assessment of needs? Overall the previous set of household projections utilising an average of the 2008 and 2011 based household projections have been update to the 2012 based projections - published after completion of the 2015 Consultation Draft Local Plan. The preferred housing requirement for North Tyneside has consequently increased from 792 homes per year to 828 homes per year - reflecting the stated changes in household formation identified in the comment. 2) Are there local demographic factors which indicate a departure from household projections is necessary? The assessment of household need undertaken by the Council is informed by expertly prepared household forecasts. This tested a range of scenarios including the benchmark subnational projections, migration led projections over	reflecting updated household forecasts 2012 the housing requirement has been amended to 828 homes per year.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>jobs led medium (lower net out commute), 10 Year Migration Trend, and Sub-National Population Projection (SNPP). This option results in a need for 792 homes per year" (paragraph 7.21 of the Local Plan). It is concluded that this scenario will result in job growth of around 654 jobs per annum. The consortium has tested the various components of the Council's choice of housing requirement, as follows: 1) What do the latest household projections conclude should be the starting point for an objective assessment of needs? 2) Are there local demographic factors which indicate a departure from household projections is necessary? 3) Are adjustments for economic growth required and if so what level of growth is appropriate? 4) Is an uplift to take account of market signals justified? 5) Is the Council's assumption that out-commuting will change justified? What do the latest household projections conclude should be the starting point for an objective assessment of needs? The 2012-based Household Projections (2012 HP) show that North Tyneside is projected to grow more and faster than any other local authority in Tyne and Wear and Northumberland (see figures 1 and 2). The 2012 Household Projections (which include the 2012 SNPP but crucially update headship rates from the Interim 2011 HP) project growth in households of 17% over the period 2011 to 2031. This is significantly more than is projected in any of the Tyne and Wear authorities which collectively are projected to grow by around 12%, with Northumberland at</p>			<p>five and ten year periods and a range of alternatives considering the implications of differing levels of job growth, commuting and migration. Following the update to the 2012 household forecasts the Council do not consider the projection to be a departure. 3) Are adjustments for economic growth required and if so what level of growth is appropriate? General support for the Council's assessment that job growth is likely to outstrip population growth in North Tyneside over the plan period - influencing the balance of commuting flows are welcomed. The implications and approach of our neighbours - particular at Northumberland and Newcastle forms an important component of discussions through the Duty to Co-operate. 4) Is an uplift to take account of market signals justified? The Council considers that the 2014 SHMA provides a suitably robust assessment of housing needs and housing market signals. The SHMA includes consideration of conditions in neighbouring authorities and an assessment of the relative performance of the borough. The overall assessment that market signals indicate the housing market in North Tyneside is "tight" is broadly agreed with. However, the assumption that in such circumstances a broad 10% uplift should simply be added to the evidence based scenarios for growth is not considered a robust solution. In addition, attention is drawn to the moderate market pressures described at a time when housing delivery</p>

				<p>just 9% growth. Figure 1: Household Projections for Tyne and Wear and Northumberland (Source 2012 Household Projections) Figure 2: Indexed (2011=1) Household Projections for Tyne and Wear and Northumberland (Source 2012 Household Projections) The household projections update the Council's "Sub-national Population Projection 2012" scenario which underestimates growth significantly (by around 45 dwellings per annum or 900 across the plan period). Given both of these scenarios utilise the same population input it is clear that the household formation rates (headship) in the latest projections have been increased significantly. In fact, a review of headship rates taken from the 2011 HP (which is used by the SHMA and by extension the LPCD) and the newly published 2012 HP reveals that the former significantly underestimates household formation in older cohorts. In particular figures 3, 4 and 5 set out how household formation is projected change in the 2011 HP1 and 2012 HP and show that the SHMA will underestimate the propensity for these cohorts to form new households and consequently underestimate housing needs as a whole, particular as the population is ageing. Figure 3 : Household formation rates of 65 to 74 year olds (Source 2012 Projections) 1 The 2011 HP project to 2021 and therefore are projected forward ten years to 2031 on the basis of the best fit trend for the projection 2011 to 2021. Figure 4: Household formation rates of 55 to 59 year olds (Source 2012 Household Projections)</p>			<p>within North Tyneside have ranged between 300 and 450 new homes per year. Through the Local Plan period an annual average rate of 828 homes per year is proposed and being planned for. There is no evidence of the performance of the housing market in North Tyneside with such a rate of housing delivery over the long term. Such an uplift may therefore be considered as part of the process of monitoring, implementation and delivery of the Local Plan - but is not appropriate to adjust the housing target itself.</p> <p>5) Is the Council's assumption that out-commuting will change justified? The broad support for the assumption that rates of out-commuting will change is welcomed. Again the implications of this is being considered and has formed a key part of our engagement through the duty to cooperate.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Figure 5: Household formation rates of 60 to 64 year olds (Source 2012 Household Projections) The starting point for an assessment of housing needs is the 2012 HP Projections which project a need for in excess of 805 dwellings per annum. In addition, new headship rates published with the 2012 HP should be utilised in the modelling work for all other scenarios including the economic-led scenarios. It is likely this will increase the overall need for housing. Are there local demographic factors which indicate a departure from household projections is necessary? Figure 6 sets out net migration in North Tyneside over time. It is clear that net migration has fluctuated significant since 2001/2 with a high of 1,112 persons in 2008 to a low of - 110 persons in 2012. Given these fluctuations, it is considered appropriate to take into account longer term trends. Another factor which has not been picked up by past migration trends or the 2012 SNPP is the influence of Un-attributable Population Change ("UPC"☐). UPC is the difference between the population estimate rolled forward from the 2001 Census and the Population estimate following the 2011 Census. In North Tyneside the Census revealed that there was an additional 1,800 people living in the Borough than was originally estimated. Whilst it is not possible to fully and accurately account for how these people were mis-accounted for, it is likely that at least some if not most were under-recorded migrants. Figure 4 therefore adjusts past net migration to take account of UPC</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>which has a significant and positive impact on past trends.2 2 This phenomena only affects the years between the Census as UPC was calculated using the 2011 Census. The 2012 SNPP does not account for UPC. If UPC has been a significant component of population change it is important to account for it in the demographic analysis of the SHMA. Figure 6: Migration estimates from the 2013 Revised Mid Year Estimates (Source ONS 2013 MYE) To assess the potential impact of considering longer term trends, figure 7 sets out net migration for a range of time period and include UPC where appropriate. It is clear that the SNPP (which is 2012 based and includes trends from the 5/6 years from 2006/7) contains a period of high migration when compared to the 12 year and most recent 6 year average. However, when UPC is included, this increases past migration averages significantly. Figure 7: Average Migration Rates from 2001/2 to 2012/13 Revised Mid Year Estimates (Source ONS 2013 MYE) It is therefore considered that the 2012 SNPP and the 2012 Household Projections which utilise the household projections could underestimate past migration on account of longer term trends and UPC. An upward adjustment on the basis of this evidence is therefore justified. Are adjustments for economic growth required and if so what level of growth is appropriate? The Local Plan (at paragraph 7.22) states that 792 dpa will support a significant increase in the local economy of 654 jobs per annum. GVA has reviewed 2014 Experian Forecasts which</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>conclude job growth of over 760 jobs per annum is forecast over the period 2011 to 2031, an increase of 16% over the job growth assumed in by the Local Plan. This level of economic growth forecast by Experian is the baseline forecast for the area and is considered to be principal projection for the Borough (i.e. is comparable to the 'medium growth' scenario put forward by the Council. Figure 8 shows that North Tyneside is forecast to grow at the fastest rate of any of the Tyne and Wear authorities (incl. Northumberland). This lends some credence to the Council's proposition that out-commuting will change over the plan period. This is because, as economic opportunities in the Borough become stronger relative to South East Northumberland and Newcastle upon Tyne residents who currently work in those areas will be more and more inclined to pursue local employment opportunities. Figure 8: Indexed forecasted employment growth 2011 to 2031 (Source Experian) Overall there is a justification for a greater increase in the level of jobs planned for through the plan given up to date economic forecast. It is also likely that commuting will change in response to the significant levels of growth forecast in the Borough (this is discussed further below). Is an uplift to take account of market signals justified? The 2014 SHMA at table 4.7 sets out an assessment of housing market signals. This is not in line with the PPG. The PPG states that an assessment of market signals should be a relative one, comparing the performance of the local housing market to that of the</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>wider housing market area and areas with comparable socio-economic characteristics. The 2014 SHMA does not undertake such an assessment and is therefore not considered robust. Notwithstanding, it would appear that in terms of affordability (see figure 9), the change since 1997 has been largely in line with the that of the surrounding area with a worsening of 59% compared to 61% in Newcastle, 66% in Gateshead 53% in South Tyneside and 54% in Northumberland. Figure 9: Indexed affordability ratio change 1997 to 2013 (Source: DCLG Live Tables) In terms of median house price change (see figure 10) however, North Tyneside has experienced the fastest growth across the period 1996 to 2013 with a growth of 218% compared to 212% in Gateshead, 2014% in Newcastle upon Tyne, 210% in Northumberland. Figure 10: Indexed house price grown 1996 to 2012 (Source DCLG Live Tables) As described by the SHMA at paragraph 4.20, residential rents have been static, however vacancy rates are low and decreasing showing that demand is high relative to supply. Low vacancy rates increase friction in the housing market, reducing competition and compounding increasing house prices. They are symptomatic of a lack of supply relative to demand. Overall, whilst the picture is mixed, there would appear to be some indicators which are pointing to a "tight" housing market which requires additional supply to meet demand. The PPG states that a worsening trend in any of the indicators will require an upward adjustment to planned housing numbers compared to</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>those based solely on household projections. The 2012 HP are projecting an increase of around 805 dpa. The size of a market signals uplift is a matter of judgment, on which the PPG offers no specific advice. At an Examination in Public of Eastleigh's Local Plan (Hampshire) the EiP's Inspector's Preliminary Conclusions recommended a 10% uplift in response to market signals that indicated "'modest' market pressures. Overall, given the issues associated with house increases house prices and falling vacancy rates, a modest increase in the region of 10% above household projections would seem appropriate. Is the Council's assumption that out-commuting will change justified? The housing and job requirement as set out in the Local Plan are predicated on a change in the commuting shift. On balance this is considered appropriate. Firstly, between the 2001 and 2011 Census, out-commuting fell in North Tyneside in response to an increase in local employment, particular business uses at the enterprise zone office parks at Quorum and Cobalt. This is detailed in the 2014 SHMA and its accompanying appendix by Edge Analytics. Secondly, the jobs economy in North Tyneside is forecast to grow at a faster rate than the surrounding area in future, further reducing the requirement for residents to leave the Borough for work. Notwithstanding, such a significant change in commuting rate will of course have an impact on the surrounding authorities and their housing / job balance. For example, Northumberland County Council is assuming</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>within their Core Strategy that out-commuting to Newcastle and North Tyneside will fall. There is potentially a conflict here in terms of the ability of each authority to house fewer and fewer of the subregions' workforce. Notwithstanding the evidence which would seem to justify a change in commuting in North Tyneside, a political agreement with the surrounding authorities through a Duty to Cooperate process should be made to ensure that at the sub-regional level, the spatial strategy each authority is pursuing is appropriate, justified and deliverable and meet full objectively assessed needs for the entire wider housing market area. A trajectory for new housing In paragraph 7.29 it is set out that the Council will apply a 5% buffer onto the requirement of 792 homes per annum. However, when considering paragraph 47 of NPPF and the Council's Annual Monitoring Report 2013 it is the consortium's view that the Council has persistently failed on an annual basis to meet requirements. With the exception of years 2004 " 2008, the Council has failed to meet the housing requirement, including any of the years between 2008 and 2013. The recent under delivery, regardless of economic conditions, has been persistent and therefore under the terms of NPPF paragraph 47, the 20% buffer should be applied to the requirement. The Council will be aware of well established case law on this point including the Burbage appeal which sets out that economic conditions are not a justification for under delivery and also the Cotswold judgement where the frequency of</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the under delivery was a key factor in establishing whether to apply the 5% or 20% buffer. The consortium also considers that in table 8, the total supply should not include 100% of sites with planning consent (or minded to grant) because there is significant evidence to demonstrate that historically, not all houses consented are constructed. It has been widely accepted that a 10% discount should be applied to planning permissions to give a more accurate reflection of realistic supply. The implication of this, alongside the consortium's view that the OAN should be higher, is a requirement for increased allocations or numbers of houses proposed on existing allocations in the local plan including at Killingworth Moor. Conclusions on Policy S7.1 (now S4.1) and S7.2 Overall, it is consortium's view that the Council's requirement of 792 would not meet objectively assessed need. Household projections show that older person household are likely to form at a faster rate than assumed by the 2014 SHMA resulting in an increase in total household growth of around 6%. This will have an impact on all of the modelled scenarios. In total, the household projections indicate a need for around 805 dpa. Longer term demographic trends would seem appropriate as would the inclusion of UPC which increase the baseline demographic further. Up to date economic forecasts have revealed that the Council's chosen requirement would not meet the full needs of local businesses. An upward adjustment would be required to do so. Whilst the overall</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				picture with regard to market signals is mixed, there are signs of moderate market pressure. It is concluded that upward adjustment of 10% over household projections is justified, increasing the annual requirement to at least 885 dpa (notwithstanding the additional growth in the jobs target and or demographic needs). This is the current view of the consortium. Notwithstanding, the consortium reserve the right to comment further on additional information. The Council should apply a 20% rather than 5% buffer to the requirement recognising the persistent under delivery against the requirement.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152103	RE New Site: Land to south of Meadow Drive, Seaton Burn. Our client supports the recognition in the supporting text to Policy S7.1 (now S4.1) (paragraph 7.4), as highlighted by local strategies and documents, of the importance of new housing development in the Borough. It is considered that, as the inclusion of the site within the Green Belt is not justified, the site provides suitable and deliverable housing land to help meet the objectively assessed needs of the Borough, and would reflect the key priorities outlined in Policy S7.1 (now S4.1).		S 7.1 Strategic Housing	The comment is noted. The Council has undertaken an assessment of its Green Belt as a whole. The Council has established that there are for this plan period no exceptional circumstances that would require an amendment to the Green Belt.	No amendments proposed.
899444	George F White		LP20151310	DM7.10 Large Executive Housing This policy is supported.		DM 7.10 Large Executive Housing	Support noted.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151351	Policy DM7:10 Large Executive Housing: CPRE is not convinced of any robust evidence demonstrating the benefit of such housing to the Borough, and sees no need for this policy. We also perceive a risk that this policy could		DM 7.10 Large Executive Housing	Comment noted. The North Tyneside SHMA indicates a continued need for larger properties whilst overall North Tyneside has a lower than average proportion of upper council tax band properties. However, the	Reference to executive housing is now included in a single Housing Type and Mix policy.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				make "exceptional circumstances" for off-site affordable housing (Policy DM7:6) routine and therefore not "exceptional". The corollary of executive gated estates is ghettos of social housing.			need for additional housing of all types, tenures and sizes is identified and supported through the Local Plan.	
830571	Persimmon Homes	DEVELOPER	LP20152043	Policy DM 7.10 sets out the Councils approach towards executive housing, this policy sets the evidence for requirement of specific schemes which Persimmon support in principle however we have the following concerns. The policy sets a maximum density threshold which is excessively low and does not account for development of executive housing which can still be achieved at a higher density. We agree that the overall size of units would have to be bigger to qualify as executive but don't agree that the density is an overriding factor. We propose that this policy be amended to remove the density requirement.		DM 7.10 Large Executive Housing	Comment noted. The point regarding housing density for the definition of executive homes is recognised. Overall within the context of Local Plan delivery provision of executive homes is encouraged but the application of this policy will not compromise the ability of a developer to propose the development of large homes at a higher density. Therefore it is not considered necessary to amend the Councils definition of the form of development which it would consider as executive - for the purposes of the Local Plan and future monitoring.	Reference to executive housing is now included in a single Housing Type and Mix policy.
396269	English Heritage	GOVERNMENT AGENCY	LP20152162	Policy DM7.11 - criterion (b) should require there to be no unjustified adverse impacts upon any heritage value the building or locality may possess.		DM 7.11 Houses in Multiple Occupation	Comments noted. However we feel that the policies set out in the heritage assets chapter, that are applicable to all policies/proposals within the Plan, provide adequate protection to heritage assets.	No amendments proposed.
588278		RESIDENT	LP2015424	The choice of new housing for "older people" tends to be between bungalows and care homes with "Extra Care" in between. This perception of the needs of a very diverse demographic group is narrow and unambitious. A much greater variety of choice is needed including co-housing (as part of the self-build offer ?) this is an opportunity to release significant equity into the local economy as well as larger family homes through 'right-sizing' by this group.		DM 7.12 Extra Care / Specialist Housing	Comment is noted. The policy seeks to support all forms of specialist housing to meet a diverse range of needs.	No amendments proposed.

							meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	
891835		RESIDENT	LP2015212	Five Mile Park looks very good in this area (Seaton Burn, Wideopen). All seems reasonable.		S 7.2 Housing Figures	Comment noted.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012
468309		RESIDENT	LP2015237	I think employment will grow larger than indicated, but the prediction for housing appears reasonable. However I am aware that our young population is vastly short of 1-bedroomed accommodation - are such flats to be built?		S 7.2 Housing Figures	Comments noted. The Local Plan sets out that new development should have regard to evidence for housing types and size - primarily from the Strategic Housing Market Assessment. This includes identification of needs for one bedroom homes. Some provision for such housing is expected over the plan period.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012
892200		RESIDENT	LP2015251	5,000 more homes, when will this end, building everywhere. There will be nowhere to go for a nice country walk in years to come. Government needs to look at lowering the population. Simple, stop building houses. Try and lower the population. Too many people!!		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities. Not making adequate provision for new homes within North Tyneside will simply make it harder for residents to find quality homes to live in which they can afford.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012
804904			LP2015255	Please provide a breakdown of [such fictitious forecast by] ethnicity and expected employment rate of the incoming masses. I would also be intrigued to see the algorithms such a report is based on		S 7.2 Housing Figures	Details of the housing and population forecasts are available within the evidence base schedule on the Council's planning portal website. The ethnicity of any current or future resident of North Tyneside is irrelevant.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
892757			LP2015283	I dispute the figures stated for housing and the subsequent employment gains. The new development at Wellfield, comprising of 4 and 5 bedroom houses only, is representative of the council's disregard for and a contradiction of its own policy stating that smaller homes are required in the future.		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012
892836		RESIDENT	LP2015293	The Local Plan Consultation 2015 is not evidence of the need for employment and new homes. North Tyneside is already well populated. Bringing more employment does not mean new homes. Restrict the new employment to a level which can be accommodated by residents of North Tyneside "" we do not need to bring more people here. Urbanisation is currently as a maximum level. Bringing in more people will mean more schools, traffic congestion. Stay where we are now. A further 10,200 homes means about 30,000 more residents, we do not want such a growth in population, it could mean up to 15/20,000 new cars on the roads. We cannot cope now. Challenge the Government about their requirements, reconsider the evidence. I like living in North Tyneside - please don't force me to move away because of unrealistic policies - both local and national.		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012
467684		RESIDENT	LP2015319	I do not accept that so many houses are needed. If you must have them, convert the white elephant empty office blocks at West Allotment into flats but heaven help the traffic congestion. I am surprised Labour Council is so willing to accede to Tory		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				be much less attractive to live in. The emptiest county in the country is Northumberland and it could easily accommodate another large new town which could take any overspill from North Tyneside, if indeed so many new houses are really necessary, a fact that I am far from convinced of. Whilst some limited development could take place without altering significantly the nature of the Borough, the present plans contain far too many houses. Many communities are in danger of losing their individual identities.			development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities. The Local Plan seeks to identify the most sustainable brownfield and greenfield sites for development and sets out a range of policy to deliver the infrastructure the borough needs and protect North Tynesides character, environment and attractiveness. Without working to plan for the needs of the borough growth is likely to take place anyway in an ad hoc manner and not secure required benefits for the borough.	with DCLG Household Forecasts 2012
396930		RESIDENT	LP2015407	There is sufficient level of unemployment in this area to satisfy your stated demand for about 13,000 new jobs, without any further house building.		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				neighbouring authorities where reasonable and appropriate, we understand that with Newcastle and Northumberland helping to provide for some of your objectively assessed needs in seeking to re-balance the north of Tyne area's cross-boundary housing market, there is no requirement for South Tyneside to potentially help provide for any of North Tyneside's housing needs. We would nevertheless be interested to know whether you consider that the district may have any additional capacity (primarily in non-Green Belt areas) that could potentially help provide for any of South Tyneside's identified development needs should that come to be necessary? While we recognise that South Tyneside is considered to be a largely self-contained housing market area, there is inevitably some degree of cross-boundary movements within the wider economic market (travel-to-work) area that, coupled with evidence of migration patterns, might suggest reasonable scope for a small proportion of South Tyneside's development needs being provided for within the North Tyneside area. We would be happy to discuss this matter further as part of the ongoing cross-authorities dialogue.			meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities. North Tyneside's growth forecasts take into account a range of scenarios for growth. Through the North Tyneside SHMA only a limited relationship is identified between North Tyneside and South Tyneside's housing markets. At this time, North Tyneside's strategy indicates that the level of housing growth will be outstripped by job growth whilst. Meanwhile, ongoing improvements to connectivity along the A19 between North and South Tyneside may over the plan period increase connectivity between the two authorities. Both Newcastle and Northumberland are looking to increase their rates of housing delivery to retain levels of working age population. Considerations of the potential rates of migration between North and South Tyneside would need to be considered within that wider sub-regional context and North Tyneside will be happy to continue working with South Tyneside on overall strategies for housing delivery.	
806166		RESIDENT	LP2015475	I am writing to object strongly to the North Tyneside Local Plan for the following reasons: "ç The plan is based on growth rates which are overly-ambitious even though earlier consultation showed that people in North Tyneside wanted to aim for lower rate of growth in order to save valued green spaces. 				<p>23,000 more people in the borough in 17 years. Far from using the middling ground I think these figures are overly optimistic and I do not think you should be planning on an "if current trends continue" scenario from an external body. You make no mention of sensitivity analysis in these figures. I would hope that you have performed some as this would help inform the point about prioritising development on brownfield sites and monitoring its development. Furthermore, what is the demographic of the 23,000 people you expect to live in the borough? This will significantly affect the type of housing required. For example, the population of the over 65s increased by 14% between 1981 and 2010, and the family population "those from 0 to 49 - has decreased by 9.5% over the same period. This means that different housing stock is required to the 2, 3, 4 bedroom "executive" houses currently being built. In addition to this point, older people live in their large houses because they want to be near their friends of 30, 40, or 50 years. If appropriate housing was built for them, that would free up larger housing stock, without the need to build on precious green fields. It is my understanding that there is a surplus of school places in North Tyneside and that the new schools are just rebuilds of existing ones - if that is the case, then where are all the school places required for such a massive increase in population coming from? In addition, where are all the health facilities coming from? The lower end of the spectrum for housing need would seem more</p>

				appropriate and would be easily defensible to the Department for Communities and Local Government. Save valued green and wildlife space please.				
685823	North Tyneside Green Party		LP20151098	<p>Green Party These figures are based on a Growth Option which was rejected by local residents as indicated by the Consultation November 2013 quoted above. They are based on a population increase projection of some 23,000 over the next 15 years a 12% increase, which is quite substantial. The lower growth option preferred by local residents in the consultation indicated a more reasonable increase in population of 12,000, a 6% increase. The infrastructure and roads which will be needed to support the proposed increase in population will inevitably have a detrimental impact on the environment in terms of use of greenfield land and existing roads and facilities. It will also increase substantially the amount of carbon emissions through car ownership and traffic congestion. This development is not sustainable in terms of the Vision in the introduction to the Plan: "Sustainable means ensuring that better lives for ourselves don't mean worse lives for future generations." It will inevitably have a detrimental impact in terms of the Objectives cited above in relation to protecting and enhancing the natural environment, reducing carbon emissions etc. Also, planning permission has already been granted for a large number of housing developments in the borough (4,800 homes) most of which have not yet been started e.g. Smiths Docks. This indicates that the housing</p>		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				<p>developers are not anxious to build, presumably because they think they won't be able to sell the houses. In practice of course the more houses that are built on the borough's Greenfield sites the less attractive it becomes as an area to live in. The open space is valued by residents; once gone there is less incentive to live here. We support a Local Plan based on Growth Option C 7.25 Based on baseline growth in jobs to 2032 "" Lower than the Borough's starting point set out in national population projections. This option results in a need for 562 homes per year and 11,808 from 2011 to 2032. Estimated 6,081 homes to plan for. Low Growth "" 912 homes per year, 2x long term average and 374 jobs. The difference between housing needs between Options B and C is about 5,000 houses. This number is much more sustainable and will not require such large scale developments at Killingworth Moor and Murton. Instead some of this land can be used for food production/market gardening as suggested above. It is worth noting that even this level of house building represents "2 x long term average"̄. Even this will be a hard target to meet, let alone the higher targets, even if they were desirable!</p>				
898981			LP20151118	<p>Since the growth projections are forecasts and will never be expected to be 100% accurate over a 15 year period, the council should follow a "first do no harm" approach. I would approach this as follows Firstly, use up the existing housing permissions. According to the figures there are just under 5000 approved, so this should survive 5 years of the</p>		S 7.2 Housing Figures	<p>The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				current projections. In year 3 of those projections, if growth figures are still following the same trajectory, then pick the least environmentally sensitive brownfield sites (or those requiring the most remediation) and grant those planning permission. Aim for enough homes for another 5 years. 3 years into that 5 year "chunk" review the growth figures again and repeat. Only once all brownfield sites are developed should green field land even be considered. It should certainly not be granted planning permission based on 15 year forecasts given the degree of statistical error possible in those timescales.			homes and employment opportunities.	
805471			LP20151124	I agree with those that state that your figures are not rational. You state houses will be built in their hundreds over the period however properties under development are already struggling to be sold. In addition there appear to be over 1000 properties for sale and over 1200 available to rent and that was just a cursory count today. There does not appear to be an exponential growth in industry /retail/ administrative business in the area to warrant such growth. 15200 homes equate to over 30000 people moving into the area and no one moving out.		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				with labour (as for example they have to do in East Anglia). There is no need for much more private housing - property prices are static here and rentals take some time to be taken up, which strongly indicates that there is enough private housing. And you have countless comments from local residents to the effect that they do not want more housing. The lifestyle of local residents is surely (or should be) very important to the Council - unnecessary housing, with its knock-on effect on traffic, schools, green areas and other amenities, will have an adverse effect on the lives of residents. There is probably a need for more affordable housing. There are many brownfield sites, empty flats above shops, areas on the outskirts of the shopping areas etc which should be used first. Of course it is more onerous for a developer to build on a brownfield site than a green one - but the role of the Council should be to protect our area for the residents and thus not take the easy route of selling off green plots. In short, don't turn NT into yet another area blighted by too much housing, too many people, too much traffic etc. Preserve the good balance that we currently have.			homes and employment opportunities.	
899309			LP20151150	The scenario in which this demand for new homes is based predicts a 1% increase in population growth rate indicated in Table 6, from the current population of 15-64 yo (considered working age group) 132, 276 in 2011 to 133, 601 in 2032. How does this marginal increase in population spread over a 20-yr period justify the need for 10, 200 new homes? The problem of giving planning		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				<p>permission NOW for what we believe is the requirement of the future is that we deny the future generation to decide on what they want for themselves and their environment, or whatever is left of it by the time they can make the decisions. The word Sustainability is thrown around in the Plan as if the council really understands what it means, the United Nations defines sustainability as providing 'decent standard of living for everyone today without compromising the needs of future generation.' How is it socially and environmentally sustainable to convert greenfields into concrete blocks? We understand the need to chase progress but it is unfortunately measured solely in monetary terms. It is difficult to place value on open spaces and the sense of well being experienced by people who benefit from these. The proposal to build a housing estate so close to Rising Sun Country Park is a lazy solution and should be rejected. Already we have witnessed an unprecedented number of new housing development around Forest Hall, Killingworth and Benton in less than five years. The environment, natural and built, can only take so much stress, we now experience flooding in areas which didn't have flooding previously, the education and health facilities in the area are deteriorating, traffic is getting worse, these are the price we and our children have to pay in our pursuit of unmediated progress.</p>				
805554			LP20151225	<p>This is a huge over estimation of new homes required and the council should provide robust evidence of how this number is</p>		S 7.2 Housing Figures	<p>The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for</p>	<p>The objectively assessed housing requirement has been updated to accord</p>

				<p>data indicates that for North Tyneside the average household size is likely to decrease at an increased rate over that previously predicted, thus resulting in an increased household growth which will need to be met by a corresponding increase in the delivery of new homes. Initial assessments indicate the difference between the 2011 based households per annum and the 2012 based households per annum over the initial ten years of the plan 2011-2021 (comparisons beyond 2011 are not possible due to the extent of 2011 data) are an additional 61 dwellings per annum . Further work is necessary to correctly reflect the most up-to-date data in the assessment of the plan areas OANs and this should inform the next iteration of the plan. 7.13 makes reference to the SHLAA and the technical assessment of sites to meet the Borough's housing development. There are a number of sites within the SHLAA where the Council's assessment of deliverability is questioned as being over optimistic including the estimated annual delivery figures for example Smith's Dock commencing in 2015/16 with a delivery rate of 80 units per year. This also therefore questions the accuracy of the Council's Five Year Housing Land Supply position and the Housing trajectory (see response to 7.29). (7.29) Suggests that "overall North Tyneside has successfully delivered housing targets and does not have a history of underperformance'; this is not borne out by the evidence provided in the SHLAA 2014 table 8. This clearly indicates that over a 10</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>year period from 2004/05 net housing delivery has not been met for the last six years; as a consequence North Tyneside has failed to deliver the housing target over this period by 455 units. If this assessment is restricted to a five year period from 2009/10 the net under delivery increases further to a deficit of 1415 units. Over the three years of the plan period from 2011/12 the deficit amounts to 1156 units. As the annual target has not been met more frequently than it has been met, and over the period there is a deficit of housing units, there is clearly a record of persistent under delivery NPPF (47) requiring a buffer of 20% to be applied. The Council's five year housing land supply document 2014-2019 forms an important evidence base for the Local Plan. The Council's methodology for the calculation of the five year housing land supply is questioned. It is suggested that the percentage buffer 5% or 20% should be applied to both the residual requirement and the identified shortfall/over provision in supply, rather than just the residual requirement. This method has been established through recent appeal cases (APP/H1840/A/13/2199085, APP/H1840/13/2199426 APP/V0728/A/13/2190009). A review of the Council's methodology is suggested to ensure that it complies with current best practice.</p>

				10,500 and 12,000, which would have resulted in a strategy of restricted growth.			future residents of North Tyneside for new homes and employment opportunities.	
899194	Northumbrian Water Ltd		LP20151646	NWL supports the removal of the references within the policy to reducing the housing requirement by working in partnership with Newcastle and Northumberland to provide any unmet need within North Tyneside. The housing requirement of 16,632 net additional dwellings between 2011/12 and 2031/2 or 792 dwellings per annum (dpa) represents a decrease upon the previous consultation which identified a requirement of 16,272 between 2013 and 2030 or 957dpa. NWL consider that to provide a positive statement and to be in accordance with the NPPF which sets out the need to 'boost significantly' housing supply, the housing requirement in the policy should be expressed as a minimum. NWL therefore recommend that the policy be reworded to "To provide for the growth and development needed in North Tyneside to meet the Borough's Objectively Assessed Need for new homes provision is made for the development of 16,632 homes from 2011/12 to 2031/32 at a minimum annual average of 792 new homes per year."		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012
755686	Home Builders Federation		LP20151731	22. The housing requirement of 16,632 net additional dwellings between 2011/12 and 2031/2 or 792 dwellings per annum (dpa) represents a significant uplift from the now revoked RSS requirement and in this regard the HBF supports the Council. It is, however, also noted that it represents a decrease upon the previous consultation which identified a requirement of 16,272 between 2013 and 2030 or 957dpa, albeit the Council were		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				<p>seeking to reduce this requirement through the DtC. 23. The HBF consider that to provide a positive statement and one in conformity with the NPPF, including the need to boost significantly housing supply, the requirement should be expressed as a minimum. The HBF also consider that the housing requirement is set too low and we therefore recommend a further uplift. Our reasons for coming to this conclusion are set out in the following paragraphs. Methodology 24. In determining the housing requirement the Council has undertaken a number of scenarios to identify what may constitute an objectively assessed housing need for the area. These scenarios are discussed in the 2014 SHMA. The forecasts provide analysis against the 2011 based and 2008 based CLG headship rates. The 2014 SHMA considers three main elements in the forecasting work, which are demographic led forecasts, migration led forecasts and jobs led forecasts. Each main element is then varied and subject to sensitivity testing to provide a suite of 15 different forecasts each of which are presented against the 2011 and 2008 based CLG headship rates together with an average. The HBF considers the overall methodology employed in determining and selecting the scenarios to be generally appropriate. 25. The outputs from the modelling work provide a wide range of forecasts ranging from 243dpa (Natural change, 2011 based headship rates) and 1,855dpa (Jobs-led High+, 2008 based headship rates). The chosen housing requirement of 792dpa sits towards the lower</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>end of the scenarios and does not conform to any single scenario. The 2014 SHMA breaks down the scenarios into three broad growth options low, medium and high (Table 4.4). The housing requirement represents the medium growth option which is a mid-point between three scenarios including the medium jobs-led scenario with assumed reductions in commuting patterns. Interestingly the analysis of the growth options does not consider the higher level jobs-led growth options (in excess of 1,000dpa), including the commuting ratio adjusted Jobs-led high+ scenario. Neither the plan nor the 2014 SHMA adequately explain why this scenario was not considered. The HBF consider that this scenario is also realistic and should have been used to inform the discussion upon an appropriate objectively assessed housing figure. 2012 based sub national household projections (2012 based SNHP) 26. Following the publication of the 2014 SHMA the 2012 based SNHP were released. The NPPG, as amended, is clear that these represent the most up to date estimate of future household growth and as such should be used as the starting point for determining household growth (ID 2a-016-20150227). Over the full projection period (2012 to 2037) an annual growth of 751dpa is identified for North Tyneside. If the plan period is considered (2011 to 2032) annual growth rates are expected to be higher at 774dpa. This is just 18dpa lower than the proposed housing requirement. 27. In determining whether the 2012 based SNHP</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>are appropriate it must be considered that these have been influenced by a period of deep recession. It is widely acknowledged that the effect of the recession is a propensity towards lower household growth. Therefore as the economy continues to improve it is likely that household formation rates will also increase. It is therefore likely that the current household projections could suppress actual future rate of household growth. In this regard the HBF consider the 2012 SNHP should be considered as an absolute minimum starting point with uplifts required to meet economic aspirations and market signals within individual housing market areas. Economic aspirations 28. The plan, paragraph 5.22, clearly identifies that it seeks to accommodate at least 707 additional jobs per annum. Yet the proposed housing requirement only provides for 654 jobs per annum. This is a mismatch of 53 jobs per annum or 1,113 over the period of the housing requirement (2011 to 2032). The HBF is unclear why such a mismatch exists within the plan particularly as this is contrary to the NPPF (paragraph 158) and NPPG (ID 2a-018-20140306). It is therefore recommended that the Council resolve this mismatch and provide the relevant uplift in the housing requirement. 29. The housing requirement is reducing by an assumption that commuting rates will decrease over the plan period. The HBF agrees that reductions in commuting rates can be achieved by policy interventions. The reduction must, however, be based upon robust evidence indicating how this will be</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>achieved. The 2014 North Tyneside Household and Demographic Forecasts paper identifies that the sensitivity analysis of the medium jobs led scenario (upon which the chosen requirement is based) assumes a reduction in the commuting ratio from a derived ratio of 1.15 to 1.05 between 2014 and 2023. The HBF recognised that there appears to have been a reduction in the commuting ratio between the 2001 and 2011 census. It does, however, remain unclear how much this reduction was influenced by the recession and therefore how likely it is that such a trend will continue into the future.</p> <p>Market Signals 30. The 2014 SHMA discusses market signals in paragraph 4.18 onwards. This is a fundamental element of determining the objectively assessed need for housing (NPPG ID 2a-019-20140306) and a worsening trend in any of these indicators will require upward adjustment to planned housing numbers (NPPG ID 2a-020-20140306). The 2014 SHMA provides a cursory consideration of the signals and in paragraph 4.23 indicates that no adjustment is required. 31. The HBF consider that such a determination should also take account of a comparison with similar neighbouring authorities. In this regard it is notable that house prices in North Tyneside were higher than the neighbouring authorities of Newcastle and Northumberland and greater than the Tyne and Wear average (Figure 3.1; 2014 SHMA). In addition relative affordability is the second worst against lower and median quartile house prices, behind Newcastle and Northumberland respectively,</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>within the region (Table 3.1 &amp; 3.2; 2014 SHMA). 32. It is also clear that the Council has failed to meet its housing requirement over since 2007/8. This has led to under-delivery, in such cases the NPPG advises; "If the historic rate of development shows that actual supply falls below planned supply, future supply should be increased to reflect the likelihood of under-delivery of a plan.' (ID 2a-019-20140306) 33. The HBF is therefore of the opinion that there is a justification to provide an uplift of the housing requirement based upon market signals. Affordable Homes 34. The NPPF 2014 SHMA clearly identifies a need for affordable homes identifying a net need for 490 affordable homes per annum. This represents almost 62% of the overall housing requirement, this is clearly unlikely to be feasible due to economic viability implications. The need for affordable housing has also increased since the previous SHMA update in 2011 which identified an annual need for 479 affordable dwellings. 35. The 2012-13 Annual Monitoring Report identifies affordable housing delivery in Table H12. During the period 2004/5 to 2012/13 a total of 747 affordable dwellings were provided or just 83 per annum. This is significantly below the overall requirement. In such cases the NPPG advises; "An increase in the total housing figures included in the local plan should be considered where it could help deliver the required number of affordable homes'. (ID 2a-029-20140306) 36. The HBF therefore considers that an uplift in the housing requirement can be justified by the</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>identified need for affordable housing. Conclusion 37. The HBF consider that the proposed housing requirement is too low and a moderate uplift is recommended. In determining the level of uplift required the Council should have regard to the issues raised above with regards to market signals, past levels of under-delivery, the need to align employment and housing strategies and to assist in delivering greater quantities of affordable housing. Paragraph 7.29 / Table 8 38. It is noted that the Council intend to use a 5% buffer for its five year housing land supply calculation as required by NPPF, paragraph 47. Whilst the HBF concur that over the period 2004/5 to 2007/8 the Council exceeded its target it has in recent years fallen considerably short, even when assessed against the now revoked RSS requirement. The 2014/15 Strategic Housing Land Availability Assessment (SHLAA) identifies that this shortfall, taking account of the proposed housing requirement amounts to 455 units and a failure to deliver against its targets since 2007/8. 39. Whilst it is recognised that much of the shortfall is due to the proposed uplift in the housing requirement the HBF considers this to constitute persistent under-delivery and as such a 20% buffer should be applied. 40. Table 8 provides an indication of the outstanding requirement for housing land supply. This includes all sites with planning permission and awaiting to grant subject to the signing of section 106 agreements at 31st December 2014. Whilst the HBF does not dispute the figure we strongly recommend</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				that caution is utilised in using such figures when determining the remaining quantity of housing land to be allocated. This is because, due to numerous reasons, not all sites with planning permissions will be developed. The HBF therefore consider that a more robust calculation would be to apply a discount to the sites with planning permission or awaiting Section 106 sign-off. A common approach which has been accepted at a number of planning appeals is to provide a 10% deduction in unimplemented housing permissions to take into account that some commitments may not come forward (see appeals at Rothley APP/X2410/A/13/2196928 and Honeybourne APP/H1840/A/12/2171339).				
808917	BDW North East	LAND DEVELOPER	LP20151771	The LPCD states that "planning officers from the 5 Tyne and Wear authorities, plus Northumberland County and Durham County, have met regularly throughout the formation of the Plan to share and respond to Cross Boundary issues". There is also a Memorandum of Understanding in place, approved by North Tyneside Cabinet in 2013, which sets out the agreement between the 7 relevant authorities on how they can comply with their duty to cooperate. BDW is pleased with the cross-boundary work that has taken place. The examination of the LP will test whether the council has complied with the duty to cooperate. The NPPG highlights that in order to meet the duty to cooperate test the Local Authority "" will need to submit comprehensive and robust evidence of the efforts it has made to cooperate and any		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>outcomes achieved" (NPPG, para 003). BDW recognise that the council have identified the broad topics considered under the duty to cooperate. However, there needs to be clarification of the specific issues discussed. There is also no reference to the outcomes of the discussions and what was done to address the issues discussed. Without evidence of the cooperation and outcomes achieved the Inspector will find the LP unsound. The NPPG states that "it is unlikely that this (the duty) can be satisfied by consultation alone" and that "inspectors will assess the outcomes of the cooperation and not just whether LPAs have approached others". BDW are pleased to see that the council has worked closely with Newcastle and Northumberland in considering its housing requirement. The SHMA recognises that "Newcastle proposes to reduce net migration losses, particularly of working age families to its neighbouring authorities, principally North Tyneside. It is consistent to see the North Tyneside plan replicate the agreement sought by Newcastle and Gateshead in their plan " to reduce out-migration from Newcastle to North Tyneside. In terms of Northumberland "the Northumberland SHMA (December 2014) has included consideration of potential additional migration from North Tyneside, which reflects increased connectivity between the two areas in employment and housing and indicates that the County's preferred strategy could support the additional housing needs that could arise". Northumberland stated that</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the two local authorities were going to produce a joint position statement on OAN, including member input and signoff. The LPCD and its supporting documents do not make any reference to this. BDW would welcome clarification from the council on whether Northumberland is taking a proportion of North Tyneside's additional housing needs, any number agreed and the impact on the housing requirement of each authority. To fulfil the duty to cooperate the council must make reference to the outcome of discussions and what was done to address the issues discussed. A statement must be produced demonstrating the cooperation between the council and Northumberland. It must outline any agreement that has been reached between the two councils, whether the council plan on transferring its surplus housing requirement to Northumberland, the numbers agreed and the impact upon the housing requirement of each authority. The council sets out its preferred housing requirement of 16,632 homes from 2011/12-2031/32. An annual average of 792 new homes per year. The RSS set out a target of 11,940 over 15 years. BDW are pleased to see that the overall housing requirement represents a significant uplift on the now revoked RSS requirement. However, the previous consultation set out an annual requirement of 957 dwellings per annum. Therefore the requirement of 792 new homes per year set out in the LPCD represents a decrease on the previous requirement set out by the council. The council must ensure the</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>housing requirement set is sufficiently aspirational. In accordance with the NPPG the council must use the household projections as a starting point to estimate the overall housing need. The household projection-based estimate of housing need should then be adjusted to reflect factors affecting local demography and household formation rates not captured in future trends. The council should adjust the need number to reflect appropriate market signals as well as other market indicators of the balance between the demand for and supply of dwellings "" land prices, house prices, rents, affordability, rate of development and overcrowding. The methodology used to calculate housing need by the council is appropriate. The council have forecast three scenarios against the 2011-based and 2008-based CLG headship rates: demographic led forecasts, migration led forecasts and jobs led forecasts. These were then subjected to sensitivity testing to provide 15 different forecasts. The NPPG states that councils must base their assessment on the most up-to-date household projections. The 2012-based household projections were released following the publication of the SHMA 2014. The council must review their housing need calculations in light of the new figures available. Looking at the 2012-based household projections they forecast an annual growth of 751 dwellings per annum in North Tyneside, over the full projection period 2012-2037. Considering the plan period, 2011 "" 2032 annual growth rates are expected to be</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>higher at 774 dwellings per annum. This is only 18 dwellings per annum less than the proposed housing requirement. The council needs to review their housing requirement based on the 2012-based SNHP, especially given that their proposed requirement is only 18 dwellings per annum more than the projections forecast. It is important that the council's requirement is more aspirational than the projections. The projections were influenced by a period of deep recession, the effect of which is a propensity towards lower household growth. As the economy improves housing formation rates are likely to increase, therefore 2012-based household projections could suppress actual future rates of household growth " concerning given that the councils proposed requirement is only 18 dwellings per annum higher. The council must review the housing requirement in light of the 2012-based household projections. These must be used as an absolute minimum starting point. BDW have some concerns over the scenario chosen by the council. The housing requirement of 792 dwellings per annum is at the lower end of the scenarios. There are 9 scenarios which produce a higher target. BDW believe a higher target would be more appropriate. The analysis of the various growth options does not consider option 3 "Jobs led higher + (lower net out commute) SENS3, 1,350 homes per year. Neither the plan or the SHMA adequately explain why this scenario was not considered. This scenario is realistic and should be considered when discussing the housing figure. The</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>requirement of 792 dwellings per annum chosen as the preferred option by the council does not actually conform to any single scenario. It represents a mid-point between sub-national population projection 2012 (SNPP-2012) housing growth of 15,971 and 761 dwellings per annum and 10 year migration trend (PG 10-Yr) housing growth of 17,021 and 811 dwellings per annum. BDW also note that the medium growth option does not plan for sustainable population growth. It plans for a 6% in people aged 0-4 years, a 57% increase in people aged over 65 years, but only a 1% increase in the economically active population, aged 15-64 years. Whilst the higher growth option plans for a 5% increase in the economically active population. The council must plan for the growth of the borough, by planning for an increase in the economically active population, therefore the council should consider an uplift in the housing requirement. BDW urge the councils review the housing requirement based on 2012-based household projections as a minimum starting point. The council should consider higher scenarios and in particular "jobs led higher + (lower net out commute) SENS3 to take account of the need to plan for an increase in the economically active population. The housing requirement is reduced by an assumption that commuting rates will decrease over the plan period. The council must provide robust evidence of how a reduction in commuting rates would be achieved. BDW note that there has been a reduction in the commuting ratio between</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the 2001 and 2011 census. However, the council must remember this reduction was influenced by the recession. The council must provide robust evidence of how this reduction will continue into the future. The council must provide robust evidence to justify the reduction in commuting ratio, demonstrating how it would be achieved. Market signals and market indicators should be used to adjust the housing need number, as they give an indication of the balance between the demand for and supply of dwellings. The NPPG, para 20 (Reference ID: 2a-019-20140306) states that "prices or rents rising faster than the national/local average may well indicate particular market undersupply relative to demand". "The more significant the affordability constraints (as reflected in rising prices and rents, and worsening affordability ratio) and the stronger other indicators of high demand (e.g. the differential between land prices), the larger the improvement in affordability needed and, therefore, the larger the additional supply response should be" (NPPG, para 21 (Reference ID: 2a-021-20140306). BDW note that the council has undertaken a consideration of market signals in the borough and justified that there are no adjustments required. However, we believe the council should adjust the housing requirement in light of the boroughs higher house prices in comparison to Newcastle and Tyneside and the Tyne and Wear average. Relative affordability is also the second worst against lower and median quartile house</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>prices, between Newcastle and Northumberland respectively, within the region. The council must provide for an uplift in housing requirement to take account of the market signals with similar neighbouring authorities and the boroughs relative affordability. The RSS set out a target of 796 homes per year, 3,980 homes from 2008-2013. Net completions in this same 5 year period equalled 1,686 homes. A shortfall of 2,294 dwellings against the RSS requirement. The NPPG states that "if the historic rate of development shows that the actual supply fails below planned supply, future supply should be increased to reflect the likelihood of under-delivery of a planar€" (NPPG, para 20, Reference ID: 2a-019-20140306). The council must provide an uplift in housing requirement to take account of historic rates of under-delivery. The council must provide for an uplift in housing requirement to take account of the market signals with similar neighbouring authorities and the boroughs relative affordability. An uplift is also required to take account of historic rates of under-delivery. The council state that "it is also assumed that the 792 target addresses any backlog in demand as it uses a baseline figure based on the current demographic situation in North Tyneside€". The council has failed to account for the undersupply. BDW notes that the council have included total additional homes delivered from 2011/12 "" 31 December 2014. Based on the annual requirement of 792 homes per annum this is a requirement of 2,376 homes. Therefore the</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>council has under-delivered by 743 units over the 3 years. The council must include this under-delivery in their outstanding gross housing target. In the two years prior to the start of this plan period the council delivered 947 homes, against a target of 1,592. This resulted in an undersupply of 645 homes. Therefore the total 5 year undersupply which must be included in the outstanding gross housing target is 1,388. In accordance with NPPF para 47 "where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward later in the plan period) to provide a realistic prospect achieving the planned supply and to ensure choice and competition in the market for land". 20% should be added to the housing target and the undersupply to account for the council's persistent under delivery of housing. The outstanding gross housing target also includes a planning commitment of 4,810 units. However, the council has not made any allowance to provide any discount for non-implemented planning permissions. A 10% lapse rate would be reasonable, a practice which has been established through recent appeal decisions " Rothley (APP/X2410/A/13/2196928) and Honeybourne (APP/H1840/A/12/2171339). BDW believe the outstanding housing requirement should be calculated as demonstrated below: Net housing target 2011/12 to 2031/32 16,632 Undersupply from 2009-2014 1,388 20% buffer applied to target and undersupply 3,604 Existing planning</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>permissions and sites minded to grant permission awaiting section 106 (as at 31 December 2014) minus 10% lapse rate 4,329 Outstanding Gross Housing target 2011/14 to 2031/32 17,295 The council should adjust the "outstanding gross housing target to take account of the undersupply, account for a 20% buffer and provide for a 10% lapse rate on planning commitments. BDW note that the councils proposed allocations provide sufficient capacity for 8,806 dwellings. This is 1,383 dwellings less than the council's outstanding gross housing target of 10,189. Against BDW's outstanding gross housing target the allocations produce a shortfall of 8,489 dwellings. The council must allocate more sites, consider releasing land from the Green Belt and re-designating safeguarded land as housing allocations/contingency land to meet the housing target. BDW note that the council have included a windfall allowance in their housing delivery calculation to meet the shortfall. The NPPF states that "local planning authorities may make an allowance for windfall sites in the five-year supply if they have compelling evidence that such sites have consistently become available in the local area and will continue to provide a reliable source of supply. Any allowance should be realistic having regard to the Strategic Housing Land Availability Assessment, historic windfall delivery rates and expected future trends, and should not include residential gardens". The council must justify the inclusion of these windfall sites. They must provide compelling evidence that such sites have consistently</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>become available in the local area and will continue to provide a reliable source of supply. BDW note that the 2014/15 SHLAA identified that 356 windfalls came forward in the period 2009-14 at a rate of 45 dwellings per annum. This would still result in a shortfall of 573 units if windfall sites were to come forward at the same rate and deliver 810 dwellings over the plan period. The council must allocate more land for housing to meet its target. In accordance with the NPPG the council have produced an indicative trajectory of anticipated development, with consideration of associated risks to ensure consistency, accessibility and transparency. BDW have concern at the number of dwellings identified for year 1-5. The council has identified a supply of 735 homes per year for the first 5 years. This is 57 dwellings short of the 792 annual target. The number of dwellings identified for the first 5 years must be higher to meet the target. In accordance with the Sedgfield approach the council should meet the shortfall identified early in the plan period. The council should therefore account for this in its identification of sites, as well as including a 20% buffer. In accordance with the NPPF, the council should also produce a housing implementation strategy to sit alongside the housing trajectory. This should set out how the full range of housing will be implemented describing how they will maintain delivery of a 5-year supply of housing land (NPPF, para 14). To meet the housing target the council must allocate more sites, consider releasing land from the Green</p>

				<p>Belt and designate safeguarded land as housing allocations or contingency land. The council should also justify the inclusion of windfall sites. Five Year Land Supply The council must use the trajectory to demonstrate that they have a five-year land supply of deliverable housing sites.</p> <p>"Demonstration of a five year supply is a key material consideration when determining housing applications and appeals. As set out in the National Planning Policy Framework, a five year supply is also central to demonstrating that relevant policies for the supply of housing are up-to-date in applying the presumption in favour of sustainable development" (NPPG, para 033, Ref ID: 3-033-20140306). The council should increase the number of dwellings identified in the first 5 years to meet the target, meet the shortfall identified early in the plan period and include a 20% buffer. BDW note that the council have calculated that North Tyneside has a 3.06 year housing land supply. BDW believe this is even lower at 2.05 years housing land supply. The main point is that the council does not currently have a 5 year land supply. A CDP requirement 2015-2020 3,960 B Shortfall 1,388 C 20% buffer as required by para 47 of the NPPF (applied to A+B) 3,604 D Revised 5-year housing requirement (A+B+C) 8,952 E 5-Year Annualised Average (D/5) 1,790 F Local Plan allocations and commitments total 3,675 G Difference (F-D) -5,277 J Number of Years Supply of Housing (F/E) 2.05 The NPPF states that "housing applications should be considered in the context of the presumption</p>

				in favour of sustainable development. Relevant policies for the supply of housing should not be considered up-to-date if the local planning authority cannot demonstrate a five-year supply of deliverable housing sites". The council must allocate more sites to ensure it can demonstrate a five-year supply of deliverable housing sites and to ensure the housing target can be met.				
900308	Places for People		LP20151779	(Comments with input from Urban Splash) There is an identified need to house an increased population of 21,000 by 2032, evidenced by SHMA growth forecasts. This translates to 792 homes per annum to meet Borough's Objectively Assessed Need from 211/12 to 2031/2032. The Smith's Dock development represents a significant contribution towards housing need in North Tyneside.		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151797	Moving on to Policy S7.2, we recognise that the LPCD aims to provide 16,632 new homes in the Borough between 2011/12 and 2031/32, at an annual average of 792 homes. Existing housing to set against this target includes 1,633 homes completed between 2011 and 2014, alongside 4,810 units on sites with existing planning permission and sites that are minded to be granted permission and are awaiting a section 106. Therefore, there is a requirement for the LPCD to provide 10,189 units between 2014 and 2032. Taking a requirement to provide 10,000 units over the remaining plan period equates to approximately 555 dwellings per annum over the next 18 years, which broadly speaking ties in with the housing figures contained within		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities. 				10,200 new homes "" in addition to about 5,000 homes already with planning permission"□. 10,200 + 5,000 = 15,200 homes I suggest more realistically Average net migration inward = 780 per year = 11,700 over 15 years estimated average 2 people per home = 5,850 homes 5,850 minus 3,445 with permission but not yet built minus 3,239 existing empty properties ----- = - 834 Therefore there will be a surplus number of homes in the borough of North Tyneside.				
638268	Natural History Society of Northumbria		LP20151894	NHSN believe that the plan is based on growth rates which are overly-ambitious and ignore earlier consultation feedback showing a public opinion for a lower rate of growth to save valued green spaces. In addition, evidence provided by North Tyneside Council to the examination in public for the Newcastle Core Strategy agreed that additional housing growth in Newcastle would capture households that might otherwise locate to North Tyneside. It was agreed that this would result in a reduced housing need for North Tyneside. Given this agreement we can not understand how the housing need for North Tyneside has gone up instead of down. We would draw your attention to the recent decision by the Planning Inspector for the County Durham Core Strategy who concluded that their plan was unsound because growth aspirations were unrealistic when taking into account the plans of neighbouring LPAs. Given neighbouring development plans we believe that a more realistic rate of growth for North Tyneside is around 600 new houses per year. This will support the economy and also meet		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities. 				residents' demands to reduce building on green land. We can see no calculations in the plan that would suggest that a slightly lower figure of, for example 650 houses per year can not meet economic growth aspirations given the growth that will take place in neighbouring areas (i.e. provide employment for North Tyneside residents).				
769763	Bellway Homes (NE)	DEVELOPER	LP20151928	The housing requirement of 16,632 net additional dwellings between 2011/12 and 2031/2 or 792 dwellings per annum (dpa) represents a decrease upon the previous consultation version of the Plan which identified a requirement of 16,272 dwellings between 2013 and 2030 or 957dpa. Bellway consider that to provide a positive statement and to be in accordance with the NPPF which sets out the need to 'boost significantly' housing supply, the housing requirement in the policy should be expressed as a minimum. Bellway therefore recommend that the policy be reworded to:"To provide for the growth and development needed in North Tyneside to meet the Borough's Objectively Assessed Need for new homes provision is made for the development of 16, 632 homes from 2011112 to 2031132 at a minimum annual average of 792 new homes per year."		S 7.2 Housing Figures	The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. 				over the plan period, as this figure is set too low. There is also a lack of alignment between the economic and housing aspirations for the Borough in terms of the jobs growth aspirations underpinning the economic and housing future for the Borough. Our client therefore recommends an upwards adjustment to the housing requirement to reflect North Tyneside's Objectively Assessed Housing Need as set out in the HEaDROOM Report, which will come under separate cover. As mentioned above, the HEaDROOM Report will be submitted after the consultation deadline following the publication of the full detailed 2012- based SNHP data from DCLG.			homes and employment opportunities.	
396511	GVA	PLANNING CONSULTANCY	LP20152007	PLEASE NOTE FIGURES 1-10 ARE IN THE ATTACHED Policy S7.1 (now S4.1) "" Strategic Housing and Policy S7.2 "" Housing Figures Policy S7.1 (now S4.1) sets out a strategic housing policy and S7.2 sets out a requirement to deliver an average of 792 dwellings per annum between 2011/12 and 2031/32. However, we note that the plan period will be 15 years from 2016/17 to 2032. Paragraph 7.10 of the Local Plan states that the detailed population and economic modelling work which supports the requirement is set out in the 2014 SHMA. The scenarios assessed include household projections, economic-led projections and alternative migration sensitivities. Table 3 of the Local Plan summarises the results of the modelling work with annual requirements ranging from 282 dwellings per annum (dpa) needed to support natural change (i.e. no		S 7.2 Housing Figures	Comments providing a robust consideration of the proposed housing growth in North Tyneside are welcomed. 1) What do the latest household projections conclude should be the starting point for an objective assessment of needs? Overall the previous set of household projections utilising an average of the 2008 and 2011 based household projections have been update to the 2012 based projections - published after completion of the 2015 Consultation Draft Local Plan. The preferred housing requirement for North Tyneside has consequently increased from 792 homes per year to 828 homes per year - reflecting the stated changes in household formation identified in the comment. 2) Are there local demographic factors which indicate a departure from household projections is necessary? The assessment of	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>migration) up to 1,789 dpa needed to achieve the higher economic forecast. The chosen scenario is "closest to trend based OAN, and supports the forecast medium job growth, this is based on a combination of scenarios; jobs led medium (lower net out commute), 10 Year Migration Trend, and Sub-National Population Projection (SNPP). This option results in a need for 792 homes per year" (paragraph 7.21 of the Local Plan). It is concluded that this scenario will result in job growth of around 654 jobs per annum. The consortium has tested the various components of the Council's choice of housing requirement, as follows: 1) What do the latest household projections conclude should be the starting point for an objective assessment of needs? 2) Are there local demographic factors which indicate a departure from household projections is necessary? 3) Are adjustments for economic growth required and if so what level of growth is appropriate? 4) Is an uplift to take account of market signals justified? 5) Is the Council's assumption that out-commuting will change justified? What do the latest household projections conclude should be the starting point for an objective assessment of needs? The 2012-based Household Projections (2012 HP) show that North Tyneside is projected to grow more and faster than any other local authority in Tyne and Wear and Northumberland (see figures 1 and 2). The 2012 Household Projections (which include the 2012 SNPP but crucially update headship rates from the Interim 2011 HP)</p>			<p>household need undertaken by the Council is informed by expertly prepared household forecasts. This tested a range of scenarios including the benchmark subnational projections, migration led projections over five and ten year periods and a range of alternatives considering the implications of differing levels of job growth, commuting and migration. Following the update to the 2012 household forecasts the Council do not consider the projections to be a departure. 3) Are adjustments for economic growth required and if so what level of growth is appropriate? General support for the Council;s assessment that job growth is likely to outstrip population growth in North Tyneside over the plan period - influencing the balance of commuting flows are welcomed. The implications and approach of our neighbours - particular at Northumberland and Newcastle forms an important component of discussions through the Duty to Co-operate. 4) Is an uplift to take account of market signals justified? The Council considers that the 2014 SHMA provides a suitably robust assessment of housing needs and housing market signals. The SHMA includes consideration of conditions in neighbouring authorities and an assessment of the relative performance of the borough. The overall assessment that market signals indicate the housing market in North Tyneside is "tight" is broadly agreed with. However, the assumption that in such circumstances a broad 10% uplift should</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>project growth in households of 17% over the period 2011 to 2031. This is significantly more than is projected in any of the Tyne and Wear authorities which collectively are projected to grow by around 12%, with Northumberland at just 9% growth. Figure 1: Household Projections for Tyne and Wear and Northumberland (Source 2012 Household Projections) Figure 2: Indexed (2011=1) Household Projections for Tyne and Wear and Northumberland (Source 2012 Household Projections) The household projections update the Council's "Sub-national Population Projection 2012" scenario which underestimates growth significantly (by around 45 dwellings per annum or 900 across the plan period). Given both of these scenarios utilise the same population input it is clear that the household formation rates (headship) in the latest projections have been increased significantly. In fact, a review of headship rates taken from the 2011 HP (which is used by the SHMA and by extension the LPCD) and the newly published 2012 HP reveals that the former significantly underestimates household formation in older cohorts. In particular figures 3, 4 and 5 set out how household formation is projected change in the 2011 HP1 and 2012 HP and show that the SHMA will underestimate the propensity for these cohorts to form new households and consequently underestimate housing needs as a whole, particular as the population is ageing. Figure 3 : Household formation rates of 65 to 74 year olds (Source 2012 Projections) 1 The 2011 HP project to 2021</p>			<p>simply be added to the evidence based scenarios for growth is not considered a robust solution. In addition, attention is drawn to the moderate market pressures described at a time when housing delivery within North Tyneside have ranged between 300 and 450 new homes per year. Through the Local Plan period an annual average rate of 828 homes per year is proposed and being planned for. There is no evidence of the performance of the housing market in North Tyneside with such a rate of housing delivery over the long term. Such an uplift may therefore be considered as part of the process of monitoring, implementation and delivery of the Local Plan - but is not appropriate to adjust the housing target itself.</p> <p>5) Is the Council's assumption that out-commuting will change justified? The broad support for the assumption that rates of out-commuting will change is welcomed. Again the implications of this is being considered and has formed a key part of our engagement through the duty to cooperate.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>and therefore are projected forward ten years to 2031 on the basis of the best fit trend for the projection 2011 to 2021. Figure 4: Household formation rates of 55 to 59 year olds (Source 2012 Household Projections) Figure 5: Household formation rates of 60 to 64 year olds (Source 2012 Household Projections) The starting point for an assessment of housing needs is the 2012 HP Projections which project a need for in excess of 805 dwellings per annum. In addition, new headship rates published with the 2012 HP should be utilised in the modelling work for all other scenarios including the economic-led scenarios. It is likely this will increase the overall need for housing. Are there local demographic factors which indicate a departure from household projections is necessary? Figure 6 sets out net migration in North Tyneside over time. It is clear that net migration has fluctuated significant since 2001/2 with a high of 1,112 persons in 2008 to a low of - 110 persons in 2012. Given these fluctuations, it is considered appropriate to take into account longer term trends. Another factor which has not been picked up by past migration trends or the 2012 SNPP is the influence of Un-attributable Population Change ("UPC"☐). UPC is the difference between the population estimate rolled forward from the 2001 Census and the Population estimate following the 2011 Census. In North Tyneside the Census revealed that there was an additional 1,800 people living in the Borough than was originally estimated. Whilst it is not possible</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>to fully and accurately account for how these people were mis-accounted for, it is likely that at least some if not most were under-recorded migrants. Figure 4 therefore adjusts past net migration to take account of UPC which has a significant and positive impact on past trends.2 2 This phenomena only affects the years between the Census as UPC was calculated using the 2011 Census. The 2012 SNPP does not account for UPC. If UPC has been a significant component of population change it is important to account for it in the demographic analysis of the SHMA. Figure 6: Migration estimates from the 2013 Revised Mid Year Estimates (Source ONS 2013 MYE) To assess the potential impact of considering longer term trends, figure 7 sets out net migration for a range of time period and include UPC where appropriate. It is clear that the SNPP (which is 2012 based and includes trends from the 5/6 years from 2006/7) contains a period of high migration when compared to the 12 year and most recent 6 year average. However, when UPC is included, this increases past migration averages significantly. Figure 7: Average Migration Rates from 2001/2 to 2012/13 Revised Mid Year Estimates (Source ONS 2013 MYE) It is therefore considered that the 2012 SNPP and the 2012 Household Projections which utilise the household projections could underestimate past migration on account of longer term trends and UPC. An upward adjustment on the basis of this evidence is therefore justified. Are adjustments for economic growth required and if so what</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>level of growth is appropriate? The Local Plan (at paragraph 7.22) states that 792 dpa will support a significant increase in the local economy of 654 jobs per annum. GVA has reviewed 2014 Experian Forecasts which conclude job growth of over 760 jobs per annum is forecast over the period 2011 to 2031, an increase of 16% over the job growth assumed in by the Local Plan. This level of economic growth forecast by Experian is the baseline forecast for the area and is considered to be principal projection for the Borough (i.e. is comparable to the "medium growth" scenario put forward by the Council. Figure 8 shows that North Tyneside is forecast to grow at the fastest rate of any of the Tyne and Wear authorities (incl. Northumberland). This lends some credence to the Council's proposition that out-commuting will change over the plan period. This is because, as economic opportunities in the Borough become stronger relative to South East Northumberland and Newcastle upon Tyne residents who currently work in those areas will be more and more inclined to pursue local employment opportunities. Figure 8: Indexed forecasted employment growth 2011 to 2031 (Source Experian) Overall there is a justification for a greater increase in the level of jobs planned for through the plan given up to date economic forecast. It is also likely that commuting will change in response to the significant levels of growth forecast in the Borough (this is discussed further below). Is an uplift to take account of market signals justified? The 2014 SHMA at table 4.7 sets</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>out an assessment of housing market signals. This is not in line with the PPG. The PPG states that an assessment of market signals should be a relative one, comparing the performance of the local housing market to that of the wider housing market area and areas with comparable socio-economic characteristics. The 2014 SHMA does not undertake such an assessment and is therefore not considered robust. Notwithstanding, it would appear that in terms of affordability (see figure 9), the change since 1997 has been largely in line with the that of the surrounding area with a worsening of 59% compared to 61% in Newcastle, 66% in Gateshead 53% in South Tyneside and 54% in Northumberland. Figure 9: Indexed affordability ratio change 1997 to 2013 (Source: DCLG Live Tables) In terms of median house price change (see figure 10) however, North Tyneside has experienced the fastest growth across the period 1996 to 2013 with a growth of 218% compared to 212% in Gateshead, 2014% in Newcastle upon Tyne, 210% in Northumberland. Figure 10: Indexed house price grown 1996 to 2012 (Source DCLG Live Tables) As described by the SHMA at paragraph 4.20, residential rents have been static, however vacancy rates are low and decreasing showing that demand is high relative to supply. Low vacancy rates increase friction in the housing market, reducing competition and compounding increasing house prices. They are symptomatic of a lack of supply relative to demand. Overall, whilst the picture is mixed, there would appear to be some indicators which are pointing to a</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>"tight' housing market which requires additional supply to meet demand. The PPG states that a worsening trend in any of the indicators will require an upward adjustment to planned housing numbers compared to those based solely on household projections. The 2012 HP are projecting an increase of around 805 dpa. The size of a market signals uplift is a matter of judgment, on which the PPG offers no specific advice. At an Examination in Public of Eastleigh's Local Plan (Hampshire) the EIP's Inspector's Preliminary Conclusions recommended a 10% uplift in response to market signals that indicated "modest' market pressures. Overall, given the issues associated with house increases house prices and falling vacancy rates, a modest increase in the region of 10% above household projections would seem appropriate. Is the Council's assumption that out-commuting will change justified? The housing and job requirement as set out in the Local Plan are predicated on a change in the commuting shift. On balance this is considered appropriate. Firstly, between the 2001 and 2011 Census, out-commuting fell in North Tyneside in response to an increase in local employment, particular business uses at the enterprise zone office parks at Quorum and Cobalt. This is detailed in the 2014 SHMA and its accompanying appendix by Edge Analytics. Secondly, the jobs economy in North Tyneside is forecast to grow at a faster rate than the surrounding area in future, further reducing the requirement for residents to leave the Borough for work.</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Notwithstanding, such a significant change in commuting rate will of course have an impact on the surrounding authorities and their housing / job balance. For example, Northumberland County Council is assuming within their Core Strategy that out-commuting to Newcastle and North Tyneside will fall. There is potentially a conflict here in terms of the ability of each authority to house fewer and fewer of the subregions' workforce. Notwithstanding the evidence which would seem to justify a change in commuting in North Tyneside, a political agreement with the surrounding authorities through a Duty to Cooperate process should be made to ensure that at the sub-regional level, the spatial strategy each authority is pursuing is appropriate, justified and deliverable and meet full objectively assessed needs for the entire wider housing market area. A trajectory for new housing In paragraph 7.29 it is set out that the Council will apply a 5% buffer onto the requirement of 792 homes per annum. However, when considering paragraph 47 of NPPF and the Council's Annual Monitoring Report 2013 it is the consortium's view that the Council has persistently failed on an annual basis to meet requirements. With the exception of years 2004 "" 2008, the Council has failed to meet the housing requirement, including any of the years between 2008 and 2013. The recent under delivery, regardless of economic conditions, has been persistent and therefore under the terms of NPPF paragraph 47, the 20% buffer should be applied to the requirement. The Council will be aware of</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>well established case law on this point including the Burbage appeal which sets out that economic conditions are not a justification for under delivery and also the Cotswold judgement where the frequency of the under delivery was a key factor in establishing whether to apply the 5% or 20% buffer. The consortium also considers that in table 8, the total supply should not include 100% of sites with planning consent (or minded to grant) because there is significant evidence to demonstrate that historically, not all houses consented are constructed. It has been widely accepted that a 10% discount should be applied to planning permissions to give a more accurate reflection of realistic supply. The implication of this, alongside the consortium's view that the OAN should be higher, is a requirement for increased allocations or numbers of houses proposed on existing allocations in the local plan including at Killingworth Moor. Conclusions on Policy S7.1 (now S4.1) and S7.2 Overall, it is consortium's view that the Council's requirement of 792 would not meet objectively assessed need. Household projections show that older person household are likely to form at a faster rate than assumed by the 2014 SHMA resulting in an increase in total household growth of around 6%. This will have an impact on all of the modelled scenarios. In total, the household projections indicate a need for around 805 dpa. Longer term demographic trends would seem appropriate as would the inclusion of UPC which increase the baseline demographic</p>

				<p>further. Up to date economic forecasts have revealed that the Council's chosen requirement would not meet the full needs of local businesses. An upward adjustment would be required to do so. Whilst the overall picture with regard to market signals is mixed, there are signs of moderate market pressure. It is concluded that upward adjustment of 10% over household projections is justified, increasing the annual requirement to at least 885 dpa (notwithstanding the additional growth in the jobs target and or demographic needs). This is the current view of the consortium. Notwithstanding, the consortium reserve the right to comment further on additional information. The Council should apply a 20% rather than 5% buffer to the requirement recognising the persistent under delivery against the requirement.</p>				
830571	Persimmon Homes	DEVELOPER	LP20152034	<p>Policy S7.2 clearly highlights the Council's preferred option of growth alongside two other options for lower and higher growth within the LPA. Option B is set to deliver 792 dwellings per annum to a total of 16632 across the plan period. This level of growth as shown in the figures of paragraph 7.22 can only support 654 new jobs per annum. This growth scenario does not deliver the Council's own strategy for jobs growth across the plan period which is identified as at least 707 new jobs. Persimmon are keen to ensure that the policy and Plan are found sound through an EIP process at present this is a clear flaw in the economic and residential provision aims of the Plan. In addition to this we would like to take the opportunity to point out that</p>		S 7.2 Housing Figures	<p>The level of new development is informed by a robust assessment of the borough Objectively Assessed Needs for development. The Council is required to follow this evidence based approach in order to deliver a sound plan capable of meeting the clear need of current and future residents of North Tyneside for new homes and employment opportunities.</p>	<p>The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012</p>

				housing target figures within local plans should not be considered a ceiling on development we would support in future iterations of this policy wording which sets the housing level as a minima.				
901136		LOCAL AUTHORITY	LP20152063	<p>North Tyneside is part of a wider housing market which includes Newcastle, as demonstrated in the North Tyneside SHMA; a significant proportion of inflow of population is from Newcastle. Paragraph 7.31 of the Plan estimates approximately 1,000 people each year, particularly young families migrate from Newcastle. Newcastle and North Tyneside have worked closely to ensure that the proposed housing growth in our areas is complementary. The CSUCP aims to increase housing choice within Newcastle to reduce net migration losses, particularly of working age families to its neighbouring authorities, principally North Tyneside. Newcastle proposes to reduce the net loss in population from 2017-18, and by 750 per annum from 2020-21. If successful this would reduce historic patterns of migration from Newcastle to North Tyneside and support the stable level of growth set out in Policy S7.1 (now S4.1) of North Tyneside's Plan. In broad terms, Newcastle Council supports the preferred scenario. North Tyneside's Local Plan housing provision is based on the assumption of an increase in jobs over the SEP period to 2024, followed by baseline growth to 2032, which supports the forecast "medium" job growth and results in a need for 16,632 homes at an average of 792 homes per year. North Tyneside's 792 annual target represents an</p>		S 7.2 Housing Figures	Newcastle City Council's support for both the quantity and location of new housing proposed is noted. This support is considered to reflect the coherent and sustainable approach between neighbouring local authorities, an example of positive planning as part of the Duty to Cooperate. 				ambitious but realistic figure. Newcastle Council supports the sites and locations identified for housing and considers the approach to be sustainable.				
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152075	RE New Site: Russell Square. Our client supports, in principle, the objective of the Local Plan to meet North Tyneside's objectively assessed housing need in order to support the growth and development needed in the Borough. However, our client considers the proposed housing requirement of 16,632 homes over the period 2011/12 and 2031/32 to be too low, which does not reflect the housing needs of the Borough, particularly to meet the economic aspirations of the Local Plan. It is noted that the housing requirement has been reduced from the previous of the Local Plan from 16,272 over the period 2013 to 2030. Our client considers that a robust justification has not been provided for this reduction. In addition, our client considers that the housing requirement should be expressed as a minimum target. This is to ensure that Policy S7.2 provides sufficient flexibility to adapt to changing conditions and that the objectively assessed housing needs are fully met. This will ensure that the policy is fully compliant with NPPF paragraph 14.		S 7.2 Housing Figures	The NT Population and Household Forecasts provide the latest available evidence of housing need over the plan period from 2011 to 2032. In line with guidance, the starting point for determining this requirement is through consideration of the latest projections published by DCLG, which are derived from the ONS population forecasts. The full report is available to read on the Council website.  At the time of publication of the LPCD 2013 the figure for the OAN for the borough was identified as 16,272 between 2013 and 2030, a total based on the latest evidence available at the time and average 926dpa. However, it must be noted that this was a figure and was identified as the maximum requirement, with the 2013 Policy S/SSSS7.2 (now 4.2) outlining that this total could be reduced to between 10,500 and 12,000 through the Duty to Cooperate arrangements. Since November 2013, the Population and Household Forecasts has been prepared as part of the evidence base to support the Local Plan, identifying the latest requirement, with the Council's preferred total being 16,632 new homes to 2032, at 792dpa.	The objectively assessed housing requirement has been updated to accord with DCLG Household Forecasts 2012

879024		RESIDENT	LP201516	I have received the for plans to build thousands of houses on Killingworth Moor. I am deeply saddened to hear of this. The area is one which I frequently walk as do many others because this area is full of wildlife and is a small pocket of countryside in what is becoming a concrete world. I see all wildlife here, including Deer and Foxes. People generally use this area and enjoy getting outdoors. Many people cycle or simply stroll here. I live in Forest Hall and this patch is most precious. This area is so close to the Wagonway paths which are promoted and maintained by North Tyneside Council. If you look at the plan you can see that it will become just one big stretch of housing all the way to the coast. Neighbourhoods should have an escape without having to travel many miles. I note that one of the proposed site "West Moor" has been dropped. I can not understand that as the area suggested is not a area that people use or walk. It is wasteland. Yet you plan to build where people walk and enjoy and continue on from wagonway paths???	Site 22 to 26	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 2,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.
878767			LP201524	Since the publication of the first Plan in November 2013, it would appear that a further 22 sites (site refs 111-143) have been identified or have become available for housing development. 17 of these new sites are brownfield. It is therefore quite reasonable to expect that more,	General	S 7.3 Distribution of Potential Housing Development Sites	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence. This includes the assessment of the

				currently unidentified sites, will also become available for housing development during the planning period to 2032. Appropriate allowances for these currently unnamed sites should therefore be included in the list of potential sites for housing development. In addition, it would appear that no allowance has been made in the projected required future housing numbers for the residential units that it is hoped will be created from the conversion of existing and future vacant town centre shop units and premises above to residential units (see Policy DM6.4) and also the conversion of the existing Hotels and Guest Houses (and other existing redundant buildings) to residential units (see Policy AS5.8). Again appropriate allowances should be being made in the list of required development sites for housing for the residential properties that will be created from these property conversion policies. Incorporating these required adjustments into the list of potential sites for future housing may help defer or delay the need for carrying out some of the more unpopular large scale development of housing planned as necessary on the greenfield sites at Killingworth Moor and around Murton.			the Local Plan. The SHLAA is updated on an annual basis and each year additional sites are identified and assessed for development. From this assessment the most suitable sites have been selected for potential allocation. An allowance for windfall development is made through the Local Plan, based on past trends and evidenced through the SHLAA, which provides a small proportion of the total housing requirement to 2032. This windfall allowance includes forecast of potential supply from conversion of existing premises such as those in retail use or hotels. Further work will be undertaken, to identify any potential additional sites and to provide robust evidence to underpin the windfall allowance, before the next of the Local Plan. However despite a focus on brownfield development, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.	deliverability/developability as outlined the 2015 SHLAA and a revised allowance for windfall delivery.

890129		RESIDENT	LP201566	Road access out of Whitley Bay Monkseaton is now terrible even without road works.	General	S 7.3 Distribution of Potential Housing Development Sites	A wide range of road and public transport improvements are programmed or planned for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now 7.3) and the IDP for further detail. The specific impact of each proposal will require assessment on a site-specific basis and appropriate improvements secured for development to be acceptable.	No amendments proposed.
890124		RESIDENT	LP201568	Can't give alternative sites as there are none left unless we build on every green space and green belt which we will with population increase not controlled. If you must build more houses on green spaces, the places shown appear to be the only options, though as stated concerned about housing surrounding Rising Sun Country Park and Killingworth Lake. Green space is very important, priceless. Hope all brownfield sites are used first not just green space to make it cheaper for developers. Hard to see after this proposed building plans where there would be left to build apart from green belt and green spaces.	General	S 7.3 Distribution of Potential Housing Development Sites	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.	No amendments proposed.
462662		RESIDENT	LP201569	Site 17 and permitted site 18 - Station Road / Rising Sun C.P. The site is a floodplain hence the proposal to dig ponds! Building on the site will stop rainwater escaping through the land, thus making the flooding worse! (Ponds tend to overflow when full). In the area how can tenants feel secure	Site 17	S 7.3 Distribution of Potential Housing Development Sites	An application for development will have to be accompanied by an assessment of issues relating to flooding and ground conditions and, if necessary, propose measures to address and mitigate these issues in order to make development acceptable. Information from relevant experts will be taken into account in considering matters of	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

							development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity.	considered further through detailed masterplanning.
890408			LP2015135	The Holystone Bypass (A191) is already very busy and almost impossible for pedestrians and cyclists to cross at peak times accessing the local fields. This area has not been marked for any traffic management improvements. Houses behind Devonshire Drive (Area 21) offer no direct access to the Bypass thus there would be an increase in traffic in an area that has already has traffic calming measures in effect Removing the area at site 21 removes the last close green area accessible in the immediate area that is not hemmed in by a Major A Road thus is safe for children to play on Local facilities are already strained, the example is Holystone Primary School is already one of the largest in the area and is very over-subscribed which already creates excessive traffic There is a very strong local feeling against further development in the Holystone area, as shown by the 3,500+ signature petition handed to the council around 2012 by the Holystone Action Group. There are many possibilities in North Tyneside, including the area around	Site 21	S 7.3 Distribution of Potential Housing Development Sites	A wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. The precise impact on the local highway network arising from each proposal will require assessment on a site-specific basis and appropriate improvements secured in order for development to be acceptable. This includes improvements to cycling and walking infrastructure, integral to any proposal, and ensuring safe access. As part of any proposal for development, a planning application must include an assessment to consider the current role, use and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision. The importance of community services and facilities, including schools, is reflected in Policies S10.13 (now S7.10) and S10.1 (now 7.1) which outline how the Council will	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

468309		RESIDENT	LP2015239	New site: overall I agree with this key proposals info. My only question is: the old pit buildings and land at the back-end of Backworth have stood wasting for years. Surely some housing or factories could be built there? (on the road to Earsdon)	New site	S 7.3 Distribution of Potential Housing Development Sites	This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 11 now Site E0102). The SHLAA currently concludes that this site is unsuitable for residential development due to this designation. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.

				<p>would like considered, and hopefully improve the feasibility of any future plan whilst also putting forward our concerns. We feel that we should make you aware of these, so that any proposal adopted will not have a detrimental impact on our business and relationship with local residents. Over the last 10 years various proposed 'Master Plans' have been put forward with the admirable objective of improving the Chirton Industrial Estate area. We obviously fully support any proposal which leads to a much needed sustainable regeneration of the area, however we have had worries of what impact these will have on our business. As you may be aware we have traded from our present premises on Norham Road since 1985 and presently employ 61 staff at this outlet. This premises is our Head Office and primary warehouse facility, serving our other stores in Ryhope Sunderland, Portrack Lane, Stockton and a new development in Pennywell Sunderland. In addition we dispatch almost all of our internet sales from this building and currently our web based trade is rapidly increasing. The last 12 months has seen a marked improvement in all aspects of our dealings, which is one of the reasons that we are adding the Pennywell location to our operations. However any disruption to our planned growth in North Shields would be</p>		Housing Development Sites	<p>regeneration programme for the area. It also reflects the current application relating to part of the site (14/01018/OUT) for which a decision is pending. The mixed-use designation will seek to provide a strategy to help manage ongoing change, improving the area and working with businesses that wish to remain, in order to understand their requirements, in a proactive manner. This will help to avoid any threat of piecemeal development. Proposals would not simply be for residential redevelopment but could involve some housing supported by, and integrated with, employment, commercial and, potentially, retail uses. In this, the Council is aware of the needs and requirements of existing businesses and there is no proposal that existing landowners or users will be forced to vacate the site or will see any restriction placed upon current operations. The Council is committed to involving existing businesses and landowners in future proposals.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>extremely damaging to our overall business. Our Norham Road store is well known in the North Tyne area and we spend considerable sums on a yearly basis advertising its present location, and are therefore fully committed to our retail store in this area for the foreseeable future. Furthermore we have invested heavily in its IT systems to enable communication between our stores and escalating internet traffic. We also engage a kitchen business in the Chirton estate, whose production is almost entirely for sales from our 3 stores and this employs a further 15 Staff. Our agents Sanderson Weatherall have written on a number of occasions detailing our difficulties should any future development include domestic housing immediately adjacent to our premises. I enclose copies of two of the most recent letters which illustrate the problems we could encounter, one dated 24th July 2014 and also one sent on the 26th August 2014. We feel that there are problems in the piecemeal way that this area is possibly evolving, with housing proposed in between retail, bus depot and warehouse operations, giving the impression of a lack of coordinated strategy. This has been probably partly caused by proposed long term plans not coming to fruition, causing a blight on improvements,</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>which existing business's would have invested in. Unfortunately, in our case, this has lead to a lack of confidence in committing finance to any major development of our site, being unable to risk radically improving our premises or look to increase our warehousing, by applying for planning to renew and extend our building. We do feel that the original direction of future development outlined in the McKellar 'Master Plan' of 2005 seemed to contain much more sustainable, integrated and viable proposals than the fragmented options presently being discussed. We do understand why these are being floated as there is a natural impatience with how slowly plans have progressed so far, which we are sure has lead to the same problems with 'planning blight' that we have encountered. We also appreciate that the withdrawal of Tesco's involvement, through their financial difficulties, where previously they spearheaded any improvements, made alteration to the overall plan necessary, but this should not have altered the general direction of the Council's approach. We therefore welcome the Council asking for feedback but in view of the above would appreciate early positive indications of what is planned for the Chirton Industrial Estate and North Shields area. In addition a measure of certainty that what is planned for will</p>

				ensure the viability of our business, and enable us to confidently plan for the future.				
892139		RESIDENT	LP2015241	Site 35 to 41: I am absolutely horrified that Murton Village would no longer survive with our footpaths, riding school, fields for horses. I bought a house purposely to be away from the housing schemes only to be told I could be surrounded by homes etc - not pleased at all.	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing up to a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.
892165		RESIDENT	LP2015243	Site 22 to 26: objection. I would like to see Site 22 - 26 maintained as non developed for either housing, commercial or industrial use. Keep it 'OPEN' as it is.	Site 22 to 26	S 7.3 Distribution of Potential Housing Development Sites	Objection to development noted. 892824		RESIDENT	LP2015291	<p>Site 21: Our thanks for the Summary Document of the Local Plan. We would like to draw attention to issues concerning the development of area 21. The drainage of the area flows from the current Holystone housing estate onto the field which Area 21 currently is. In periods of heavy rain, when the street drains have been overloaded, water has loaded into this area which has acted as a natural sink. It seems not many months- but was probably two years ago- that there was flooding in the Devonshire Drive area, and this would likely have affected more homes had there not been that area to which the water could run off. In the scenario that the area is used for the option of additional housing, the existing households will be lost. We advocate the proposed development threatens increase in flooding risks to existing households and should be considered as unacceptable. The accessibility of the site is currently by pedestrian path on its easterly tip and from an opening onto Devonshire Drive on its southern tip, The latter would be a possible future road link to the development increasing traffic flow on Devonshire Drive and exacerbating flow, particularly at school-run times. The maintenance of the roadway is currently of a poor standard, with a section that has not been tarmacked since the original estate. The indicated</p>	Site 21	S 7.3 Distribution of Potential Housing Development Sites	<p>An application for development will have to be accompanied by an assessment of issues relating to flooding and ground conditions and, if necessary, propose measures to address and mitigate these issues in order to make development acceptable.</p> <p>Information from relevant experts will be taken into account in considering matters of flood risk and the overall suitability of the site.</p> <p>As part of any proposal for development, a planning application must include an assessment to consider the current role, use and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision.</p> <p>The importance of community services and facilities, including schools, is reflected in Policies S10.13 (now S7.10) and S10.1 (S7.1) which outline how the Council will enable delivery of required infrastructure to make new development acceptable and, to meet anticipated future needs.</p> <p>The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). 							specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now 4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. Identification in the SHLAA (Site 428) ensures this will be included as part of delivery in broad area allowance.	y of sites as outlined the 2015 SHLAA.
396890		RESIDENT	LP2015340	New site: The field adjacent to Means Drive, Burradon is to be included for housing development.	New site	S 7.3 Distribution of Potential Housing Development Sites	This site is located within the North Tyneside Green Belt. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.
814591			LP2015341	Well, like all other contributors to date my concerns are that the deals may already be made to build on more and more of the green sites. I don't know that the wildlife will understand that they are to use ever shrinking designated corridors and that we may see more and more 'road kill' than at present. Could the new housing ( I appreciate people need to live somewhere), not be on remaining brown sites and when they are all absolutely full THEN consider the old farm fields?	General	S 7.3 Distribution of Potential Housing Development Sites	In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. Partial coverage by a wildlife corridor does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of	A Wildlife corridor policy has been added into the Local Plan.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							existing and creation of new networks will continue to be explored and prioritised. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.	
794139		RESIDENT	LP2015350	Site 35 to 41: object to development on these plots. Building a new town near Murton will destroy the character of the area. Green land / fields should never be built on while brownfield sites are available.	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 2,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. Opportunities to incorporate open space, landscaping and community uses, including allotments, will be explored on a site-specific basis, taking account of the latest evidence of need.	No amendments proposed.
893850			LP2015361	Site 17: It is not very encouraging to see that, even where North Tyneside has refused planning permission (on the east Station Road greenfield site adjacent to the Rising Sun Park) the developer, Persimmon, have had the refusal overturned by a national body. So they will also presumably build on the fields to the west of Station Road as well. Persimmon's track record in the north east is worrying; last autumn Gateshead Council halted their work at a development because they were not adhering to planning regulations; and a small site in Wallsend has also been the subject of complaints to do with drainage/sewerage, and remains uncompleted after EIGHT YEARS. Their plans for mitigating the impact of so much building on the natural environment seem good on paper, but	Site 17	S 7.3 Distribution of Potential Housing Development Sites	Proposals for the Station Rd/Whitley Rd sites are unlikely to include any development of the most northern part of Station Rd (W) and an appropriate buffer will have to be maintained to existing development to safeguard and enhance existing green links in the area. These measures will help to maintain a gap between settlements, support and improve wildlife habitats, prevent any adverse impact on the Rising Sun CP and enable resident access to recreation areas. A wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This includes schemes and proposals relating to the A191 corridor. The specific impact of each proposal will require	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				there must be doubts as to whether they will amount to anything in reality. I am really most concerned about the impact of so much housing development on traffic congestion, noise, and pollution in a small area of Benton. I see that the total of all your preferred sites for housing, just in the land along Whitley Road from Asda to Four Lane Ends, amounts to 1,824 new houses, in addition to those already under construction around the Blue Flames land. I would like to see some serious report on the possible impact of so much additional traffic on this area; Four Lane Ends is already a major choke point for east-west traffic. The loss of open green space is also a very sad factor in this area; some thinking about damage limitation would be very welcome.			assessment on a site-specific basis and appropriate improvements secured for development to be acceptable. For Station Road/East Benton Farm area, key access arrangements will already be established as part of the permitted scheme at Station Road East. Additional improvements will be promoted to ensure impacts on the transport network are mitigated, including continued promotion of sustainable travel including bus, cycling and walking must be integral to any proposal.	
893885		RESIDENT	LP2015362	Site 35 to 41: Object to farmland in preference to brownfield, would remove last green area and susceptibility to flooding. Demand for 15,000 yet to be proved and will preference be given to locals. Opposed to development.	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	The NT Population and Household Forecasts provide the latest available evidence of housing need over the plan period from 2011 to 2032. The Council must plan to meet this need by allocating sites for development. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. The Masterplan process will take account of the precise details relating to flood risk and any ongoing improvement works. An application for development will have to be	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.	detailed masterplanning.
893885		RESIDENT	LP2015363	New site: alternative locations should be any site (brownfield) with planning permission - but not greenfields that are forever lost to food production and prone to flood.	General	S 7.3 Distribution of Potential Housing Development Sites	All sites with an outstanding planning permission are currently forecast to contribute towards meeting overall requirement for 16,632 new homes in the borough over the plan period. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.
893889		RESIDENT	LP2015365	Site 11 now Site E0108: Plenty opportunities for building at the other locations on map. Strongly oppose building for the following reasons: 1. The main road was raised some time ago by the council so that the road could be widened and our house is now 2 steps down from the road. The grass opposite offers good drainage in an area that has suffered flooding	Site 11 now Site E0108	S 7.3 Distribution of Potential Housing Development Sites	An application for development will have to be accompanied by an assessment of issues relating to flooding and ground conditions and, if necessary, propose measures to address and mitigate these issues in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

				<p>previously. If that area is built on there would be nowhere for the water to go except down to our house. 2. We previously opposed to the moving of the bus stop from the east end of Western Terrace but it was moved anyway because it was in front of a house. If houses are built it will once again be in front of a house and the new residents will no doubt park outside of our houses creating a parking issue. 3. If the houses are in the same style as the houses already on Western Terrace then why build more when there are 2 for sale which have remained unsold for well over a year or longer. 4. Angerton Terrace was build when Dudley was a mining village and there is a strong possibility that there is underground mines under the houses. Our house already moves when large vehicles go past, digging foundations opposite could seriously damage our foundations or disturb old mine workings. 5. We bought this house with an open aspect as the main purchase reason. We don't want to love on a housing estate staring at a brick wall. If houses are built opposite it will seriously lower our standard of life and go against the main reason for wanting to live here. This was a village not a new town and we hate what is happening to it. It seems that there are numerous locations on the plans in the area for large scale building (much to</p>			<p>The precise impact on the local highway network arising from a proposal will require assessment on a site-specific basis and appropriate improvements secured in order for development to be acceptable - this includes acceptable resolution of any parking issues.</p> <p>The suggestion of improvements to existing open space will be considered including, if necessary, through the Local Plan process. Opportunities to develop new allotment sites will be explored on a site-specific basis, taking account of the latest evidence of need.</p>

Potential developers of the sites should be aware that it is National Grid policy to retain our existing overhead lines in-situ. Because of the scale, bulk and cost of the transmission equipment required to operate at 400kV National Grid only supports proposals for the relocation of existing high voltage overhead lines where such proposals directly facilitate a major development or infrastructure project of national importance which has been identified as such by central government. Therefore we advise developers and planning authorities to take into account the location and nature of existing electricity transmission equipment when planning developments. National Grid prefers that buildings are not built directly beneath its overhead lines. This is for two reasons, the amenity of potential occupiers of properties in the vicinity of lines and because National Grid needs quick and easy access to carry out maintenance of its equipment to ensure that it can be returned to service and be available as part of the national transmission system. Such</p>	Site 108	S 7.3 Distribution of Potential Housing Development Sites	<p>This site is allocated as employment land through the current UDP and it is proposed that this designation is retained in the Local Plan (NT053). Comments noted. The detailed design and layout of a potential development scheme will take into account the need to maintain access to overhead lines. Opportunities to incorporate open space, landscaping or parking etc. will be encourage and explored on a site-specific basis.</p>	No amendments proposed.

				<p>access can be difficult to obtain without inconveniencing and disturbing occupiers and residents, particularly where properties are in close proximity to overhead lines. The statutory safety clearances between overhead lines, the ground, and built structures must not be infringed. To comply with statutory safety clearances the live electricity conductors of National Grid's overhead power lines are designed to be a minimum height above ground. Where changes are proposed to ground levels beneath an existing line then it is important that changes in ground levels do not result in safety clearances being infringed. National Grid can, on request, provide to developers detailed line profile drawings that detail the height of conductors, above ordnance datum, at a specific site. National Grid seeks to encourage high quality and well planned development in the vicinity of its high voltage overhead lines. Land beneath and adjacent to the overhead line route should be used to make a positive contribution to the development of the site and can for example be used for nature conservation, open space, landscaping areas or used as a parking court. National Grid, in association with David Lock Associates has produced "A Sense of Place" guidelines, which</p>

396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015565	Site 5: Objection: This site is situated within a wildlife corridor. Development in a wildlife corridor renders the objectives of a wildlife corridor untenable.	Site 5	S 7.3 Distribution of Potential Housing Development Sites	In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. Partial coverage by a wildlife corridor does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	A Wildlife corridor policy has been added into the Local Plan.
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015566	Site 9, now Site E008, : Objection: Whilst the Northumberland Wildlife Trust recognises that this site would be strategically placed for employment, we would have considerable concerns over any residential development in this area and its potential impacts (from increased footfall, pollution, runoff, changes to water levels and domestic pets etc.) due to its close proximity to Gosforth Park SSSI. Indeed we note a speculative submission has arisen due to this allocation. We would	Site 9, now Site E008,	S 7.3 Distribution of Potential Housing Development Sites	This site is allocated as employment land through the current UDP and it is proposed that this designation is retained in the Local Plan (NT055). In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors. A location which is adjacent to Gosforth Park Nature Reserve (SSSI) does not automatically render development completely inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				also note that at present this land has ecological value from the scrub and rough grasslands that have established and that the site could have potential for ecologically sensitive flood mitigation should it be allocated for development. We would, therefore, suggest that if the LPA were to produce a strategic biodiversity mitigation/compensation plan, that this site be included in it.			through site layout, the proposed area for development and overall yield. Further work is necessary, taking into account expert advice, to identify the scale and scope of development which would be appropriate. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015567	Site 11 now Site E010: Objection: The development on land allocated as an SLCI would be contrary to paragraph 110 to minimise€¹ adverse effects on the local and natural environment or paragraph 114 plan positively for the creation, protection and enhancement of networks of biodiversity. The Northumberland Wildlife Trust also notes that this area is of semi-improved neutral grassland (potentially mitigation for an earlier residential development). This habitat is a Local BAP priority and to develop is would be contrary to policy S/8.4 in the Local Plan and to paragraph 117 of NPPF to "promote the preservation€² of priority habitats€³. This statement remains current.	Site 11 now Site E010	S 7.3 Distribution of Potential Housing Development Sites	This site is allocated as employment land through the current UDP and it is proposed that this designation is retained in the Local Plan (NT031). In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors. Partial designation as a LWS does not automatically render development completely inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. A new policy is proposed designating an 'open break' which would cover the proposed safeguarded land to the south of West Moor and the northern section of Site 11 now Site E010 covering the SLCI. This proposal would reflect the significance of this open space to the character of West Moor and protection of biodiversity value. The Council biodiversity officer has recommended an adequate buffer for the	The Local Plan document includes indicative mapping for larger allocations identifying potential access points and possible strategic open space.

				<p>questions asks what designated land use at the property or the area &amp; what specific proposals are contained in any existing or proposed development plan? The answer is NONE. 3.4 asks is the property or will it be within 200m of a proposed new road or route under proposals published for public consultation. The answer again is NO. I find it hard to believe that this information wasn't known at the time of the search and think we may need to seek legal advice re: this. As if this goes ahead it may affect the market value of our house ?? Where we live already seems to be hugely congested at the moment. Since moving here I was shocked at the sheer volume of traffic passing through Park lane towards the Cobalt. Traffic jams at either end of the day exist from the Ford Garage all the way down to Shiremoor Metro station &amp; beyond some days. We shouldn't be hasty in building 1000's of houses on our fields that hold so much history to the area, where our grandparents &amp; their parents before them mined ,, in fact our Coal mining search said we in Angerton Ave were in the likely zone of 4 coal mining seams from shallow to 90m deep and while there were no planned works it does state that reserves of coal were still in existence in these seams &amp; they may be worked in future as fuel supplies diminish. So</p>			<p>character and identity.  As part of the Masterplan, an access and transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints. This includes improvements to traffic flows on the A191 corridor and Park Lane.  The Council is continuing to work with the Coal Authority to explore issues relating to existing coal reserves at Murton. This includes whether there will be any necessity to put in place measures to ensure this resource is not sterilised as a result of development.</p>

							determine the most suitable location for providing land for ecological compensation relating to development at Station Road East, Wallsend (12/02025/FUL). A number of options are currently being explored, taking into account expert advice, to identify the most appropriate land to mitigate loss resulting from this permitted housing site.	
897296		RESIDENT	LP2015606	Site 17: I am emailing you to register my concern about the Local Plan recently delivered by the council. Namely, that all of the green field land adjacent to Whitley Road is proposed to be allocated to housing or industrial use. This would mean that there will be no green space left between Benton and Wallsend and Palmersville. Even the buffer between these areas would be gone. Once the green fields are gone, they are gone "" we cannot get them back. The area would become a huge housing estate. The pressure on the transport infrastructure would be vastly increased "" roads which are already struggling to cope with existing demands. The junction of Station Road and Whitley Road will become even more congested. Side Roads e.g. Thornhill Road and Grange Avenue will become even more of a rat run. There is already a huge number of entry/exit points on the road between Benton Quarry Park and Coach Lane. The Rising Sun Country Park will be completely enclosed by housing. Since	Site 17	S 7.3 Distribution of Potential Housing Development Sites	Proposals for the Station Rd/Whitley Rd sites are unlikely to include any development of the most northern part of Station Rd (W) and an appropriate buffer will have to be maintained to existing development to safeguard and enhance existing green links in the area. These measures will help to maintain a gap between settlements, support and improve wildlife habitats, prevent any adverse impact on the Rising Sun CP and enable resident access to recreation areas. A wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This includes schemes and proposals relating to the A191 corridor. The specific impact of each proposal will require assessment on a site-specific basis and appropriate improvements secured for development to be acceptable. For Station Road/East Benton Farm area, key access arrangements will already be established as part of the permitted scheme at Station	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

				the consultation in 2012/13, two large areas of green field land adjacent to the Rising Sun Country Park have been granted planning permission for 1100 houses on top of those already built. They were originally part of the consultation to potentially remain as green field sites.			Road East. Additional improvements will be promoted to ensure impacts on the transport network are mitigated, including continued promotion of sustainable travel including bus, cycling and walking must be integral to any proposal. Consideration of impacts on the local network, such as Thornhill Rd/Grange Ave, will also be necessary.  The importance of community services, including schools and GP surgeries, is reflected in Policies S10.13 (now S7.10) and S10.1 (now S7.1) which outline how the Council will enable delivery of required infrastructure to make new development acceptable and, to meet anticipated future needs.	
638512			LP2015610	Site 35-41: I was disturbed to learn that solar panels (strictly speaking, photovoltaic cells) would not be fitted as a matter of course to the new houses planned for Murton Village. It was explained to me at the consultation session at the new Whitley Bay library that the houses themselves would be insulated to a very high standard, which is commendable. But where were the solar panels? If it is not council policy to fit solar panels to all new-build properties, it should be. And if it is not changed by the council I will raise this through the Labour Party, of which I am a lowly member. Council builders (if there are any left) should be ordered by the council to fit solar	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	The Council promotes the use of sustainable design and construction, including the schemes and proposals which incorporate energy generation from renewable sources. In particular, Policy DM10.8 (now DM7.6) supports the use of community-based renewal schemes and micro-generation technologies as part of an overall objective of reducing environmental impacts and delivering development which is environmentally sustainable. Although there are currently no proposals to enforce the installation of solar panels on the proposed strategic site at Murton, the use of such technology will be encouraged through the formal planning process.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				panels. Private builders should be ordered to do the same, and if they refuse, sack them and get other builders who would accept the council's orders. At present prices, to add £1,000 or £2,000 to the price of a house of, perhaps, £150,000 would not be noticed by a buyer if they can get a mortgage. The solar panels should be fitted not only to keep electricity bills down but also to sell clean energy to the national grid. That is the main point. We have to turn each house/school/library into a mini power station, so that the whole of Tyneside can become a huge power station made up of individual solar panels. I know the council fits some solar panels to schools and some houses, but what exactly is the council's policy? Everyone knows it is more efficient to fit solar panels as part of the building process, rather than retro-fit them. I would be willing to discuss this personally with the planning team/the Mayor/individual councillors but would hope you could first explain exactly what council policy is on solar panels.

							acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.	
897837			LP2015677	I have read a number of the comments on this particular comments and in particular I think that comments LP2015629, LP2015533 and LP2015627 are valid and well made. Site 35-41: Whilst I recognise the need for plans to be put into place, I agree that to build on the likes of Killingworth Moor, Murton Village and land around Weetslade and Gosforth Parks would be an absolute travesty. With regard to the proposed plans of up to 3000 houses in the Murton area, I fail to see how that would not affect massively the fabric of the "village". If the maximum number of houses were built, I think it is fair to assume that most homes nowadays have at least two cars. This would potentially put an extra 6,000 cars on the road in this area. I believe that would completely destroy the fabric of that village. I also note the comments about traffic congestion in and around the Park Lane areas being congested especially heading towards the Cobalt Business Park. I note from the proposed plan that there is an intention to build a road that runs from Norham Road, straight through the fields on the outskirts of Murton to Earsdon. In reality that road would likely be a dual	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of Policy 7.4 (now Policy AS4.4 (A)), is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner.
