897599		RESIDENT	LP2015685	We're opposed to all further development on greenfield sites, wildlife corridors and sites of local wildlife interest.	General	S 7.3 Distribution of Potential Housing Development Sites	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2(now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.  In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining	A Wildlife corridor policy has been added into the Local Plan.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							suitability. Partial coverage by a wildlife corridor does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan.	
396641		RESIDENT	LP2015689	Site 139: I am concerned as these areas are across the green belt corridor which I hope the Council would keep clear, as shown on the map.	Site 139	S 7.3 Distribution of Potential Housing Development Sites	This land is not within the statutory Green Belt as designated through the North Tyneside Unitary Development Plan (UDP). Proposals for the Station Rd/Whitley Rd sites are unlikely to include any development of the most northern part of Station Rd (W) and an appropriate buffer will have to be maintained to existing development to safeguard and enhance existing green links in the area. These measures will help to maintain a gap between settlements, support and improve wildlife habitats, prevent any adverse impact on the Rising Sun CP and enable resident access to recreation areas.	No amendments proposed.
396641		RESIDENT	LP2015690	Site 17: I am concerned as these areas are across the green belt corridor which I hope the Council would keep clear, as shown on the map. 894854			LP2015753	Site 35-41: I object strongly to any further development on open land around New York and Murton. This open area is well used by the residents of Monkseaton, Shiremoor, Murton, New York, and surrounding areas for recreation, i.e. well used by cyclists, walkers, horse riders and considered to be irreplaceable as such. Did I read that this country can only supply 60% of the food needed to feed ourselves, then the question arises how can responsible authorities contemplate using up valuable Farming Land?. 3000 more homes = 3-4000 thousand more cars. Utter madness.	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy (now AS4.4 (A)), is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. The Local Plan does not have any direct influence over the link between where food is produced and where it is consumed. However the importance of agricultural land	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							<p>in creating a sustainable future is recognised and the retention of the current Green Belt boundaries will ensure that significant tracts of productive agricultural land are protected from development over the plan period and beyond. Further evidence relating to agricultural land classification within the borough has been requested from Natural England.</p> <p>As part of the Masterplan, an access and transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints.</p>	
804850			LP2015756	New site: An old brownfield former mine site has been completely ignored around East Holywell, these sites should be considered before building on arable land	New site	S 7.3 Distribution of Potential Housing Development Sites	<p>This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 11 now Site E0102). The SHLAA currently concludes that this site is unsuitable for residential development. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.</p>	<p>The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.</p>

898375		RESIDENT	LP2015764	Site 35 to 41: Development sites are proposed which are inappropriate and contrary to planning policy. For example part of sites 35-41 is to provide ecological compensation for a development elsewhere in the borough.	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy (now AS4.4(A)), is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. Work is currently being undertaken as part of the Masterplan process in order to determine the most suitable location for providing land for ecological compensation relating to development at Station Road East, Wallsend (12/02025/FUL). A number of options are currently being explored, taking into account expert advice, to identify the most appropriate land to mitigate loss resulting from this permitted housing site.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.
804850			LP2015767	Site 22-26: Any development considered should be along the A19 or A189 corridors as there is ample land from the Tyne Tunnel up as far as Killingworth. Using this land would provide easy access to main trunk roads via new slip roads etc. .It appears bias that there are possibly going to be more houses built on the Murton Gap than at Killingworth, this is grossly unfair. Killingworth is by far the more favourable site as it will have less impact for all with its location being on the A19 and A189	Site 22 to 26	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy (now AS4.4(A)), is being prepared to deliver the both of the proposed strategic sites at Murton and Killingworth Moor, guiding development in a coherent, sustainable manner. Together this process will outline the specific capacity and layout of the site, providing a maximum of 4,500 homes between the two sites, with the exact balance still to be determined, a decision which will take into account a wide variety of evidence and site constraints. The Local Plan Spatial Strategy seeks to maximise development opportunities in Wallsend, North Shields and the Coast, whilst delivering the remaining development needs across the urban area. The resulting distribution of suggested development sites, Policy S7.3 (now S4.3),	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.

							to make new development acceptable and, to meet anticipated future needs.	
898505		PLANNING CONSULTANCY	LP2015823	<p>Site 29: My comments relate to your housing section reference S7.3 which contains a schedule of housing sites with housing number estimates. The site you refer to as Site 29 'Backworth Business Park and Cottages' relates to a site at Backworth which was in part a reclaimed mining site. The north/eastern part of the site is the subject of a current planning application by Northumberland Estates. The application has been under consideration by the Council for the last year for 65 residential units. The only issue of substance appears to be a problem with the measures necessary to manage the environment issues relating to a small industrial use (Keenan's). It is expected that Northumberland Estates will be successful over the next few months and they are likely to move to submit an application for additional housing on some of the adjacent land currently allocated for commercial/industrial uses. Furthermore my client's site 'Holywell Engineering' has been the subject of pre-planning discussion with the Council and has received positive responses from Council Officers. It has actually received permission for housing on the site but that permission has time expired as other options were under consideration (including a</p>	Site 29	S 7.3 Distribution of Potential Housing Development Sites	<p>This site is proposed for mixed-use allocation, a reflection of the Council's desire to provide a strategy to help manage ongoing change, improving the area and working with businesses that wish to remain, in order to understand their requirements, in a proactive manner. Proposals would not simply be for residential redevelopment but could involve some housing supported by, and integrated with, employment uses. In this, the Council is aware of the needs and requirements of existing businesses and there is no proposal that existing landowners or users will be forced to vacate the site.</p> <p>It is acknowledged that the overall site may have a potential capacity which would exceed the 65 units outlined in the Local Plan and relating to the recent planning application. However, this lower yield is a reflection of the proposed mixed-use allocation, with an emphasis on land-uses in addition to housing, and significant constraints to development. Therefore 65 dwellings is felt to be an appropriate total for allocation.</p> <p>The application in question (12/00637/FUL) was refused in May 2015 and it is apparent that there are still significant obstacles to delivery. These include the ecological site constraints and, principally, important issues relating to the operation of existing business which will need to be</p>	No amendments proposed.

Policy DM7.6 (now DM4.7) sets out a borough-wide target for at least 25% of new homes to be affordable on every site which meets the identified threshold. In all but the most exceptional cases, affordable housing will need to be provided on-site and will remain affordable in perpetuity. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.
898525		RESIDENT	LP2015826	Site 142: While I understand that an increasing demand for homes within the borough necessitates identification of land for future housing	Site 142	S 7.3 Distribution of Potential Housing	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of	No amendments proposed.

				<p>development, I would suggest that the Site Reference 142 is inappropriate for this purpose. Not only are the houses on Front Street, opposite the proposed development, the last houses in Annitsford to enjoy a view of open fields but the land itself, with its mature trees and shrubs, provides a natural habitat for a variety of wild birds including several species on the RSPB's Red and Amber Lists "Birds of conservation concern". The land also provides an informal green space for dog walkers. This reduces the likelihood of dog fouling on public footpaths in general, with its attendant health hazards and clean-up costs, but more specifically, minimises the risk of this happening on the open planned grassed areas in front of houses on Front Street. Understandably, already being overlooked by houses to the rear and sides of my property, I'd also rather not have the front aspect of my house permanently overlooked by yet more houses. The road, B1505, is also an issue when considering development of Site 142. Though, perhaps officially unreported, there have been several traffic incidents on this road. Frequently used by motorists trying to avoid congestion on the A189, this is already quite a busy road as the latest of several traffic calming measures contest. Traffic can only increase with the opening of the new</p>		Development Sites	<p>potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.</p> <p>This site has been selected as a suggested allocation following this process but any proposal for development will require a formal planning application, with the issues of visual, landscape and environmental impact having to be assessed and, if necessary, measures proposed to address and mitigate these issues in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site, this includes that related to wild birds and negative impacts from the adjacent A189.</p> <p>The precise impact on the local highway network arising from a proposal will require assessment on a site-specific basis and appropriate improvements secured in order for development to be acceptable.</p>

				<p>emergency hospital at Cramlington later this year and the possibility of more motorists from the large development Site Reference 3 proposed in your Consultation plan. The potential hazard to residents, particularly children, crossing from houses on the proposed site to Front St. has to be obvious especially since the return journey might well require crossing from behind cars parked outside the general dealers and fast food outlets on Front Street. While details of the building line for the proposed development are not available, pollution, and its possible effects, from traffic on the A189 have also to be considered. Though there are already houses to the south of Site 142 and their occupants may be quite willing to live in such close proximity to this busy dual carriageway, any houses on the proposed development, especially the northern end, would be exposed to greater levels of pollution from stationary traffic queuing at traffic lights on the A189, particularly during rush hour periods. It's not a place I would want to live!</p>				
898546			LP2015828	<p>Site 128: The proposed 'wildlife corridor' at the disused railway in Benton is a good idea. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>people choose to live in Monkseaton is because of the proximity to green space. Do the politicians really think that increasing the density of development at the coast is going to maintain its desirability as a place to live, and all of the input to the local economy that this results in? There is a wide variety of wildlife, that does not fall into the "protected" bracket, that either visit or make their homes in this existing green space (not just the "wildlife corridor"!)). This includes foxes hedgehogs, amphibians, small mammals including voles, birds of prey including Sparrow Hawks, herons, curlews, pheasants, bats and many more. Building to the extent prosed in this area would destroy the balance currently in existence. Transport links (both road and public transport) connecting the coast to Newcastle City centre are already under pressure. Building more homes in this type of volume only makes the problem worse, and the local plan appears to ignore this east-West connection. Flood risk from surface water is already an issue in this area. Development on the scale proposed only places more pressure on an existing sewer network that is already stretched. Indeed, development on this scale makes a mockery of the need to obtain planning permission to pave a driveway. The local politicians</p>			<p>accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. A wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This includes schemes to make improvements along the A191 corridor. As part of the Masterplan, an access and transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints. The Masterplan process will take account of the precise details relating to flood risk and any ongoing works. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in</p>

				the area as a consequence of increasing the population. The council should look after the people currently resident in North Tyneside and not be pressured by the Government or big business into taking action that will certainly be detrimental to the wellbeing of all who live here.			and the IDP for further detail. This includes schemes to make improvements along the A191 corridor. The specific impact of each proposal will require assessment on a site-specific basis and appropriate improvements secured for development to be acceptable. For Station Road West and East Benton Farm, key access arrangements will already be established as part of the permitted scheme at Station Road East. Meanwhile additional improvements to ensure severe impacts on highways and continued promotion of sustainable travel including bus, cycling and walking must be integral to any proposal.	
467822		RESIDENT	LP2015870	Old hotels that can be used as flats and the railway hotel need doing right.	General	S 7.3 Distribution of Potential Housing Development Sites	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. These include a number of former hotel sites in the coastal area. In addition, an allowance for small-sites and windfall development is made through the Local Plan, based on past trends and evidenced through the SHLAA, which provides a small proportion of the total housing requirement to 2032. These allowances include forecast of potential supply from conversion of existing premises such as hotels.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.

805083		RESIDENT	LP2015947	I dispute the need for development on this scale strongly. Why do we have to make this decision now. Areas for development that could be used. The large green spaces where the grass is cut regular and are life less.	General	S 7.3 Distribution of Potential Housing Development Sites	The NT Population and Household Forecasts provide the latest available evidence of housing need over the plan period from 2011 to 2032. The Council must plan to meet this need by allocating sites for development. A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA, including assessing the most appropriate greenfield sites which may be surplus to requirements. From this assessment the most suitable sites have been selected for potential allocation.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.

				<p>raised by the residents and the council about granting permission to Persimmon Homes to build on the field of Station Road. I am also very concerned to see that the remaining green fields in this area (sites 17, 110, 139), have all been hallmarked for further development. Much apart from my sadness at seeing the natural habitat of a large range of wildlife (rabbits, deer and foxes) destroyed, in formerly industrialised areas such as Wallsend, green space is very, very precious. We also simply do not have the infrastructure to cope with the additional traffic that this will bring onto Whitley Road and Station Road, let alone the impact on the surrounding roads. For example, the levels of traffic on Mullen Road at school drop off and pick up time (there are three schools within a half mile stretch) are already at very dangerous levels and it is only a matter of time before there is a serious accident. I feel that building additional homes along the remainder of Station Road without upgrading the infrastructure would be very irresponsible of the council and put the lives of residents (new and old) at considerable risk. Once again, I encourage the planning department to 'think outside of the box' revisiting brown field sites and rebuilding in those areas, this has been done with great success by neighbouring</p>		Housing Development Sites	<p>Station Rd (W) and an appropriate buffer will have to be maintained to existing development to safeguard and enhance existing green links in the area. A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.</p>	
805563			LP20151077	Site 14: I am pleased to see that site 14, land to the rear of Midhurst Road in Benton, is no longer designated as	Site 14	S 7.3 Distribution of Potential	Support for designation noted. Amendment will be needed to reflect the final decision on site
792500			LP20151083	Site 14: We are very happy that this area has been removed from the Local Plan - it is a totally impractical area of land to be used for housing, there is massive local community support to not only preserve this land but to be able to utilise it - as it has been in the recent past until quite recently - by way of allotments and community space and we have demonstrated this by gaining over 110 local names on a petition of support in an application for Designated Green Space and the forming of the Benton Triangle Community Action Group. see us on <a href="http://www.betontriangle.com">www.betontriangle.com</a> Therefore we wish to express our strong support for the permanent removal of the land at the rear of Midhurst Road, Benton from the list of potential development sites and its retention as an official	Site 14	S 7.3 Distribution of Potential Housing Development Sites	Support for designation noted. 				designated Green Space. ""				
805543			LP20151086	Council members should hold their heads in shame at the disgraceful decision to build on green belt land at Station Road East [NTC: A planning application was submitted for housing on this site, which is not designated as Green Belt land. It was refused planning consent by North Tyneside Planning Committee, but this decision was appealed by the developer. The appeal was allowed, and consent granted, by a Government Planning Inspector in December 2014]. Now plot 17 is also up for grabs. No doubt this will be built upon and we all know why. The wildlife corridor here has been destroyed but is still displayed on the overall map. Shame on you again. The council policy of "Let's cover North Tyneside with bricks" still applies.	Site 17	S 7.3 Distribution of Potential Housing Development Sites	Station Road East - North Tyneside Council Planning Committee refused planning permission for this site. Subsequently, the developer appealed this decision and, following a report by an independent Inspector, the Secretary of State overturned the decision and allowed the application. This site now has planning permission for 650 homes, delivery from which will contribute towards the overall housing requirement for the borough of the plan period. Proposals for the Station Rd/Whitley Rd sites are unlikely to include any development of the most northern part of Station Rd (W) and an appropriate buffer will have to be maintained to existing development to safeguard and enhance existing green links in the area. These measures will help to maintain a gap between settlements, support and improve wildlife habitats, prevent any adverse impact on the Rising Sun CP and enable resident access to recreation areas.	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.
899290			LP20151120	Site 14: I see site 14 has been removed from the list. I hope common sense has prevailed and this site is to be kept as a green space.	Site 14	S 7.3 Distribution of Potential Housing Development Sites	Support for designation noted. Following further assessment through the Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space. 899352	Left City		LP20151163	Site 61: Comment Site 61 is located at the Eastern edge of North Shields Town Centre and is identified as having the potential to provide 41 homes. North Shields Retail Centre Regeneration Strategy 2010 (NSRCRS) referenced in 6.37 of the LPCD 2015 proposes the redevelopment of the site for mixed commercial office and residential development. The proposal is for 68 flats and 1680sq.m of commercial office. Future retail demand has been identified in S6.3 of the LPCD 2015 with a clear preference for town centre locations. Conclusion The site's position in North Shields Town Centre makes it suitable within the context of the LPCD 2015 for residential use as defined in S7.3 but equally suitable for Commercial Office or Retail use as defined in S6.3. The LPCD 2015 Policies Map should define	Site 61	S 7.3 Distribution of Potential Housing Development Sites	The Council is keen to promote the reuse of brownfield land in town centres and the Local Plan looks to focus development within the main urban area. However, the need to deliver new homes is not looked at in isolation and Policy S6.1 (now S3.1) aims to pursue growth and regeneration of town centres by delivering new development, but only when this is appropriate and not detrimental to existing circumstances. Whilst the current proposal is for housing, consideration will be given as to whether a mixed-use allocation would be more appropriate. In such a case, proposals would not simply be for residential redevelopment but could involve some housing supported by, and integrated with, employment, commercial and retail uses.	No amendments proposed.

				<p>Northumberland and a fair amount of this should continue to be protected to ensure that North Tyneside does not become one mass housing estate with an odd field here and there between. There are a few public footpaths across the moor which are popular with families and dog walkers alike, they will become nothing more than glorified footpaths through a large housing estate if these proposals go ahead. There is insufficient transport links for this area too - so unless North Tyneside Council can work with Nexus to branch a metro line up to Killingworth from Palmersville then everyone will be needing to use their cars to go anywhere. I live off Simonside way and it is already difficult to turn right out of the junction onto the B1317 with the speed and volume of traffic during peak periods. The B1317 will become a very busy road which will see mass congestion onto the already congested Great Lime Road. Or in the other direction people heading through Backworth towards the A19 (which is also already congested in both directions during peak periods). Even with the proposed new roadways marked on the map, they are still feeding into the same congested Great Lime Road and A19. If North Tyneside need to use some of the land for housing this should be kept at a minimum and ensure that the area</p>			<p>suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. As part of the Masterplan, an access and transport strategy will be prepared to identify the most suitable means of delivering the development. This includes measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. This will include consideration of potential impacts on Great Lime Rd and the B1317. The Council currently working with Nexus in order to identify the improvements to the public transport network necessary to deliver the Local Plan, this includes opportunities for potential Metro extensions and new stations. Policy S10.3 (now S7.3) sets out the overall strategic approach to transport improvements. The importance of community services, including schools, is reflected in Policies</p>	<p>wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>does not then become completely urban. There is already 127 houses granted for the old army land and that is taking up a fair amount of the current farm land too - therefore 2000 houses plus retail and schools will change the whole face of the area into a mass area of brickwork. At least some of the fields should be retained and maybe even developed into proper parkland for the residents to enjoy. Retail and businesses should be kept to essential service provision for the nearby residences - after all how many half empty business parks does one council need to have? Please look at your plans again and see if you can start to relocate some of the remaining businesses out of their tired old industrial estates (of which there are many) with more empty factories than are actually occupied and free up some brownfield space specifically for housing to be developed on one or more of them. I am sure if NTC offered incentives for businesses to move the borough would not have so many buildings going to wreck and ruin. There is nothing uglier than a whole load of empty factory buildings.</p>			<p>S10.13 (now S7.10) and S10.1 (now S7.1) which outline how the Council will respond so that the infrastructure required is delivered in order to make new development acceptable and, to meet anticipated future needs.</p> <p>The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now DMS1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.</p>	
899444	George F White		LP20151306	<p>S7.3 Distribution of Potential Housing Development Sites This policy identifies the Council's preferred housing sites. The outstanding requirement for housing land supply for the plan period is identified in Table</p>	Site 4	S 7.3 Distribution of Potential Housing Development Sites	<p>The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. 				<p>8 as a gross target of 10,189 units. However the sites identified in Policy S7.3 only amount to a potential 8,806 units. There is clearly insufficient sites identified to meet the current OAN of the area and as such additional sites are required to ensure that the plan allocates sufficient suitable, available and achievable sites to promote and deliver development to meet the OAN. There are uncertainties with regard to some of the identified sites in S7.3 raising questions whether the sites will deliver the potential capacity identified, and specifically whether they will deliver the total number of units within the plan period. For example Site 3 Annitsford Farm in the North West area is identified as having the potential to deliver 400 new homes over the plan period. This site is constrained, parts of the site lie within Flood Zone 2 and 3 and significant buffer zones would be required to mitigate potential development impact on identified Local Wildlife Sites, the capacity of this site to deliver 400 units is over optimistic. Policy 7.3 includes two strategic sites 22-26 Killingworth Moor and 35-41 Murton which are detailed further in policy AS7.4. Again, there is uncertainty whether these two sites will deliver the anticipated potential housing numbers included in AS7.4 at 1,700 and 2,800 respectively given the known constraints, and</p>			<p>period to 2032, including the sites specifically highlighted in this representation. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (nowDM4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. Site 4 is included for assessment in the SHLAA (Site 333) and has been considered as a potential housing allocation through the Local Plan process. However, on consideration of a range of evidence, expert advice and comments received through the consultation process, it has been determined that it would be best to be retain as safeguarded land, potentially meeting the development needs of the borough post-2032.</p> <p>It is acknowledged that a range of additional work is being undertaken to provide further evidence of suitability for residential allocation. The Council encourages the landowner and agent to continue to engage positively through the consultation process.</p>

				<p>doubtful given the necessary lead in times for the required collaboration, master planning and infrastructure requirements whether these sites would deliver the proposed number of units within the plan period. Industry advice indicates average build out rates as between 30 to 45 per annum, even accepting a higher rate of 100 units per year as advocated by the SHLAA 2014 (5.33) these sites could take between 17 and 28 years to complete; given the lead in times and that the plan period commenced in 2011/12 it is unrealistic to expect that these sites will be completed and will deliver the full potential capacity within the plan period. To make up for this likely shortfall in provision within the plan period by the two strategic sites and uncertainty in respect of some of the preferred sites, the plan will need to make provision for additional residential development sites to meet the OAN within the plan period. This will need to consider the phased release of the Strategic Sites specifically in the early part of the plan period where development of these will not compromise or prejudice the overall development of the sites. There remains strong demand in North Tyneside for new housing. In order to deliver the OAN for the Borough, sites with capacity to deliver must be in places that are attractive to the</p>

				<p>the site. It is noteworthy that Northumbria Water has indicated the site has "No conflicts'. Concerns have been raised by the NWT regarding the biodiversity value of the site and the relationship with nearby site statutory and non-statutory wildlife sites. A Preliminary Ecological Assessment is due to be undertaken to assess the site having regard to the cumulative impact of nearby developments. The site is actively farmed and is not set aside land or rough grazing, in this respect the potential biodiversity value of the site is likely to be low. A public right of way borders the site to the east and forms part of a wider network, however the majority of the site is in agricultural use and not accessible to the public. Assessments of the impact of nearby land uses including transport routes and the industrial estates will inform a noise assessment and potential mitigation measures. Site investigations will establish any potential historical contamination of the site however as the majority of the site has been actively farmed the risk is anticipated to be low. A desktop study indicates there are no Listed Buildings or Scheduled Monuments or other heritage assets on site, although acknowledgement is given to the importance of the historic waggon way to the east of the site. Taking into account the above factors is it</p>

				<p>comments myself and hundreds of others made during the first round of so-called consultation were disregarded, I am at a loss as to how to better convey the enormity of a decision to build on what little green space is left in our borough. These fields are enjoyed by countless dog walkers, cyclists and riders every day, all year round. But you already know that. The area is a natural and unspoilt habitat for a range of wildlife, but you know that too. The streets around my home suffered flood damage in 2012 and despite the measures put in place recently, these fields are often waterlogged still. Schools in the area are oversubscribed already, GP and dental surgeries are stretched to the limit and the roads are congested. Your report recognises all of these as real concerns. I understand the need to build more houses across North Tyneside, but strongly object to the lion's share being built in one concentrated area. I would urge councillors to look again at the proposed sites and reduce considerably the number of homes planned for the areas separating Rake Lane, Monkseaton and Murton.</p>		Development Sites	<p>coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. 464572	Landowner	PLANNING CONSULTANCY	LP20151497	Site 120: Support the proposed allocation of brownfield land adjacent to Benton Metro (site 120) for housing.	Site 120	S 7.3 Distribution of Potential Housing Development Sites	Support noted. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2(now S1.4) and S7.1 (now S4.1) and through this suggested allocation.	No amendments proposed.
464572	Landowner	PLANNING CONSULTANCY	LP20151500	Site 14: Objection lodged that Land to the rear of Midhurst Road, Benton (SHLAA ref 298) should be allocated in whole or part for housing. As set out in the SHLAA, the site is 100% brownfield. According to NPPF para 17, a core planning principle is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided it is not of high environmental value. Land to the rear of Midhurst Road, Benton is not of high environmental value and its reuse should therefore be encouraged. An objection is therefore lodged that land to the rear of Midhurst Road, Benton (SHLAA ref 298) should be allocated and developed in preference to the greenfield sites listed in S7.3. Greenfield sites are currently projected to contribute a significant number of dwellings to the supply including land at Annitsford Farm, 400 dwellings (policy ref 3), Killingworth Moor, 2000 dwellings (policy ref 22 "" 26) and land at Murton, 3000 dwellings (policy ref 35 "" 41). This approach of allocating and developing greenfield sites before brown is not consistent with national policy and is not sound. It is therefore	Site 14	S 7.3 Distribution of Potential Housing Development Sites	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2(now S1.4) and S7.1 (now S4.1) and through this suggested allocation. Given that the majority of the site was until very recently used for railway sidings the brownfield context is acknowledged. This site has been assessed through the SHLAA (Site 298) and was included as a potential development site in the 2013 of the plan. However, following further assessment through the Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space. This is due to site constraints, principally the lack of suitable access to the site. As a result the site will not be selected as preferred residential allocation. Following designation as open space through the Local Plan, any proposal for alternative use of the site, including for residential development, would be assessed on individual merit in light of relevant policies. In this context, in addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are	No amendments proposed.

							This includes schemes to deliver improvements on the A191 corridor and accessibility to/from Cobalt Business Park and working with Nexus and public transport providers in order to identify need for new services and public transport links.	
442914	Big Tree Planning Ltd	PLANNING CONSULTANCY	LP20151518	SHLAA Site: 305 The decision to pursue Growth Option B as stated at Paragraph 7.15 of the Plan is supported, as this is considered to be the most positive of the realistically achievable of the Growth Options. The previous consultation indicated that housing requirement could be reduced to between 10,500 and 12,000, which would have resulted in a strategy of restricted growth. Policy S7.3 states that the outstanding gross housing target for North Tyneside within this Plan's period is 10,189 dwellings. The potential housing development sites listed within this Policy have a combined indicated capacity of 8,806 dwellings, which leaves a shortfall to the outstanding gross housing target of 1,383 dwellings. Approximately 3,000 dwellings within the indicated capacity are proposed to be located on a Strategic Allocation site at Murton. However, the Murton site is well known, having been considered by various developers for many years but never brought forward due to insurmountable ground condition issues. It is therefore not considered that this strategic allocation can be	Site 305	S 7.3 Distribution of Potential Housing Development Sites	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032, including the sites specifically highlighted in this representation. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now DM4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 305). A Review has been undertaken to support the Local Plan, this concludes that there are currently no exceptional circumstances evident to	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>delivered. The indicated capacity of all remaining sites identified within Policy S7.3 therefore totals approximately 5,806 dwellings; a shortfall to the Plan's outstanding gross housing target of approximately 4,383 dwellings. The Plan indicates at Paragraph 7.42 that some windfall development could help to meet any shortfall but the amount is not quantified, although the graph of North Tyneside's housing trajectory located at Paragraph 7.36 of the Plan shows approximately 1,500 dwellings across the plan period through windfall delivery. Whilst this figure is somewhat arbitrary, it is broadly appropriate given the level of previous years' completions on windfall sites as shown within the SHLAA. The same graph indicates that even with housing numbers on the undevelopable Murton Strategic Allocation being included, the Plan's yearly housing completion target will not be met until at least 2023/24. In summary, the Plan in its current form does not allocate sufficient deliverable sites to meet the Plan's target of 16,632 new dwellings between 2011 and 2032. As such, additional sites need to be identified and allocated through the Plan in order for it to be considered sound and to meet objectively assessed needs. Practically all land within the existing urban area is proposed within the Plan to be developed with the exception of</p>			<p>require the release of Green Belt land for development. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the retention of much-needed areas of open space; the loss of which would have a significant detrimental impact on the quality of life of residents throughout the Borough. As practically all developable land outside the existing urban area is designated as Green Belt it is evident that some Green Belt releases are unavoidable if the Council are to meet the objectively assessed housing need. Whilst the NPPF stresses the great importance of Green Belts as a means of preventing urban sprawl by keeping land permanently open, the overarching presumption in favour of sustainable development requires local plans to meet objectively assessed needs. The NPPF allows for Green Belt boundaries to be altered "in exceptional circumstances" as part of the preparation or review of a local plan, with the focus on promoting sustainable patterns of development. It requires consideration of the consequences of channelling development towards non-Green Belt locations, and also allows land to be excluded from the Green Belt which is unnecessary to be kept permanently open. As discussed above, there is not sufficient land available outside of the Green Belt in North Tyneside to meet the Council's objectively assessed housing need. If existing Green Belt boundaries are to remain unaltered</p>

				<p>the only option is for the adjoining authorities of Northumberland County Council and Newcastle City Council to accommodate the undersupply. However, Newcastle City Council has just adopted its new local plan, and Northumberland County Council is at a similar stage to North Tyneside. What's more, both adjoining authorities are relying on significant Green Belt releases in order to accommodate their own objectively assessed housing need. As such, the displacement of North Tyneside's housing requirement to its neighbouring authorities is no more preferable in terms of Green Belt policy. In addition, it is not considered that channelling development to locations outside of North Tyneside would represent a significantly more sustainable option. The Government has made abundantly clear, both in the NPPF and in Ministerial statements; the urgent need to boost significantly the supply of housing and, as far as is consistent with other policies, to meet fully the needs of the relevant housing market area. Set against this is the great importance attached to preserving North Tyneside's Green Belt. Inspectors appointed to examine other local plans, such as the Reigate and Banstead Core Strategy Local Plan and the County Durham Plan, have indicated that the exceptional</p>

				<p>circumstances required to justify Green Belt releases through the plan-making process only exist if there is an overriding need for development to achieve the strategic objectives and policies of the plan, and either (i) all possible options for development outside the Green Belt have been exhausted, or (ii) the development would represent a significantly more sustainable option than development on non- Green Belt land. In addition, Inspectors have indicated that there should be either no conflict with the purposes and integrity of the Green Belt or, at worst, limited conflict. As explained above, the overriding need for housing is required to achieve the strategic objectives of the Plan and all possible options for development outside the Green Belt have been exhausted. As such, some strategic Green Belt releases will be required in order for the Council to meet their strategic objectives. Potential Green Belt release sites should be considered individually to determine whether there would be any conflict with the purposes and integrity of the Green Belt. The development of the Site east of Kirklands, Burradon would not lead to the unrestricted sprawl of large built-up areas or neighbouring towns merging into one another; and it would not result in significant encroachment into the countryside. It would have no</p>

				<p>impact on any historic town, and as mentioned above there is not sufficient derelict and other urban land available within the Borough. As such, if it were developed, there would be no conflict with the purposes and integrity of the Green Belt. The Site could accommodate approximately 500 dwellings, and it would be proposed to maintain a large area of open space towards the centre of the Site, where there is an existing pond. A view of the proposed alteration to the Policies Map is attached to this letter, which shows the Site as a Preferred Housing Development Site as well as the creation of a large triangular area of green or open space at the Site's centre. There is a legal agreement in place between North Tyneside Council and Mrs Jean Burke which stipulates that the Council's land would be developed and used to provide access thus generating a very significant capital receipt for the Council A full Transport Assessment carried out by Fairhurst has shown that a suitable access can be achieved from the existing roundabout to the south of the Site without the need for any other 3rd party land.</p>

				are other small pockets that have not been revealed?		Development Sites	exercise, as smaller sites would not be identifiable at this scale. However, it is very important to note that, all sites with planning permission, and every dwelling these correspond to, are included in the figures which determine the amount of land which needs to be allocated for development. <b>Table 8, Row C)</b> identifies a total of 4,810 units with planning permission (or minded to grant) at 31 December 2014, a total which includes every site with planning consent, including those of less than 10 units. From this a residual total for allocation is calculated. Therefore no potential delivery from outstanding planning permissions has been missed or ignored.	reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.
424278	SITA Up	LANDOWNER / BUSINESS	LP20151549	There are a number of points within the waste management section of chapter 10 of the Local Plan on which we would like to provide comment as detailed below, but SITA UK also own a site on the Benton Square Industrial Estate designated for waste uses which has remained vacant for two years now. In light of encroaching housing developments and allocations, together with the inability to make this site work as a viable waste/recycling facility, SITA UK have also provided comments here on policy S7.3 and propose the reallocation of the site for mixed use/housing. Section 7 "" Housing Policy S7.3 Distribution of Potential Housing Development Sites Preferred site number 136, Unit 1&2	New site	S 7.3 Distribution of Potential Housing Development Sites	This site is included for assessment in the SHLAA (part of Site 497a). However, it is considered that the site is currently unsuitable for housing development, reflecting locational factors and site constraints, therefore it has not been considered as a potential housing allocation through the Local Plan process. On consideration of a range of evidence, expert advice and comments received through the consultation process, it has been determined that it would be best to be retain as employment land (NT010), meeting the economic growth and development needs of the borough over the plan period. Additionally, it is considered that despite the existing facility being vacant, this site is covered by Policy DM10.12 (now DM7.8)	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Wesley Way, Killingworth, is identified in Policy S7.3 for potentially 65 homes, yet this site is directly adjacent to a site designated for waste use; SITA UK's Benton Square waste recycling site on Wesley Way. This is in direct conflict with policy DM10.12 which seeks to protect land around established waste facilities as identified on the Policies Map. SITA UK's Benton Square site is currently on the market and has been vacant for two years after a number of different attempts (both by landowners SITA UK and by their tenants) to set up a viable recycling business on the site have failed. The 0.9 hectare waste site is significantly constrained by overhead power lines crossing the eastern half of the site and by the relatively recent 'Forest Gate' housing development overlooking the western half of the site from the north side of the Metro line. SITA UK strongly support policy DM10.12 but propose that the waste allocation for the Benton Square site be removed in favour of a designation for mixed use to match the designation of adjacent Units 1&amp;2. Such a designation would fit more comfortably with the increasingly residential surroundings than the current waste use designation. The western half of the waste site could contribute an estimated 20-30 homes on brownfield land to the housing land provision, neatly completing a block of</p>			<p>which aims to protect such facilities unless it can be demonstrated that there is no longer evidence of need.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>housing land rather than causing conflict in the Plan with a continuing waste designation. Public transport links are good, with Palmersville Metro station close by, and designation of SITA UK's currently vacant site could improve the viability of the mixed use designation for neighbouring Units 1&amp;2. It is noted that Units 1&amp;2 is identified as deliverable for housing in the 6-10 year window, whereas SITA UK's adjacent site is currently vacant and could reasonably be developed within 5 years. There are three points of access from SITA UK's site onto Wesley Way, although the central one has been blocked off with fencing due to layout of previous operations on site. These access points could be used to provide a residential street through the site, with housing at the western end and a buffer of green space or business use at the eastern end where the overhead lines cross the site. A Sustainability Appraisal has been prepared for SITA UK's Benton Square site based upon the methodology used by the Council and the assessment for the adjacent units; a copy is attached together with a site location plan. A formal pre-application request is also being submitted to establish the Planning Authority's view on the proposed use of the site for housing/mixed use. SITA UK consider that the re-designation of the currently</p>

							transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This includes schemes to deliver improvements on the A191 corridor and accessibility to/from Cobalt Business Park and working with Nexus and public transport providers in order to identify need for new services and public transport links.	
473231		LANDOWNER / BUSINESS	LP20151589	<p>Policy S7.3 states that the outstanding gross housing target for North Tyneside within this Plan's period is 10,189 dwellings. The potential housing development sites listed within this Policy have a combined indicated capacity of 8,806 dwellings, which leaves a shortfall to the outstanding gross housing target of 1,383 dwellings. Approximately 3,000 dwellings within the indicated capacity are proposed to be located on a Strategic Allocation site at Murton. However, the Murton site is well known, having been considered by various developers for many years but never brought forward due to insurmountable ground condition issues. It is therefore not considered that this strategic allocation can be delivered. The indicated capacity of all remaining sites identified within Policy S7.3 therefore totals approximately 5,806 dwellings; a shortfall to the Plan's outstanding gross housing target of approximately 4,383 dwellings. The Plan indicates at Paragraph 7.42 that some windfall development could help</p>	New site	S 7.3 Distribution of Potential Housing Development Sites	<p>The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032, including the sites specifically highlighted in this representation. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now DM4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. This land is included in the SHLAA (Site 306) but has been assessed as unsuitable for residential development and therefore undevelopable. This conclusion is due to the</p>	Amendment to be made to Policy AS1.9 to reflect Local Green Space designation for Killingworth Open Break.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>to meet any shortfall but the amount is not quantified, although the graph of North Tyneside's housing trajectory located at Paragraph 7.36 of the Plan shows approximately 1,500 dwellings across the plan period through windfall delivery. Whilst this figure is somewhat arbitrary, it is broadly appropriate given the level of previous years' completions on windfall sites as shown within the SHLAA. The same graph indicates that even with housing numbers on the undevelopable Murton Strategic Allocation being included, the Plan's yearly housing completion target will not be met until at least 2023/24. In summary, the Plan in its current form does not allocate sufficient deliverable sites to meet the Plan's target of 16,632 new dwellings between 2011 and 2032. As such, additional sites need to be identified and allocated through the Plan in order for it to be considered sound and to meet objectively assessed needs. It is proposed that the Site east of B1317 Killingworth Road, Killingworth Village be allocated to assist in the identified shortfall of allocated deliverable sites. At present, the Site forms part of the Killingworth Open Break, but a local plan review is considered an appropriate time to amend the boundaries of such local designations. Recently, planning permission (ref: 14/00730/FUL) on land to the east of</p>			<p>site being within Killingworth Open Break, with it considered that development would harm the fundamental character of Killingworth Village Conservation Area. This is set out in current adopted UDP policy and now incorporated into revised Policy S3.5 (now S1.9 Local Green Space) in the Local Plan. Therefore, this site has not been considered for residential allocation. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This includes proposals for a strategic settlement buffer, the exact location for which is yet to be finalised, to prevent merging of existing communities and retain individual character and identity.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the Site was granted for the provision of 125 dwellings. This site is shown on the 2015 Policies Map as a Large Site with Planning Permission, with an Indicative Strategic Settlement Buffer directly to the south. If a straight line is drawn between the southern boundary of that site with planning permission and the extent of existing residential development of Killingworth Village to the west of the Site, a logical extension is formed and this is the extent of the Site proposed for allocation within the Plan. This would allow land to the south to remain as open break, and it is suggested that the Indicative Strategic Settlement Buffer be extended west to Killingworth Road. A view of the proposed alteration to the Policies Map is attached to this letter, which shows the Site as a Preferred Housing Development Site; the Indicative Strategic Settlement Buffer extended to Killingworth Road; and the Killingworth Open Break realigned to facilitate this.</p>

				<p>also to provide flexibility within the plan. NWL's site at Moorhouses Reservoir, Billy Mill, North Shields (ref 42) is identified as a brownfield site with potential to accommodate 50 homes. NWL strongly support the identification of this site for residential development and request that it is taken forward as a residential allocation in the Local Plan. NWL support the allocation of the whole site for residential development on the Proposals Map however NWL consider that based on a density of 30 dwellings per hectare, the site could accommodate around 96 dwellings, almost double the suggested potential yield of the site within the policy. NWL would therefore request that the yield of the site is increased to 96 dwellings to ensure the policy more accurately reflects the site's potential and can assist in meeting the housing shortfall.</p> <p>, As outlined above, Moorhouses Reservoir is located on partially brownfield land, in close proximity to a range of local services. Whilst the remainder of the site is currently Open Space, we note that the Open Space designation (policy R2 of the North Tyneside UDP) has not been carried forward in the Local Plan and instead the whole site is now proposed to be allocated in the Proposals Map and Policy S7.3 for housing. NWL support this approach and consider that,</p>			<p>overall requirement. Further detailed analysis is available in the SHLAA. The role that redevelopment could play in improving image and addressing issues of anti-social behaviour is acknowledged.</p>

898777			LP20151676	<p>Policy S7.2 identifies a housing requirement of 16,632 net additional dwellings over the Plan Period or 792 dwellings per annum. Whilst this represents an uplift from the now revoked RSS requirement, which is welcomed, it actually represents a decrease upon the previous consultation which identified a requirement of 16,272 dwellings between 2013 and 2030 or 957 per annum. It is considered that, in order to ensure conformity with the NPPF in terms of seeking to boost significantly the supply of housing, this requirement should be expressed as a minimum. Notwithstanding the above, it is also the view that the overall housing requirement is set too low within the Consultation Local Plan. Following the publication of the 2014 SHMA the 2012 based Sub-National Household Projections (SNHP) were released. The NPPG advised that these represent the most up to date estimate of future household growth and, therefore, should be used as a starting point for determining growth itself. However,</p>	Site 102	S 7.3 Distribution of Potential Housing Development Sites	<p>The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032, including the sites specifically highlighted in this representation. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5. Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region.</p> <p>Site 102 is included for assessment in the SHLAA (Site 059) and has been considered as a potential housing allocation through the Local Plan process. However, on</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>whilst the 2012 based SNHP are a starting point it needs to be acknowledged that these have been influenced by a period of recession and lower household growth as a result. In light of this it could be the case that the current household projections suppress the actual future rate of household growth. The 2012 SNHP should, therefore, be considered as an absolute minimum starting point with an uplift, in particular, required to meet the economic aspirations highlighted in Section 5 of the Local Plan. In this regard, paragraph 5.22 of the plan identifies, through the application of Employment Growth Scenario "Medium", the creation of at least 707 additional jobs per annum. Despite this, the proposed housing requirement only provides for 654 jobs per annum. This equates to 53 jobs per annum, or 1,113 over the period of the housing requirement. It is, therefore, recommended that the Council address this anomaly by providing an appropriate uplift in the housing requirement. It is also considered that the housing land requirement should also account for the potential non-delivery or under-delivery of existing permission/commitments. Policy S7.3 details proposed allocations to provide sufficient capacity for 8,806 dwellings. This is 1,383 dwellings short of the proposed housing requirement, once</p>			<p>consideration of a range of evidence, expert advice and comments received through the consultation process, it has been determined that it would be best to be retain as employment land, meeting the economic growth and development needs of the borough over the plan period. It is acknowledged that a range of additional work is being undertaken to provide further evidence of suitability for residential allocation. The Council encourages the landowner and agent to continue to engage positively through the consultation process.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>planning permissions and completions are removed. It would seem that the shortfall is intended to be made good through windfall developments. However, even if the rate of windfalls indicated within the 2014/15 SHLAA were to continue to come forward this would only provide capacity for 810 dwellings, still 573 units short of the housing requirement. In order to address this deficiency a further quantum of housing should be allocated to provide flexibility required within the Plan for both non-delivery and under-delivery of sites. In addition, the North Tyneside Strategic Housing Land Availability Assessment (2014) also considered the Swales Industrial Estate as a potential housing site. This considered that the site was suitable and viable, but not presently available due to multiple ownerships across the site. Policy S5.2 of the Local Plan Consultation, therefore, seeks to retain the Swales Industrial Estate for employment use. Conclusion In light of the above, and for the following principal reasons, it is considered that Swales Industrial Estate should be allocated for housing within the emerging North Tyneside Local Plan:</p> <ul style="list-style-type: none"> <li>&gt;The ELR has confirmed that there is more than sufficient identified employment land to meet forecast demands;</li> <li>&gt;The ELR identifies a negative requirement for industrial</li> </ul>

899297			LP20151707	<p>Northumberland Wildlife Trust would seek clarification on why some sites with current planning permission have not been highlighted in the Policies Map. Many of these sites were not allocated through the previous UDP and would be likely to contribute significantly towards the land allocation for new housing developments. Not including these on the map can mislead the reader into thinking these sites are not going to be developed. I note the alteration to the map in this respect, however it is not clear from the map if these areas (now with planning permission) contribute towards the overall housing number aims? . I have serious concerns over the allocation of land for new housing on land that has already been targeted for off-site mitigation for existing developments such as Station Road mitigation land at Murton. I also note that local councillors have also included this land in claims about flood relief, which I understood to be separate from any planning obligations at Station Road. Mitigation and compensatory land for biodiversity should not be developed. This will not contribute towards biodiversity net gain, nor does it plan positively for the "protection... of networks of biodiversity and green infrastructure" (paragraph 114 of NNPF). It is therefore vital that the LPA includes a</p>	General	S 7.3 Distribution of Potential Housing Development Sites	<p>For the sake of clarity, only outstanding planning permissions of 10 dwellings and above are shown on the map of suggested sites to accompany the consultation exercise, as smaller sites would not be identifiable at this scale. However, it is very important to note that, all sites with planning permission, and every dwelling these correspond to, are included in the figures which determine the amount of land which needs to be allocated for development. Table 8, Row C) identifies a total of 4,810 units with planning permission (or minded to grant) at 31 December 2014, a total which includes every site with planning consent, including those of less than 10 units. From this a residual total for allocation is calculated. Therefore no potential delivery from outstanding planning permissions has been missed or ignored.</p> <p>Work is currently being undertaken as part of the Masterplan process in order to determine the most suitable location for providing land for ecological compensation relating to development at Station Road East, Wallsend (12/02025/FUL). A number of options are currently being explored, taking into account expert advice, to identify the most appropriate land to mitigate loss resulting from this permitted housing site.</p> <p>A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a</p>	<p>The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>policy that states that land used for mitigation for losses and adverse impacts on biodiversity should remain un-developed in perpetuity. . Furthermore, I do not consider the wildlife corridor allocations to be either functional or accurate to what is on the ground. These appear to be very loose links between small areas of green land (a lot of which is either currently allocated for development or is allocated in this new Local Plan) that do not form any coherent tangible wildlife link across the borough. For these wildlife corridors to have any functionality or be defensible in a planning inquiry they should be realistic and enforceable. Therefore at present the wildlife corridors do not meet NPPF requirement (paragraph 109) to establish "coherent ecological networks that are more resilient to current and future pressures" . The LPA should plan positively for biodiversity and produce a targeted, strategic plan for areas that would be suitable for off-site mitigation. This plan should produce a series of linked areas that would be suitable and produce a net gain for biodiversity across the borough to meet the requirements of NPPF. Again we make reference to paragraph 114 of NPPF that requires LPAs to "set out a strategic approach in their Local Plans, planning positively for the creation,</p>			<p>coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. The Masterplan process will take account of the precise details relating to flood risk and any ongoing works. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.</p>

				conjunction with the LPA, have been doing works along this burn to restore it (as it is failing Water Framework Directive requirements) and to help mitigate flood risks along the burn catchment. Allocating development in this site would not only jeopardise the works already carried out but could also add to flood risk and the adverse impacts that are causing the burn to fail against WFD.			through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised. Proposals for development will take account of the precise details relating to flood risk and ongoing improvement works to the Seaton Burn. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.	
899297			LP20151709	Site 4: Objection This site along with the allocation of site 109 will effectively cause the isolation of Gosforth Park SSSI and Local Wildlife Sites. Not only could this adversely impact upon a statutorily protected site (contrary to paragraph 118 of NPPF) but this would also have significant adverse effects upon the Wildlife Corridor, as such not meeting the requirements of paragraph 114 of NPPF to plan positively for the creation, protection and enhancement of networks of biodiversity. This site has approved planning permission on it.	Site 4	S 7.3 Distribution of Potential Housing Development Sites	Site 4 is included for assessment in the SHLAA (Site 333) and has been considered as a potential allocation for development through the Local Plan process. However, on consideration of a range of evidence, expert advice and comments received through the consultation process, it has been determined that it would be best to be retained as safeguarded land, potentially meeting the development needs of the borough post-2032.  In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
899297			LP20151710	Site 5 Objection This site is situated within a wildlife corridor. Development in a wildlife corridor renders the objectives of a wildlife corridor untenable.	Site 5	S 7.3 Distribution of Potential Housing Development Sites	In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. Partial coverage by a wildlife corridor does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	A policy has been added to the Local Plan to address development issues within identified Wildlife Corridors.
899297			LP20151711	Site 9, now Site E008, Objection It is recognised that this site would be strategically placed for employment, we would have considerable concerns over any residential development in this area and its potential impacts (from increased footfall, pollution, runoff, changes to water levels and domestic pets etc.) due to its close proximity to Gosforth Park SSSI. Indeed I note a speculative submission has arisen due to this allocation. At present this land has ecological value from the scrub and rough grasslands that have established and that the site could have potential for ecologically sensitive flood mitigation should it be allocated	Site 9, now Site E008,	S 7.3 Distribution of Potential Housing Development Sites	This site is allocated as employment land through the current UDP and it is proposed that this designation is retained in the Local Plan (NT055). In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors. A location which is adjacent to Gosforth Park Nature Reserve (SSSI) does not automatically render development completely inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. Further work is necessary, taking into account expert advice, to identify the scale and scope of	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				for development. I would, therefore, suggest that if the LPA were to produce a strategic biodiversity mitigation/compensation plan, that this site be included in it.			development which would be appropriate. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	
899297			LP20151712	Site 11 now Site E010: Objection The development on land allocated as an SLCI would be contrary to paragraph 110 to minimise€ ;adverse effects on the local and natural environment or paragraph 114 plan positively for the creation, protection and enhancement of networks of biodiversity. I also note that this area is of semi-improved neutral grassland (potentially mitigation for an earlier residential development). This habitat is a Local BAP priority and to develop is would be contrary to policy S/8.4 in the Local Plan and to paragraph 117 of NPPF to "promote the preservation€ ; of priority habitats€".	Site 11 now Site E010	S 7.3 Distribution of Potential Housing Development Sites	This site is allocated as employment land through the current UDP and it is proposed that this designation is retained in the Local Plan (NT031). In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors. Partial designation as a LWS does not automatically render development completely inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. A new policy is proposed designating an 'open break' which would cover the proposed safeguarded land to the south of West Moor and the northern section of Site 11 now Site E010 covering the SLCI. This proposal would reflect the significance of this open space to the character of West Moor and protection of biodiversity value. The Council biodiversity officer has recommended an adequate buffer for the SLCI.	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.
899297			LP20151713	Site 17: Objection This is not a suitable allocation as this area, alongside site 18 (now subject to approved planning	Site 17	S 7.3 Distribution of Potential	In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining	A Wildlife corridor policy has been added into the Local Plan.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				permission) provide important habitat and buffer to the Rising Sun Country Park, as well as wildlife links. The site also includes mature hedgerows that also provide wildlife links across the area. Again the wildlife corridor runs through this site.		Housing Development Sites	suitability. Close proximity to the Rising Sun CP and partial coverage by a wildlife corridor does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	
899297			LP20151714	Sites 22-26: Objection There are considerable concerns over the impacts of development on these sites on the water quality and flooding of the Briardene. Like the Seaton Burn this watercourse was considered failing by the Environment Agency and the Northumberland Wildlife Trust, in conjunction with the LPA, have been carrying out works to mitigate for flood risks and water quality. To develop here could result in increased flood risk and a decrease in water quality. IN addition, there appears to be areas of semi-improved grassland which may fall under the priority habitats of the Local BAP for neutral grasslands. Development of these would be contrary to paragraph 117 of NPPF to	Site 22 to 26	S 7.3 Distribution of Potential Housing Development Sites	In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. Partial coverage by a wildlife corridor does not automatically render development inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				"promote the preservation of or priority habitats. Additionally, wildlife corridors run through these sites. Without properly defined wildlife corridor boundaries ad hoc development will have significant impacts upon biodiversity and wildlife corridors, therefore not adhering to paragraph 114 of NPPF.			Proposals for development will take account of the precise details relating to flood risk and ongoing improvement works to the Briardene. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.	
899297			LP20151715	Site 29 : Objection This site has been subject to a planning application and as the was refused, it is unclear why this is still included in the Local Plan. This site supports a Local Wildlife Site. To develop this site would be contrary to paragraph 110 of NPPF to "minimise" adverse effects on the local and natural environment, to paragraph 114 to "plan positively for the creation, protection and enhancement of networks of biodiversity and to paragraph 117 of NPPF to "promote the preservation of or priority habitats as this site supports neutral/basic semi-improved/unimproved grassland, a BAP habitat. It would also be in contradiction to the Local Plan policy S/8.4c to conserve and enhance Local Sites.	Site 29	S 7.3 Distribution of Potential Housing Development Sites	The application in question (12/00637/FUL) was refused in May 2015, after the LPCD 2015 was finalised and, indeed, after the close of the consultation exercise. In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors. Partial designation as a LWS does not automatically render development completely inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is apparent that there are still significant obstacles to delivery. However the scheme submitted at the time was deemed acceptable by North Tyneside's biodiversity officer. It is considered that a 65 units scheme, as part of a mixed-use allocation, is still possible for this wider site but deliverability in the short-term is questionable. The importance of the need	No amendments proposed.

899297			LP20151717	<p>Sites 35-41 : Objection The Northumberland Wildlife Trust has identified a number of concerns over the allocation of these sites (35-41). Firstly, a large proportion of this area has been offered as is a compensation site for permanent ecological losses from another housing development. To develop it would therefore render the ecological compensation of this previous application untenable. This area should, therefore, not be included in the development allocations. Secondly, parts of this site are being considered by the North Tyneside, Northumbrian Water and the Environment Agency to mitigate for flood risks across the borough. Not only would development here mean this needed flood mitigation would not be carried out, but it would also add to flood risk and water quality reductions. Thirdly, it is very unclear why this area is has not been allocated as a Wildlife Corridor, as it is at present functioning as one, being some of the only open and connected green space in this area (unlike parts of the Wildlife Corridor to the east; note that NPPF states that Wildlife Corridors are "areas of habitat connecting wildlife populations" and therefore it would seem logical to allocate those areas where there is a green link as a Wildlife Corridor.). NPPF requires LPAs paragraph 117 to "identify and map components of the</p>	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	<p>A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. Work is currently being undertaken as part of the Masterplan process in order to determine the most suitable location for providing land for ecological compensation relating to development at Station Road East, Wallsend (12/02025/FUL). A number of options are currently being explored, taking into account expert advice, to identify the most appropriate land to mitigate loss resulting from this permitted housing site. The Masterplan process will take account of the precise details relating to flood risk and any ongoing works. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site. In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. Wildlife corridor designation does not automatically render development inappropriate. 				policy AS/8.9 for encouraging "improvements to the area for wildlife and recreation". A significant boundary revision would be sort for this site.			policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	
899297			LP20151720	Site 109 : Objection This site along with the allocation of site 4 will effectively cause the isolation of Gosforth Park SSSI and Local Wildlife Sites. Not only could this adversely impact upon a statutorily protected site (contrary to paragraph 118 of NPPF) but this would also have significant adverse effects upon the Wildlife Corridor, as such not meeting the requirements of paragraph 114 of NPPF to plan positively for the creation, protection and enhancement of networks of biodiversity. Furthermore, this site is within the Wildlife Corridor and development within this would be adverse to the aims of the designation. This site has also been noted by the Northumberland Wildlife Trust to have developed habitats suitable for ground nesting birds (including farmland birds; BAP priority species) and wading birds. The loss of this could impact upon the aims of the Local BAP. From local press coverage, the development of this site appears to be going ahead. Outline plans for the area "" Indigo Business Park, do not include the most eastern	Site 109	S 7.3 Distribution of Potential Housing Development Sites	This site is allocated as employment land through the current UDP and it is proposed that this designation is retained in the Local Plan (NT058). In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors. A location which is adjacent to Gosforth Park Nature Reserve (SSSI) and an LWS and also see partial coverage by a wildlife corridor does not automatically render development completely inappropriate. At this stage, the Local Plan does not specifically outline the precise area of the site which would be subject to development, rather simply outlining the overall boundary of the allocation. As a result, careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. Further work is necessary, taking into account expert advice, to identify the scale and scope of development which would be appropriate. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				end despite assurances that that this area would remain open as a wildlife corridor to link Gosforth Park SSSI to Weetslade Country Park. This does not appear to be the case from the Local Plan, as the entire area is allocated. It is very difficult to see how the plans, in their current form, allow for any wildlife movement in and out of a nationally designated site and into the wider area, including Weetslade Country Park. Furthermore, as with many of the site allocations a wildlife corridor has been allocated across this area, but again there is no actual provision for this on the ground and such an allocation therefore appears untenable.			and creation of new networks will continue to be explored and prioritised.	
899297			LP20151721	Site 139 : Objection This site is situated within a wildlife corridor. Development in a wildlife corridor renders the objectives of a wildlife corridor untenable. 							continue to be explored and prioritised.	
755686	Home Builders Federation		LP20151732	S7.3 Distribution of Potential Housing Development Sites 41. Whilst the HBF does not wish to comment upon the acceptability, or otherwise, of individual sites it is important that the sites are deliverable and there is in-built flexibility to provide for any under delivery from allocations. According to the table within policy S7.3 the overall proposed allocations provide sufficient capacity for 8,806 dwellings. This is 1,383 dwellings short of the proposed housing requirement, once planning permissions and completions are removed. In common with our response to Table 8 (see above) we consider that the gap is actually greater due to the likelihood that some existing permissions are likely never to be implemented. 42. It would appear that the shortfall is intended to be made good through windfall developments. Whilst the NPPF, paragraph 48, enables local authorities to make an allowance for such sources of delivery this must be based upon robust and credible evidence that such sites will continue to provide a reliable supply. The 2014/15 SHLAA identifies at paragraph 8.50 that 356 windfalls came forward during the 5 year period from 2009 to 2014 at a rate of 45 per annum. Even if this rate of windfalls were to continue to come forward	Windfall	S 7.3 Distribution of Potential Housing Development Sites	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032, including the sites specifically highlighted in this representation. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now DM4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				over the remaining 18 years of the plan period this would only provide capacity for 810 dwellings, still 573 units short of the housing requirement. It is unclear how this gap is intended to be filled. 43. The HBF recommends that the Council consider increasing the overall amount of allocations provided by the plan not only to account for this potential shortfall but also to provide flexibility within the plan.				
396220	North Tyneside Council	COUNCILLOR	LP20151741	Sites 35 to 41 - Concerns Residents have contacted members of our Group to express their concerns about the proposals in the North Tyneside Local Plan: Consultation 2015. In particular 1. The areas shown for development should be spread more fairly across the Borough, rather than in large concentration, especially in the Murton area.	Distribution	S 7.3 Distribution of Potential Housing Development Sites	The Local Plan Spatial Strategy seeks to maximise development opportunities in the strategic areas of Wallsend, North Shields and the Coast, whilst seeking an overall distribution of remaining development needs across the urban area. The resulting distribution of suggested development sites, in Policy S7.3 (now S4.3), reflects this strategy and is followed by site-specific assessment, including consideration of the suitability and deliverability/developability of each site, to select the range of suggested allocations.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.
900234		RESIDENT	LP20151744	Site 71: Support housing on this site, removing a noisy use unsuitable next to residential areas. Access should be off both Hylton Street, the southern end of Henry Street, and potentially Waterville Terrace even if just pedestrian and cycle access down the bankside to Waterville primary school. (Years ago there was a scheme for road access to the Hylton Street Metro Maintenance Depot from Waterville Road.) Development of houses (not	Site 71	S 7.3 Distribution of Potential Housing Development Sites	Support for development noted. Nexus, as landowner, have confirmed that when this site is no longer needed for everyday operational requirements then this will be available for redevelopment. The timescales for this are likely to be short-term but do involve a process of finalising and securing an alternative location. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1) and through this suggested allocation.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				flats on this part of the site at least) should front both Hylton and Henry Streets, being of no more than 2 storeys on the eastern half of the site, be 'in keeping' (not just "respect" because the term get twisted by architects) the traditional terrace housing adjacent (at least on the eastern end of the site), and provide sufficient onsite parking to cater for their own needs, within curtilages. The site could do with a short planning brief, with input/consultation of local residents. See also comments on design policies.			The precise impact on the local highway network arising from each proposal will require assessment on a site-specific basis and appropriate improvements secured in order for development to be acceptable. Importantly this includes assessing the suitability of a range of potential options for site access and identifying the best means. The Local Plan includes a range of policies to deliver new development which is attractively designed, including Policy DM9.2 (now DM6.2).	
900234		RESIDENT	LP20151750	Site 64: Object to these being designated, promoted or anything else, for housing. These are sites which are suitable for main town centre uses, and are in such uses presently. Opportunities for new town centre uses/development, and for some of the retail predicted to be required in the plan period, are in short supply in North Shields. By contrast housing can fit in / go pretty much anywhere (conversions, new build etc). And Site 65 is only identified for 6 new homes, which is a waste of a site. These three sites are less close to nearby housing in practice than many others which adds to their suitability. The 'town centres first' approach in the plan is laudable, but to make it work there is a need for large-ish sites where town centre stuff can go. And as the Bingo Hall is a very	Site 64	S 7.3 Distribution of Potential Housing Development Sites	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). Therefore, the Council is keen to promote the reuse of brownfield land in town centres and the Local Plan looks to focus development within the main urban area. However, the need to deliver new homes is not looked at in isolation and Policy S6.1 (now S3.1) aims to pursue growth and regeneration of town centres by delivering new development, but only when this is appropriate and not detrimental to existing circumstances. This decision is also taken on consideration of the retail policies of the Plan, which identify future demand for, and criteria for the location of, additional retail provision across the borough. Whilst the current proposal is for housing, consideration will be given as to whether a	No amendments proposed.

				size of unit that para. 6.66 says is required. Certainly the current building on sites 61 and 60 are very bulky: so there is a great opportunity to be realised by replacing these with (far better designed) new 'bulky' retail or leisure buildings to provide the space and formats that modern operations prefer. Somewhat ironically, site 60 used to be the old NTC Planning Dept. office, now being proposed for just 5 houses. We can, and should, do better than that. Agree with comments for 61 and 62 about loss of car parking, and those comments are just from a traffic and transport viewpoint. Town vitality needs/considerations also mean parking shouldn't be lost, or it just drives people elsewhere.			One priority of Policy S6.1 (now S3.1) is to enhance accessibility by all modes of transport and any proposals which would result in the loss of existing car parking would have to be carefully considered through the planning process, including the resulting impact on existing shopping and community facilities.

804019	Owen Pugh Ltd	LANDOWNER / BUSINESS	LP20151766	Site 2: Background As you will be aware Fairhurst have previously made submissions on behalf of OP in response to NTC's Strategic Housing Land Availability Assessment (SHLAA) in October 2008, and subsequently in response to NTC's 5 Year Housing Land Supply Assessment in July 2012 and the 2014 SHLAA. The previous submissions related to the Owen Pugh site at Grieves Row in Dudley and a small triangular parcel of land to the south of the site which forms part of NTC's 5 Year Housing Land Supply. Fairhurst also made representation on behalf of OP in relation to the North Tyneside Local Plan Consultation in	Site 2	S 7.3 Distribution of Potential Housing Development Sites	Comments with regard to the future intentions for this site are noted. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1) and through this suggested allocation. As highlighted, it is acknowledged that the site could potentially deliver a higher yield than the 64 dwellings identified in LPCD 2015. The 2014 SHLAA does indicate a yield of 90 dwellings, based on the evidence provided by landowner and agent, something which was unfortunately not reflected in the Local Plan due to a lag in time between the respective publication dates. In the next the yield will be revised to 90, aligning with the SHLAA. The	Site yield revised to 90 dwellings in line with 2015 SHLAA

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>December 2013. In the most recent submission, in July 2012 and September 2014, Fairhurst provided an update on the forecasted delivery of the Grieves Row site and elaborated on previous supporting information by providing demonstration that the sustainable development of the sites could serve social, economic and environmental roles as required by the National Planning Policy Framework (NPPF). We have enclosed the previous representations from 2008, 2012, 2013 and 2014 as a background to this submission. North Tyneside Local Plan: Consultation 2015 In the recently published Consultation of the North Tyneside Local Plan, a number of sites are identified as "preferred locations for housing development' through the SHLAA 2014. The Grieves Row site is identified as "Map ref. 2: Grieves Row, Dudley' in the list in Chapter 7, section S7.3 of the Consultation . It is stated that the site is brownfield land and that it has the capacity to accommodate 64 dwellings. Having spoken directly with officers from NTC planning department we understand that the council have accepted that the site can deliver 90 dwellings in the SHLAA and that the site has been recognised as being "deliverable' in 0-5 years. In this regard, the SHLAA (January 2015) in "Appendix 3: 2014/2015 " Schedule of Deliverable</p>			<p>complimentary role that Site 140 can play, as part of a wider development, is accepted. The negative impact on residential amenity resulting from current operations, including from HGV traffic, is recognised and is reflected through the proposal to allocate this site for residential use, rather than employment land as in the UDP. The relationship with adjacent sites which are proposed to remain in employment/industrial uses will have to be carefully considered through site layout and design.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Sites' under site reference 95, identifies the site for the delivery of 90 units, with an estimated delivery strategy of 30 units within years 1 "" 5 and 60 units within years 5 "" 10. OP consider that a higher yield would deliver a mix of housing type to meet the needs of the area. Fairhurst consider that stating that the housing site could only deliver 64 units may prejudice decisions on future proposals. OP request that the potential housing yield figure is increased to allow more flexibility, so that development proposals can meet current housing needs in line with the 2014 SHLAA. Consequently, this allocation should actually read 90 dwellings in line with the above, based on the 2014 iteration of the SHLAA and previous representations made to the council as outlined above. The site area is approximately 3 hectares in size.</p> <p>""Map ref. site 140: the small triangular area to the south of Grieves Row, Dudley' is listed as the former Miners Welfare Centre, greenfield and able to accommodate 7 dwellings. Please note that this site, we consider, to be brownfield as this parcel of land was left undeveloped following the demolition and removal of the former miner welfare buildings. Update and Delivery of the site to Housing As previously outlined by Fairhurst in past representations, the Grieves Row site</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>is no longer suitable for employment use given the residential character of the area and the negative impact it has on residential amenity. Additionally, the existing transport infrastructure is no longer adequate to support employment use on site. The continuing emerging Local Plan is expected to provide a development framework for the sustainable growth and development of North Tyneside for the next fifteen years. To be found sound, the evidence base of the emerging Local Plan will need to be informed by up to date information regarding the availability of land from landowners. OP can confirm that, although the current use of the site is employment use, we expect to vacate the site, facilitating the development of housing on the site in the next 2 years. As identified in previous submissions, OP considers that the redevelopment of the site for housing would represent logical, sustainable development based on the following:</p> <p>"ç The redevelopment of the site will enable the company to relocate to suitable premises which meet their business requirements;" ç The site is no longer suitable for employment use given the residential character of the area and the negative impact it has on residential amenity;" ç The existing transport infrastructure is no longer adequate to support employment use</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>on site; "ç Housing development on the site represents sustainable development in accordance with the NPPF; "ç The site is brownfield land; The site can be readily integrated into the adjoining residential areas and is highly sustainable due to its close proximity to a wide range of services, as identified in previously submitted representations; "ç The suitability of the area for housing has been proven by other recent housing developments in the Dudley area; "ç Development of the site will present Dudley with a significant regeneration opportunity which will result in a benefit to the immediate surroundings and the local community through a sensitively designed residential development providing an increased housing choice in the locality; and "ç Redevelopment of the site would prioritise sustainable methods of transport including pedestrian movement, cycling and public transport. The delivery of the Grieves Row site has been delayed for the last six years due to market conditions during the recent recession, however, we can confirm that the site remains available and it is the company's intention to relocate the new headquarters for our business activities and main operations in the short-term i.e. within the next 2 years. We can also update and confirm that the relocation is required from the</p>

				<p>Grieves Row site in the very near future for operational purposes because the site is currently too small for the activities taking place on it and is therefore hindering the further growth and expansion of the company. In addition, the facilities on the site are now out of date and require continual expenditure for upgrading and maintenance to accommodate the business. This highlights that it is within our commercial interest to relocate from Grieves Row as soon as possible. In this regard, we are currently in the process of planning relocating from the Grieves Row site to an alternative site in our ownership and have undertaken discussions with the relevant planning authority to progress with the development of the alternative premises. Additionally, a further substantial site has more recently come to our attention which could house our headquarters and main operations within the group. These premises are of serious interest to the company and discussions are ongoing with the owners. Benefits of Alternative Uses There is also benefit to the local community to a timely redevelopment of the site as it is no longer considered to be an appropriate location for employment uses. Please see the previous representations to the to the 5 Year Housing Land Supply made in June 2012 (attached) which</p>

				<p>demonstrate that continued use of the site for employment is considered to be outdated. The surrounding area is now predominantly residential in nature with the residential estate of 'Meadow Bank' located to the east, 'Ford View' to the north east, 'Bamborough Court' to the south and McNulty Court to the south west. The prevailing winds in the area are westerly, with the consequent result that during dry and windy periods, dust from the site can blow towards the residential area of 'Meadow Bank'. In addition to the above, vehicle movements from the site have been known to cause disturbance to the local properties, and although both ourselves and S &amp; B Eps Ltd are operating in accordance with the relevant permissions and consents, the now residential character of the neighbourhood defines that both businesses hold records of complaints from the local community. The site has two accesses both taken from Grieves Row (the B1319) on the eastern boundary. We take access from a mini roundabout shared with the modern 'Meadow Bank' residential development to the east. S &amp; B Eps Ltd also takes access via Grieves Row, approximately 50 metres north of the mini roundabout. The S &amp; B Eps access is provided as a T junction from the existing road. The width of the road in</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>this location is not sufficient to allow an HGV to enter or exit the site in one manoeuvre, and the access is often the cause of congestion on Grieves Row during operational hours. Given the existing constraints and predominantly residential character of the area, the continued employment use of the site is considered to be outdated. Housing development on site could be designed to have significant amenity enhancements to the occupiers of dwellings on site, and also the existing residents of the surrounding neighbourhoods. It would bring about improvements in terms of noise, dust and traffic congestion. Conclusion In conclusion, we consider that current evidence demonstrates that the Grieves Row site is suitable, available and deliverable for housing development and that the redevelopment of the Grieves Row site is logical in planning and sustainability terms. We plan and anticipate relocating from the site in the short-term i.e. within the next 2 years to new headquarter premises which shall benefit the continued growth and expansion of the company. The ongoing allocation of the site for housing development would respond to the company's business needs and enable the regeneration of a brownfield site to deliver much needed housing in an accessible location. The</p>

				size of the site shall easily accommodate 90 dwelling on the Grieves Row site and 7 dwellings on the triangular parcel of land, that being the former Miners Welfare Centre.				
804019	Owen Pugh Ltd	LANDOWNER / BUSINESS	LP20151768	Site 140: the small triangular area to the south of Grieves Row, Dudley' is listed as the former Miners Welfare Centre, greenfield and able to accommodate 7 dwellings. Please note that this site, we consider, to be brownfield as this parcel of land was left undeveloped following the demolition and removal of the former miner welfare buildings.	Site 140	S 7.3 Distribution of Potential Housing Development Sites	Support for development noted. NPPF includes a definition of brownfield land (or PDL) and, following further consideration, that this site does meet this criteria. Site record to be amended in the Local Plan and the SHLAA.	Change to brownfield? (DH still to do this)
808917	BDW North East	LAND DEVELOPER	LP20151776	BDW support the new housing sites allocated but would like to see more sites allocated.	General	S 7.3 Distribution of Potential Housing Development Sites	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032, including the sites specifically highlighted in this representation. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now AS4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region.	
900308	Places for People		LP20151791	New site: (Comments with input from Urban Splash) We would question the exclusion of the Marine Gardens/Coquet Avenue site which is situated in a priority investment area.	Site 48	S 7.3 Distribution of Potential Housing Development Sites	This site is included in the Local Plan as a suggested site residential development for 41 dwellings. See Site 48 - Site at Coquet Avenue, Whitley Bay.	No amendments proposed.
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151798	Policy S7.3 identifies a wide range of preferred locations for housing development, and includes welcome reference to flood risk mitigation as a consideration in the selection of preferred sites from those identified in the SHLAA process. We would however suggest that critical infrastructure capacity should also form an explicit consideration within this policy. It is welcome to note a number of brownfield development opportunities within the sites identified in Policy S7.3, which present the potential for the removal of surface water from the combined sewerage system. The sustainable drainage of previously developed sites serves to increase available capacity in both the sewerage network and Howdon STW.	General	S 7.3 Distribution of Potential Housing Development Sites	Support for brownfield development and the role this could play in dealing with removal of surface water is noted. There are a range of Local Plan policies which relate to water management and flood risk and a newly introduced policy focused on water quality. Together this range of policies set out the Council's preferred approach. In addition to this, the IDP sets out any improvements necessary to water infrastructure in order to tackle both current and future constraints, including those already programmed. However, further consideration will be given as to whether there is need to amend Policy S7.3 (now S4.3) in light of comments. The Council will continue to work with NWL in order to deliver development over the plan period which is sustainable.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.
396253	Northumberland Estates	DEVELOPER	LP20151813	Site 28: This site is allocated as a preferred housing development site on the Local Plan Policies Map. The Northumberland Estates supports the identification of this site for housing, and following the granting of planning permission in January 2015	Site 28	S 7.3 Distribution of Potential Housing Development Sites	This site was granted planning permission in January 2015, after the publication of LPCD 2015. In the next of the Plan this will be identified as a 'large site with planning permission'.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				(14/01687/OUT), note that the Policies Map should reflect this by being designated a 'Large Site with Planning Permission', rather than an allocated housing site.				
396253	Northumberland Estates	DEVELOPER	LP20151814	Site 29: This site is allocated as a preferred mixed use site on the Local Plan Policies Map. The Northumberland Estates support the identification of this site for mixed use development including housing and employment land. The site is subject to an existing planning application (12/00637/FUL) for housing (67 dwellings) including road infrastructure, structural landscaping, gardens and public amenity space. This application is yet to be determined but is viewed as acceptable in principle, subject to meeting normal development control criteria. The Local Plan currently designates the site as a 'Local Wildlife Site'. It is considered that this designation is not supported by ecological evidence and will prevent development from being progressed. It is considered that there is an inconsistency within the Local Plan between allocating this site for mixed employment and residential use, as well as a Local Wildlife Site. The attached Ecology Survey submitted alongside these representations demonstrates that Backworth Business Park and Cottages has limited ecological value. Therefore it is	Site 29	S 7.3 Distribution of Potential Housing Development Sites	This site is proposed for mixed-use allocation, a reflection of the Council's desire to provide a strategy to help manage ongoing change, improving the area and working with businesses that wish to remain, in order to understand their requirements, in a proactive manner. Proposals would not simply be for residential redevelopment but could involve some housing supported by, and integrated with, employment uses. In this, the Council is aware of the needs and requirements of existing businesses and there is no proposal that existing landowners or users will be forced to vacate the site. The application in question (12/00637/FUL) was refused in May 2015 and it is apparent that there are still significant obstacles to delivery. These include the ecological site constraints and, principally, important issues relating to the operation of existing business which will need to be mitigated/overcome before development is acceptable. It is considered that a 65 units scheme, as part of a mixed-use allocation, is still possible for this wider site but deliverability in the short-term is questionable. In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors. Partial	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				considered that the Local Plan should remove the Local Wildlife Site designation in order to progress development at this site.			designation as a LWS does not automatically render development completely inappropriate. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield.	
396253	Northumberland Estates	DEVELOPER	LP20151815	Site 73: The Northumberland Estates supports the allocation of Site 73 for housing development, as identified on the Policies Map. Proposals for housing will be prepared and submitted to North Tyneside Council within the plan period.	Site 73	S 7.3 Distribution of Potential Housing Development Sites	Support for development noted. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1) and through this suggested allocation.	No amendments proposed.
396253	Northumberland Estates	DEVELOPER	LP20151816	Site 70: The Northumberland Estates support the allocation of Site 70 for housing development, as identified on the Policies Map. Proposals for housing have been prepared and submitted to North Tyneside Council and will be brought forward in the plan period.	Site 70	S 7.3 Distribution of Potential Housing Development Sites	Support for development noted. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1) and through this suggested allocation.	No amendments proposed.
396253	Northumberland Estates	DEVELOPER	LP20151817	Fenwick's Pit, East Holywell Village This site is not allocated in the Local Plan, but The Northumberland Estates consider it to be suitable for development. The site is located within the Green Belt, however it is previously developed land. Therefore, under the NPPF (paragraph 89) this site is able to be re-developed. It is considered that the Local Plan should recognise this as a potential development opportunity, and this should be reflected on the Policies Map.	New site	S 7.3 Distribution of Potential Housing Development Sites	This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 11 now Site E0102). The SHLAA currently concludes that this site is unsuitable for residential development. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.

396253	Northumberland Estates	DEVELOPER	LP20151818	Site 22 - 26: Sites 22 and 26 are in the ownership of The Northumberland Estates and comprise the land adjacent to the A19 of the Killingworth Moor allocated development site on the Local Plan Policies Map. The A19 Corridor is a key economic driver of regional significance to which future development needs stand to be directed. Both sites are proposed for residential and employment use as part of the wider Killingworth Moor development. Within Killingworth Moor, sites 22 and 26 are sustainably located in close proximity to local services and facilities, and readily accessible by public and private transport. These sites can achieve a sustainable future for North Tyneside, meeting the housing and employment needs of the local communities. The development of these sites also provides a significant opportunity to promote and enhance the natural environment, notably the proposed wildlife corridor marked on the Local Plan Policies Map. Significant work has already been undertaken into specific issues, including highway access, flooding and drainage, landscape and ecology. Further work will be undertaken in conjunction with other landowners of the Killingworth Moor site to produce a wider Masterplan for the site, and this will be prepared in discussion with North Tyneside	Site 22 to 26	S 7.3 Distribution of Potential Housing Development Sites	Support for development noted. As highlighted, a comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This is being undertaken with the direct involvement of all key stakeholders, including landowners and statutory bodies, including the consultee, and will build on the work carried out to date relating to highway access, flooding and drainage, landscape and ecology.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.

				<p>was reserved for a potential heavy rail link to the airport through track sharing with Nexus. NIA agreed with the local authority in 2014 that this land was no longer required for this purpose, the land then being considered as part of the Strategic Housing Land Availability Assessment. The land has not been allocated for housing within the SHLAA, being discounted for reasons of lack of assessment primarily in relation to transport and trees. The land was discounted prior to NIA being made aware of this, and NIA would welcome the opportunity to work with the authority to provide the required information to take a view on the acceptability of the scheme for housing, with a view to then having the land allocated, were this appropriate. This land has been allocated in this plan as green or open space. Again, NIA was not consulted on this allocation and considers it inappropriate for the following reasons: Considering its potential allocation as "'Open Space', the site has not previously been allocated for this use, and is not open to the public, being closed off via gates and closed board fencing. There is no access to the site to the public and NIA would not consider providing this facility to the local community for this site, having rejected previous requests by the local</p>		Development Sites	<p>potential heavy rail connection to Newcastle International Airport. However this was removed from LPCD 2015 following advice from NIA.</p> <p>The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032.</p> <p>Site 128 is included for assessment in the SHLAA (Site 339) and has been considered as a potential housing allocation through the Local Plan process. However, following further assessment through the Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space.</p> <p>NIA's view on the future role of the site is acknowledged. This current consultation exercise is the opportunity to submit further evidence and comment to help shape the decision-making process moving forward. It is acknowledged that a range of additional work is being undertaken to provide further evidence of suitability for residential allocation. The Council encourages the landowner to continue to engage positively through the consultation process. The range of residential allocations will be further refined for the Local Plan Publication, with the representations to the</p>

				<p>community to do so. Considering an allocation as "Green Space' the designation of Local Green Space is outlined within the National Planning Policy Framework and the accompanying Planning Practice Guidance. The guidance states that: The Local Green Space designation will not be appropriate for most green areas or open space. The designation should only be used: " where the green space is in reasonably close proximity to the community it serves; " where the green area is demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and " where the green area concerned is local in character and is not an extensive tract of land. The site does not meet any of the criteria outlined, with the following justification. " As outlined above, the land is not open to the public. As such it could not be considered to serve the community to any great extent and has no recreational value. " Up until recently the land was reserved for development of a heavy rail link it being located adjacent to both the metro, light rail and national rail line. The site is also subject to significant antisocial behaviour in the form of</p>			<p>current consultation and any further evidence being key in guiding these final decisions.</p>

				<p>flytipping, drug/alcohol abuse, arson etc, with people illegally entering the site for this activity. On this basis we do not consider that the site could be considered to be of great tranquillity. "ç The site whilst a former railway line, is not considered to be historically valuable or of any significance to the region or local community. " ç A tree survey carried out by a competent arborist considers that the trees on site are in large of poor quality, with only a small number within the site, of good quality. Whilst the trees offer some limited amenity value in terms of greenery, the site could not be considered to be "special', "significant' or of particular beauty above that of any existing well vegetated garden or landscaped boundary treatment. " ç The site has no wildlife designations, other than the plans proposal to run the wildlife corridor through it. NIA is not aware of any habitat surveys having been undertaken for the site and does not consider how the authority could be of the view currently that the site provides a richness of wildlife on the site. NIA would request that designation of the site as "Open or Green Space' should be removed from the plan. I would be happy to meet with the relevant offices to discuss this further.</p>

900513		RESIDENT	LP20151841	<p>Site 35 to 41: In 1987 North Tyneside Council appealed against Leech Homes to stop similar building in and around Murton. The Council gave such strong arguments that, at a public meeting in 1986, the Government Inspector J. Trevor Graham ruled on the Council's favour. Your arguments still pertain in the light of this new proposed development (please see your copy of the findings). Murton Village is unique. It is the only open space used by walkers, joggers, bike riders, horse riders. Frequenting by migrating birds etc. I strongly oppose this proposed urbanisation. Brownfield sites should be explored first.</p>	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	<p>Comment noted with regard to previous proposal for development. Even following allocation, a planning application(s) for the proposed strategic site will require approval before any development can commence. Such an application will be judged on merit through the development management process.</p> <p>The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.</p> <p>A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife</p>	<p>An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.</p>

No amendments proposed.
638268	Natural History Society of Northumbria		LP20151906	Having met with Council Officers in advance of this being published we are very disappointed to see that they have not acted upon some of the ideas discussed in respect to the presentation of site allocations. There are several sites where it will not be either possible or appropriate to develop the full extent of the areas shown. We believe that the full development of such sites would be contrary to planning policy. It would be preferable to show on the proposals maps that not the whole site would be developed. This would give reassurance to local residents and interest groups that special features would be saved, that meaningful wildlife corridors and open spaces would be retained and that any constraints such as flooding are	General	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver both of the proposed strategic sites at Murton and Killingworth Moor, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 4,500 homes, between the two sites, in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>avoided. This might then negate the need for objecting to some of the sites. It would also make it clearer to developers that it is anticipated that not the whole site would be developed, which should reduce the likelihood of inappropriate planning applications and planning appeals. There is a simple solution, which is to retain the site boundary line but to remove shading on part of the site where it is anticipated that development would not be appropriate. This could be indicative, for example there is an "Indicative Strategic Settlement Buffer". An alternative to this would be to use a different form of shading to indicate that not the whole site would be built upon. We have indicated below those sites where we feel that clearer shading (or removal of shading) is required. We also feel that the maps produced by the Council for consultation purposes are deliberately misleading by not shading out the two largest greenfield development sites (Sites 22-26 and 35-41) in a manner consistent with other sites. This gives the plan an overall "less developed" look. This is clearly intentional and designed to try and mislead the public. Any future maps should consistently represent all development sites.</p>			<p>and retain individual character and identity. At the time of consultation in early 2015 there was not sufficient information available as to how development might occur, and which parcels of land would be preferred for development. The ongoing masterplan process is to guide this and will inform the Local Plan Publication , allowing further detail to be made available to all stakeholders, giving chance for further comment and representation. The updated Policies Map will reflect the preferred options for development at both Murton and Killingworth Moor, with the Masterplans providing comprehensive detail.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				therefore the principle of housing development in this location is already firmly established. Whilst the finer details of the comprehensive master plan for the allocation will be refined in due course informed by the technical work still to be undertaken we support the principle and logic of a western access through the approved REME site to facilitate the development of the extension land and wider allocation beyond. The through road approved for the REME site has been designed to cater for additional capacity and to allow for bus penetration to serve the extension land and the wider land as required. Also the junction at the entrance to the REME site on West Lane can be upgraded to a roundabout to increase capacity. Delivery of the REME site and early delivery of the extension land would not prejudice the implementation of the wider allocation and indeed could assist in facilitating its development in accordance with criteria b) of Policy AS7.4.				
510094	Natural England	GOVERNMENT AGENCY	LP20151942	Natural England note that the potential housing development sites in Whitley Bay have been screened in for Appropriate Assessment (AA), however the potential for cumulative impacts as a result of recreational disturbance from housing beyond the Coastal Zone on Northumbria Coast SPA/Ramsar have not been considered. Natural England is particularly concerned that	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	Comments noted. The Council will continue to work with Natural England in order to deliver development over the plan period which is sustainable and which avoids any adverse impact on environmental sites, including areas covered by SPA and Ramsar designations. This will include undertaking further work through the SA and HRA processes as necessary.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>large allocations such as sites 35-41 at Murton are collectively stated to provide a maximum of 3,000 dwellings. Although further away from the Northumbria Coast SPA/Ramsar than the development sites in Whitley Bay, the number of dwellings proposed is far greater and so recreational disturbance should be considered here in particular. If it has been determined that sites beyond the Coastal Zone are unlikely to significantly affect the Northumbria Coast SPA/Ramsar, this should be justified. 16. When undertaking your Habitats Regulations Assessment (HRA), allocations that are likely to contribute to increased recreational activities should be reassessed, taking into account potential impacts from recreational disturbance both alone and in combination. Unless an allocation is large and in close proximity to the site, recreational disturbance is often a cumulative/in combination effect that occurs as a result of a planar housing distribution. As the location of an allocation is not the primary determinant of whether new residents will visit and affect the SPA/Ramsar (accessibility and attractiveness are key determinants), this assessment would be more effective when considered against overall housing numbers and their strategic distribution. This would avoid a complex in combination</p>				<p>development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>assessment of individual allocations. 17. When determining likely significant effects or adverse effects on integrity, the HRA should consider the in combination effects of policies that increase housing in proximity to the coast and promote the coast as a visitor destination. This assessment should consider whether the mitigation measures within policy DM.8 are sufficient to avoid the combined effects of more housing and an attractive and accessible coast. 18. Natural England notes that the assessment of the development sites 35-41 at Murton listed in the local plan are absent from the SA and HRA. However the SA refers to two sites at Murton (116 "" Murton North and 117 "" Murton South) with Murton North and Murton South also the names used in the HRA. It is unclear to Natural England whether sites 35-41 and 116-117 cover the same land. If this is the case then the numbering system used should be consistent for clarity. If this is not the case then given their importance of Murton in delivering the housing development site numbers these should be assessed in the SA and HRA in line with all other development sites.</p>				
805556			LP20151973	Site 22 - 26: I raised a number of comments at the earlier consultation stage, primarily focusing on the following concerns in respect of sites	Site 22 to 26	S 7.3 Distribution of Potential Housing	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding	An indicative Concept Plan identifying potential solutions to secure sustainable development

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
830576	Taylor Wimpey	DEVELOPER	LP20151983	<p>Site 139: These representations are made on behalf of Taylor Wimpey North East in response to the ongoing consultation on the North Tyneside Local Plan. These representations have been prepared having regard to Taylor Wimpey's land interest within the borough, specifically including proposed housing allocation site 139 (land at Darsley Park), under policy S7.3 (distribution of potential housing development sites). As a general observation, Taylor Wimpey North East is a member of the Home Builders Federation (HBF) and supports the representations made by the HBF, addressing matters of borough wide significance. Further observations in relation to the plan are set out below. Policy S7.3 identifies the sites which the Council proposes to allocate for residential development over the plan period. These representations do not comment on each individual site. although support the allocation of land at Darsley Park (map reference 139) for the development of approximately 98 residential dwellings. Taylor Wimpey North East has previously promoted this site through the most recent SHLAA consultation and provided evidence to demonstrate its deliverability. In this respect, pre-application discussions within North Tyneside Council have commenced, with the Council confirming a general</p>	Site 139	S 7.3 Distribution of Potential Housing Development Sites	<p>Support for development noted. Site 139 is identified as a suggested allocation for residential development through the Local Plan process. This follows a positive assessment of suitability and availability in the SHLAA, with site concluded to be deliverable in the next 5 years following consideration of the evidence. However, a proposal for development will still have to address any identified constraints, which will have to be assessed, and where necessary mitigated, on a site-specific basis through the development management process.</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				in principle acceptance of the proposed development, subject to receiving a formal planning application. In terms of site deliverability (referring to footnote 11 of the NPPF) the site is available for development. and represents a suitable location for development now (as confirmed by the SHLAA). Subject to the submission of a formal planning application, survey work undertaken by Taylor Wimpey and progress made on pre-application discussions with the Council, there is a realistic prospect that housing will be delivered on this site within 5 years. In this respect. it is also demonstrated that the site is viable and dependable. with a developer commitment to promote a short term planning application.				
900788		DEVELOPER	LP20151992	New Site - Land at Wallsend Road (currently a suggested employment site): Our client objects to this policy as there are insufficient sites identified on the Policies Map to meet the objectively assessed housing needs in North Tyneside. In order to meet this objectively assessed housing need (as set out in the HEaDROOM Report) our client's site at Wallsend Road should be included as a housing allocation. In addition, Policy S7.3 currently identifies no preferred sites for housing development in the Percy Main area. Housing development at our client's site will ensure that a	New site	S 7.3 Distribution of Potential Housing Development Sites	The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now AS4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed	The sites allocated for housing development through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>sufficient supply of new homes is provided in the Percy Main area over the plan period, which makes a positive contribution to the area, whilst contributing towards the delivery of the Spatial Strategy. As such, it is considered that our client's site at Wallsend Road should be allocated for housing development.</p> <p>Site Overview The site is located to the north of the identified Local Centre of Percy Main and comprises a vacant open field which extends to 1.6ha (approx.). A footpath intersects the site to the south which runs along the eastern boundary of the site and also joins Wallsend Road to the west. The site is bounded as follows: "ç To the north by Wallsend Road and A193, beyond which lies an open field and the Tyne Tunnel Trading Estate; "ç To the east by a disused wagon way and a pedestrian footpath, beyond which lies the Percy Main residential area; "ç To the west by Wallsend Road and a timber yard (John Potts Ltd), beyond which lies a scrap yard; and "ç To the south by hedgerows and vegetation, beyond which lies the Percy Main residential area. The site benefits from an existing access off Wallsend Road and is within close proximity to a range of bus stops and the Percy Main Metro Station. Policy Context The site is currently allocated in the LPCD as an employment site (Policy S5.2), which</p>			<p>analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. Site NT006 is included for assessment in the SHLAA (Site 061). However, it is considered that the site is currently unsuitable for housing development, reflecting locational factors and site constraints, therefore it has not been considered as a potential housing allocation through the Local Plan process. On consideration of a range of evidence, expert advice and comments received through the consultation process, it has been determined that it would be best to be retain as employment land, meeting the economic growth and development needs of the borough over the plan period. The Council encourages the landowner and agent to continue to engage positively through the consultation process. This includes providing any further evidence/detail which could assist in the SHLAA assessment.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>falls within the A 19 (T) Economic Corridor designation. In addition, the site is bordered to the east by a Transport Safeguarding Route (Policy S10.3) beyond which lies a Wildlife Corridor (Policy S8.4). Strategic Housing Land Availability Assessment (SHLAA) The site forms part of a wider site in the SHLAA (Ref No. 061 ), which is identified as being not presently developable. The site is identified as having housing potential, with no identified technical issues or constraints. The only reason the site is not considered to be suitable for residential development is its allocation as an employment site.</p> <p>Noise I Residential Amenity Nathaniel Lichfield &amp; Partners Planning. Design. Economics. The site lies adjacent to commercial uses to the west, which comprise a timber yard (John Potts Ltd) and beyond this a scrap yard. Appropriate mitigation could be provided along the western boundary such as buffering strips, landscaping bunds or acoustic fencing.</p> <p>Consideration will also be given to the appropriate siting and specification of new homes. Such mitigation will protect the amenity of new residents from noise generated from the neighbouring uses and prevent limitations on the neighbouring employment uses. Site Suitability "c An existing access is available off Wallsend</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Road; "ç The site lies in Flood Zone 1 and is not at risk of flooding; "ç The site does not form part of any wildlife or ecology designations. A Wildlife Corridor passes the site to the east and landscape buffering could be provided to supplement this designation; "ç We are not aware of any contamination issues at the site and consider that, given its greenfield status, there are unlikely to be any such issues; and "ç The site currently comprises poor quality grassland and could be brought forward for residential development to bring regeneration benefits to the Percy Main area. Sustainability The site represents a sustainable and logical infill, relating well to the existing built form of the Percy Main area. The site is located within close proximity of a range of local services and facilities, including: a Doctors Surgery (within 100m), a Food &amp; Wine Shop (within 200m), a Mini Market (within 250m), St. John's C of E Church (within 300m), Percy Main Football &amp; Cricket Club (within 400m), and Percy Main Primary School (within 450m). The site also benefits from excellent public transport links including four bus stops and Percy Main Metro Station within 250m. In the context of the above, it is considered that the site is located in a highly sustainable location. Furthermore, the site is suitable, available and achievable with no</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>technical constraints. The residential development of the site would help to achieve the Council's housing requirements. Economic Impacts An economic assessment of the proposals demonstrates that the proposed development at our client's site at will:</p> <ul style="list-style-type: none"> <li>"ç Create 60 person-years of employment in construction - equivalent to supporting an average of 30 jobs throughout the entire duration of the anticipated 24 month build programme;</li> <li>"ç Support a further 45 jobs in the supply chain and related services and deliver an additional Â£700,000 of GVA (economic output) per annum during the construction period;</li> <li>"ç Attract new (predominantly economically active) households to live in the area, resulting in Â£370,000 of net additional expenditure in shops and services within North Tyneside. This additional expenditure could support the creation of approximately 5 new FTE jobs in the local area (including opportunities in the retail and leisure sectors);</li> <li>"ç Result in a further Â£270,000 of first occupation expenditure on goods and services to make a house 'feel like home' a proportion of which would be captured locally;</li> <li>Generate New Homes Bonus payments of approximately Â£400,000 in total;</li> <li>"ç An uplift in Council Tax revenues of more than Â£60,000 per annum</li> </ul> <p>Potential Development The site</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				could accommodate a development of approximately 50 homes. Options include the provision of market and affordable homes for local families to meet the Council's housing requirements and the needs identified in the SHMA. The site is available for development immediately and can be brought forward for development as soon as planning permission is granted. The landowner is supportive of development and strong house builder interest has been confirmed. In the context of the above, our Client respectfully requests that the Council re-allocate the site at Wallsend Road from employment uses and remove the site from the A 19 (T) Economic Corridor to facilitate its inclusion as a housing allocation in the next iteration of the LPCD.				
900817		RESIDENT	LP20151997	Site 35 - 41: Please accept the following in your consideration of the next steps of the North Tyneside 2015 Local Plan, in particular in respect to the proposed master plan/building/transport work on and around plots 35-41 around Shiremoor and Murton Village. In any case, I have now had a chance to look at the local plan and policies map/previous local feedback. I am pleased to see that Murton Village has been granted some protection in the revised plan and that the proposed maximum housing numbers have been decreased from	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>5000 to 3000 on the site in question. (Plots 35-41) However, I do now have concerns that this may push a lot of the building work even closer to the existing Shiremoor estates (and therefore my own home). It does seem unfair that there has been no area of protection on the West side of the site for Shiremoor too, especially as that means that the open space and semi-rural identity of Shiremoor which I purchased my home here for, could be completely wiped out and replaced by the excessive noise, traffic and pollution of a major transport route. I'm devastated at the prospect of this. The vast majority of Shiremoor residents do not have immediate access to the small area of greenbelt land north of the metro line, a lot of which are allotments rather than open spaces anyway. Should plans go ahead, there will no longer be any moor in Shiremoor, one of only 3 or 4 dedicated moors around Newcastle, and that really would be a tragic loss. Having said all this, I am aware that the land in question is already owned by a housing developer, so I am not naive enough to think that building can be stopped altogether, after all, Persimmon will want to see a profit and yourselves at the Council have housing targets to meet, so my priority is to make suggestions which will minimise disruption/destruction of my</p>			<p>significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity.</p> <p>As part of the Masterplan, an access and transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. This includes the careful consideration of the most appropriate means of access from the existing network. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints. Importantly, the impact which the proposed new link road will have upon the Green Belt will be carefully considered with mitigation measures proposed through the Masterplan and the detailed planning process. In addition to this, a wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This includes working with Nexus and public transport providers in</p>	<p>detailed masterplanning.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>little part of the community. My biggest objection is to the proposed dual carriageway right up the centre of the site. It not only completely crosses a very important wildlife corridor but is also proposed to go straight through into Greenbelt land at it's north end. Horrendously inconsiderate and environmentally insensitive planning. One of the main reasons I purchased a house here was because of the open green spaces and wildlife within such a well-linked and facilitated area. Even with the extra proposed housing and related facilities, a dual carriageway would be a completely unnecessary invasion through the site. I appreciate that there will be hope for employment links between the new estate(s) and the industrial/economic corridor to the south plus Silverlink, but it would still be massive overkill! And why create such a massive road to join up to the tiny protected villages of Earsdon and South Wellfield? Are we expecting a sudden population explosion? There's no need. Not only does the proposed road start off (next to site 107 on the map) almost right next to the A19 and A191 corridor which also edges the site, but there are already plenty of links up to the main junction of the A192 and A186 at Earsdon, major and minor. For example, even the regular width street of Park Lane is hardly bumper-to-</p>			<p>order to identify need for new services and public transport links. The Masterplan process will take account of the precise details relating to flood risk and any ongoing works. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>bumper slow-moving traffic at 5pm on a weekday. Yes, the proposed housing will need it's own main road to service it, but it won't be creating a dramatic increase in traffic travelling northwards, as the main region's employment zones, city and coast can all be reached via the south edge of the site. I also worry that by creating more major links to the north, we could actually inadvertently overload areas like the Silverlink even more rather than encouraging traffic away from it. The Infrastructure Delivery Plan/Travel Plan needs some serious reconsideration regarding this proposed 'protected' route. If built, it will fragment the Shiremoor/West Allotment areas even further - there are so many major roads through this area already. And why should this route be protected but the existing wildlife corridor and greenbelt land it proposed to go through isn't?</p> <p>Returning to the site in question and proposed building of houses/facilities, I have some concerns relating to the promise to "prevent joining of existing communities" versus the requirement of residents in my immediate area (the estate along the Angerton Avenue to Glendale Road edge of the site) for some safe, green open space. As you know, this area is skirted by a public right of way, which finishes directly next to my house on Angerton Avenue</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>via the back of Boundary Mill Stores. At the moment, this route isn't a particularly obvious fenced off one, and we residents are concerned that if new building work is done right up to the site boundary, it will become one, which could attract loiterers and break-in/drug related crime (as the walkways around Shiremoor metro are), especially if it is linked up to any of the new housing estates or major public transport sites/ schools / supermarket facilities in particular and so becomes a cut through for the public. House values are around a third higher on and around Angerton Avenue because it is slightly separated and buffered from the rest of Shiremoor, so experiences much less crime, and is quieter when it comes to through traffic. This is also due to the number of homes which back on to the green open spaces of this site, with sea views visible down the side of Boundary Mill. There are a lot of dog-walkers around this estate who make use of this open space, it is filled with wildlife which is welcomed by the residents - you only have to look at all the homes with bird baths/boxes in the trees and food left out for hedgehogs etc to see this. Wildlife in gardens on this estate/the fields this side of the proposed dual carriageway includes a huge variety of visiting and nesting birds, hedgehogs, frogs, rabbits and</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>foxes (which with even more housing could suddenly be branded pests rather than a perfectly welcome aspect of the area) - all of which I saw personally within just a couple of weeks of moving. Building right up to our site edge and going through with the proposed road will cut us off completely from the supposedly protected wildlife corridor, which would be extremely environmentally destructive. The Police service also use the public right of way and fields backing on to our little estate as a training and exercise route for police horses, so the area directly adjacent (Please see highlighted yellow area in the attached picture) really is an important area of land to preserve if we can get it protected somehow. This would also serve to un-wall the public right of way and make it a less obviously not-overlooked route for potential criminal activity (other than one burglary on the Boundary Mill Store site last year, there are no records of break-ins via this walkway at all over the last couple of years at least), and keep it safe for homeowners such as myself, walkers and people exercising their dogs (many of whom are middle-aged or vulnerable older lone females or elderly couples). Not being overly closed off or a cut through for other streets and facilities, this land is</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>currently a very safe open space for residents. I expect that keeping this little section of land and not joining it to any new estates would also keep the homeowners of the west-facing open-aspect bungalows happy as their properties still have open green space to the rear. Protecting this area also helps towards the promise to preserve distinction between areas - although to be honest, I think only by leaving the whole of the section of the site to the East of the proposed dual carriageway would truly do that and keep the wildlife corridor safely intact. Actually, that would probably keep almost all of the Shiremoor residents happy! I think it would also be very important to ensure that the opening to the site between Angerton Avenue and Alwinton Road is kept as pedestrian-only access for this reason, as well as to prevent the estate being used as a through route. I can see that the end of Glendale Rd has the potential to be continued to the north, so I again request that this stays separate from and is not joined up to any major roads to the north and east - I live opposite to the junction of Angerton Avenue and Horsley Avenue, and there are already a fair few cars and vans using it as a cut through to avoid part of Park Lane. Joining the estate to another at Glendale Road could dramatically increase through traffic, and it would</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				become very noisy and a major annoyance as headlights from turning cars point directly into my living room and main bedroom. Again, crime increase would be a concern to me too. I was also informed by another resident that the section of land at the end of Glendale Rd could not be built on after the installation of flooding prevention devices as everything would sink - I'm not sure of the details of this but it is worth researching if you haven't already. I sincerely hope that you will take my views and feedback into consideration, if you look back at the online forum feedback from the last stage of the public consultation, you will see that there was actually more objection to building next to the existing homes in Shiremoor than there was around Murton village, and that has been granted a protected zone around it.				
396511	GVA	PLANNING CONSULTANCY	LP20151998	Site 22 - 26: These representations have been prepared by Bilfinger GVA on behalf of the Northumberland Estates and jointly with the Banks Group ("the Consortium"), who are principle landowners and controlling landowners at Killingworth Moor. 1.2 The representations respond to the North Tyneside Local Plan Consultation February 2015 ("the Local Plan"). 1.3 North Tyneside Council ("the Council") will be aware that the consortium has the majority land	Site 22 to 26	S 7.3 Distribution of Potential Housing Development Sites	Support for allocation of Killingworth Moor noted. Details of likely delivery rates are also noted as are the example benefits which will be brought to this development and to the wider community. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This is being undertaken with the direct involvement of all key stakeholders, including landowners and statutory	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>interest in the land at Killingworth Moor, currently identified as a Strategic Land Allocation in the Local Plan under Policy AS7.4. The Council will be aware that both landowners have secured planning permission for development on land in the immediate surrounding area including at Shiremoor, Northumberland Park and Great Lime Road in delivering new housing, education, retail and leisure and new metro station. The consortium also have land interests in Northumberland and Newcastle and are therefore not only experienced in delivering significant new development but have extensive knowledge of the local context and the planning policy position in North Tyneside and also within neighbouring authorities including Northumberland and Newcastle. 1.4 These representations relate specifically to the land at Killingworth Moor (outlined in red on the plan in Appendix 1) and are without prejudice to any other representations submitted by either member of the consortium regarding other land interests within North Tyneside or any adjoining authority. 1.5 These representations are provided within the context of paragraph 182 of the National Planning Policy Framework ("NPPF"<a href="#">a</a>) which states: "The Local Plan will be examined by an independent inspector whose role is to</p>			<p>consultees, and will build on the work carried out to date. The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now AS4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. the strategic allocations policy sets out the intended delivery of a maximum of 4,500 homes between the two strategic sites at Killingworth Moor and Murton, with the exact proportion on each to be determined after further analysis, particularly through the masterplanning process. This will consider whether the option to increase delivery above the 1,700 currently set out in LPCD 2015.</p>	<p>exist which will be considered further through detailed masterplanning.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. A local planning authority should submit a plan for examination which it considers is "sound" namely that it is: Positively prepared the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development; i. Justified the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence; i. Effective the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and i. Consistent with national policy the plan should enable the delivery of sustainable development in accordance with the policies in the Framework." The Consortium supports the allocation of land at Killingworth Moor within policies S7.3 and AS7.4. The Local Plan highlights the long term nature of both Strategic Sites which will make a vital contribution to housing delivery in this plan period and beyond. In S7.3 it</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>suggests that a total of 4,500 out of 5,000 houses from the two sites would be delivered in the plan period. It is stated, in paragraph 7.36 of the Local Plan, that neither Killingworth nor Murton is likely to be completed by 2032. However, it is worth noting that the proposed allocation sites identified in S7.3 fall short of meeting the full OAN to 2032 so if there is scope to enhance delivery from the two strategic sites during the plan period this would be highly beneficial to the delivery of new housing and the objectives of the Local Plan. Assuming adoption of the Local Plan in 2016 and both strategic sites start delivering housing in year 2017 and reach optimum build out rates the following year in 2018, Killingworth Moor (if it were to be allocated for 1,700 units as currently propose) would need to be built out at a rate of about 120 per annum to be completed in 2032 and Murton (if it were allocated for 2,800 units as currently proposed) would need to be built out at a rate of about 200 per year. As a general rule of thumb any one house builder will expect to build and sell up to 50 units per annum from an outlet. On this basis the Murton strategic site would require 4 builders throughout the plan period. Killingworth Moor would need 2-3 builders over the same period. The consortium suggests that there is</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				scope for an increase in the delivery from Killingworth Moor during the plan period from 1,700 to 2,100. This enhanced delivery would assume three builders on site which appears very realistic given that there are discreet parts of the site which could be marketed quite differently. This takes into account the extant permission for the REME Depot which to some extent would allow the Killingworth Moor area to establish itself earlier in the plan period than 2017. There is clear evidence that both Strategic Site Allocations are needed during this Local Plan period based on both the current OAN and on the OAN the consortium suggest against Policy AS7.1 (now S4.1). Both are long term strategic sites which should be planned strategically from the outset to realise the greatest benefits to the future residents and wider community. The Local Plan process provides the best chance of starting this process. At Killingworth Moor there are a number of opportunities for major benefits when planning at this scale. These include public transport, public access and connectivity, education provision, community facilities, wildlife habitat, green infrastructure, flood mitigation and low carbon energy.

805823			LP20152036	Removal of site at Midhurst Road, Support We are very pleased that the proposal to build on the triangle of land behind Midhurst Road has been taken out of this latest version of the plan.	Site 14	S 7.3 Distribution of Potential Housing Development Sites	Support for designation noted. Following further assessment through the Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space.	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152037	Site 22 -26: Generally supportive Policy S7.3 highlights and allocated selected development sites for housing use for a total number of 8806 as confirmed by the latest SHLAA. While commendable to include this level of information as confirmed by table 8 on page 87 there is a total remaining need for the plan period of 10189 units as such there is a remaining un identified total of houses of 1383 units across the plan period. Not withstanding the overall deliverability of all sites which	Windfall	S 7.3 Distribution of Potential Housing Development Sites	Support for allocation of Killingworth Moor noted. Details of likely delivery rates are also noted as are the example benefits which will be brought to this development and to the wider community. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This is being undertaken with the direct involvement of all key stakeholders, including landowners and statutory bodies,	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>we question given the high number of Brown Field developments this leaves approximately 8% of the total requirements to be met through windfall allowance which is considered excessive and not conducive with a positively plan lead approach. While we don't disagree that some units will be delivered via windfall sites, historic windfall allowances cannot be attributed based on past trends given that the authority have been planning via the appeal process on "windfall sites" since 2011 and that this is the predominant base of its 5 year land supply (as shown on page 87). In addition to the above, Persimmon have been involved during the SHLAA preparation process and know that this document is a very robust and comprehensive assessment of land available / likely available during the lifetime of the plan. Given the robust nature of this and that Windfall sites are any sites not identified during the Plan preparation process we question the reliance on such a large percent of windfall can be justified. Persimmon suggest that existing development sites currently identified and some sites in the SHLAA not currently identified for development within the plan period could be brought forward to meet this need. Further details on this can be found in the last section of this representation. The above being said</p>			<p>including the consultee, and will build on the work carried out to date.  The Local Plan identifies the overall housing requirement for the plan period, based on the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032. As noted, in addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now AS4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA and further work will be undertaken in order to ensure the robustness of the data which supports the windfall forecast. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. However the need to refine the preferred allocations will be considered for the next of the plan.</p>

				brought forward in a joined-up logical manner, avoiding piecemeal and incidental development. We would like to thank North Tyneside for this opportunity to comment on their emerging plan and would ask to be kept informed of any further and future development as part of the consultation for the emerging plan.				
901149		RESIDENT	LP20152067	Site 22 - 26: I understand the Local Authority's need for a local plan. Central government's proposals on planning and enthusiastic developers have reduced the ability of local people to influence the area in which we live. The development of such a large area of land on Killingworth Moor is a contentious issue. It is my view that the proposed plan does not provide sufficient protection to the Killingworth Village conservation area. The main concern is the road infrastructure proposal; in particular the link between the site and the B1317. This road is unsuitable for the increased volume of traffic from such a development. Another area of concern is the strain on existing amenities i.e.: schools, doctors surgeries etc and the lack of public transport. Given the distance between Murton and Killingworth how can joint facilities be workable? The authority's said a masterplan would be required for the area (sites 22-26). Not much detail on how this would be formulated is given	Site 22 to 26	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 2,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. Central to this is the need to protect the setting of Killingworth Village Conservation Area. As part of the Masterplan, an access and transport strategy will be prepared to identify the most suitable means of	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>in the plan. This puts residents in the position of commenting on a plan with limited detail and a wish list of proposals. It is easy to be sceptical of the Local Authority's plans. The junction at Palmersville has been constructed leading to Killingworth Moor complete with traffic lights. This, together with the size of the roads proposed on the REME Development leading to the Moor, gives the impression the development was always going to take place. It is my opinion that no further access to the Moor should be granted through the REME Development onto the B1317. Access to the site via the A19/Holystone should be considered. A high priority should be the formulation of an amenities strategy to include: schools, surgeries, footpaths and public transport routes. It is important local people have equal input into any development of a masterplan for this site. The developers will be lobbying hard to ensure they get their way and maximise the amount of land released for housing. The masterplan should not be written by the developers and any future proposals for the site should be resisted until a masterplan is agreed.</p>			<p>delivering the development. This includes measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. The impact on the B1317 will be of key concern, with the objective on minimising additional flows on the existing highway network. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable.</p> <p>In addition, a wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This includes working with Nexus and public transport providers in order to identify need for new services and public transport links. The importance of community services, including schools and GPs, is reflected in Policies S10.13 (now S7.10) and S10.1 (now S7.1) which outline how the Council will respond so that the infrastructure required is delivered in order to make new development acceptable and, to meet anticipated future needs. The option for the provision of joint services between the two strategic sites will be explored together with providers and key stakeholders in order to deliver the most effective results for both new and existing communities and the wider population.</p>

				<p>housing development that, along with the two Strategic Sites, are to come forward to meet the housing requirement of 10,189 over the plan period. Although the total capacity of preferred housing locations and Strategic Sites exceed this requirement, our client considers that the housing requirement is too low and should be increased. It is also important to note that, as shown in Table 8, a significant proportion of housing delivery is dependent on all existing planning permissions being implemented. Our client considers that it is unlikely that all sites with planning permission or minded to grant permission will be fully developed. As such, it is likely that the outstanding housing requirement will be greater than currently identified. In consideration of the above, our client questions whether the current supply identified through preferred housing locations and Strategic Sites will be sufficient to meet the housing requirement and that greater flexibility should be afforded. It is therefore considered that further sites for housing should be allocated. In addition, Policy S7.3 currently only identifies two preferred sites for housing development in Seaton Burn. These sites are "'Drift Inn' (Ref 133) and "'Site of former Seaton Burn First School' (Ref 141), with an anticipated</p>		Potential Housing Development Sites	<p>the latest available evidence, and a range of suggested allocations to meet this need. It is considered that these allocations are deliverable/developable over the plan period to 2032. In addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now AS4.5). Supply from these sources will continue to come forward for development to meet the overall requirement. Further detailed analysis is available in the SHLAA. The Council is also continuing to work with neighbouring authorities, through the Duty to Cooperate arrangements, to determine the best spatial distribution of housing development across the wider sub-region. This site is located within the North Tyneside Green Belt and is assessed in the SHLAA (Site 148). The SHLAA currently concludes that this site is unsuitable for residential development. A Green Belt Review, undertaken to support the Local Plan, concludes that there are currently no exceptional circumstances evident, as required by NPPF, to require the release of Green Belt land for development. Therefore, the Local Plan confirms that this land will remain designated as Green Belt over the plan period.</p>	<p>through the Local Plan have been updated to reflect the latest housing land supply evidence, including the deliverability/developability of sites as outlined the 2015 SHLAA.</p>

				yield of 8 and 6 dwellings respectively. It is clear that the combined yield of these sites will not be sufficient to meet the future housing needs of Seaton Burn over the plan period and that further sites in the settlement will be required to come forward. The allocation of our client's site for housing will contribute towards the delivery of a sufficient supply of new homes in Seaton Burn. Our client's site is deliverable in the short term and would make a positive contribution to Seaton Burn, whilst contributing towards the delivery of the Spatial Strategy. As such, it is considered that our client's site should be allocated for housing development.				
396238	North Tyneside Council	COUNCILLOR	LP20152082	Site 3: Support the continuation of House building on the Annitsford Farm site and ask that in the Planning Brief special consideration be given to the needs of the residents in the existing streets of Hedgefield View, Ford View which face the site and North Villas. I do not consider access to Annitsford Farm site is possible via existing space between Ford View and shops i.e. across Car park of Clayton Arms. Only possibility if compulsory purchase of land and demolition of Public House. Could be possible if new Public House was offered as part of new housing development.	Site 3	S 7.3 Distribution of Potential Housing Development Sites	Support for housing, and the use of a Planning Brief to guide development, noted. A wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. The precise impact on the local highway network arising from a proposal will require assessment on a site-specific basis and appropriate improvements secured in order for development to be acceptable. For Annitsford Fm, this includes important consideration and resolution of access constraints and measures to address capacity in the local highway network. The importance of community services and	No amendments proposed. Larger development sites are supported by an indicative plan setting out potential access points and open space.

				<p>response to proposed local plan we have gathered considerable feed back through talking to residents in informal settings and on their behalf would like consideration to be given to the following: 1. The Fewster's site of shops and caravan parking in the centre of the village is in an important strategic location. It has residential properties to the south (Jubilee Terrace and Bridge Street), east (Russell Square), north (where the new Chapelville Sheltered Home is nearing construction and 6 bungalows are planned), and part of the coast to coast cycle way to the west. Current applications for change of use of caravan storage area to more permanent storage containers (more suitable in an industrial site) are very strongly opposed by local people. Previous use of the land was for Colliery housing which was demolished in the 40s and 50s. The site has deteriorated into a badly maintained eyesore with outdated shop fronts, but a Chemist, bookies and working garage offer jobs and services to local people. I am unsure when the land was designated for caravans but residents would like this area to be considered for future mixed use for housing and shops only. Ward Councillors support the use of this site for residential housing and shops only without prejudice.</p>			<p>the Local Plan. The next review of the SHLAA will include an appraisal of this site in Seaton Burn.</p>	<p>y of sites as outlined the 2015 SHLAA.</p>

				Although redevelopment in this general area is welcome the car park is well used and could be part of redevelopment but remain as a public car park. St Columba's Church is an important part of our local community and many people using this church - during many days of the week - use this car park. Shoppers also use the car park to access the town centre. These are concerns which constituents have raised and I am at their request raising them with you to ask you to consider them.		Housing Development Sites	within the main urban area. However, the need to deliver new homes is not looked at in isolation and Policy S6.1 (now S3.1) aims to pursue growth and regeneration of town centres by delivering new development, but only when this is appropriate and not detrimental to existing circumstances. One priority of this policy is to enhance accessibility by all modes of transport and any proposals which would result in the loss of existing car parking would have to be carefully considered through the planning process, including the resulting impact on existing shopping and community facilities, such as St Columba's URC. The Council also has a Parking Strategy which aims to manage the provision of parking in the borough which will provide further guidance.	
808139		RESIDENT	LP20152112	Site 35 - 41: Further to my recent letter, it has come to my attention that further alterations to the Site Ref: 35 - 41 Murton have been made but not included in the recent consultation . These concern the offset biodiversity land from the site at the Rising Sun County Park. It appears that the land to the north north/west of Murton has now been designated a nature/wetland area to compensate for the above loss at the Rising Sun County Park. Therefore more hedgerows trees etc. will have to be provided for the habitat of the affected wildlife. This wetland will no doubt accommodate some of the flood prevention measures required for	Site 35 to 41	S 7.3 Distribution of Potential Housing Development Sites	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. 				that I strongly support the plans to designate the 'Benton Curve' (disused railway) as a Wildlife Corridor.		Potential Housing Development Sites	Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space.	
901340		RESIDENT	LP20152227	Site 52: The site proposed is already near busy roads and junctions. During work and after this will increase the risk of injuries and accidents. The need for housing should not compromise others safety and comfort. The junctions with Deepdale and Derwent at Honistor Road is already tight and busy at times. Cars already nearly crash into each other without increased traffic and disturbance from building work. The roads are used by both cars and pedestrians trying to get to the 3 schools in the area (Marden High, Monkhouse Primary and St Mary's primary) Increase traffic would be dangerous for the children and parents. The green space that is currently at site 52 is used by many children and others such as dog walkers. The space provides an area for children to play safely close to their houses so that parents are aware of their location. Nearest park or other space is Links field 400m away and across a busy road. As a PE teacher I find it irresponsible of the Council to be taking such a space away when obesity in children is so high. Where are children supposed to 'play' and	Site 52	S 7.3 Distribution of Potential Housing Development Sites	As part of any proposal for development, a planning application must include an assessment to consider the current role, use and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision.  The precise impact on the local highway network arising from a proposal will require assessment on a site-specific basis and appropriate improvements secured in order for development to be acceptable. This would include addressing safety concerns and ensuring suitable access for pedestrians.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>exercise if you take all available space away? A field is a FREE area for them. I have been in my house for 21 months and concerned that these new houses would a) decrease the values of my house b) cause great disruption to the access to my house both before and after build c) increase the dangers of car and pedestrian accidents (I have a 6month old baby who will now have nowhere to play when she grows up and will have to be VERY careful with on walks). Comfort of others should be respected the new houses would block many peoples houses that line the space designated. This is NOT an appropriate space for new housing. I do not have and alternative site as that is NOT my job. These are many housing sites that are not full so concentrating on filling them and allowing people to get on to the property ladder should be looked at first.</p>

901591		RESIDENT	LP20152417	Site 21: Looking at the attached map it seems that the pink site marked No.21 is the children's playing field? Can someone please call me to clear this up, as I may be mistaken. Thank you. If I am correct in thinking this is the children's playing field I am opposing it for obvious reasons. My 4 children as well as all the other children in Holystone will have nowhere to play, dog walkers also use this field, especially the elderly people who can't walk far enough to go anywhere else. Also me and my family have used this field for recreational activities for over 50 years. My family has lived in Windsor place for a very long time and from my Nana and Granda to their great grand children we have all used this field for recreational activities and still continue to do so. I have spoken to people in Holystone and the majority of people have not received this leaflet and are unaware of the latest proposals. However quite a few have	Site 21	S 7.3 Distribution of Potential Housing Development Sites	This proposed site for residential development is currently designated through the UDP as part open space and part allocated employment land. As part of any proposal for development, a planning application must include an assessment to consider the current role, use and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision.	No amendments proposed.

				already explained they have already opposed this only 2-4 years ago. Please forward any info to my email. Thank you.				
471172		RESIDENT	LP20152418	Site 139: Darsley Park - Objection Covering letter submitted to petition objecting to Site 139 with 42 signatures. We the undersigned wish to oppose the proposal in the Local Plan to develop the field (ref no 139) for housing. We believe that with the developments around the Rising Sun Countryside Park and Tyne View Park which already have planning permission, the current development at Darsley Green and the proposed development on the site of the old St Bartholomew's School (ref no 15) the traffic on Whitley Road will be at saturation point. In addition any development of the field will lead to yet more junctions on to a stretch of road that is already very busy. There is also a local nursery, the Quarry Park, the Blue Flames Club and NUFC training ground which attract many young people on foot. In addition there was a promise made when the training ground was built that any future development of the field would be for community sport. We ask the Cabinet member to reconsider this site and remove it as designated housing development.	Site 139	S 7.3 Distribution of Potential Housing Development Sites	Receipt of petition and issues raised acknowledged. A wide range of road and public transport improvements are programmed or planned for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. The specific impact of each proposal will require assessment on a site-specific basis and appropriate improvements secured for development to be acceptable. For the proposed site at Darsley Park this includes crucial assessment of the impacts upon Whitley Road and ensuring safe pedestrian links to and from the development and to facilities in the wider area.	No amendments proposed.

				location since it is surrounded by houses and quiet roads.				
808139		RESIDENT	LP20152430	<p>Site Serious consideration should be given to solving the traffic congestion that arises at rush hour and peak times during the day with traffic entering and leaving the confines of the Cobalt Business Park and the Silverlink. The local omnibus operators have had to alter their timetables at certain times of the day due to the severe congestion of traffic at various times of the day, resulting in the knock on effects of delayed public transportation. With hindsight these problems should have been addressed when Cobalt was originally developed. On the afternoon of Thursday 2nd April last, the traffic came very close to gridlock with the A191 blocked from the A19 to the B1316 including Norham Road North, the B1322, also the Silverlink North including Silverfox Way, Middle Engine Lane both ways and the Silverlink to the A1058. This occurrence brought out the best in some of the motorists who decided the laws of the road did not apply to them, trying to do 3 point turns, blocking exits and lanes they did not want to be in. This resulted in a (30) minute bus journey from Newcastle to New York taking one hour and forty minutes (1hr 40mins).</p> <p>This is now becoming a regular occurrence and needs to be addressed</p>	General	S 7.3 Distribution of Potential Housing Development Sites	<p>A wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This includes schemes to deliver improvements on the A191 corridor and accessibility to/from Cobalt Business Park and working with Nexus and public transport providers in order to identify need for new services and public transport links.</p>	No amendments proposed.

				before the new housing development to be built on Shiremoor/Murton greenfield site with the large increase of motor vehicles that will accompany this development.				
878656		RESIDENT	LP20157	I have just received a copy of your Local Plan Consultation regarding further housing in the Killingworth area. How can this be justified whilst the shopping facilities in the area are so poor? No one that I know is against more housing in the area, but surely it must be in balance with proper 21st century shopping facilities. I can only hope you take this into consideration before building commences.	Site 22 to 26	AS 7.4 Strategic Site Allotations	A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 2,000 homes in the most suitable areas and at an appropriate scale. As part of the Masterplan, the requirement for additional services and facilities will also be considered, including the need for additional retail provision. More generally, Policy S6.1 provides the strategic context so future retail provision in the borough, setting out a policy for growth, regeneration and support for main town centre development.	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.
878568			LP201514	How can you say that your green infrastructure strategy will retain, enhance and increase the biodiversity of each site. There is a huge amount of land covered in hedgerows and trees that have been included in site 39, next to the metro line. These will be destroyed forever, along with all the wildlife that it sustains.	Site 35 to 41	AS 7.4 Strategic Site Allotations	A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. 							for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity.	exist which will be considered further through detailed masterplanning.
878767			LP201525	There is uncertainty about the actual number of houses that will be required to be developed in the Borough by 2031/32. There is also uncertainty about the actual location of sites that will be available to provide the required housing. The commencement of any development of housing on these two strategic areas of previously safeguarded land Murton (sites 35-41) and Killingworth Moor (sites 22-26) should therefore be delayed until towards the end of the planning period i.e. years 11-15. This will mean correcting the dates for the commencement of development currently being shown for some of the Murton and Killingworth Moor sites on the planning schedule. By deferring the commencement of any housing development on the Murton and Killingworth Moor sites until after year 11 of the plan will ensure that by that time the forecasted demand for housing has actually materialised and no other, currently unknown but more suitable sites for housing development have become available in the	Strategic Sites	AS 7.4 Strategic Site Allocations	The NT Population and Household Forecasts provide the latest available evidence of housing need. The Council must plan to meet this need by allocating sites for development. The Local Plan Spatial Strategy seeks to maximise development opportunities in Wallsend, North Shields and the Coast, whilst delivering the remaining development needs across the urban area. The resulting distribution of suggested development sites, Policy S7.3 (now S4.3), reflects this strategy, following site-specific assessment in the SHLAA to consider suitability and deliverability/developability of each site, before the most sustainable and appropriate allocations are selected. A positive and proactive Local Plan is required, allocating enough land to meet the identified requirement, to guide development to the most sustainable locations. It is considered that the strategic sites are required to meet the housing need, with the SHLAA and housing trajectory setting out the forecast delivery. Without such an approach, the Council will not be able to identify a 5-year supply of deliverable sites and will have limited	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. 				secondary school.....". North Tyneside currently has surplus places in all of its secondary schools. Marden High School is currently experiencing a significant budget deficit due to the loss of one of its three 'feeder' primary schools through the creation of Kings Priory. I therefore question whether it is prudent to build a new secondary school. I would invite you to consider whether children and young people from the new Murton development could be directed to existing secondary schools. If this caused a problem over 'over-subscription' to a nearby existing High School, like Monkseaton High School, then it would not be difficult to transfer one of its current feeder primary schools to Marden High School, thereby securing the viability of existing schools rather than further weakening them.			additional school. The Masterplan and the formal planning process will determine the most appropriate scale of such facilities and the best location in the borough. More generally, the importance of community services is reflected in Policies S10.13 (now S7.10) and S10.1 (now S7.1) which outline how the Council will respond so that the infrastructure required is delivered in order to make new development acceptable and, to meet anticipated future needs.	of this area is included in the pre-submission draft of the Local Plan. 892980		RESIDENT	LP2015306	<p>Site 35 to 41, Murton: Comment I attended your consultation meeting on 26 February at Shiremoor Resource centre and was told to forward any queries regarding the Murton build direct to your planning department.</p> <p>My main concern regarding the build is around the proposed new road leading from Earsdon through to New York. As I live in 286 New York Road this new road will be right next to my house and the other 2 houses in this block. I believe that this will not only infringe on our views and the local wild life but also create noise pollution. One of the other major factors is that the valuation of my property will decrease, who would want to live right next to a major road with traffic day and night passing by your door every day. The reason we bought this house originally was because of the location the lovely open aspect at the rear of the property overlooking fields as far as the eye can see. I questioned the gentleman at the meeting regarding using the existing Murton Lane as this is currently being used for traffic in and out of Murton village without any impact to anyone. This would be more beneficial to us as residents in New York as the road would have less of an impact on our homes and our lives. My other concern is the amount of extra traffic this would bring to an already congested road/roundabout, living opposite this</p>	Site 35 to 41	AS 7.4 Strategic Site Allocations	<p>A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. 				<p>road and being a car driver myself the amount of traffic that is using this road to get to the Cobalt, Silverlink and Rake Lane is far too congested therefore adding another road would be complete and utter madness. I was made aware of the Nexus plans to extend the Metro line through to the Cobalt and onto Percy Main which I feel is a good idea and one which I hope does take place but in the mean time another main road leading to the New York roundabout should be re-thought . I am aware that the position of this road is having the minimal impact on residents other than the two houses on Murton Lane and the three on the block in New York Road but as we have not yet been made aware of where the new houses will be built we feel that we are going to be railroaded on both accounts i.e. the loss of views and open aspects and the extra noise pollution from this main road. Although you have considered protecting Murton Village I don't feel any consideration has been given to the these houses which will be affected by the re-development. I hope you will take our views into consideration before the next planning meeting and try to accommodate our proposals regarding the new road.</p>

				in excess of 50 years and over the 5 years we had lived at the property these were home to Ducks, Swans and Heron which were visible from our property. For over six weeks I emailed, rang and left messages every other day and eventually received a call back from a water ways officer saying that the environmental officer was on maternity leave. The waterways officer met me on site and said that although a landowner had a responsibility to drain his land he would investigate with regards to whether the correct permits were in place from Natural England and come back to me, he never did come back to me. I therefore contacted Natural England myself and discovered that no such permits had been requested and they reported this to the Police Wildlife Officer Don Churchill to investigate, we are not aware of the outcome of this investigation. .			Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site. As part of the Local Plan process the Council is actively working with statutory bodies such as Natural England and the Environment Agency to determine whether proposals for development are appropriate.	
892986		RESIDENT	LP2015307	Site 22 to 26: 11) Declined Permit to Plough (Environmental Impact Survey) In June 2014 a contractor again turned up to Killingworth Moor/A19 corridor and commenced the installation of field drainage across the land. When I asked him what he was doing he replied that he had been employed by Northumberland Estates to install land drainage to prevent the pond from refilling and to drain the two other ponds and remainder of the land into	Site 22 to 26	AS 7.4 Strategic Site Allocations	A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. 							tackle both current and future constraints in transport infrastructure - see Policy S10.3 (now S7.3) and the IDP for further detail. This also includes working with Nexus and public transport providers in order to identify need for new services and public transport links.	
892986		RESIDENT	LP2015307	Site 22 to 26: 19) Priority Transport Improvements (Consultation 2015) Noise to our Property The priority transport improvements particularly across Killingworth Moor/A19 Corridor will have a direct impact both from a visual and noise perspective to our property which we believe from a planning perspective are unacceptable.	Site 22 to 26	AS 7.4 Strategic Site Allotments	All proposals in addition to ensuring they adequately mitigate or make positive contributions to the borough as a whole will also be required to ensure that the residential amenity of new and existing residents are protected. This would include ensuring issues such as noise pollution, and air quality are properly considered and mitigated where they arise. Such assessments can be pre-empted to some degree through design of schemes but the key stage for undertaking noise impact assessment and air quality impact assessments will be as detailed proposals for the specific route and design of infrastructure such as new roads are developed.	No amendments proposed
892986		RESIDENT	LP2015307	Site 22 to 26: The Consultation Plan . 20) Greenfield & Brownfield Sites The plan mentions that 65 Brownfield sites have been identified for development, however it does not identify on the suggested sites for development map any of these 65 Brownfield sites, surely these should be categorised as preferential rather than effecting Greenfield sites, is there a new plan indicating where these 65 Brownfield sites are as it appears that a lot of	Site 22 to 26	AS 7.4 Strategic Site Allotments	All of the suggested sites for development are identified on the map, whether brownfield or greenfield. Further detail on the specific size, yield and whether the sites is greenfield or brownfield in nature is available in Policy S7.3 (now Policy S4.3), setting out the detail of every site identified as a suggested housing site. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). A comprehensive assessment of	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				them have been removed from the 2015 plan. .			potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.	
892986		RESIDENT	LP2015307	Site 22 to 26: 21) Factory's and Commercial Units The site of Killingworth Moor appears to have a potential mix of residential and commercial employment areas, in fact we have seen Northumberland Estates proposal for nine factory units, hotel and offices in the field directly behind and alongside our property, have the council considered the number of vacant factory units all around the neighbouring area such as Benton Square Industrial Estate, Bellway Industrial Estate, The Cobalt etc, why build new factory's on Greenbelt land when there are tens of thousands of square feet of empty units all around the area, The Cobalt Park website today shows fifteen vacant factory/offices and a future three becoming vacant.	Site 22 to 26	AS 7.4 Strategic Site Allocations	The proposal for the strategic site at Killingworth Moor includes the potential delivery of up to 2,000 homes and up to 17ha of employment land. The Employment Land Review provides the evidence for the amount of land required to meet the economic growth and development needs of the borough over the plan period. Despite there being empty premises across the borough the analysis of need has considered that further land will be needed, in addition to this, over the next 15 years and it is considered that the strategic site at Killingworth Moor can help meet some of this need by providing land for employment development in a sustainable and accessible location.	No amendments proposed.
892986		RESIDENT	LP2015307	Site 22 to 26: In summary we are very disappointed with the plan and how it will impact on the Killingworth and Holystone Areas, to our knowledge the previous council's approach was to	Site 22 to 26	AS 7.4 Strategic Site Allocations	Objection to development noted due to the wide range of reasons highlighted through this representation. In addition to the ongoing Local Plan process, further engagement on the detailed proposals will	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in

							As part of the Masterplan, an access and transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints.	
894604		RESIDENT	LP2015411	Priority Transport Improvements I have shown on the enclosed plan the proposed TRANSPORT IMPROVEMENT ROAD moved to the east of the A19 and shown in blue for two very important and valid reasons. 1. There is a major accident blackspot at the junction of the B1322 and the A1056 Seghill, Backworth, Killingworth junction. Providing a roundabout at this junction would virtually eliminate major accidents and could provide an easier junction for traffic leaving the A19 southbound. 2. There would be a major benefit to Backworth Village as the relocation of this route to the east of the A19 would provide a very much needed by-pass to Backworth Village without a great cost. As you will be aware the road through Backworth Village is very narrow and not at all designed to cope with the excessively	Strategic Sites	AS 7.4 Strategic Site Allocations	The suggested changes to the local highway network, show on the attached plan, are noted. it should be recognised that planning permission has been granted for development to the east of the A19 that is expected to incorporate a minor between the B1322, B1317 and the A186. At the Killingworth Moor suggested site comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver both of the proposed strategic sites at Murton and Killingworth Moor, guiding development in a coherent, sustainable manner. A crucial aspect of this will be the need for an access and transport strategy which will identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. This includes the most appropriate means of	No amendments proposed

				<p>houses slap, bang in the middle of this chaotic road network to simply add to the current problem? A new trunk road between Rake Lane and Earsdon Road will not alleviate any of this - it will just add make it worse - anyone can see that. I can only imagine how many cars will come from the 4000 proposed houses.....how will the roads cope, and at what expense in terms of traffic hazards this will bring to the residents? The second reason I oppose the plan is because of the loss of open green field sites and habitat for wildlife. You just need to look at the West Park development at West Monkseaton - open space and views lost forever, animals, birds and pond-life displaced through loss of habitat despite the promises and reassurances from NTC and Taylor Wimpey that this would never happen.....just go and see for yourself. The glossy site plan and the written assurances from NTC in 2010 promised to protect the wildlife and the environment but they didn't deliver and now five years on it's too late. NTC and their friends can not be trusted - if they really had the interests of the residents and environment at heart they would be looking elsewhere to fill the apparent housing shortfall. Why decimate what is left of the open spaces in an over-crowded and over-stretched corner of the borough? The plan is illogical, unjustifiable, and unfair</p>			<p>necessary in order to improve the existing highway network. The routes as shown on the Policies Map are indicative, only being a reflection of the earliest discussions as to how some of the identified issues might be resolved. However, only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints. In addition, a wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in transport infrastructure. This includes schemes to deliver improvements on the A191 corridor and accessibility to/from Cobalt Business Park. Emphasis will also be placed on achieving a modal shift to public transport and working with Nexus and public transport providers in order to identify need for new services and public transport links, including considering options for additional Metro stations. The Masterplan will outline the specific capacity and layout of the site, providing a maximum of 3,000 homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and</p>

No amendments proposed.
897792		RESIDENT	LP2015674	We object to any development around Murton Village.	Site 35 to 41	AS 7.4 Strategic Site Allocations	Objection to development noted.	No amendments proposed.
805490		RESIDENT	LP2015678	I agreed with the comments made [at the Killingworth drop-in session) and suggested to the officers a road could run from Holystone roundabout (A19) on to Killingworth Moor via a road bridge over the Metro line (a road bridge over the metro line is in the plan on the Murton site). This would give traffic direct access from the A19 on to the South East corner of Killingworth Moor. This was suggested in 1996 when the last local plan was under discussion, I attended a consultation meeting held by senior council officers who advocated the road from Holystone roundabout and	Site 22 to 26	AS 7.4 Strategic Site Allocations	A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. As part of the Masterplan, an access and transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. This includes consideration of the most appropriate means of access to the sites, the route and	No amendments proposed

				reference 1b.			and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.	
898328			LP2015751	I understand that all councils are under pressure to build and this is leading to building on green spaces. One of the proposals recently put forward to residents was to build on the area behind Monkseaton High School. I, like most residents, rejected this idea because it is a green field space. I strongly believe that that area could be made into a great space with housing and a much needed wooded area. If the council were to guarantee that the company building on the land had to plant acres of trees and create a very green environment around any housing, I am sure it could win over residents. You could relieve congestion on the existing roads with one main road through the middle. There could be cycle routes and walks through the wooded areas to provide a much needed large green space for families to enjoy. Most importantly, there should be an area similar to Jesmond dene or (No Suggestions) park created in this area. We really should be thinking of ways to create new green spaces alongside the inevitable house building because one day all of these green spaces will end up being built on; so if we don't start thinking	Site 35 to 41	AS 7.4 Strategic Site Allotments	<p>The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1) (now Policies DM1.4 and S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet the identified housing requirement the shortfall will have to be made up from delivery on the most sustainable greenfield sites.</p> <p>The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.</p> <p>A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. 				<p>impact for all with its location being on the A19 and A189 Roads around West Monkseaton such as A192 Seatonville/Earsdon Roads, Shields Road around Foxhunters Roundabout are already at maximum capacity and cannot cope with traffic at present. Access to the " Murton Gap" from any of the estate roads such as Fairfield Drive and Cauldwell Avenue must be denied as it is just about impossible to access the A192 at present via these roads. Many roads have been shown with pinch points on the Local plan map, however many places have been missed including the A192 which is one of the busiest and overburdened in the borough. Its as if it is expected all the traffic to head West, it does however also travel North and East. From the consultation map I cannot see how a road bypassing Park Lane Shiremoor can be driven through green belt to the north Murton gap, it somewhat defeats the purpose of a green belt. Once again I can see most of Shiremoor being bypassed and areas such as Monkseaton having to put up with the traffic congestion and road traffic issues such as speeding NOT acceptable! A more suitable idea for existing residents in Monkseaton would be to put the settlement buffer between there and Murton</p>			<p>development sites, Policy S7.3 (now Policy S4.3), reflects this strategy, following site-specific assessment in the SHLAA to consider suitability and deliverability/develop ability of each site, before the most sustainable and appropriate allocations are selected. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver both of the proposed strategic sites at Murton and Killingworth Moor, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of the site, providing homes, between the two sites, in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. 				extended both eastwards and westwards to form a much more substantial green area.			and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. However careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised.	
807743		RESIDENT	LP2015840	As a resident on Briar Vale, West Monkseaton I have 2 major concerns regarding the proposed Murton Development. I urge the council fully consider these over and above any pressures or benefits to building on this site to the volumes proposed. Point 1 - Flooding - the fields from Murton slope towards West Monkseaton, which has caused major flooding to Briar Vale and other housing estates. By building on these fields creates vast areas of non porous surfaces where water currently absorbs into the soil. The fear is that any developer under estimates this issues and the drainage solution isn't effective in heavy persistent periods of precipitation. Point 2 - Traffic Congestion - the current road junction	Site 35 to 41	AS 7.4 Strategic Site Allocations	A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. 				<p>linking North Tyneside with the A19 from Rake Lane and the Shiremoor bypass are already heavily congested at peak times. Adding up to a further 3000 homes will just create unbelievable congestion at this junction. Furthermore, I was told at a council meeting that the Foxhunter junction and Seatonville Road were already deemed to be up to capacity. Therefore adding further developments on the Murton site will surely add to these junctions and just make North Tyneside a nightmare to travel around. Whilst it is recognised there is a need for further new housing developments, there needs to be careful consideration on where these big numbers of homes can be placed, so that everyone can enjoy where they live and can freely move around without the risk of their homes being flooded. There are some industrial site in the borough which are largely unused and an eyesore. These appear to have been overlooked for housing, which would probably attract a develop to build the affordable that appears to be lacking.</p>			<p>transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. 				<p>development of several small sites will not provide the relevant sums. One major Development of the area(s) should generate enough profit to allow this to happen. I note that some major traffic improvements are planned at key strategic junctions. I would have thought that duelling the Northern Relief road around the North Side of Killingworth Township would relieve some of the current concerns. It is noted that agreed master plans would be required. Will this be on a site by site basis or will their be an overall master plan for the whole of Killingworth Moor, for instance. An overall master plan for Killingworth Moor is the only way to achieve a unified and consistent development. Of particular concern is Killingworth Lane and Killingworth road, which in their present form will not be able to support the additional traffic generated by the proposed developments on Killingworth Moor. similarly, Killingworth Village will become more of a "rat run" than it currently is. I believe that Killingworth Moor is partly classified as for Employment. Surely the particular area should be specifically identified.</p>			<p>development be considered acceptable. The Masterplan will allow for the issues of funding to be tackled at a strategic level, avoiding an risk of a piecemeal approach. The Infrastructure Delivery Schedule (IDS), part of the Infrastructure Delivery Plan, outlines the indicative costs for the infrastructure required to meet the levels of growth anticipated in the Local Plan. The IDS outlines that the funding for the major road works required for both strategic sites at Murton and Killingworth Moor, will be met by the developers.</p>

				<p>by the proposed 2 strategic sites will cause gridlock from Monkseaton to Longbenton / Gosforth Park area. I would like to propose a dual carriageway By-Pass of Backworth to run from the Grey Horse Pub roundabout ( Shiremoor By-pass ) to the A1056, A19 intersection. This would stop the rat run through Backworth and divert traffic away from Holystone roundabout. I would also like to propose closing access to Whitley Road and old Holystone village from Holystone roundabout and use the exit to create an access on to the K / Moor S / Site. This direct connection to the A19 is of vital importance, it is essential if K / Moor is to be developed as proposed and would take pressure off the A1056, B1317, B1505 ( Great lime Road ). A road bridge over the Metro line would be required on K / Moor just as a road bridge over the Metro line is needed on the Murton S.site's single road. I have spoken to many people who think a new junction is proposed on the A19 from one of the proposed K / Moor roads, the reason for this is they do not know at present a public footpath, farmers lane and tunnel exists ( which is only 5.4 metres wide x 4.2 metres high ) through the embankment of the A19, and leads to a roundabout on the Shiremoor By-Pass. On the N.T.C. L.P. map the latter section of proposed new road from the</p>			<p>means of access to the sites, the route and scale of the new roads proposed and the impacts and mitigation necessary in order to improve the existing highway network. Importantly this will include how the sites relate to the A19, Holystone roundabout, Great Lime Rd and A1056 and A191 corridors.</p> <p>The suggested route of new links and improvements to the network are noted and will be considered. The routes as shown on the 2015 Policies Map are indicative, only being a reflection of the earliest discussions as to how some of the identified issues might be resolved. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints.</p>	<p>detailed masterplanning.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				tunnel to Shiremoor By-pass is totally obscured, as 'Northumberland park ' is written across the route. Hence people think a new junction on to the A19 is proposed. The tunnel is only 5.4 metres wide, enough for 2 cars to pass, but no room for a pedestrian footpath !				
805490		RESIDENT	LP20151044	<p>Could we have another open break, wild life corridor between the housing estates that back on to Killingworth Lane (B1317) and the Proposed developments on K / Moor and Holystone. Running from the Seaton Burn waggon way wildlife corridor along the side of the B1317 road to the old R.E.M.E. site which has planning permission for Bellway housing. This would stop the merging of communities and retain a measure of green open space on the upper East side of Killingworth Moor, and fulfil objectives of AS7.4 (d.&amp; e.) Also S8.4, (c, d,) +8.20. - e.g.- " Green infrastructure corridors must be safeguarded through S.S. Allotments. Major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identity, maintaining amenity space and access to the countryside and biodiversity"..</p> <p>"Wildlife corridors allow movement of wildlife between areas of habitat, linking sites and reducing the risk of</p>	Strategic Sites	AS 7.4 Strategic Site Allotments	<p>In selecting sites for allocation, the direct and indirect impacts on biodiversity and ecology are crucial factors in determining suitability. Careful consideration will be necessary in order to determine whether a suitable scheme can be delivered – including through site layout, the proposed area for development and overall yield. It is recognised that further policy relating to development and wildlife corridors is required in the Local Plan. The importance of the need to protect biodiversity networks is recognised through the Local Plan process and opportunities for enhancement of existing and creation of new networks will continue to be explored and prioritised. 							outline the specific capacity and layout of the site, providing homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity.	
899444	George F White		LP20151307	AS7.4 Strategic Site Allocations The plan to develop a strategic site at Killingworth Moor is supported. This is a broad location for strategic development (NPPF, 157). Killingworth Moor would be a large scale development which will benefit from master planning and coordinated infrastructure provision. Our Client supports the comprehensively development of the site and acknowledges the need for collaborative working between developers and the Local Planning Authority. Clarification is required with regard to the need for the scale of the services and facilities identified in policy AS7.4 specifically, a new secondary school, major additional retail needs, country park provisions. Our client objects to Criterion (a) which	Site 22 to 26	AS 7.4 Strategic Site Allocations	Support for allocation of Killingworth Moor noted. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. This is being undertaken with the direct involvement of all key stakeholders, including landowners and statutory bodies, including the consultee, and will build on the work carried out to date. The comments with regard to infrastructure provision and phasing are acknowledged. Further work is required, through the Masterplan process, in order to determine the exact requirements for additional services and facilities and the likely timescales for delivery of different phases of development, with this being considered important ant in order to avoid any threat of	Reflecting these comments and the functional seperation of the site from the wider strategic allocation the boundary of the Killingworth Moor strategic site has been amended to reflect this and a separate allocation created.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>requires "any application for development to be preceded by and be consistent with a master planar€™ . This does not acknowledge that some parts of the sites could come forward in advance of an agreed master plan when they are of a scale which would not prejudice the overall aims and objectives of the strategic development or its implementation. A more flexible approach is required otherwise there is a real possibility that development on this strategic site will not come forward at all within the plan period. Our Client owns land (part of SHLAA site 075x), which is included as part of the identified strategic site, however it is suggested that this site could come forward in advance of the larger strategic site. This small site situated to the north west of the area with clear boundary's it is approximately 1.13 ha is bounded by A1056 to the north, High Farm to the east with a mature hedge and trees adjacent to the farm access track which forms part of a Waggon way to the south. The site has a capacity for approximately 30 dwellings. This site could come forward in the early part of the plan period and provide much needed housing delivery in North Tyneside. Initial desktop assessment of the site indicates that there are no heritage assets on the site. A preliminary Ecological Assessment is</p>			piecemeal development.	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>currently being prepared early findings indicate the site is of low ecological value but further assessment of bats maybe required, no signs of other protected species were evident. Assessments of the impact of nearby land uses including transport routes will inform a noise assessment and potential mitigation measures. Site investigations will establish any potential historical contamination of the site however as the majority of the site has been actively farmed the risk is anticipated to be low. The site lies within Flood Zone 1, with no known or predicted flood risk arising from the site (1 in 1000 years). The management of surface water would form part of a detailed Foul and Surface Water Drainage Strategy for the site. An access feasibility report is currently being prepared. Our Client has concerns over the wildlife corridor as currently identified (on the proposals map) along the Killingworth Wagonway. Refer to response to proposed policy S8.1 for further information. Our client is keen to work with the Local Planning Authority and would welcome the opportunity to discuss bringing this site forward for development in the early part of the plan period. (7.36) indicates that only a proportion of the two strategic sites at Killingworth and Murton will be required to meet the Borough's needs</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				for residential development to 2031. This statement is inconsistent within the preceding text and policy AS7.4. Indeed policy S7.3 includes for the full potential capacity of the two sites contributing towards the total homes of 8,806 units over the plan period. For the reasons set out in our response to Policy 7.3 the likelihood that the two strategic sites will not be completed within the plan period, undermines the Plans ability to fully to meet the Borough's housing needs creating significant uncertainty on the deliverability of the plan, and therefore requires additional sites to be identified. Reference is made to the housing trajectory, having regard to the above comments the trajectory will need to be reviewed. (7.42) reference should be included to the contribution that windfall development can make towards the housing supply as well as employment land supply.				
899599		RESIDENT	LP20151316	Site 35-41: As a resident of Murton village I am writing to lodge my dismay at these plans. I walk through the fields to the Metro. The reassurance of it being sown and ploughed each year gives a sense of continuity and connection to nature. As stated in the National Planning policy framework, we should aim to identify and protect areas of tranquillity which are prized for their recreational value . These fields are such an asset.	Site 35 to 41	AS 7.4 Strategic Site Allotments	Objection to development noted. The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1) (now Policies S1.4 and S4.1). A comprehensive assessment of potential housing sites is undertaken each year through the SHLAA and, from these, a wide range of brownfield sites have been included as suggested housing allocations in the Local Plan. However, there is a finite supply of such land and, in order to meet	No amendments proposed.

				bus route options from Killingworth are quite limited and night time services are very limited. I request a serious effort be made to push for the inclusion of a Metro link & until this is in place a significant improvement to bus services introduced. E.g.. Extend the 63x service later at night & cut the industrial estate detour out of the night time service.			transport strategy will be prepared to identify the most suitable means of delivering the development. This includes measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. A crucial aspect of this will be the need for additional public transport services and the Council currently working with Nexus and service providers, including the bus operators, in order to identify the improvements to the public transport network necessary to deliver the Local Plan. As part of this consideration of opportunities for potential Metro extensions and new stations is being taken. The 'Metro Strategy, 2030' prepared by Nexus, provides the strategic framework for planned future investment in system. Local Plan Policy S10.3 (now Policy S7.3) sets out the overall strategic approach to transport improvements. Whilst the every effort will be made to improve local bus services, and encourages this through criteria d) of Policy S10.3 (now Policy S7.3), the Council currently has limited influence over the operation of commercial services.	shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.
797201		RESIDENT	LP20151410	My home directly borders one of the plots of land proposed for redevelopment- the area between West Monkseaton and Murton. As the comments myself and hundreds of others made during the first round of	Site 35 to 41	AS 7.4 Strategic Site Allocations	A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. This will outline the specific capacity and layout of	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of

				<p>so-called consultation were disregarded, I am at a loss as to how to better convey the enormity of a decision to build on what little green space is left in our borough. These fields are enjoyed by countless dog walkers, cyclists and riders every day, all year round. But you already know that. The area is a natural and unspoilt habitat for a range of wildlife, but you know that too. The streets around my home suffered flood damage in 2012 and despite the measures put in place recently, these fields are often waterlogged still. Schools in the area are oversubscribed already, GP and dental surgeries are stretched to the limit and the roads are congested. Your report recognises all of these as real concerns. I understand the need to build more houses across North Tyneside, but strongly object to the lion's share being built in one concentrated area. I would urge councillors to look again at the proposed sites and reduce considerably the number of homes planned for the areas separating Rake Lane, Monkseaton and Murton.</p>			<p>the site, providing homes in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. The Masterplan process will take account of the precise details relating to flood risk and any ongoing works. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. Information from relevant experts will be taken into account in considering these matters and the overall suitability of the site.</p> <p>The importance of community services, including schools, is reflected in Policies S10.13 and S10.1 (now Policies DM7.9 and S7.1) which outline how the Council will respond so that the infrastructure required is delivered in order to make new development acceptable and, to meet anticipated future needs. 				<p>destroy the uniqueness of the current towns - The scheme will lead to over congestion of traffic which I do not believe will be alleviated without major road building schemes. Road building schemes must be avoided and from a personal viewpoint I don't believe that North Tyneside Council are able to manage the road traffic in this area (looking at the current situation) - The scheme will cause great harm to wildlife and nesting songbirds which are currently under great pressure from human activity. Whilst not a nature lover as such, then I believe that this scheme must not proceed if for no other reason. - This scheme will destroy the habitat and environment of Great Crested Newts which may exist in parts of the areas under consideration. The priority transport improvements - These are quite obviously roads even though you do not state this in the document, I object to these because they will not solve traffic issues but worsen them as the amount of traffic will increase, which it always does when new roads are created - The transport improvement around Murton must not proceed as it clearly impacts on part of the greenbelt and the proposed wildlife corridor as well as the existing properties on its route - The transport improvement will result in a flyover, over the metro line, this will result in</p>			<p>existing communities and retain individual character and identity.  The importance of community services, including schools, is reflected in Policies S10.13 and S10.1 (now Policies S7.9 and S7.1) which outline how the Council will respond so that the infrastructure required is delivered in order to make new development acceptable and, to meet anticipated future needs. The need for additional services and facilities will be looked at as part of the Masterplan process. As part of the Masterplan, an access and transport strategy will be necessary to identify the most suitable means of delivering the development, including measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. This includes consideration of the most appropriate means of access to the sites, the route and scale of the new roads proposed and the environmental impacts and mitigation necessary in order to improve the existing highway network. New road links are felt to be essential in order to deliver the development. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints.</p>

				<p>adequately protect the existing conurbations. Flooding The Letch and Ouseburn has a well-documented history of localised flooding in the Palmersville and Forest Hall Catchment with many homes at risk See Figure 1. As such any development would need to carefully design as to not impact any further on this sensitive receiving water body. The green space development will reduce the available land bank to allow surface water to infiltrate into the receiving groundwaters and as such increase drought potential and increase flooding from Run off. The Foul Sewer system is classified by Northumbrian Water critical drainage area and are at a high risk of flooding therefore it would intimate that there would not be further capacity on the sewer network to take the fowl from an additional developments without significant infrastructure upgrades. Figure 1 Extract taken from EA What's in my backyard (see attached) ENVIRONMENTAL IMPACT ASSESSMENT (EIA) As the whole lot 22-26 lot area would be implicated as proposed development then any scheme would need to be considered as part of a whole scheme development area and a full Environmental Statement (ES) would need to be provided. EIA is a tool for systematically examining and assessing</p>			<p>for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. The importance of the need to maintain and enhance PROW and other links is recognised in the work. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. The Masterplan process will take account of the precise details relating to flood risk and any ongoing works. An application for development will have to be accompanied by an assessment of flooding issues and, if necessary, propose measures to address and mitigate in order to make development acceptable. 				<p>the potential impact and effects of development on the environment. Essentially, it is a process that examines the environmental consequences of development actions before they go ahead (i.e. are granted the relevant permissions and licences). The requirement for EIA is established by European Directive 85/33/EEC (as amended by 97/11/EC) on the assessment of the effects of certain public and private projects on the environment (The EIA Directive). The EIA Directive is implemented in the UK through national law, of which the following Acts and Regulations would be considered to be relevant to this whole site development even when sectioned off in lots. Travel The road and public transport network would not support additional pressure. Killingworth has limited access points onto the major transport road infrastructure without access through highly congested B roads. A major infrastructure investment to public transport would be required such as the Metro extended to Killingworth Moor. As the impact of further traffic to already congested roads would cause significant adverse impact on local residents. Sterilisation of Mineral Reserves The underlying coal fields below these sites contain many thousands of tonnes of coal that was abandoned when it was not</p>			<p>undertaken to consider mineral safeguarding and potential prior extraction opportunities in order to provide the necessary evidence for the next stage of the Local Plan. As part of the Masterplan, the requirement for additional services and facilities will also be considered, including healthcare provision. More generally, the importance of community services is reflected in Policies S10.13 and S10.1 (now Policies S7.9 and S7.1 (now S4.1)) which outline how the Council will respond so that the infrastructure required is delivered in order to make new development acceptable and, to meet anticipated future needs.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>economically viable to extract. If these reserves are to be exploited in future years then building large swathes of property over the area will sterilise the minerals. Access to amenities There is already limited school places for the population in the Killingworth area and additional houses would significantly impact on the education of pupils. Doctors, dentist and other medical services have extensive waiting lists for appointments and again additional population would cripple the existing system.</p>				
805535			LP20151558	<p>Why was Killingworth lane B 1317 not mentioned ? As new junctions are proposed from the K / Moor S.Site, at present, it is a very busy rat run at peak times as is Simonside Way - East Bailey ). North Tyneside Council is spending Â£150million on road infrastructure over the next 5 years. However I am concerned as at present these roads are at full capacity at peak times ! The additional traffic generated by the proposed 2 strategic sites will cause gridlock from Monkseaton to Longbenton / Gosforth Park area. I have spoken to many people who think a new junction is proposed on the A19 from one of the proposed K / Moor roads, the reason for this is they do not know at present a public footpath, farmers lane and tunnel exists ( which is only 5.4 metres wide x 4.2 metres high ) through the embankment of the</p>	Site 22 to 26	AS 7.4 Strategic Site Allocations	<p>A comprehensive Masterplan, in support of the strategic allocations policy, is to be prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable manner. 							development will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including a accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. The exact scale and scope of this is still to be determined.	
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151799	Strategic site allocations at Murton and Killingworth Moor, identified within AS7.4, will require careful planning, phasing and implementation to ensure the capacity of the sewerage network can facilitate development at these sites. With regard to the site at Murton specifically, which is expected to provide up to 3,000 homes, discussions between NWL and potential developers have identified that the site presents the opportunity for surface water separation from the existing combined sewerage network in order to create capacity for foul flows from the proposed development. In this respect, we believe that the wording within AS7.4 must emphasise the importance of proper drainage masterplanning for the sites identified to ensure a cohesive approach to sustainable drainage. We are yet to	Strategic Sites	AS 7.4 Strategic Site Allocations	Comments are noted. The Council is committed to joint working with NWL to achieve the best outcome for sustainable water management and drainage at both Murton and Killingworth to protect against increased flood risk, and contribute where opportunities arise towards the separation of surface water from Howdon Sewerage Works	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.

				<p>hold similar conversations for the sites identified at Killingworth Moor, which are expected to provide up to 2,000 homes, however we believe that there is the opportunity to build upon the positive work already achieved at Murton to facilitate a sustainable approach to drainage across both strategic sites identified in the LPCD. A partnership between North Tyneside Council, the Environment Agency and NWL is currently developing a strategic scheme for sustainable surface water management across the wider Killingworth and Longbenton areas. As part of this scheme, a transfer of surface water flows from Longbenton Letch to Forest Hall Letch is proposed in order to reduce existing flood risk where Longbenton Letch currently discharges to the public sewerage system. In order to facilitate this transfer, upstream attenuation of flows is required in the Forest Hall Letch catchment, in an area presently marked as indicative strategic settlement buffer to the south of the Killingworth Moor strategic site on the policy map published by North Tyneside Council as part of the present consultation. There may be opportunities for developers of strategic sites at Killingworth Moor to work with the existing partnership to further improve surface water management within this area of North</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Tyneside, and we would encourage developers to seek early consultation with the relevant parties as sites come forward for development. We would welcome the opportunity to work with North Tyneside Council and potential developers on the masterplanning of the strategic housing development site at Killingworth Moor, and again believe that emphasis must be placed upon drainage masterplanning within the wording of AS7.4. Due to the imperative nature of sustainable surface water management, we would request that more specific and explicit reference to surface water separation schemes be made within AS7.4 as a pre-requisite to planning permission. Inclusion of flood risk and surface water management as a stand-alone point within AS7.4 would serve to emphasise the importance of these factors within the sustainability of the identified strategic allocations. We suggest that this policy is revisited with a stronger emphasis upon sustainable water management.</p>				
396253	Northumberland Estates	DEVELOPER	LP20151820	<p>Policy AS7.4 relates specifically to the strategic site allocations of Killingworth Moor and Murton. Killingworth Moor has been identified as providing a maximum of 2,000 houses, whilst Murton is identified as providing a maximum of 3,000 houses. It is considered that these maximums should not be set as definite limits, and</p>	Strategic Sites	AS 7.4 Strategic Site Allocations	<p>The strategic allocations policy proposed the delivery of 4,500 homes within the plan period between the two strategic sites, with the masterplanning work currently being undertaken being central to determining the exact balance. 				that a degree of flexibility should be provided to these figures. It is considered that as long as either strategic site can demonstrate a level of deliverability, then a number of houses in excess of the allocated 2,000 and 3,000 should be accepted. The Northumberland Estates supports the promotion of Master-planning by Policy AS7.4. Master-planning between the relevant landowners and North Tyneside Council will be ensure that they are developed in an integrated way with the surrounding communities and local area.			at Murton and Killingworth Moor, guiding development in a coherent, sustainable manner. This is being undertaken with the direct involvement of all key stakeholders, including the consultee, and will build on the work carried out to date relating to highway access, flooding and drainage, landscape and ecology.	policy approach also takes into consideration the outcome of further work on the concept plan and the overall
769763	Bellway Homes (NE)	DEVELOPER	LP20151926	Bellway has secured an interest in the land identified on the attached plan which is bound by Park Lane, Boundary Mill shopping outlet and A 191 New York Road. The site is capable of accommodating c. 270 units typically family units in a range of sizes and types. The site forms part of the proposed wider allocation identified as 'Murton' within Policy AS7.4- Strategic Site Allocations. Bellway fully support the allocation and the proposed release of the site for housing. The site is allocated as Safeguarded land within the saved adopted Local Plan and therefore the principle of housing development in this location is firmly established. Access can be achieved from Park Lane providing direct access into Bellway's site and could be designed to provide a connection into	Strategic Sites	AS 7.4 Strategic Site Allocations	Comments with regard to the Bellway-owned aspect of the site noted. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. his will be undertaken with the direct involvement of all key stakeholders, including landowners and statutory bodies, including the consultee, and will build on the work carried out to date. It is not considered that the requirement to undertake masterplanning is prohibitive to the timely delivery of the site. on a detailed point direct access from Park Lane is not considered in highway terms to be a desirable solution to accessing the site.	Policy for Strategic Sites has been amended with the joint policy for Killingworth Moor and Murton Gap split into separate policies for each, indicating the approxiamte capacity of each site for development. This new policy approach also takes into consideration the outcome of further work on the concept plan and the overall

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the wider allocation. A secondary emergency access could also be achieved from New York Road. Bellway's land interest is capable of coming forward in the short term (0-5 year period) and would meet the deliverable tests set out in the NPPF as there are no known impediments to its delivery. Recognising the importance of the comprehensive delivery of the wider proposed allocation, Bellway are committed to ensuring the development of their landholding would not prejudice the implementation of the wider site in accordance with criteria b) of the Policy. However, Bellway's site could come forward independently and be accessed directly from Park Lane with connections provided to the site boundary to comprehensively connect and integrate with to the wider allocation. Finally, the delivery of Bellway's land interest provides a logical extension to the existing built up area and would not lead to the coalescence of any settlements including Shiremoor with Murton. Bellway owns land in the central element of the Killingworth Moor allocation as delineated on the attached plan. Bellway obtained full planning permission on 23 January 2015 for the redevelopment of the former REME Depot, Killingworth Village (the land identified in red on</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the plan) to provide 125 dwellings with access from the 81317 West Lane (LPA ref: 14/00730/FUL) ("the REME site"). Construction of the site has begun and is it is anticipated that the development will complete in 2018. Bellway also own the land immediately surrounding the REME site (shown within the blue line on the plan and hereafter referred to as "the extension land"). This land provides a logical extension to the REME site and has potential to provide a further 180 units which would be fully deliverable in the short term (i.e. in parallel with and following on from the completion of the REME site). The ownership forms part of the proposed allocation identified as 'Murton' within Policy AS7.4- Strategic Site Allocations. Bellway fully support the allocation. The ownership is within an area allocated as Safeguarded land within the saved adopted Local Plan and therefore the principle of housing development in this location is already firmly established. Whilst the finer details of the comprehensive master plan for the allocation will be refined in due course informed by the technical work still to be undertaken we support the principle and logic of a western access through the approved REME site to facilitate the development of the extension land and wider allocation beyond. The through road approved</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>for the REME site has been designed to cater for additional capacity and to allow for bus penetration to serve the extension land and the wider land as required. Also the junction at the entrance to the REME site on West Lane can be upgraded to a roundabout to increase capacity. Delivery of the REME site and early delivery of the extension land would not prejudice the implementation of the wider allocation and indeed could assist in facilitating its development in accordance with criteria b) of Policy AS7.4. Bellway fully support the Council's approach and identification of land at Murton and Killingworth Moor as forming strategic allocations and look forward to working with the Council and other landowners to bring the sites forward through delivery of a comprehensive master plan. The sites are capable of making a significant contribution to meeting housing needs across the Borough and within the local area. As currently worded, the policy seeks to deliver up to 4,500 homes during the plan period. However, collectively Murton and Killingworth Moor are identified as providing 5,000 units. As such, 4,500 homes should be the minimum to be delivered. Bellway look forward to working with the Council to determine the capacity of the two Strategic Allocations through the masterplanning process. Bellway</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>support the Council's approach in seeking to deliver comprehensively developed masterplans for the sites and are happy to work collaboratively with other landowners to prepare the masterplans based upon a range of technical assessments that demonstrate the deliverability of the sites. However, Bellway have the following specific comments on the policy: "ç Bellway question the level of certainty provided by concept frameworks and suggest the first stage should be the production of the master plan itself informed by supporting technical documents. The master plan should be prepared in tandem with the Local Plan, and sit alongside the Plan, to articulate how the site should be delivered. "ç Bellway agree there is a need to identify a strategy for the timing, funding and provision of infrastructure but suggest that this should be undertaken as part of the comprehensive masterplanning exercise (with the level of provision/contributions commensurate to the scale of each site) so as not to delay or impede the subsequent delivery of individual sites at the planning application stage. "ç Criteria c), d), e), f) and g) refer to the preparation of a number of allocation-wide strategies including access, transport, green infrastructure and landscape. Bellway suggest that</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				these criteria are reworded to refer to their inclusion within the approved comprehensive master plan document rather than requiring these via individual proposals/planning applications. This would ensure that proposals which are in accordance with the approved master plan can come forward post-adoption uninhibited by the requirement for further allocation-wide technical work.				
510094	Natural England	GOVERNMENT AGENCY	LP20151943	Natural England are pleased to see support given to Green Infrastructure (GI) in this policy as the provision of GI provides multi-functional benefits (including alternative recreational opportunities to the coast), however our concerns regarding sites 35-41 at Murton listed under S7.3 Distribution of Potential Housing Development Sites apply equally here. - Natural England note that the potential housing development sites in Whitley Bay have been screened in for Appropriate Assessment (AA), however the potential for cumulative impacts as a result of recreational disturbance from housing beyond the Coastal Zone on Northumbria Coast SPA/Ramsar have not been considered. Natural England is particularly concerned that large allocations such as sites 35-41 at Murton are collectively stated to provide a maximum of 3,000 dwellings. Although further away from the Northumbria Coast SPA/Ramsar than	Strategic Sites	AS 7.4 Strategic Site Allocations	A revised Habitat Regulations Assessment and Appropriate Assessment has been prepared. This identifies a range of proposals to mitigate potential impacts upon international designated sites and has been involved additional consultation with Natural England on the proposed approach.	Improved mitigation measures incorporated into the pre-submission draft Local Plan.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the development sites in Whitley Bay, the number of dwellings proposed is far greater and so recreational disturbance should be considered here in particular. If it has been determined that sites beyond the Coastal Zone are unlikely to significantly affect the Northumbria Coast SPA/Ramsar, this should be justified. When undertaking your Habitats Regulations Assessment (HRA), allocations that are likely to contribute to increased recreational activities should be reassessed, taking into account potential impacts from recreational disturbance both alone and in combination. Unless an allocation is large and in close proximity to the site, recreational disturbance is often a cumulative/in combination effect that occurs as a result of a planar€™s housing distribution. As the location of an allocation is not the primary determinant of whether new residents will visit and affect the SPA/Ramsar (accessibility and attractiveness are key determinants), this assessment would be more effective when considered against overall housing numbers and their strategic distribution. This would avoid a complex in combination assessment of individual allocations. When determining likely significant effects or adverse effects on integrity, the HRA should consider the in combination effects of policies that</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>increase housing in proximity to the coast and promote the coast as a visitor destination. This assessment should consider whether the mitigation measures within policy DM.8 are sufficient to avoid the combined effects of more housing and an attractive and accessible coast. Natural England notes that the assessment of the development sites 35-41 at Murton listed in the local plan are absent from the SA and HRA. However the SA refers to two sites at Murton (116 "" Murton North and 117 "" Murton South) with Murton North and Murton South also the names used in the HRA. It is unclear to Natural England whether sites 35-41 and 116-117 cover the same land. If this is the case then the numbering system used should be consistent for clarity. If this is not the case then given their importance of Murton in delivering the housing development site numbers these should be assessed in the SA and HRA in line with all other development sites.</p>				
805556			LP20151972	<p>I raised a number of comments at the earlier consultation stage, primarily focusing on the following concerns in respect of sites located in and around Killingworth: - Potential for substantial congestion in an area already subject to significant road usage / delays. Many people living in this area travel towards Newcastle and not along the</p>	Strategic Sites	AS 7.4 Strategic Site Allotments	<p>Thank you your comments are noted. The local plan process is key to ensuring that overall needs for growth can be accommodated by ensuring that the right infrastructure is in place to address potential impacts. To inform this ongoing traffic modelling is underway to identify the requirements for new road infrastructure. Meanwhile evidence of flood risk,</p>	<p>An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space,</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>A19 corridor, there is only one road on which to do this, which is already heavily congested especially during rush hour. - Potential for excessive demands for school places, in an area that is already heavily over-subscribed. - Potential for the loss of significant green space. - Potential for the loss of identity, amalgamating Killingworth with surrounding areas, generating a continuous urban sprawl that stretches to the coast. With regret, I conclude that your response offers little in the way of substance to alleviate these concerns. In this respect, I echo the sentiments of an earlier responder, who has recently provided me with details of their concerns: AS7.4.-(d) Access and transport strategy- Killingworth Way, Great Lime Road, Shiremoor By-pass. - Rake Lane, Earsdon By-pass. ( Why was Killingworth lane B 1317 not mentioned ? As new junctions are proposed from the K / Moor S.Site, at present, it is a very busy rat run at peak times as is Simonside Way - East Bailey ). North Tyneside Council is spending Â£150million on road infrastructure over the next 5 years. However I am concerned as at present these roads are at full capacity at peak times ! The additional traffic generated by the proposed 2 strategic sites will cause gridlock from Monkseaton to Longbenton / Gosforth Park area. I</p>			<p>biodiversity value, heritage and character will all be required to be considered and addressed before development could take place.</p>	<p>facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>would like to propose a dual carriageway By-Pass of Backworth to run from the Grey Horse Pub roundabout ( Shiremoor By-pass ) to the A1056, A19 intersection. This would stop the rat run through Backworth and divert traffic away from Holystone roundabout. I would also like to propose closing access to Whitley Road and old Holystone village from Holystone roundabout and use the exit to create an access on to the K / Moor S / Site. This direct connection to the A19 is of vital importance, it is essential if K / Moor is to be developed as proposed and would take pressure off the A1056, B1317, B1505 ( Great lime Road ). A road bridge over the Metro line would be required on K / Moor just as a road bridge over the Metro line is needed on the Murton S.site's single road. I have spoken to many people who think a new junction is proposed on the A19 from one of the proposed K / Moor roads, the reason for this is they do not know at present a public footpath, farmers lane and tunnel exists ( which is only 5.4 metres wide x 4.2 metres high ) through the embankment of the A19, and leads to a roundabout on the Shiremoor By-Pass. On the N.T.C. L.P. map the latter section of proposed new road from the tunnel to Shiremoor By-pass is totally obscured, as 'Northumberland park ' is written across the route. Hence people</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				think a new junction on to the A19 is proposed. The tunnel is only 5.4 metres wide, enough for 2 cars to pass, but no room for a pedestrian footpath !				
396511	GVA	PLANNING CONSULTANCY	LP20151999	<p>Policy AS7.4 set out the proposed allocation of two strategic site allocations at Killingworth Moor and Murton. As set out in the introduction, this representation on behalf of the consortium refers only to the land at Killingworth Moor, notwithstanding any land interests of the consortium at Murton. The consortium is very supportive of a strategic allocation at Killingworth Moor. They have already collated a significant volume of information regarding the masterplanning of the site which demonstrates that the site has no insurmountable constraints and can be delivered, in its entirety, within the plan period. As attached in Appendix 2, the Consortium re-submits a previous illustrative master plan for the site but look forward to engaging with the Council over refinement of the master plan before the next publication of the Local Plan following further discussions and evidence gathering.</p> <p>Notwithstanding the support for the allocation, the consortium has the following concerns and suggested changes to the Policy wording: Number of Houses Policy AS7.4 covers two areas of land; Killingworth Moor and</p>	Site 22 to 26	AS 7.4 Strategic Site Allocations	The strategic allocations policy proposed the delivery of 4,500 homes within the plan period between the two strategic sites, with the masterplanning work currently being undertaken being central to determining the exact balance. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver both of the proposed strategic sites at Murton and Killingworth Moor, guiding development in a coherent, sustainable manner. This is being undertaken with the direct involvement of all key stakeholders, including the consultee, and will build on the work carried out to date relating to highway access, flooding and drainage, landscape and ecology.	Policy for Strategic Sites has been amended with the joint policy for Killingworth Moor and Murton Gap split into separate policies for each, indicating the approximate capacity of each site for development. This new policy approach also takes into consideration the outcome of further work on the concept plan and the overall

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Murton. The overall requirement across the two sites is set out as "up to" 4,500 homes and a "maximum" of 3,000 houses at Murton and a "maximum" 2000 houses at Killingworth Moor. How these figures "up to" and "maximum" figures have been arrived at is not clear within the plan. Policy S7.2 sets out a need for 16,632 homes for the plan period and where (in table 8 of the local plan) total homes completed up to December 2014 (1,633) and existing planning permissions (4,810) are removed from the figure, the outstanding gross requirement is 10,189. Policy S7.3 identifies land for 8,806 new homes. It is understood that any surplus (1,383) would come from windfall sites. As set out in comments to Policy S7.2, the consortium also considers that 100% of the sites with planning permission will not come forward and should be discounted by 10% to account for non delivery. This 10% discounting is widely recognised and has been accepted in recent Examinations into Local Plans. In doing so this would increase the deficit between the need and the supply (notwithstanding whether the OAN should be increased or whether a 20% rather than 5% buffer should be included on the requirement). The consortium is concerned that under Policy AS7.4 it is not justified or in</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>accordance with NPPF (paragraph 47 which seeks to significantly boost the supply of housing) to have a "maximum" restriction on the number of houses proposed on the sites as this unnecessarily restricts the supply, a concern where the allocations within the plan already falls short of the requirement and therefore reliant upon windfalls. Greater certainty on delivery would be achieved by setting an approximate number of houses that could be exceeded where necessary. The Council will be aware that there are a number of strategic allocations in the emerging NewcastleGateshead Core Strategy and the Inspector assessing that plan (concluding it to be sound) set out an "approximate" number of houses that may be delivered from those sites, not setting a ceiling within the allocation thus allowing flexibility. The consortium would suggest this approach for Policy AS7.4 and the removal of the terms "up to" and "maximum" to be replaced with "approximately" and making clear that the number of houses proposed is not a ceiling. The consortium considers that further masterplanning of the sites will provide greater clarity on their capacity and, for the reasons set out above, they do not consider this number allocated to the site should be a ceiling as such an approach would</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>not be sound or consistent with NPPF. Employment Development As set out in comments to Policies S5.1/5.2 the consortium supports 17 ha of new employment at Killingworth Moor, the type and location of which will be dictated by ongoing masterplanning of the site to be agreed with the Council. The consortium considers reference to the new employment development should be included in Policy AS7.4 given that it is a strategic allocation rather than a specific housing allocation. Other Development Policy AS7.4 includes additional development at Killingworth Moor for provision of primary education and new local retail facilities via a new neighbourhood centre for local facilities. The concept of inclusion of these elements is broadly supported subject to masterplanning of the site and clear evidence of need and viability that will be prepared by the Consortium in consultation with the Council. Policy AS7.4 also makes reference to the need for secondary education to be located on either Murton or Killingworth Moor but that the location is not yet confirmed. The consortium retains its position on this until further discussions have taken place with the Council over the need and preferred location. Green Infrastructure The consortium agree that for Killingworth Moor there is a need for green</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>infrastructure including open space and wildlife corridors and these will be included within a masterplan being progressed for the site to be agreed with the Council in accordance with the Policy. The consortium is concerned to see a demarcation of "indicative strategic settlement buffer" on the Policies Map. The consortium do not believe that a detailed buffer needs to be shown on the map particularly as it is described as indicative. The consortium suggests that the Wildlife Corridor should be focused on the Forest Hall Letch watercourse and that this would serve as a strategic settlement buffer between the new development and Palmersville/Forest Hall. The consortium do not believe that the former landfill cell is needed to fulfil such a role so this should be deleted from the buffer. In bullet (d) of Policy AS7.4 it is stated that the access and transport strategy should "maximise" the potential for walking cycling and public transport. The consortium propose that the policy should be to "fully realise" the potential. There has to be a balance between putting paths and buses everywhere and the beneficial links which should be made. Masterplanning The consortium agrees that a masterplan for the sites is required but that it should be agreed and form part</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>of the adopted Local Plan rather than being a requirement after the plan is adopted which would delay delivery of new development on the site. The consortium is familiar with this approach, currently progressing masterplanning in Newcastle and Gateshead where a Core Strategy is about to be adopted including strategic allocations. However, experience from those local authority areas suggests that an agreement on a masterplan as part of the Local Plan would be advantageous in speeding up the delivery of development on the strategic sites and the ability to submit applications quickly after adoption of the Local Plan. The consortium would highlight to the Council that changes were made to the Policies for the NewcastleGateshead Core Strategy strategic allocations by the Inspector. Those changes included that it was not necessary for there to be a single application but that multiple applications would be acceptable. It is therefore welcomed that the Policy AS7.4 recognises (in criterion b) that more than one application would be appropriate provided it does not prejudice the implementation of the whole development. It is the intention of the consortium to work closely with the Council to prepare a masterplan for the site for their full consideration before the EiP. Access and Highways</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				The consortium agrees the need for an access and transport strategy to maximise the potential for walking, cycling and use of public transport and will work closely with the officers of the Council in preparing a strategy for the highways links within the site and the principal connections to Killingworth Way, Great Lime Road, Shiremoor Bypass (under the A19) and the A1056 and including the consented REME site.				
830571	Persimmon Homes	DEVELOPER	LP20152038	Policy AS7.4 planning for strategic site allocations sets out the LPA's approach towards the two large strategic allocation areas of Killingworth Moor and Murton. We are generally supportive of this policy approach and support the allocation of these areas in general however have some specific issues and concerns relating to the requirements of this policy. The policy sets out the overall scope and approximate size of development of being up to 3000 units at Murton and up to 2000 at Killingworth Moor and yet the policy sets up to 4500 during the plan period. More clarity is sought in sub section (a) and (b) showing how these 4500 units are expected to come forward (and to which site). For example: (a) Murton, allowing for future master planning too establish the specific capacity and layout of the site provision for a maximum of 3000(2700 within the plan period)	Strategic Sites	AS 7.4 Strategic Site Allocations	General support for policy noted. A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver both of the proposed strategic sites at Murton and Killingworth Moor, guiding development in a coherent, sustainable manner. This is being undertaken with the direct involvement of all key stakeholders, including the consultee, and will build on the work carried out to date relating to highway access, flooding and drainage, landscape and ecology. This will outline the specific capacity and layout of the site, providing homes in the most suitable areas and at an appropriate scale. Work is currently being undertaken as part of the Masterplanning to determine the exact balance between the two sites . This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and	Policy for Strategic Sites has been amended with the joint policy for Killingworth Moor and Murton Gap split into separate policies for each, indicating the approximate capacity of each site for development. This new policy approach also takes into consideration the outcome of further work on the concept plan and the overall

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				homes at sites 35-41 on the LPCD 2015 policies map, between Monkseaton and Shiremoor: As currently worded the policy suggests that "any application for development is preceded by a comprehensive master plan". This is a two stage planning process which is unnecessary and can be streamlined into one process under existing Development Management processes. Persimmon suggests that the policy is re worded to remove "application" from this to read as follows: "a. Any development is preceded by and is consistent with, a comprehensive master plan prepared collaboratively with and approved by the Council. The master plan will include the whole site which integrates the site with its surroundings communities, wider countryside and town centre." Persimmon has engaged with the other land owners and the Council to progress the consultation master plan for the Murton area. This policy subject to the above alteration is endorsed and supported. A further detailed submission has been made on behalf of the Murton Development Consortium.			networks and retaining significant areas of open space, including accessible space for recreation and leisure. It is not considered that the requirement to undertake masterplanning is prohibitive to the timely delivery of the site, particularly as this is already underway, and is considered essential in order to guide the sustainable development of both sites.	
901149		RESIDENT	LP20152068	I understand the Local Authority's need for a local plan. Central government's proposals on planning and enthusiastic developers have reduced the ability of local people to influence the area in	Strategic Sites	AS 7.4 Strategic Site Allocations	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Killingworth Moor, guiding development in a coherent, sustainable	An indicative Concept Plan identifying potential solutions to secure sustainable development of this area is included in

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>which we live. The development of such a large area of land on Killingworth Moor is a contentious issue. It is my view that the proposed plan does not provide sufficient protection to the Killingworth Village conservation area. The main concern is the road infrastructure proposal; in particular the link between the site and the B1317. This road is unsuitable for the increased volume of traffic from such a development. Another area of concern is the strain on existing amenities i.e.: schools, doctors surgeries etc and the lack of public transport. Given the distance between Murton and Killingworth how can joint facilities be workable? The authority's said a masterplan would be required for the area (sites 22-26). Not much detail on how this would be formulated is given in the plan. This puts residents in the position of commenting on a plan with limited detail and a wish list of proposals. It is easy to be sceptical of the Local Authority's plans. The junction at Palmersville has been constructed leading to Killingworth Moor complete with traffic lights. This, together with the size of the roads proposed on the REME Development leading to the Moor, gives the impression the development was always going to take place. It is my opinion that no further access to the Moor should be granted</p>			<p>manner. This will outline the specific capacity and layout of the site, providing homes -in the most suitable areas and at an appropriate scale. This decision will take account of site constraints and matters relating to ecology, sustainability and deliverability and will ensure the most appropriate balance between land utilised for development whilst supporting wildlife habitats and networks and retaining significant areas of open space, including accessible space for recreation and leisure. This includes proposals for a strategic settlement buffer to prevent merging of existing communities and retain individual character and identity. Central to this is the need to protect the setting of Killingworth Village Conservation Area.</p> <p>As part of the Masterplan, an access and transport strategy will be prepared to identify the most suitable means of delivering the development. This includes measures to maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. The impact on the B1317 will be of key concern, with the objective on minimising additional flows on the existing highway network. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable.</p> <p>In addition, a wide range of road and public transport improvements are programmed, or planned, for North Tyneside in order to tackle both current and future constraints in</p>	<p>the pre-submission draft of the Local Plan. This Plan shows broad areas for wildlife, open space, facilities and potential development. Within these broad areas a wide range of issues and opportunities exist which will be considered further through detailed masterplanning.</p>

				through the REME Development onto the B1317. Access to the site via the A19/Holystone should be considered. A high priority should be the formulation of an amenities strategy to include: schools, surgeries, footpaths and public transport routes. It is important local people have equal input into any development of a masterplan for this site. The developers will be lobbying hard to ensure they get their way and maximise the amount of land released for housing. The masterplan should not be written by the developers and any future proposals for the site should be resisted until a masterplan is agreed.			transport infrastructure - see Policy S10.3 (now Policy S7.3) and the IDP for further detail. This includes working with Nexus and public transport providers in order to identify need for new services and public transport links.  The importance of community services, including schools and GPs, is reflected in Policies S10.13 and S10.1 (now Policies S7.10 and S7.1 ) which outline how the Council will respond so that the infrastructure required is delivered in order to make new development acceptable and, to meet anticipated future needs. The option for the provision of joint services between the two strategic sites will be explored together with providers and key stakeholders in order to delivery the most effective results for both new and existing communities and the wider population.  As part of the next stage of the Local Plan, the Publication , more detailed proposals for the development of the two strategic sites will be outlined. Residents will be given the chance to comment on those proposals through the formal consultation process, helping to shape the future direction of the development and supporting infrastructure and facilities at both Murton and Killingworth Moor.	
808139		RESIDENT	LP20152113	Further to my recent letter, it has come to my attention that further alterations to the Site Ref: 3 5 - 41 Murton have been made but not included in the recent consultation . These concern the offset biodiversity	Site 35 to 41	AS 7.4 Strategic Site Allocations	A comprehensive Masterplan, in support of the strategic allocations policy, is being prepared to deliver the proposed strategic site at Murton, guiding development in a coherent, sustainable manner. 				playing fields. Could existing roads be improved to cope with an increase in traffic rather than create a new one?			maximise the potential for walking, cycling and public transport use and which provide a connected, legible network of streets. Only on successful resolution of the issues related to transport infrastructure will development be considered acceptable. The most appropriate means of access, to this particular parcel and the wider development, will be a crucial aspect of this work. The improvements to the network associated with this site will also help to provide strategic solutions to wider transport issues and constraints. The master planning process will work to find a balance between housing, transport and green infrastructure needs.	
805490		RESIDENT	LP2015705	Killingworth Moor: I agreed with the comments made and suggested to the officers a road could run from Holystone roundabout (A19) on to Killingworth Moor via a road bridge over the Metro line (a road bridge over the metro line is in the plan on the Murton site). This would give traffic direct access from the A19 on to the South East corner of Killingworth Moor. This was suggested in 1996 when the last local plan was under discussion. I attended a consultation meeting held by senior council officers who advocated the road from Holystone roundabout and said only a limited amount of Killingworth Moor could be developed as the smaller supporting road network was limited in traffic capacity.	Strategic Sites	AS 7.4 Strategic Site Allocations	Comments noted. The potential impact of proposals upon the road network and junctions requiring improvement are assessed through traffic modelling work. Ongoing assessments will be undertaken of the required mitigation and phasing of new and enhanced infrastructure.`	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
899469			LP20151294	These sites contain important wildlife corridors, esp. Murton which is a key corridor linking greenbelt land to the river and coast. It does not seem possible to reconcile a policy requirement to protect and enhance green infrastructure and wildlife corridors with plans for such major developments with all the associated transport infrastructure.	Strategic Sites	AS 7.4 Strategic Site Allocations	Currently whilst the site provides an area of open land for wildlife, as largely farmed agricultural land the extent and value of that land for biodiversity is relatively limited. Whilst proposals for development will reduce the overall area of land that is open, a major opportunity exists to improve the quality of the remaining open land for wildlife and biodiversity value with provision of managed areas for wildlife free from intensive farming practices. With the addition, where necessary, of appropriate off site mitigation is also introduced the overall proposals can and will be required to maintain or potentially improve overall biodiversity value.	No amendments proposed
789566	Environment Agency	GOVERNMENT AGENCY	LP20151828	As previously highlighted a number of recent planning applications have proposed direct deep drainage discharges of surface water to the bedrock. These have been particularly problematic at Algernon "" we welcome that the policy recognises deep drainage structures are unsuitable in this area. Mine water levels are currently actively managed across the Local Authority area. On this basis, we consider that such techniques do not provide a sustainable, long term solution due to rising groundwater levels reducing the storage capacity which may lead to groundwater flooding elsewhere. Discharges that concentrate the flow of effluent at one location and bypass some of the soil layers will limit the	Strategic Sites	AS 7.4 Strategic Site Allocations	Thank you for the information, we acknowledge that the ground conditions within North Tyneside mean that discharge into the ground is not always possible.	We have removed the asterisk from the policy and added the information into the supporting text. Whilst the information is important, to keep the policy brief we do not want to include all ground conditions within the policy.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>ability of the ground to attenuate pollutants and protect groundwater. Direct input into groundwater presents a significantly increased risk of pollution. We are seeking to stop cases where discharges are directly into the groundwater through wells, boreholes and shafts. The level of prior examination required to support a proposal to use a borehole may be significantly greater than required for near surface infiltration systems. An environmental permit may be required. On this basis, we would recommend that the asterisk highlights that deep drainage structures are unlikely to be suitable anywhere in the Authority area.</p>				
463028			LP201576	<p>1. There may be a demand for housing in North Tyneside (or there may not), but that does not mean we have to meet the demand. We do not need to destroy all our green areas, which, in our case, were a major reason for moving to Holystone. If it becomes one giant suburb, people will not want to live here. 2. The council have allocated the northern parts of North Tyneside to Green Belt. Green belts normally separate areas of urban development, but in our case, we are separating ourselves from... the green expanses of Northumberland! I would much rather see a Green Heart to North Tyneside, instead of a pointless green belt. If we have to build on green land, let's develop the Green Belt, not the Green Heart. 3. The council should review the empty houses in the area</p>		DM 7.5 Criteria for New Housing Development	<p>Comments noted. Local Planning Authorities are required by National Planning Policy to use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in this Framework, including identifying key sites which are critical to the delivery of the housing strategy over the plan period (Para 47 of the NPPF). Paragraph 7 of the NPPF outlines that there are three dimensions to sustainable development: economic, social and environmental. Paragraph 8 states that these roles should not be undertaken in isolation, because they are naturally dependant.</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>and get them back into use. 4. We should only build on brown-field sites; there are many possibilities in North Tyneside, including the area around Norham Road. I do not think that areas 21, 24, 25, 26, 29 should be developed. Ideally areas 17 and 18 should also be left undeveloped. There has already been a very large amount of building in the Holystone area, including the Stonelea development West of the A19, the Murray Fields development East of the A19, the new houses near Moorview (North of Northumberland Park metro) and the new Forest Gate estate next to Palmersville metro. We should not build even more houses here. Local facilities are already strained, for example Holystone Primary School is already one of the largest in the area and is very over-subscribed. The Holystone Bypass (A191) is already very busy and almost impossible for pedestrians and cyclists to cross at peak times. This greenfield area is well used by walkers and cyclists and is one of the best reasons to live in our area. The extensive network of open spaces and wagon ways near Holystone promotes keeping fit. There are plenty of brown-field sites available, for example Norham Road (I think that is areas 77, 78, 106, 107 on the map). Another suitable site is the field behind Proctor and Gamble, between Whitley Road and the metro line. The derelict buildings near East Holywell could also be a site for houses. There is a very strong local feeling against further development in the Holystone area, as shown by the 3,500 signature petition handed to the council around 2012.</p>

805554			LP20151230	Criteria to include "and no sites in-between Wallsend and Benton to be built upon"! - without this you are oppressing the communities of north wall send, Benton and Holystone and related areas by increasing traffic, removing green space, impacting wildlife, potential for flooding, overcrowding local schools and services etc .		DM 7.5 Criteria for New Housing Development	Comments noted. This policy features a criteria to assess housing planning applications for those sites not included as allocations in the Local Plan. In those cases, applications will be judged on their own merits, in accordance with this policy and all others in the Plan. It is not in the interests of positive planning to have certain areas where those considerations do not apply.	No amendments proposed.
899194	Northumbrian Water Ltd		LP20151648	NWL is broadly supportive of the criteria within this policy.		DM 7.5 Criteria for New Housing Development	Support noted.	No amendments proposed.
755686	Home Builders Federation		LP20151733	44. The HBF is generally supportive of this policy but refers the Council to our overarching comments against policy S7.3 above.		DM 7.5 Criteria for New Housing Development	Comments noted.	No amendments proposed.
900308	Places for People		LP20151788	(Comments with input from Urban Splash) We agree with North Tyneside's priorities for new developments (i.e. encourage a mix of uses, improve access and link with town centre and promote high quality design) and have taken these principles forward with the Smith's Dock development.		DM 7.5 Criteria for New Housing Development	Support noted.	No amendments proposed.
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151800	With reference to development principles more generally, further significance should be assigned to sustainable drainage and flood risk reduction within DM7.5, which presently lacks reference to either topic. This may be effectively integrated within point "d", which refers to the incorporation of appropriate green infrastructure provision, as indicated below: d. Make the best and most efficient use of available land, whilst incorporating appropriate green infrastructure provision and sustainable drainage systems within		DM 7.5 Criteria for New Housing Development	This comment is noted. It is accepted that this criteria could potentially be included... However the points identified within this policy are primarily identified at the specific approach to delivery new housing development. They do not address in detail the wide range of constraints such as biodiversity, heritage and environmental protect - including flood risk. Overall those policies throughout the plan ensure those matters are also addressed in managing future development proposals.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				development; and Inclusion at this point will highlight the links between sustainable drainage and green space, which are not always evident. Having said this, we do welcome the inclusion of a principle within DM7.5 which states that development must demonstrate that it can "be accommodated by, and make best use of, existing infrastructure, and where further infrastructure requirements arise, make appropriate contribution to its provision' (point "e').				
396324	Newcastle Airport	NATIONAL/REGIONAL/ORGANISATION	LP20151838	The plan outlines future population growth and subsequent housing demand. We support the planar's aspiration to produce good quality housing stock to accommodate population forecasts, however, the impact of aircraft noise on potential new housing sites must be carefully considered. In developing new housing, there needs to be a balanced approach to identifying appropriate new sites alongside the continued operation of a major international airport. Current procedures at the Airport ensure that operations protect existing communities, with designated arrival and departure routes to avoid overflying residential areas where possible. The development of new dwellings under a flight path has potential to restrict airport options in terms of arrival and departure procedures. In considering the impact of aircraft noise on developments which may be noise sensitive such as housing, NIA has produced a set of noise contours, up to the period 2030, in line with our anticipated growth as outlined within our master plan. This process is		DM 7.5 Criteria for New Housing Development	Comments noted - this matter will be clarified in the pre-submission draft.	To add.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				consistent with Government policy, as outlined within the Aviation Policy Framework which requires airports to continue to produce contours. While reference is made to noise pollution from aircraft, the airports noise contours do not appear to have been considered for the plan area, the contours not having been reproduced on the Policies Map. NIA would be happy to work with relevant officers to transpose the noise contours onto this map and then assess the proposed noise sensitive development allocations in relation to this, where required.				
510094	Natural England	GOVERNMENT AGENCY	LP20151944	Natural England are pleased to see the support given to GI in this policy, although any new development that may affect Northumbria Coast SPA/Ramsar (alone or in combination) should comply with policy DM8.6 to ensure that it is compliant with the Habitats Regulations		DM 7.5 Criteria for New Housing Development	Comment noted, this will be amended.	"This policy has been identified as having the potential to cause adverse impacts on internationally protected wildlife sites. When implemented, regard should be had to policy DM8.6 that sets out the requirement for appropriate avoidance or mitigation of, or compensation for, any adverse effects." added at para 7.47
807177	Barmoor Ltd	LANDOWNER / BUSINESS	LP20152077	RE New Site: Russell Square It is considered that our client's site would meet the criteria outlined in Policy DM7.5 to identify suitable sites for housing which are not included on the Policies Map. 458389		RESIDENT	LP201567	(Ref Station Road) On the site given planning permission for Persimmon Homes, just how many homes are going to be at an affordable price. The sign up on the site suggests that they are building 5, 4, 3, 2 bedroom homes. How many of these are top end of market homes unaffordable I expect. I wonder??		DM 7.6 Affordable Housing	Comments noted. Comments are regarding a permitted application rather than the proposed policy.	No amendments proposed.
890851		RESIDENT	LP2015166	We are in great need of affordable housing for young people and families.		DM 7.6 Affordable Housing	Policy DM7.6 (now Policy DM4.7) outlines the Councils affordable housing requirements for new housing developments. It states that in all but the most exceptional cases the Council will require affordable housing provision to be made on-site and remain affordable in perpetuity.	No amendments proposed.
588278		RESIDENT	LP2015422	Affordable and social housing should always be 'pepper potted' within developments to avoid stigmatisation. This will be opposed by developers due to perceptions that it makes other units more difficult to sell or of lower value. The wider socio economic benefits must be factored into these decisions. Ironically, social housing has defined space standards often greater than those preferred by commercial developers so this is also an opportunity, as my comments elsewhere, to impose National Space Standards on all developments. The fear that this could lead to developers investing elsewhere can be overcome by ensuring that there is a robust engagement with viability statements and a collaborative approach with other Planning Authorities to achieve a common goal.		DM 7.6 Affordable Housing	Comment noted. As a starting principle the Council is keen to ensure every proposal over the threshold incorporates a proportion of affordable housing to ensure the creation of mixed communities. Within the sites, whilst a "pepper pot" approach is recognised as beneficial there are instances where management issues can arise if affordable homes are dotted across a large site. In these instances affordable homes are proposed in small pockets.	No amendments proposed.

894071			LP2015450	Housing, a decent, affordable home for everyone is paramount and shall be one of the main priorities of the council. The proposed "new council housing and homes by registered providers, 25% of all new homes being affordable" is too low. Increase to a minimum of 40% and give young families the opportunity and aspiration to have a decent home.		DM 7.6 Affordable Housing	Comment noted. The Council is committed to ensuring affordable housing delivery and is pursuing its own programme for new affordable homes in addition to seeking provision as part of private led developments. However, the level of affordable homes sought must respond to the overall economic conditions and viability of development. Seeking too high an affordable need will simply hinder new development leading to fewer affordable homes being delivered overall.	No amendments proposed.
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015472	We note North Tyneside's strategic aspirations and updated assessed needs for growth in policies S5.1-5.2, S6.1-6.3 and S7.1 (now S4.1)-7.2 plus DM7.6, including: i, -i, to build 16,632 net additional new homes between 2011/12-2031/32, at an overall average of 792 net additional new homes per annum and including at least 25% as affordable homes, working with Newcastle City Council and Northumberland County Council to jointly provide for North Tyneside's projected objectively assessed need over the plan period.		DM 7.6 Affordable Housing	Comment noted.	No amendments proposed.
899444	George F White		LP20151308	DM7.6 Affordable Housing In November 2014 the Government amended the National Planning Policy Guidance and released a ministerial statement with respect to affordable housing and section 106 planning obligations. This avoids disproportionate developer contributions on small scale developments of 10 units or less which have a maximum combined gross floor space of 1,000 square metres. The guidance does not make provision for the inclusion of site		DM 7.6 Affordable Housing	Reviewing the current national planning policy guidance the current policy approach in setting a threshold is not considered to be in conflict. The Local Plan is indicating that for schemes of 1 to 9 homes affordable housing will not be sought as a contribution from developers.	No amendments proposed.

				thresholds, ID: 23b-012-20150326, Policy DM7.6 Affordable Housing should be amended to be in line with the recently issued guidance. In addition Criterion b) is unclear and is not in accordance with the NPPF (50) which states with regard to offsite contributions that these should be of "'broadly equivalent value' the words "'or greater than' should be deleted from Policy DM7.6 (b). The term "'volume' is unclear is this implies "'size', in addition it is inequitable to suggest that the greater "'volumes' should be provided than would otherwise be viable as viability is clearly a material consideration in the determination of affordable housing provision and contributions.				
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151348	Policy DM7:6. Affordable housing: CPRE broadly supports this policy. The second paragraph is ambiguous unless it is intended that there are some exceptional circumstances when housing should not remain affordable in perpetuity. Consideration should be given to whether the percentage of affordable housing should be by number of houses or as a percentage of the developed footprint. There is a certain demand for affordable bungalows which would have a proportionately larger footprint than multi-storey housing. CPRE recommends that the policy specifies that any off-site affordable housing should be in the same community as the market housing site, and that if a commuted sum is accepted, a site for the affordable housing must be specified. Both these recommendations are intended to support community cohesion and balance.		DM 7.6 Affordable Housing	Comment noted and scope for clarification agreed,	Reference to "in perpetuity" moved to opening paragraph regarding overall provision of affordable housing.

899194	Northumbrian Water Ltd		LP20151649	<p>NWL considers that Policy DM7.6 should better reflect paragraph 50 of the NPPF, which states that "...policies should be sufficiently flexible to take account of the changing market conditions over time."Further more national planning policy defines specific circumstances where contributions for affordable housing (section 106 obligations) should not be sought from small scale and self-built development. As set out in the Written Ministerial Statement on small scale development, affordable housing contributions should not be sought from developments of 10-units or less, and which have a maximum combined gross floors pace of no more than 1000 sqm. Accordingly, NWL suggest the following changes to the policy: The Council will seek, where viable, 25% of all new homes to be affordable on new housing developments of 11 or more dwellings subject to specific site circumstances and economic viability. The affordable dwelling types and size should have regard to the needs set out in the most up-to-date Strategic Housing Market Assessment. The policy states at least 25% affordable housing will be required and that the Council will seek the maximum amount of affordable housing viably possible. NWL consider such a policy stance to be overly onerous and it provides limited certainty for developers, resulting in time consuming negotiations which could ultimately stall the delivery of housing in the district. The NPPF is clear that developers and land-owners are provided with competitive returns and the NPPG that the cumulative</p>		DM 7.6 Affordable Housing	The comment is noted. Overall the Council is required to set an overall viable proportion of affordable housing development for the plan period. This policy seeks to do that whilst acknowledging the specific viability of development - which may change both as a result of site circumstances and economic conditions at the time. The specific provisions of National Planning Guidance in relation to site thresholds is currently withdrawn.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>effect of obligations should not be set so high as to be at the margins of viability. In setting an affordable housing policy the Council must have regard to the cumulative viability impacts of all policies and obligations (NPPF paragraphs 173 to 177). NWL will reserve judgement upon whether the 25% affordable housing requirement is reasonable until the 2015 North Tyneside Area Wide Viability Assessment has been made available and the assumptions and inputs within it analysed. Furthermore, existing evidence base documents (2010 Affordable Housing Viability Assessment) suggest that when a 25% requirement is applied, almost none of the sites were viable. This problem is further exasperated when the cumulative effects of other proposed plan policies (such as those in relation to the sustainability credentials of new homes) are factored in. Based upon the available evidence NWL consider that the requirement for affordable housing should be reduced. In addition the policy should be re-worded to indicate that the target is an 'up to' target rather than 'at least'.</p>				
755686	Home Builders Federation		LP20151734	<p>45. The policy remains the same as the previous consultation document with the exception that the site size threshold has been reduced to 10 units from 15. The HBFs original concerns relating to the requirement for at least 25% affordable housing on qualifying sites therefore still remains. 46. The HBF does not dispute the need for affordable housing, this is clearly demonstrated by the 2014 SHMA which identifies a net shortfall of 490units per annum. In setting an affordable</p>		DM 7.6 Affordable Housing	<p>The comment is noted. Overall the Council is required to set an overall viable proportion of affordable housing development for the plan period. This policy seeks to do that whilst acknowledging the specific viability of development - which may change both as a result of site circumstances and economic conditions at the time. The specific provisions of National Planning Guidance in relation to site thresholds is currently withdrawn.</p>	No amendments proposed.

				<p>housing policy the Council must have regard to the cumulative viability impacts of all policies and obligations (NPPF paragraphs 173 to 177). Unfortunately at the time of writing the 2015 North Tyneside Area Wide Viability Assessment was not available and as such these comments are based upon the earlier viability work. It is, however, noted that paragraph 7.55 of the plan suggests that a 25% affordable housing requirement to be reasonable. The HBF will reserve judgement upon this until the study as well as the assumptions and inputs have been fully considered. 47. The 2010 Affordable Housing Viability Assessment (AHVA) clearly illustrates viability issues across North Tyneside when a 25% requirement is applied. Table S1 of the AHVA indicates that at 25% almost none of the sites were viable. The viability issues are likely to be further compromised once the cumulative effects of other proposed plan policies and obligations and the governments push towards zero carbon homes are factored in. The NPPG is also clear that the plan must deliver in the first five years and that policies should not be based upon an expectation of future rises in value (at least in the first five years, ID 10-008-20140306). If the market improves sufficiently over the longer term the Council has the ability to amend its affordable housing target through a partial review of the plan. 48. The policy also suggests at least 25% affordable housing will be required and that the Council will seek the maximum amount of affordable housing viably possible. The HBF consider such a policy stance to be</p>

				unjustified. The policy as currently written would not provide any certainty for the development industry and is likely to stall developments through protracted negotiations. The NPPF is clear that developers and land-owners are provided with competitive returns and the NPPG that the cumulative effect of obligations should not be set so high as to be at the margins of viability. 49. Based upon the available evidence the HBF recommend that the requirement for affordable housing is reduced. In addition the policy should be re-worded to indicate that the target is an "up to' target rather than "at least'.				
808917	BDW North East	LAND DEVELOPER	LP20151777	The SHMAA "modelling suggests a net shortfall of 490 affordable dwellings each year across North Tyneside. Given that the councils proposed housing requirement is 792 dwellings per annum, 490 affordable dwellings per annum represents 62% of the overall yearly requirement. This figure is unlikely to be feasible. The council should increase its housing requirement to take account of the shortfall of affordable homes. NPPG para 29 states that "an increase in the total housing figures included in the local plan should be considered where it could help deliver the required number of affordable homes" (Ref ID: 2a-029-20140306). The council must provide for an uplift in housing requirement to provide for the identified need for affordable housing to take account of the shortfall of affordable homes. In policy DM7.6 affordable housing, the council states "to meet a Borough-wide target for at least		DM 7.6 Affordable Housing	The comment is noted. Overall the Council is required to set an overall viable proportion of affordable housing development for the plan period. This policy seeks to do that whilst acknowledging the specific viability of development - which may change both as a result of site circumstances and economic conditions at the time. The specific provisions of National Planning Guidance in relation to site thresholds is currently withdrawn.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>25% of all new homes to be affordable, new housing developments of 10 or more dwellings, or on sites of 0.5ha or more, must include the maximum proportion of affordable housing taking into consideration specific site circumstances and economic viability" BDW note that the 25% target is high in comparison to those set in previous years. The only higher target was 30% in 2007, but this was at the peak of the housing market. The council must provide justification for this target. BDW recognises that the council plans to justify this in their "North Tyneside Area Wide Viability Assessment'. However, this was not available as part of the consultation evidence base. The council has stated 8,560 households out of 91,295 households are in need, 9%. BDW urge the council to justify the 25% affordable housing target. The council must prove 25% remains a reasonable and viable target for housing delivery in North Tyneside. The council must also review the wording of the policy "at least 25%...' and "must include the maximum proportion of affordable housing taking into consideration specific site circumstances and economic viability" BDW would urge the council to reword this policy to provide certainty to the developers on the amount of affordable housing required. Leaving it open to considerations of site specific circumstances and economic viability, may lead to ongoing negotiations, that effectively stall development, ultimately affecting the councils housing delivery. It is the council's responsibility to ensure their</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Local Plan is deliverable. Relying on developers to submit individual EVAs for each site is not considered sound. LPAs are not required to assess the viability of each site but they must demonstrate the viability of their plan through an EVA. The council itself, must ensure that the affordable housing target is deliverable, does not stall development and provides a competitive return to the landowner or developer. In accordance with the NPPF, para 173 the affordable housing requirement set must be viable and ensure sites are deliverable. "To ensure viability, the costs of any requirements likely to be applied to development, such as requirements for affordable housing, standards, infrastructure contributions or other requirements should, when taking account of the normal cost of development and mitigation, provide competitive returns to a willing land owner and willing developer to enable the development to be deliverable" (NPPF, para 173). Viability of the 25% remains to be seen. BDW remain sceptical given that the 2010 Affordable Housing Viability Assessment demonstrated that at 25% affordable housing requirement almost none of the sites were viable. Any viability study undertaken by the council must also take account of the Government's push towards zero-carbon homes and the implications on build costs. Para 174 of the NPPF states that national standards must be considered in relation to the viability testing of the plan. The council must reword the policy to give certainty to developers of the target as a maximum being</p>

				informed by an up to date viability assessment, before the plan can progress. Taylor Wimpey welcome the clarification within the policy that individual site circumstances, including economic viability, will be considered by the Council.				
900788		DEVELOPER	LP20151993	Our client considers that Policy DM7.6 should be amended to better reflect paragraph 50 of the NPPF in order to ensure that sufficient flexibility is afforded to adapt to changing market conditions. In order to ensure greater consistency with paragraph 50 of the NPPF, it is considered that Policy DM7.6 should be amended so that it does not set a minimum target for the Borough, as well as removing the requirement to provide the maximum amount of affordable housing viably possible. The policy should be re-worded as follows: The Council will seek 25% of all new homes to be affordable, new housing developments of 10 or more dwellings, or on sites of 0.5ha or more, subject to specific circumstances and economic viability. The affordable dwelling types and size should have regard to the needs set out in the most up to date Strategic Housing Market Assessment.		DM 7.6 Affordable Housing	The comment is noted. Overall the Council is required to set an overall viable proportion of affordable housing development for the plan period. This policy seeks to do that whilst acknowledging the specific viability of development - which may change both as a result of site circumstances and economic conditions at the time. The specific provisions of National Planning Guidance in relation to site thresholds is currently withdrawn.	No amendments proposed.
396511	GVA	PLANNING CONSULTANCY	LP20152008	The figure of 25% affordable housing is challenging when compared with Newcastle, Gateshead, Stockton and Durham. In this context the wording of the policy should be changed. It starts of by saying the target is "at least 25%" and then states that developments "must include the maximum proportion of affordable housing". There is no maximum "" there is a minimum of 25%. We do not believe that "at least" targets		DM 7.6 Affordable Housing	The target for delivery of at least 25% affordable homes is a borough wide target to meet the boroughs overall needs. This reflects the fact that housing is delivered by private developers - but schemes are also regularly brought forward in north tyneside by RPs themselves and increasingly the Council. In such circumstances affordable housing delivery is frequently if not exclusively 100% of the overall scheme. It is	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				work well in practice. There is no obvious reason why any developer would ever exceed the requirement unless it was a rural exception site or inappropriate development in the Green Belt. Under this policy off-site provision (via a commuted sum) would only be allowed in the "most exceptional circumstances"☒. This appears to be unnecessarily inflexible. Removal of the word "most"☒ would give the council more latitude to achieve the best outcomes for provision in the Borough. The first two criteria for off-site provision seem acceptable but the third does not make any sense and should be removed. It could be re-phrased to say that if it is agreed that the criteria for off-site provision are met then the commuted sum will be calculated to be the equivalent of on-site provision.			therefore consistent with our overall needs, evidence of viability and understanding of delivery that the target for the plan should be at least 25%. For the specific delivery of affordable housing on any given site the Council will seek to maximise the amount of affordable housing that can be delivered without compromising the viability of that developemnt - and with regard to any other development constributions necessary to make the scheme meet the minimum requirements for sustainable development.	
830571	Persimmon Homes	DEVELOPER	LP20152039	Policy DM7.6 sets the Council's target for affordable housing at 25%. Persimmon Homes consider this to be an appropriate level to be viably delivered within the authority. The wording of the policy however sets this as a minimum target for affordable housing. While we don't refute the need for affordable housing within the plan period policies such as affordable housing need to ensure viable development in order for the plan's key aims to be achieved. Wording such as this does not provide the development industry with sufficient comfort to ensure viable development. We propose that the wording of this policy is changed to state "up to 25% affordable Housing"☒ rather than "At least"☒.		DM 7.6 Affordable Housing	The target for delivery of at least 25% affordable homes is a borough wide target to meet the boroughs overall needs. This reflects the fact that housing is delivered by private developers - but schemes are also regularly brought forward in north tyneside by RPs themselves and increasingly the Council. In such circumstances affordable housing delivery is frequently if not exclusively 100% of the overall scheme. It is therefore consistent with our overall needs, evidence of viability and understanding of delivery that the target for the plan should be at least 25%. For the specific delivery of affordable housing on any given site the Council will seek to maximise the amount of affordable housing that can be delivered	No amendments proposed.

				however has concerns relating to the delivery, evidence that this policy rises. We would ask that the Council provide further details on how this policy will be delivered in practice and to clearly show where, how and when these houses will be provided to ensure the policy holds up under future scrutiny. In addition to the above we would these 2500 "" 3000 houses be included in the overall 16632 new homes within the plan period / included in policy S7.3? if so the delivery of these sites is questioned as no evidence of their economic viability and further evidence of funding is available. Given the level of scrutiny that policies are under during an EIP we would advise that specific evidence base is produced to support this.			developers and registered providers. The overall delivery of homes will be art of the overall objectively assessed needs for homes which are described as a minimum.	
891068		RESIDENT	LP2015197	Build flats instead of individual housing! or terraces of housing.		DM 7.8 Range of Housing Size	The Council has commissioned a Strategic Housing Market Assessment (SHMA) that provides evidence on the tenures and sizes of homes that will be required in the Borough. Information from the SHMA (and its future revisions) will be used to ensure housing delivery has regard to the requirements of all household types and sizes.	No amendments proposed.
588278		RESIDENT	LP2015419	There is no reference to the opportunity provided by the National Housing Standards Review which has devolved the setting of spatial standards in new housing to Local Authorities. You will be aware of this and the fact that house size in England is significantly smaller than elsewhere in Europe. The standard arguments against imposing space standards in Local Plans are that they increases house prices and also that Councils		DM 7.8 Range of Housing Size	Comments noted. A new policy will be introduced that reflects new Government requirements for housing standards, including making homes accessible and adaptable.	New policy "Housing Standards" added.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				are not equipped or willing to challenge developers' viability statements. The first point is based on a linear cost/m2 approach to design and construction which is not necessary and should be challenged so that innovative projects are encouraged and supported. Recent legal judgements have empowered Councils to require full commercial data underpinning viability statements, ensuring that they can be forensically and successfully challenged.				
588278		RESIDENT	LP2015425	The National Housing Standards Review provides the opportunity for Local Authorities to set spatial standards for housing. This opportunity should not be missed. Houses in England are significantly smaller than elsewhere in Europe, as demonstrated by the RIBA in it Space and Light research submitted to the Review. The argument that the market needs smaller starter homes at affordable prices should be turned into a challenge to developers to stop thinking in a linear fashion about Â£/m2 and be much more innovative about the way they deliver housing. This could be by providing shell units for completion using sweat equity etc for example. Design codes would assist with this. Elsewhere I have pointed out that the fear of investment going elsewhere, to areas which do not impose space standards should be challenged through robust and forensic responses to viability statements.		DM 7.8 Range of Housing Size	Comments noted. A new policy will be introduced that reflects new Government requirements for housing standards, including making homes accessible and adaptable.	New policy "Housing Standards" added.
467822		RESIDENT	LP2015869	Caravans can be used as a good home for mum and dads with one or two kids and maybe a dog and a cat. Site with bar and shop and a pool maybe sea water.		DM 7.8 Range of Housing Size	Caravans are not considered suitable family homes.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
899194	Northumbrian Water Ltd		LP20151650	NWL support the amendments to the policy to make it less prescriptive and to provide flexibility in enabling housing needs to be met in accordance with paragraph 14 of NPPF (which confirms that "Local plans should meet objectively assessed needs with sufficient flexibility to adapt to rapid change.") The 2014 SHMA, or any successor document, provides the most up to date information and should be used to provide the context for the range of housing provided. It is, however, important that these documents alone do not dictate the mix of housing on individual sites. NWL recommend that issues of market demand, site constraints and market demand are also important considerations and that this should be included within the wording of the policy.		DM 7.8 Range of Housing Size	This comment is noted, policy on the mix and type of housing provision has been amended. The purpose of the policy is to provide a guide to housing delivery that has regard to the latest available evidence - in particular that included within the Strategic Housing Market Assessment. This is in keeping with the requirements of national policy. The policy does not however specifically require that individual developments should match the housing mix set out within the SHMA with this open to applicants to propose a housing mix for development that meets their requirements for commercial viability.	No amendments proposed.
755686	Home Builders Federation		LP20151735	50. The HBF supports the removal of the prescriptive requirements from this policy which were included in the previous consultation, this reflects some of our previous concerns with the policy. 51. It is recognised that the 2014 SHMA, or successor document, provides the most up to date information and should be used to provide a plan-wide context for the range of housing provided. It is, however, important that these documents alone do not dictate the mix of housing on individual sites. The HBF recommend that issues of viability, market demand and site characteristics are also considerations. This could either be included in the policy or background text. The Council will also need to be careful that the policy does not conflict with policy DM7.10 Large		DM 7.8 Range of Housing Size	This comment is noted, policy on the mix and type of housing provision has been amended. The purpose of the policy is to provide a guide to housing delivery that has regard to the latest available evidence - in particular that included within the Strategic Housing Market Assessment. This is in keeping with the requirements of national policy. The policy does not however specifically require that individual developments should match the housing mix set out within the SHMA with this open to applicants to propose a housing mix for development that meets their requirements for commercial viability. The comment in relation to potential conflict with positive support for executive housing is also noted - however, given the	No amendments proposed.

				Executive Housing.			means of implementation of both policies and the identification of a demand for larger homes within the current SHMA there is not considered to be a fundamental conflict.	
830571	Persimmon Homes	DEVELOPER	LP20152041	Policy DM7.8 is supported and considered logical and grounded in evidence.		DM 7.8 Range of Housing Size	Support noted.	No amendments proposed.
899444	George F White		LP20151309	DM7.9 Self Build Policy DM7.9 Self Build is general supported as acknowledging the increased demand for this type of home in line with government aspirations. However, the inclusion of "encouragement to consider' on sites of 200 homes the inclusion of 10% of a sites net developable area for self-build appears to be arbitrary and unjustified. The SHMA 2014 makes reference to self-build but simply reiterates the Council's intent rather than provided detailed evidence for this. This part of policy DM7.9 should be deleted from the policy.		DM 7.9 Self Build	Comment noted... the Council remain keen to encourage custom and self build development and the provision of land that for such construction is a key constraint to its delivery. Making room for custom and self build development within larger residential development proposals is therefore a key opportunity. However, it is acknowledged that specific reference to a 10% land area does not add greatly to achieving the overall objective.	Policy amended to read, "For housing developments over 200 homes the Council will encourage applicants to consider (where economically viable) opportunities to set aside a proportion of the site's net developable area for custom and self build housing development."
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151350	Policy DM7.9: Self Build: CPRE supports this policy.		DM 7.9 Self Build	Support noted.	No amendments proposed.
755686	Home Builders Federation		LP20151736	52. The policy seeks to achieve at least 10% of a sites net developable area for self-build plots on sites of 200 or more. The achievement of such a requirement would have significant implications upon the viability of the site and on this basis may restrict developments coming forward. It is therefore recommended that the final paragraph be deleted.		DM 7.9 Self Build	Comment noted... the Council remain keen to encourage custom and self build development and the provision of land that for such construction is a key constraint to its delivery. Making room for custom and self build development within larger residential development proposals is therefore a key opportunity. However, it is acknowledged that specific reference to a 10% land area does not add greatly to achieving the overall objective.	Policy amended to read, "For housing developments over 200 homes the Council will encourage applicants to consider (where economically viable) opportunities to set aside a proportion of the site's net developable area for custom and self build housing development."

396511	GVA	PLANNING CONSULTANCY	LP20152009	We applaud the aspiration of delivering 10% of new units through self-build mechanism. This is an aspiration which we share. It is nonetheless challenging from a very low base. It would be important to identify a part of a site and a phase of development which lent itself to self-build. It might be possible to incentivise this phase by ensuring that they did not trigger financial contributions or affordable housing targets. It might be advisable to also allow custom-build homes within policy DM7.9.		DM 7.9 Self Build	Comment noted... the Council remain keen to encourage custom and self build development and the provision of land that for such construction is a key constraint to its delivery. Making room for custom and self build development within larger residential development proposals is therefore a key opportunity. However, it is acknowledged that specific reference to a 10% land area does not add greatly to achieving the overall objective.	Policy amended to read, "For housing developments over 200 homes the Council will encourage applicants to consider (where economically viable) opportunities to set aside a proportion of the site's net developable area for custom and self build housing development."
830571	Persimmon Homes	DEVELOPER	LP20152042	Policy DM7.9 sets out the Council's approach towards self build properties. Persimmon has explored this market and are one of the only national developers currently utilising this approach within the North East. We do not object to this policy on the principle as including "support" self build properties however this policy goes too far in requiring self build on sites over a certain threshold, as such we strongly object to the policy as worded. We question the grounds on which Council are trying to insist that any scheme over 200 units which came forward that did not include a self build element. It seems unclear how a decision maker would apply this policy and seems to suggest that the only argument available would be one of economic viability which is overly onerous and completely unjustified.		DM 7.9 Self Build	Comment noted... the Council remain keen to encourage custom and self build development and the provision of land that for such construction is a key constraint to its delivery. Making room for custom and self build development within larger residential development proposals is therefore a key opportunity. However, it is acknowledged that specific reference to a 10% land area does not add greatly to achieving the overall objective.	Policy amended to read, "For housing developments over 200 homes the Council will encourage applicants to consider (where economically viable) opportunities to set aside a proportion of the site's net developable area for custom and self build housing development."
893716		RESIDENT	LP2015347	Just a note to say how strongly I support the designation of the Benton curve (adjacent to the Oval in NE12) as a wildlife corridor. I am so pleased the local authority has recognised the environmental value of this land and I'm		Biodiversity and Geodiversity	Support noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				sure I speak on behalf of all the local residents who would hate to see it developed in any way.				
893910		RESIDENT	LP2015367	I would like to register our strong support of the designation of the above disused railway line [Disused railway adjoining The Oval and North Avenue Benton] known as Benton Curve as a wildlife corridor as put forward in the new North Tyneside Local Plan.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
893914		RESIDENT	LP2015369	I would like to express my support for the proposal to designate the old railway track known as the Benton South West Curve as a wildlife corridor.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
472648		RESIDENT	LP2015399	We should like to place on record our strong support for the North Tyneside Council's designation of the Benton Curve disused railway line as a wildlife corridor. With the huge proliferation of building on almost all of the local green field areas (completed, under construction & proposed) this section is part of one of the few remaining wildlife routes into & out of the Rising Sun Country Park, which is rapidly being isolated by the developments encircling it.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
894349		RESIDENT	LP2015405	I wish to strongly support the designation of the Benton Curve as a wildlife corridor - my husband is of the same opinion.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
894349		RESIDENT	LP2015406	I wish to strongly support the designation of the Benton Curve as a wildlife corridor. I am aware that this area is losing many of its green spaces for housing but we must protect the wildlife. It will diminish greatly if said wildlife is confined to smaller and smaller areas and unable to move from one area to another freely and safely. As a resident of the area concerned, I hope that the local wildlife will		Biodiversity and Geodiversity	Support noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				be enjoyed for many years to come - and the only way forward is to protect what we have before it is too late.				
894634		RESIDENT	LP2015429	I have lived at 10 The Oval, Benton for 50 years and my house is directly opposite the disused railway line. I was extremely happy to learn that there was potential for the re-designation of the Benton Curve as a wildlife corridor. In this day and age of housing etc it is refreshing to think that the council would like to designate this land in this way. Any other development of this land would be hugely disruptive and in my view totally unacceptable.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015505	Paragraph 8.18 The Northumberland Wildlife Trust welcomes the recognition that those ecological features outside of designated sites provide important and invaluable contributions to local biodiversity. This statement remains current.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
898437		RESIDENT	LP2015800	I am writing to express my strong support of the local authority in achieving the designation for the disused railway at the Benton Curve, as a wildlife corridor. The need for the appreciation of wildlife in our local area is highly important. The children in the area love to watch the birds and with the sight of the odd fox and plenty of little hedgehogs, causes much excitement. There is little enough for our children to get excited about, in these troubled times and the loss of such a lovely bit of nature would be devastating to our little community here in Benton.		Biodiversity and Geodiversity	Support noted.	No amendments proposed
468254		RESIDENT	LP2015811	I am writing to applaud the decision of the Council to protect the Benton Curve and		Biodiversity and	Support noted.	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				adjoining field from possible housing development which would be wholly inappropriate in this conservation area. Furthermore the curve is a valuable wildlife corridor greatly appreciated by local residents.		Geodiversity		
898546			LP2015837	The proposed 'wildlife corridor' at the disused railway in Benton is a good idea. Firstly, that area of railway may end up being reused for its original intention one day. This is one reason why it should not be built on now. In the meantime, it provides a secluded area for wildlife to go. The airport may one day wish to reuse the land as a link between the mainline and the metro or for some similar purpose. I strongly support the use of the Benton curve as a wildlife corridor.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
898969			LP2015996	Is the council going to support local farms with protecting and enhancing biodiversity, so species such a Corn Bunting, Turtle Dove can return and be safeguarded, whilst protecting populations of Yellowhammers and Barn Owls? The form two species were once common throughout the UK including the North Tyneside region, whilst continuing development such as housing is threatening the current range of the latter two species.		Biodiversity and Geodiversity	Comments noted. Policy DM5.5 (was DM8.5) 'Managing effects on Biodiversity and Geodiversity' include all types of species, flora and fauna. It states that 'All development proposals should: a. Protect the biodiversity and geodiversity value of land, species and buildings and minimise fragmentation of habitats and wildlife links; and b. maximise opportunities for creation, restoration, enhancement, management and connection of natural habitats; and C. incorporate beneficial biodiversity and geodiversity conservation features providing net gains to biodiversity unless otherwise shown to be appropriate.	No amendments proposed.
898573			LP20151053	I urge the council and planning officers to maintain the Wildlife corridors at Benton Curve and Benton triangle for the animals birds and plants that inhabit and use those		Biodiversity and Geodiversity	Comments noted. Benton Curve and Triangle are not included in this of the Local Plan as suggested development sites and are proposed to be retained as green space.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				areas.				
898964			LP20151068	3. I could not find anything in the plan that explained the wildlife corridors properly. Looking at the map some of these cross dense housing areas.		Biodiversity and Geodiversity	Comment noted. North Tyneside Local Plan is also supported by a suite of evidence based documents. The North Tyneside Green Infrastructure Strategy provides more detail on Wildlife Corridors and can be found at <a href="http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=559143">http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=559143</a> . Alternatively if you wish to view a paper copy residents are also welcome to come and view the document at our council office.	No amendments proposed.
685823	North Tyneside Green Party		LP20151102	These comments are for S8.4 but the 'Add' button didn't work Green Party The proposed development of the land at Murton and scale of land allocated does not seem to support the requirement to give priority achieving the objectives and targets set out in the Biodiversity Action Plan, in particular in relation to the identified target area Murton within the BAP for creation and enhancement of up to 5 linear kilometres of Scrub & Hedgerow, and up to 10ha of new native scrub/shrub land. The proposed development plot infringes on an identified wildlife corridor which is designated as a priority transport route. 8 acres of the Murton plot is already set-aside to be retained as un-developed grassland and wetland area under a planning obligation to provide offset habitat for a development elsewhere in the borough. Areas of this offset land are also infringed by the proposed development, particularly priority transport infrastructure. The plan does not		Biodiversity and Geodiversity	Comments noted. North Tyneside Council is aware that a number of constraints exist on site and does not expect the whole of the site to be developed. As shown in Policy AS7.4 (now S4.4), North Tyneside Council will ensure a master plan is created for the strategic site allocations in order to ensure that development not only meets a housing need but also enhances biodiversity and geodiversity.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				identify or accept the existence of this land at all. It is imperative that the unavailability of this land is made clear in the development plan, and that any development proposal is considered in light of this land.				
899433			LP20151265	I am responding on behalf of my husband and myself. Firstly, we very much welcome the decision to remove the Benton Triangle site (previously site 14) from the list of potential development areas. Satisfactory vehicular access to this area would be virtually impossible to arrange. Also, this area is a valuable "breathing space" which is well-liked by local residents (including ourselves) and we are excited about the recent plans by local residents to develop it further as a community resource.		Biodiversity and Geodiversity	Support noted.	No amendments proposed.
			LP20152233	Wildlife corridor and fields used by many dog walkers and horse riders.		Biodiversity and Geodiversity	Comment noted.	No amendments proposed.
898219			LP2015816	There will be more chance of flooding; ( we were flooded in 2012).		Flood Risk	Comment noted. National and Local Policy prevent from any increase in flood risk.	No amendments proposed.
805689			LP2015896	Having reluctantly accepted that new housing will likely be built behind my estate, I would simply ask that all flood defence - and other infrastructure planning is agreed and budgeted for (whether by developers or taxpayers) before a single sod of earth is lifted.		Flood Risk	National and Local Policy prevent from any increase in flood risk. A Flood Risk Assessment will be produced for all major housing development. This will include plans for any flood prevention works required with the new development.	No amendments proposed.
805543			LP20151088	Flooding has been grossly underestimated by council officials and effectively swept under the carpet. The policy of covering North Tyneside with bricks will result in monumental flooding in Wallsend and adjacent areas.		Flood Risk	Comment noted. National and Local Policy prevent from any increase in flood risk. The Council will also continue to work with stakeholders like Northumbrian Water, the Environment Agency and the Lead Local Flood Authority to continue to focus on flood reduction works and surface water	No amendments proposed

							separation schemes.	
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151802	Our general response to this section is that it would be beneficial to combine, or at the least cross-reference, the content of Water Management in Section 10 with that contained in the Flood Risk section. We understand that North Tyneside Council considers that water management has a place within the wider topic of infrastructure, but it is our opinion that flooding should not be entirely separate from water management due to the inherent linkages between the topics. For example, upon reading the current document, the reader would read the policy and supporting text on flood risk and take from it limited reference to sustainable drainage. It is our opinion that the current structure does not form a particularly user-friendly document with regard to water management.		Flood Risk	Comment noted, agree that amendments are required.	Two water sections have been combined into one Water Environment chapter.
805252		RESIDENT	LP201544	I agree that North Tyneside should have a robust plan to preserve what little green or open space we have left and God forbid we have developers trying to build on greenbelt land. I understand that having this plan will give the Council more power to counter the house builders demands. It has got to stop somewhere. The houses that are being built are out of the price range of most people anyway. The only green oasis is Gosforth Park nature reserve which I visit frequently but I fear even that is not safe. We won't have any wildlife left if it cannot move around the area. And the term wildlife corridor is often used to refer to a belt of rough ground 20 metres		Green Infrastructure	Comments noted. The Local Plan encourages the use of brownfield land and contains many potential development sites on brownfield land. However evidence on population growth and housing needs means that we also need to look towards sustainable greenfield sites.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				wide. This will be the case at East Benton Rise and that's only because there are pylons in the way. I know people have got to live somewhere but brownfield sites should and must be considered first. Please do everything you can to stop the indiscriminate building and to preserve what is referred to as our heritage by giving us some places where we can enjoy the open air in relative peace and quiet without having to travel out of the area for miles.				
894366		RESIDENT	LP2015390	We would like to support the councils plan to re-designate the disused railway at the Oval and North avenue (Benton curve) into a wildlife corridor		Green Infrastructure	Support noted.	No amendments proposed.
894370		RESIDENT	LP2015391	I'm writing in support of the new North Tyneside council plan to designate the disused railway line (Benton Curve) as a wildlife corridor. As a resident in the area 15 The Grove NE12 9PE I am acutely aware of the mass of development happening in our area and the need to preserve areas for recreation and greenery for future generations. Please could you register this preference which many residents in the area would be in agreement with .		Green Infrastructure	Support noted.	No amendments proposed.
894375		RESIDENT	LP2015398	The Benton Curve Disused Railway Line: This disused railway line has been owned by the Airport Authority for a number of years on the understanding that it would be maintained as a wildlife corridor. It is now well established as such but suggestions that the line may now be sold off for development is totally unacceptable ,this must not be allowed to happen especially when local residents can see what a marked improvement there has		Green Infrastructure	This site has been removed from our list of proposed housing development sites.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				been on the wildlife since its designation. The line must be maintained in its current form regardless of ownership.				
805471			LP20151126	A wildlife corridor should be maintained however the building of huge estates at either side of this and also next to the Rising Sun country park will impact negatively on this by encroachment and traffics both footfall and vehicular.		Green Infrastructure	Comments noted. Although some designated sites have wildlife corridors running through them there is no reason to consider why these sites could not accommodate future development whilst adhering to the policies and maintaining a linked workable network of wildlife corridors.	No amendments proposed.
472456		RESIDENT	LP20151400	Proposed wildlife corridors are not based on sound assessment and are compromised by planned development and new roads. They do not meet NPPF requirements for establishing coherent ecological networks.		Green Infrastructure	Comments noted. Paragraph 117 of the NPPF states that Local Planning Authorities should identify and map components of the local ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect them and areas identified by local partnerships for habitat restoration or creation. There is no definitive methodology for producing a Borough ecological network map. However we have drawn heavily on external resources, including National Planning Policy and Natural England's work. Alongside the Local Plan a number of additional evidence based studies and guides have been developed, including the North Tyneside Green Infrastructure Strategy (2015). As part of this strategy North Tyneside's Wildlife corridors have been reviewed following significant changes in the landscape since the previous GI strategy and UDP. In order to produce North Tyneside's Wildlife Enhancement Corridors (WEC), for	No amendments proposed.

							<p>the emerging Local Plan it is essential that a baseline map with all existing green space was produced. This is in line with Natural England's recommendations for opportunity mapping and habitat networks. Working with organisations and individuals in particular with North Tyneside's Ecologist, existing designated sites and valuable habitats were first mapped on GIS. Clusters of habitats and sites which form the core wildlife areas for the Borough were then identified. This then led onto plotting network links between the core areas. Potential buffers, links and stepping stones were created to produce large habitat areas, and to create a functional wildlife network. Outside the network, wildlife habitats and sites will continue to be managed and protected, and can be buffered by habitat creation and appropriate management. It is recognised that the additional development proposed in the Local Plan could have indirect impacts on biodiversity and the use of open space for recreation. In preparing site allocations, North Tyneside Council has considered the potential impact of each site allocation on biodiversity and green spaces assets. Where new development occurs North Tyneside Council will seek on or off-site provision resulting from recreational pressure on existing Green Infrastructure sites, when practical. Although some designated sites have wildlife corridors running through them there is no reason to consider why these sites could not accommodate future development whilst</p>

							adhering to the policies and maintaining a linked workable network of wildlife corridors.	
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151801	Within commentary surrounding green infrastructure, we believe that there is the opportunity for further reference to be made to sustainable drainage and its potential to be an integral part of green infrastructure. This would enable green infrastructure to provide further benefits in the form of improved water quality and reduced flood risk, whilst continuing to deliver the additional benefits that are more prominent within the supporting text of this section, such as amenity value and biodiversity enhancement. It is our belief that the concept of green infrastructure must include notions of sustainable drainage, and that in reality the two cannot be truly separate. We therefore suggest that this section is revisited with a view to adding greater emphasis to these linkages.		Green Infrastructure	The water policies have been moved and grouped together in order to provide further clarity and strengthen the policies. The Green infrastructure Strategy which sits alongside the Local Plan has also been amended and updated.	Amendments made.
396269	English Heritage	GOVERNMENT AGENCY	LP20152163	In dealing with the issue of Green Infrastructure, it should be borne in mind that many components of it are heritage assets in their own right, such as the area's waggonways.		Green Infrastructure	Comments noted. Information will be added.	"Many components of the green infrastructure network provide a setting to heritage assets or are heritage assets in their own right, such as the area's waggonways." added to para 8.2 (now para 8.3).
901309	Council for British Archaeology North	NATIONAL/REGIONAL/ORGANISATION	LP20152216	We are supportive of the scope is being made for biodiversity and well-being within the plans. "Many components of the green infrastructure network provide a setting to heritage assets or are heritage assets in their

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				routes being used in the likes of footpaths and cycle trails as green corridors also possess a historic component and that should be emphasized, not only for their investigation, but also in their presentation to members of the public wherever possible (such as in your AS1.5c, 5.13, DM9.2b and 9.2d, S10.3.3a).				own right, such as the area's waggonways." added to para 8.2 (now para 8.3).
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015658	As you will be aware, the North Tyneside Council area has been subjected to coal mining which will have left a legacy. Whilst most past mining is generally benign in nature, potential public safety and stability problems can be triggered and uncovered by development activities. Within North Tyneside there are approximately 622 recorded mine entries and around 161 coal mining related hazards have been reported to The Coal Authority in the area. In addition to these legacy features the plan area contains recorded shallow coal workings, probable shallow coal workings, thick coal outcrops, past surface coal mining all of which constitute potential risk to future development. There are also 9 mine gas sites within the Council area and we have granted 128 permit applications in the area for parties to disturb, intersect or investigate our coal assets. Approximately 29% of North Tyneside is within the "Development High Risk" area, i.e. the area in which mining legacy risk features are present. Mining legacy features are concentrated across the northern and eastern three quarters of the area, although individual features do also exist in the south-west quadrant. Mine entries may be located in built up areas, often under buildings where		Minerals	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the owners and occupiers have no knowledge of their presence unless they have received a mining report during the property transaction. Mine entries can also be present in open space and areas of green infrastructure, potentially just under the surface of grassed areas. Mine entries and mining legacy matters should be considered by Planning Authorities to ensure that site allocations and other policies and programmes will not lead to future public safety hazards. Although mining legacy occurs as a result of mineral workings, it is important that new development recognises the problems and how they can be positively addressed. However, it is important to note that land instability and mining legacy is not a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new development is safe, stable and sustainable. As The Coal Authority owns the coal and coal mine entries on behalf of the state, if a development is to intersect the ground then specific written permission of The Coal Authority may be required.</p>				
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015664	<p>Paragraphs 8.50, 8.51 and 8.52 Support “ The Coal Authority supports acknowledgement in these paragraphs that North Tyneside has a strong history of mineral extraction and that the area is located in an area of shallow coal.</p>		Minerals	Support noted.	No amendments proposed.
466900	Mineral Products Association	NATIONAL/REGIONAL/ORGANISATION	LP20152145	<p>The Mineral Products Association (MPA) is the trade association for the aggregates, asphalt, cement, concrete, dimension stone, lime, mortar and silica sand industries. 				constrain potential future use for these purposes;" In view of this national policy requirement we believe that the final part of the last sentence of this paragraph should be deleted from the Local Plan as being unsound.				
396412	Northumb erland Wildlife Trust	OTHER / LOCAL ORGANISATI ON	LP2015490	Whilst there are positive aspects to the Local Plan, Northumberland Wildlife Trust has considerable concerns, primarily relating to policy content, landscape connectivity and the large allocations of green land for development. We consider that such issues must be addressed to ensure that the future growth of North Tyneside is fully sustainable for both people and wildlife. NWT feels that the plan is based on growth rates which are overly-ambitious and ignore earlier consultation feedback showing a public opinion for a lower rate of growth to save valued green spaces. In addition, evidence provided by North Tyneside Council to the examination in public for Newcastle City Local Plan, stated a lower anticipated growth rate than have been used in preparation of this plan. It is inconceivable that such a dramatic change would be probable. Given this, NWT believe that there is no evidence-based justification for the safeguarding of additional land for development beyond the Plan period, therefore safeguarded sites should be removed. Whilst a number of alterations have been made since the last consultation, many of them welcomed, NWT still considers that much of the plan does not to meet the requirements of National Planning Policy Framework, in particular paragraphs*: i, 81 - positively to enhance the beneficial use of the		The Natural Environment 8	Comments noted. The growth rate identified within the 2015 of the Local Plan is based on the most up-to-date population projections. Safe-guarded land has been identified in order to meet longer-term development needs which go beyond the plan period. NWT's specific issues with the plan are dealt with individually.	No amendments proposed.

				<p>Green Belt i, 109 - The planning system should contribute to and enhance the natural and local environment by: o recognising the wider benefits of ecosystem services; o minimising impacts on biodiversity and providing net gains in biodiversity where possible, contributing to the Governmental€™s commitment to halt the overall decline in biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures; i, 110 --In preparing plans to meet development needs, the aim should be to minimise "i adverse effects on the local and natural environment. i, 114 - Local planning authorities should: o set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure; and o maintain the character of the undeveloped coast i, 117 - To minimise impacts on biodiversity and geodiversity, planning policies should: o identify and map components of the local ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect them and areas identified by local partnerships for habitat restoration or creation; i, 118 - proposed development on land within or outside a Site of Special Scientific Interest likely to have an adverse effect on a Site of Special Scientific Interest (either individually or in combination with other developments)</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>should not normally be permitted. The LPA should be planning positively for biodiversity, seeking net gain and producing a coherent and functioning wildlife corridor network. Many of the current allocations for development, such as sites 22-26, 35-41 and 109 do not meet this and will ultimately result in a net loss of biodiversity with fragmented small areas of habitat, not linked by a workable network of wildlife corridors. Furthermore, NWT consider that the LPA are not planning positively for biodiversity and not meeting the requirements of NNPF by failing to produce a strategic map of identified areas for biodiversity off-setting, mitigation, compensation and wildlife habitat creation. Indeed NWT has met with Council representatives and proposed this prior to the publication of this and this has not been included.</p>				
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015501	<p>The Northumberland Wildlife Trust would have welcomed a more visionary approach to Natural Environment policies; ones that truly push towards ecological sustainability and not one that effectively looks to minimise the effects of development. In order to produce this, we feel that an ecological audit and subsequently improved strategy would be useful. This statement remains current, however we welcome some of the changes made in light of previous comments.</p>		The Natural Environment 8	<p>Comments noted. 							accordingly. This includes ensuring provision for biodiversity.	
805543			LP20151087	Hypocrisy. The council are determined to cover North Tyneside with bricks at any cost.		The Natural Environment 8	Comments noted. North Tyneside Local Planning Authority must find a balance between social, economic and environmental needs. North Tyneside recognises the importance of the natural environment and sets out a number of policies in order to manage, protect and enhance it. For instance Policy S5.1 outlines that 'The council will seek the protection, enhancement, extension and creation of green infrastructure in appropriate locations within, and adjoining the Borough. Where deficiencies in the quality of green infrastructure and in particular types of green infrastructure are identified in relevant up-to-date evidence, improvements will be targeted to those areas accordingly.	No amendments proposed
396412	Northumb erland Wildlife Trust	OTHER / LOCAL ORGANISATI ON	LP2015502	Whilst the Northumberland Wildlife Trust is in support of this policy, we note that the Local Authority will need to fund the "relevant up-to-date evidence" base, as at present this information is not available. This statement remains current. Paragraph 8.2 and 8.4. Whilst we welcome the acknowledgment of the benefits of Green Infrastructure, it should be noted that the area within Green Infrastructure needs to be large enough to perform all these functions listed. We question the allocations in the Local Plan at present and how these will provide sufficient area for green infrastructure and to provide all the functions the document requires it to. This statement remains current. This policy		S 8.1 Strategic Green Infrastructure	Comment noted. The 'appropriate locations' will differ on a site by site basis and will be determined through the planning application process. Please note this policy number has now changed to S5.1.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				states that "the Council will seek the protection, enhancement, extension and creation of green infrastructure in appropriate locations€². NWT would seek clarification on where the "appropriate locations€² are? We suggest that the LPA should produce a detailed strategic plan for areas of GI, as well as mitigation and compensation sites for various developments. This would enable a targeted approach to GI protection, linkages, enhancement, extension and creation, as well as biodiversity conservation, enhancement and creation thus allowing the LPA to meet Paragraph 114 to plan positively for the creation, protection, enhancement and management of networks of biodiversity.				
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015545	Furthermore, we do not consider the wildlife corridor allocations to be either functional or accurate to what is on the ground. These appear to be very loose links between small areas of green land (a lot of which is either currently allocated for development or is allocated in this new Local Plan) that do not form any coherent tangible wildlife link across the borough. For these wildlife corridors to have any functionality or be defensible in a planning inquiry they should be realistic and enforceable. Therefore at present the wildlife corridors do not meet NPPF requirement (paragraph 109) to establish "coherent ecological networks that are more resilient to current and future pressures€².		S 8.1 Strategic Green Infrastructure	Comments noted. North Tyneside's Wildlife Corridors have been mapped in line with National Planning Policy requirements. North Tyneside Council is working closely with both the NWT and Natural History Society of Northumbria to further define the currently indicative Wildlife Corridors. Please note this policy number has now changed to S5.1	No amendments proposed.
898208		RESIDENT	LP2015729	The protection of wildlife, through the preservation of wildlife corridors, valued green spaces and sites of special local wildlife		S 8.1 Strategic Green Infrastructure	Comments noted. Please note this policy number has now changed to S5.1	No amendments proposed.

				interest, bring benefits to people's health, wellbeing and enjoyment, for generations to come.				
898230		RESIDENT	LP2015736	The protection of wildlife, through the preservation of wildlife corridors, valued green spaces and sites of special local wildlife interest, bring benefits to people's health, wellbeing and enjoyment, for generations to come.		S 8.1 Strategic Green Infrastructure	Comments noted. Please note this policy number has now changed to S5.1	No amendments proposed.
898375		RESIDENT	LP2015766	I visit a number of reserves in North Tyneside including Swallow Pond and St Mary's so know what important wildlife corridors they provide as well as attractive amenity to their areas.		S 8.1 Strategic Green Infrastructure	Comments noted. Please note this policy number has now changed to S5.1	No amendments proposed.
898613			LP2015857	I think that much of what is quoted in DM8.1 and DM8.2 has been sadly ignored and neglected when planning permission were given regarding developments surrounding The Rising Sun Country Park. There are obviously no guarantees that the present park area will not be squeezed and squeezed until it is no longer a real natural sanctuary but instead a part of the green corridors overrun by housing and industry and that even if it survives to become a green corridor ! It is obvious from the consultation document development map that this will happen, land behind Asda Supermarket and around Scaffold Hill Quarry Pond will go as will land west of Hadrian Park. It's a shocking deceit and unfortunately the majority of folk are not truly aware of what is going on. And further more greater publicity should be given as to who is identifying the areas and deficiencies specified as greater public consultation on these matters needs to be addressed.		S 8.1 Strategic Green Infrastructure	Comments noted. As the Local Plan is yet to be adopted Policies S8.1 (now S5.1) and DM8.2 (now DM5.2) could not be implemented and policies in the current Unitary Development Plan (UDP) were used. The Council refused the Station Road application, however due to an in-sufficient housing land supply and an out of date Plan the planning application was approved by an independent inspector through the appeal process. The Local Plan must balance economic, environmental and social needs of the Borough. The Rising Sun Country Park is designated as a Site of Local Conservation Interest and is highlighted as a key asset in the Green Infrastructure Strategy (2015). The Green Infrastructure Strategy also highlights The Rising Sun Country Park as an area for anticipated extension and improvements following associated residential development. Consultation on North Tyneside's Local Plan has been carried	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							out in line with National Guidance. Information was posted to all residents within North Tyneside, press notices were released, online information was provided and public events were held in various locations throughout the Borough. The recently updated Green Space Strategy details green space and deficiencies within the Borough. North Tyneside have both online and paper versions of this document to view. Please note this policy number has now changed to S5.1	
805689			LP2015893	I believe that every piece of greenery is an important part of our green infrastructure - including the verges alongside our road network. It is hugely depressing and detrimental to a person's well being to see the enormous amount of litter every inch of the way on one's journey whether it be by foot, car, bus or metro. No wonder people have such a negative impression of North Tyneside Council when the current litter epidemic appears to be completely ignored. Ok, there was an article in the Guardian and your latest newsletter about the Big Spring Clean - but in reality this is far too small an effort. The Council needs to be seen to lead a widespread campaign to clear up the region and educate/encourage people to keep it that way. Help people get back a sense of responsibility and pride and maybe you'll find they are more open to looking at your wider plans more positively.		S 8.1 Strategic Green Infrastructure	Comments noted. The Planning system primarily deals with the built environment. The Council have a Streetcare team who deal with litter issues and they are aware of your concerns. Residents are encouraged to report issues by calling the team or via an online form: <a href="http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins">http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins</a> Please note this policy number has now changed to S5.1	No amendments proposed.
898912		RESIDENT	LP2015974	I have tried to make sense of the Wildlife corridors depicted on Map 1 of the 2015 Consultation , and they seem more		S 8.1 Strategic Green Infrastructure	Comments noted. The Wildlife Corridors on the consultation map are indicative. The Local Plan (2015) is included a suite of	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				theoretical than real. In many cases they are much thinner than shown on the map, and consist of things like metro lines and fields- which hardly count as corridors. In some cases they pass through housing estates! They are already crossed by roads, which are an obvious hazard for wildlife.			additional evidence based documents which include the Green Infrastructure Strategy (2015). The Green Infrastructure Strategy contains a more detail Wildlife Corridor Map. Metro Lines are very important Wildlife Corridors, lots of Wildlife can be found within the area including the protected Slow Worm. Wildlife Corridor designation does not automatically render development obsolete. Local Planning Authorities are required by National Planning Policy to identify areas of habitat that connect wildlife. North Tyneside's Local Plan seeks to encourage development which helps to maintain and enhance these links. Wildlife corridors help to identify the importance of the area within the network. Please note this policy number has now changed to S5.1	
899432		RESIDENT	LP20151250	Site128: I would like to take this opportunity to say that I strongly support the designation of the Benton Curve as a wildlife corridor. This sort of thing is vitally important these days as more wildlife habitats disappear under Tarmac and concrete.		S 8.1 Strategic Green Infrastructure	Support noted. Please note this policy number has now changed to S5.1	No amendments proposed.
899444	George F White		LP20151254	S8.1 Strategic Green Infrastructure Our Client supports the inclusion and protection of green infrastructure within the Consultation Document and in line with the NPPF (76). However, our Client has concerns that the extent of the buffer zone on Killingworth Wagonway is unjustified in the Consultation Document and unjustified in the evidence base: Green Infrastructure Strategy (2015). Our Clients justification for this is set out below. A key objective of the GI Strategy is to		S 8.1 Strategic Green Infrastructure	The area north of Simonside Way is designated as a site of Local Wildlife Interest. The waggonway is highlight established and provides important wildlife habitat. As stated in paragraph 117 of the NPPF local planning authority must identify and map components of the local ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>develop buffers around new and existing PROWs, and access routes to ensure that they support wildlife migration, as well as sustainable transport and recreation. This has been carried out with a positively prepared strategic approach to Green Infrastructure provision, in line with the NPPF (114). However, there is little evidence within the GI to demonstrate the specifics of how these PROWs and access routes support wildlife migration. The GI and Green Space Strategies refer that the majority of information used to determine North Tyneside's Wildlife Corridors, and high quality and high value open space is based on information from Natural England and existing records, however these are not demonstrated within the strategy documents, there is a lack in the evidence base to justify the significant buffers around some of the wildlife corridors (as illustrated at 7.2 GI Strategy, 2015). The GI Strategy does note that buffer zones vary in width depending on the type and size of habitat it contains, but there is little or no description of this for the various sites throughout the strategy or appended documents. Our Client requests that further clarification on the methodology and each buffer distance is required for wildlife corridors (GI Strategy, 2015). In regards to the Killingworth Wagonway, specifically the tree-lined area north of Simonside Way, Killingworth, which runs from the B1317 to the A1056, the east side of the PROW is unjustified as this is agricultural land which is actively farmed and managed, and there is no</p>			<p>stones that connect them and areas identified by local partnerships for habitat restoration or creation. The Local Authority began by mapping North Tyneside's hierarchy of sites and drawing up obvious links between these ecological sites. There is no statutory methodology for applying buffer zones to the designated Wildlife Corridors. Buffers are provided to ensure protection of the various designated sites. The green infrastructure has been amended to include more detail on the work drawn upon. It must be noted that buffer zones are indicative and will be dealt with on a site by site basis. Please note this policy number has now changed to S5.1</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>public access. The buffer distance is not quantified; our Client requests figures for buffer distances should be demonstrated, including the methodology for these quantifications. The western side of the buffer is justified due to its identification as an area of high value and quality, which includes areas of publically accessible high quality open space (Map 1, Green Space Strategy, 2015). Our Client would support the western buffer to protect the both the public Green Spaces (as identified in the Green Space Strategy, 2015), and provide environmental support for wildlife migration and aesthetic enhancement for social and economic contributions of the Wagonway. However, our Client would suggest a reduction in the eastern buffer due to: "ç lack of demonstrated need for wildlife migration and aesthetic value of such a significant eastern buffer on agricultural land; "ç smaller buffer on eastern side will not impact on the aesthetic value of the area and there will still be a buffer around the publically accessible green space area of high value and quality (western side of buffer); "ç open spaces will still be strategically connected and wildlife corridors will still be well integrated (as per the key objectives of the GI Strategy, 2015 and the NPPF, paragraph 76); and "ç as the GI Strategy (2015) advocates that a wildlife corridor should be formed adjacent to the A19, if the identified strategic site (Proposals Map, 22 - 26) is to come forward. Identified new residential sites should include protected green infrastructure (Recommendation 16)</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				(Objective 8). A wildlife corridor adjacent to the A19 will be required to be mature prior to any development being completed. This will serve as an additional wildlife corridor to support both wildlife migration and aesthetically enhance the area prior to development being complete (as well as provide screening for both noise and pollution). Our Client agrees that a buffer of the Killingworth Wagonway is required due to the protection of its wildlife, as well as the safeguarding of the aesthetic quality of the tree line between the existing and identified development; however this buffer should be proportionate to the level and value of wildlife within the area. One of the main objectives of the buffers is to prevent encroachment from development onto the PROW and prevent fragmentation and isolation the wildlife corridor. A western buffer can be justified through the Green Spaces Strategy (2015), nonetheless a reduced buffer should be identified on the eastern side of Killingworth Wagonway (between the B1317 and the A1056), and as such a significant buffer is not necessary to prevent encroachment from development.				
898630			LP20151273	The proposal to build houses on the remaining green fields along Whitley Road (sites 17, 111, 139 and 110) does not support the aims of this policy. I support the use of the north east curve of the metro for wildlife but I think you should retain the trackbed for potential future expansion of the metro. I object to the proposal to build houses on these sites so that we can retain the green		S 8.1 Strategic Green Infrastructure	Comments noted. All the policies outlined in the Local Plan (2015) must be read as a whole. For instance policy DM8.2 (now DM5.2) states that 'the loss of any part of the green infrastructure network will only be considered in the following exceptional circumstances...'. 'Where development proposals could adversely affect green infrastructure, permission will only be	No amendments proposed.

				<p>infrastructure that remains. In addition, you have added sites 111 and 139 since the last , yet sites 16, 18, 83, the land opposite Station Road near Darsley Park, a site at Palmersville, and four in Killingworth now have planning permission or are already built. I think this area has had enough development. There is a green break between Killingworth and Forest Hall, so there should be one between Forest Hall/Benton and Wallsend. Please safeguard this land.</p>			<p>granted where (e) alternative provision, equivalent to or better than in terms of its quantity and quality, can be provided in equally accessible locations which maintains or creates new green infrastructure connections; or (f) the proposed development would be ancillary to use of the green infrastructure and the benefits to green infrastructure would outweigh any loss of open area. The Local Plan must strike a balance between the economic, social and environmental needs of the borough. . The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with an objective to also protect and enhance the natural environment and enhance the image of the Borough. Please note this policy number has now changed to S5.1</p>	
899469			LP20151296	<p>This Plan does not effectively "check the unrestricted spread of the built-up area of North Tyneside" and in particular does not keep the separation between North Shields and Monkseaton and Monkseaton and Shiremoor. In fact, the Green Belt is just a buffer zone between North Tyneside and Northumberland. It should include areas within the borough. The Green Belt does however contain agricultural land and farming</p>		S 8.1 Strategic Green Infrastructure	<p>As outlined in policy AS7.4 (now S4.4) 'green infrastructure corridors must be safeguarded through Strategic Allocations. Major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identity, maintaining amenity space, access to the countryside and biodiversity'. Please note this policy number has now changed to</p>	No amendments proposed.

				activity which is an essential "" but ignored "" part of the local economy.			S5.1	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151354	Policy S8:1. Strategic Green Infrastructure - CPRE broadly welcomes this policy.		S 8.1 Strategic Green Infrastructure	Support noted. Please note this policy number has now changed to S5.1	No amendments proposed.
472456		RESIDENT	LP20151406	A lot of the green land should be used for agriculture and food production and put into the ownership of the citizens of NT growing fruit and vegetables for ourselves. This will provide quality jobs and increase a sense of pride and community. There is no mention of horticulture, agriculture or market gardening in your plan.		S 8.1 Strategic Green Infrastructure	Comment noted. Whilst the Local Plan does not deal with food production and markets specifically this matter is discussed in detail in North Tyneside's Green Infrastructure Strategy (2015). This document is a evidence base document which helps to inform the local plan and decision making. Please note this policy number has now changed to S5.1	No amendments proposed.
472456		RESIDENT	LP20151407	In order to fulfil the vision of a sustainable borough much greater attention needs to be given to the preservation and enhancement of the natural environment. Having wide open green spaces will not only benefit the mental and physical health of the citizens, provide the green lungs the environment need, it will make the place attractive to visit and add value to the borough. The more concrete that goes in the less attractive the place will look.		S 8.1 Strategic Green Infrastructure	Comment noted. In line with National Planning Policy, North Tyneside must balance the environmental, social and economic needs of the Borough. In line with this North Tyneside must identify and meet the housing and employments needs of its residents. Please note this policy number has now changed to S5.1	No amendments proposed.
464572	Landowner	PLANNING CONSULTANCY	LP20151502	These comments are submitted having regard to the comment in the Local Plan Consultation 2013 and Sites Analysis 2015 Schedule that land to the rear of Midhurst Road, Benton (SHLAA ref 298) is subject to an application to designate the site as Local Green Space. Nexus object to the designation of land to the rear of Midhurst Road, Benton (SHLAA ref 298) as Local Green Space / Green Space / Open Space for a number of reasons including; 1 Planning Practice Guidance (007 ref ID : 37-007-20140306) states that		S 8.1 Strategic Green Infrastructure	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1). Given that the majority of the site was until very recently used for railway sidings the brownfield context is acknowledged. This site has been assessed through the SHLAA (Site 298) and was included as a potential development site in the 2013 of the plan. However, following further assessment through the Local Plan process, including taking account of information	No amendments proposed

				<p>designating any Local Green Space will need to be consistent with local planning for sustainable development in the area. The designation of land to the rear of Midhurst Road, Benton as Local Green Space is not consistent with local planning for sustainable development in the area. As set out in the SHLAA, the site is 100 percent brownfield. A core planning principle is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided it is not of high environmental value. Land to the rear of Midhurst Road, Benton is not of high environmental value. Its reuse should be encouraged and it should be allocated and developed in preference to Greenfield sites listed in policy S7.3. A parallel representation has been submitted to policy S7.3. 2 North Tyneside Council's Green Space Strategy February 2015 assesses the value of the site 'low' and the quality of the site 'low', Map 1. In the circumstances the site is acknowledged not to be of particular value. The rationale behind the application for Local Green Space designation has to be questioned acknowledging the guidance in Planning Practice Guidance (007 ref ID : 37-007-20140306) that the Local Green Space designation should not be used in a way that undermines the aim of plan making, namely to identify sufficient land in suitable locations to meet identified needs. The rationale behind the application for the Local Green Space designation particularly has to be questioned acknowledging the statement in paragraph 1 of the Benton Triangle</p>			<p>from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space. As a result the site will not be selected as preferred residential allocation. Please note this policy number has now changed to S5.1</p>

				the Local Plan Consultation 2013 and Sites Analysis 2015. This goes to the deliverability of the proposal, policies amongst things having to be deliverable if the Plan is to be sound, NPPF para 182. Nexus' position is that the creation of open space in isolation is not deliverable. That said as has been detailed previously, if the site was subject of a comprehensive development package including open space and a residential development of around 50 dwellings in accordance with the Potential Sites Background Paper, there would be an opportunity to provide an overall scheme which is deliverable, in the public interest and amongst other things would result in high value and high quality open space meeting the standards in Objective 9 of the Council's Green Space Strategy 2015				
803900	Northumberland County Council	LOCAL AUTHORITY	LP20151534	The Council welcomes the strong approach to Green Infrastructure and particularly paragraph 8.3, which recognises that Green infrastructure does not stop at local authority boundaries and that work is on-going with neighbouring authorities to align strategic green infrastructure networks, assets and links. However, it is considered that the section would benefit from reference within the supporting text, of the Northumberland Coalfield Local Nature Partnership, which straddles the boundaries between Northumberland, North Tyneside and Newcastle and aims to tackle the lack of connectivity between wildlife areas over a 41,000 hectare area.		S 8.1 Strategic Green Infrastructure	Paragraph 8.3 (now para 8.5) amended as follows: Green infrastructure does not stop at local authority boundaries and work is on-going with neighbouring authorities, including the Northumberland Coalfield Local Nature Partnership to align strategic green infrastructure networks, assets and links. Please note this policy number has now changed to S5.1	Amendments made.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
899297			LP20151698	<p>The Natural Environment I would welcome a more visionary approach to Natural Environment policies; ones that truly push towards ecological sustainability and not one that effectively looks to minimise the effects of development. In order to produce this, I do not understand why a full ecological audit has not been undertaken in order to improve the strategy. Policy S/8.1. This policy is good but, as above, I would suggest that the Local Authority will need to fund the "relevant up-to-date evidence" base, as at present this information is not available. Alternatively, there may be merit in discussing this with developers, who will inevitably need to do this separately, which may be less effective. Paragraph 8.2 and 8.4. I welcome the acknowledgment of the benefits of Green Infrastructure, it should be noted that the area within Green Infrastructure needs to be large enough to perform all these functions listed. I would question the allocations in the Local Plan at present and how these will provide sufficient area for green infrastructure and to provide all the functions the document requires it to. This policy states that "the Council will seek the protection, enhancement, extension and creation of green infrastructure in appropriate locations". Please clarify where the "appropriate locations" are? I would suggest that the LPA should produce a detailed strategic plan for areas of GI, as well as mitigation and compensation sites for various developments. This would enable a targeted approach to GI protection, linkages,</p>		S 8.1 Strategic Green Infrastructure	<p>Following designation as open space through the Local Plan, any proposal for alternative use of the site, including for residential development, would be assessed on individual merit in light of relevant policies. In this context, in addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM7.5 (now DM4.5). Supply from these sources will continue to come forward for development to meet the overall requirement for new homes to 2032. As part of any proposal for development, a planning application must include an assessment to consider the current role, use and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision.</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				enhancement, extension and creation, as well as biodiversity conservation, enhancement and creation thus allowing the LPA to meet Paragraph 114 to plan positively for the creation, protection, enhancement and management of networks of biodiversity.				
789566	Environment Agency	GOVERNMENT AGENCY	LP20151824	<p>We support policies S/8.1 and DM/8.2 that seek to protect and provide Green Infrastructure, however we continue to recommend that the text relating green infrastructure recognises the benefits Green Infrastructure can contribute to WFD objectives. In particular in managing urban run-off and improving water quality. We consider this is particularly necessary due to the Water Framework Directive (WFD). WFD is European legislation designed to protect and enhance the quality of our rivers, lakes, streams, groundwater, estuaries and coastal waters, with a particular focus on ecology. WFD sets out the need to protect and improve the water environment in its totality. It applies to all surface water bodies, including rivers, streams, lakes, estuaries and canals, coastal waters, and all groundwater bodies. The Directive has two main objectives: "It sets a target for all waterbodies to achieve "good status" by 2015. "No deterioration in current status. Historically, urban rivers have been used as a convenient route for disposing of society's waste, with effluent from industry and sewage damaging the environment for people and wildlife. Despite the great progress made in tackling the harmful effects of urban pollution, many of North Tyneside's watercourses still fail to</p>		S 8.1 Strategic Green Infrastructure	<p>Comments noted. North Tyneside Council understand and recognise the strong links between biodiversity and the WFD. For instance paragraph 8.42 (now para 8.43) states 'The water environment is vital for its contribution to the North Tyneside's biodiversity and is important to the quality of life of residents and visitors'. The Local Plan includes a strong policy initiative which will help to continue to improve North Tyneside's watercourses and water quality. Further detailed information on green infrastructure, urban-runoff and water quality can be found within the North Tyneside Green Infrastructure Strategy. Please note this policy number has now changed to S5.1</p>	No amendments proposed.

				meet the water quality standards necessary to support a healthy environment. In North Tyneside, urban run-off has been identified as one of the main reasons some of the rivers fail to meet the quality standards set by the Water Framework Directive. This is of particular importance for the Sandy's Letch, the Seaton Burn and the Brierdene. Green Infrastructure is of particular importance in addressing these issues.				
591119			LP20151891	Allotments. Although not legally binding, most allotment strategies quote the 1969 Thorpe Report, which recommends a minimum provision equivalent to 15 per 1,000 households. - Using your figure of 15,200 new homes it is expected that you provide 228 new allotments - Using your latest permitted builds figure of 5603 it is expected that you provide 84 new allotments I am sure you are aware that Local councils are required to audit allotment provision as part of Planning Policy Guidance 17. In addition, when assessing demand the local authority must take into account any written representations on the need for allotments by any 6 residents on the electoral register or persons liable to pay council tax (section 23(2) of the Small Holdings and Allotments Act 1908). You may expect written requests from at least 6 West Moor residents soon. I sincerely hope my comments are included in your considerations. Confirmation that this has specifically happened would be appreciated.		S 8.1 Strategic Green Infrastructure	The comments with regard to the Green Space Strategy are acknowledged and it is correct that this site has been assessed as 'low' in terms of both value and quality in the latest of the GSS. The proposals for a Local Green Space designation have arisen from the representations of Benton Triangle Community and, as a result, it is considered necessary to undertake an assessment of the appropriateness of such a designation through the Local Plan process. However, following further appraisal it has been concluded that this site does not meet the criteria for designation as formal Local Green Space. Please note this policy number has now changed to S5.1	No amendments proposed.
638268	Natural History Society of		LP20151897	The LPA should be planning positively for biodiversity, seeking net gain and producing a coherent and functioning wildlife corridor		S 8.1 Strategic Green Infrastructure	Comment noted. 899297			LP20151705	There should be a preference towards minimising flood risk using sustainable urban drainage and other means that would have the dual purpose of providing wildlife habitat whilst mitigating the flood risk.		DM 8.12 Development and Flood Risk	Comment noted	No amendments proposed
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151803	<p>Commentary surrounding flood risk in the supporting paragraphs of Policy DM8.12 is well received "" particularly the recognition of planning's central role within the facilitation of sustainable and safe development. We are equally supportive of the prominence of climate change within this text, as adaptation and mitigation should form key elements of a planning document spanning decades "" during which the impacts of climate change will be increasingly realised. We note that this section makes reference to flooding from all sources, which is strongly welcomed; however we would consider it beneficial if sources of flooding were individually identified within supporting text. An example list of flooding sources that should be considered within the LPCD is provided below: i. Rivers and watercourses (fluvial) ii. Sea (tidal) iii. Surface water runoff iv. Sewers v. Ground water</p> <p>Furthermore, it is important to note the distinct characteristics of different flood sources, as not all flooding is as predictable as fluvial, in either location or frequency and therefore flood management policies must utilise a range of measures to reduce flood risk in the Borough. Flooding from sewers is increasingly recognised as an issue in areas that are not necessarily at risk from fluvial</p>		DM 8.12 Development and Flood Risk	<p>Comments noted. The different sources of flooding are well documented within the evidence base.</p> <p>We do not wish to include cross references, however, appreciate that two water sections are confusing the document.</p>	The two water sections have been brought together into a Water Environment section of Chapter 8.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>flooding. Storm events, which sometimes occur away from the areas concerned, cause major surface water runoff to enter the sewerage system. Where the network does not have capacity to accommodate peak flows, this causes the discharge of wastewater from the network to surrounding land and property. With regard to Policy DM8.12 specifically, we consider that the principles contained are sound and will serve to effectively manage the impact of new development upon flood risk. Having said this, we believe that the policy would benefit from a more comprehensive approach to sustainable water management in order to demonstrate clear links between flood risk reduction and other aspects of water management. It is our opinion that the implications of unsustainable surface water management should be clear within this section, and that cross-reference should be made to the content presently contained within Policies S10.9 and DM10.10.</p>				
789566	Environment Agency	GOVERNMENT AGENCY	LP20151826	<p>We support the inclusion of a flood risk and sustainable drainage policies. We welcome that Policy DM/8.12 has been further strengthened through adding a requirement to avoid development within areas at risk of flooding. In addition we support that the policy now seeks development should manage flood risk from all sources, taking into account the impact of climate change over its lifetime. Strand c) of the policy seeks to ensure that "there is no net increase in surface water run off". We maintain that this policy should be amended to reflect issues</p>		DM 8.12 Development and Flood Risk	Comment noted.	Water sections have been combined and rewritten, EA have been reconsulted on these changes.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>outlined in North Tyneside's Water Cycle Study (WCS) and Surface Water Management Plan (SWMP). As outlined in 10.57 and the WCS there currently is insufficient capacity at Howdon Sewerage Treatment Works (HSTW) to accommodate the increased foul drainage from the planned housing and employment growth. NWL are currently working on a Sustainable Sewerage Strategy across Tyne and Wear which will help remove surface water from sewers. Although this will help increase capacity at HSTW this will not free up sufficient capacity to accommodate all planned growth. Surface water is seen as both the problem and a solution to freeing up capacity at HSTW and enabling sustainable growth. The key to increasing capacity would be to take surface water out of the sewerage network - on this basis, we recommend that the policy reflects these requirements. In removing surface water from the sewer network careful consideration must be given to ensure that surface water does not increase flood risk elsewhere. On this basis, the requirement of "no net increase" may not be sufficiently reflect these issues. DM 10.10 seeks to limit post development run off rates to a maximum of 50% of the flows. We consider cross referencing of these policies is required to avoid confusion. You will know that the Government has announced that it intends to change our statutory consulted duties for planning applications. This also means making Lead Local Flood Authorities statutory consultees for surface water drainage issues for "major' developments.</p>

				<p>This will need a change to the Development Management Procedure Order (DMPO). A new DMPO which includes these changes and consolidates the original DMPO and amendments made to it was recently published and will come into force on 15th April 2015. To support the new consultation arrangements, DCLG has changed the Planning Practice Guidance (PPG). The main changes are to the pages: Why are sustainable drainage systems important? How the local planning authority should involve the lead local flood authority when determining planning applications and what advice should be given about local flood risks Water supply , wastewater and water quality considerations in plan-making This guidance provides clarity on when SUDs are appropriate, together with minimum standards of operation and the need that there are clear arrangements in place for ongoing maintenance. On this basis, we consider it is essential that the Policy outlines the LPA's position and expectations "" particularly regarding maintenance and adoption of SUDS. The PPG further highlights that SUDS provide opportunities to: "Ç reduce the causes and impacts of flooding; "Ç remove pollutants from urban run-off at source; "Ç combine water management with green space with benefits for amenity, recreation and wildlife. Given this emphasis of the wider benefits of flood risk, we consider that this policy can be strengthened to highlight the water quality, amenity, recreation and wildlife benefits. As previously highlighted a number</p>

				<p>of recent planning applications have proposed direct deep drainage discharges of surface water to the bedrock. These have been particularly problematic at Algernon "" we welcome that the policy recognises deep drainage structures are unsuitable in this area. Mine water levels are currently actively managed across the Local Authority area. On this basis, we consider that such techniques do not provide a sustainable, long term solution due to rising groundwater levels reducing the storage capacity which may lead to groundwater flooding elsewhere.</p> <p>Discharges that concentrate the flow of effluent at one location and bypass some of the soil layers will limit the ability of the ground to attenuate pollutants and protect groundwater. Direct input into groundwater presents a significantly increased risk of pollution. We are seeking to stop cases where discharges are directly into the groundwater through wells, boreholes and shafts. The level of prior examination required to support a proposal to use a borehole may be significantly greater than required for near surface infiltration systems. An environmental permit may be required. On this basis, we would recommend that the asterisk highlights that deep drainage structures are unlikely to be suitable anywhere in the Authority area.</p>				
830571	Persimmon Homes	DEVELOPER	LP20152047	<p>Policy DM8.12 sets the authorities approach to reducing flood risk, which is generally supported subject to the following concerns. The policy states that "all developments" will be required to demonstrate no flood risk over the lifetime of the proposed development.</p>		DM 8.12 Development and Flood Risk	Comment noted.	Policy (now DM 5.12) has been amended to read "all major development".

897641		RESIDENT	LP2015648	<p>Firstly I know you rejected the West view build, however that area of land was always subject to flooding, and now following the building work, there is a significant issue arising all paths that run parallel to the wagon way, and the wagon way itself. You have carried out remedial work due to flooding near one housing area, however the when it rains, (and not so much), the paths are flooding, and water remaining for long periods of time. The fields are also showing signs of water retention, with the result that at the end of last year, a family of swans, and several seagulls took up residency. This also has had the result that the all the paths surfaces are deteriorating, which further exacerbates the flooding issue. This whole area is built on old mine workings, and I truly wonder if this has been at anytime taken into consideration when providing planning permission. Further building within this area is going to have a detrimental effect on the water plain, and the unknown factor is the mining works. There have been a number of "holes" appearing, and many happened where there were no known workings. All of this bodes ill for large areas of this council, where mining was the mainstay of employment.</p>		DM 8.13 Flood Reduction Works	Comment noted. The impact of former mine working and groundwater has been considered throughout the preparation of the Local Plan. This work has involved engaging with stakeholders such as the Environment Agency and the Coal Authority.	No amendments proposed
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151366	<p>Policy DM18:13 Flood reduction. CPRE supports this policy. 				our existing role working in partnership with North Tyneside Council and other parties to achieve reductions in flood risk. Furthermore, we support the requirement for developments which are deemed to potentially impact upon drainage capacity (including reference to cumulative impact) to make offsetting contributions. Equally important is the requirement for developments to ensure works are complementary to wider plans, as a comprehensive approach to flood risk and sustainable drainage is a critical component in the viability of development sites such as those proposed at Murton.		Works		
803900	Northumberland County Council	LOCAL AUTHORITY	LP20151536	Land won primary aggregates Policy DM8.14 criterion b - Opportunities for the extraction of primary minerals for aggregate uses in North Tyneside seem limited on the basis of the resource present. Nonetheless it is recognised that the criterion is positively phrased and will be used to assess any proposals that may come forward over the plan period. The Council supports this approach.		DM 8.14 Minerals	Support noted.	No amendments proposed.
803900	Northumberland County Council	LOCAL AUTHORITY	LP20151536	Restoration Policy DM8.14 criterion c - The principle of this policy criterion is supported and it is recognised that this addresses the requirements set out in Paragraph 143 of the NPPF. Criterion c could, however, be usefully amended by adding additional text to recognise that there are opportunities that can be delivered through mineral site restoration. For example, mineral site restoration can deliver net-gains for biodiversity, improvements for agriculture		DM 8.14 Minerals	Comments noted and policy will be amended in accordance with suggestion.	"this could include the delivery of net-gains for biodiversity, improvements for agriculture and enhanced access for recreation. " added to the end of criterion c.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				and enhanced access for recreation.				
803900	Northumb erland County Council	LOCAL AUTHORITY	LP20151536	Recycled and secondary aggregates Policy DM8.14 criterion d - This criterion is supported in principle but it would usefully benefit from clarification of what would constitute "'appropriate locations' for permanent recycling plants for construction and demolition waste. This could be addressed by cross referencing the policy for waste management (Policy S10.11) where some locational principles are set out.		DM 8.14 Minerals	Comments noted and policy will be amended in accordance with suggestion.	"as defined in policy S10.11." added to the end of criterion d.
803900	Northumb erland County Council	LOCAL AUTHORITY	LP20151536	Supply of marine aggregates and Howdon Wharf Policy DM8.14 criterion e - In the County Council's response to the 2013 Consultation Local Plan we made comments regarding the need to recognise the strategic importance of Howdon Wharf in terms of its role in supplying sand and gravel for aggregate uses both locally to North Tyneside and to surrounding areas. The supply of sand and gravel from this wharf is considered to be particularly important given that there are no active quarries supplying minerals for aggregate use within North Tyneside. The important contribution of Howdon Wharf to the steady and adequate supply of sand and gravel for aggregate use is recognised in the Joint Local Aggregates Assessment for County Durham, Northumberland and Tyne and Wear. It is noted that amendments have been made to both the policy and the supporting text in response to the Council's comments and it is considered these amendments address the previous concerns. Criterion e is therefore supported. However, it would		DM 8.14 Minerals	Comments noted. Howdon Wharf will be added to the Policies Map.	Howdon Wharf added to Map.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				appear that Howdon Wharf is not identified on the Policies Map and consideration should be given to its identification on the Policies Map.				
803900	Northumb erland County Council	LOCAL AUTHORITY	LP20151536	Safeguarding mineral resources Policy DM8.14 criterion f - The amendments to the policy criteria and supporting text to differentiate between the mineral resources to be safeguarded and the related Mineral Safeguarding Areas are welcomed and supported. The shallow coal resource identified for safeguarding extends into the adjoining area of Northumberland. The Council considers that the approach in Policy DM8.14 is consistent with the emerging approach to mineral safeguarding in the Northumberland Local Plan. In order to improve the clarity of criterion f and its consistency with the NPPF, the following minor wording amendments are suggested: Mineral Safeguarding Areas are defined for shallow coal and basal sand and gravel resources in the plan area and their extent is shown on the Policies Map. These resources will be safeguarded from non-mineral development that would needlessly sterilise the resource and prejudice future mineral extraction.		DM 8.14 Minerals	Comments noted and policy will be amended in accordance with suggestion.	Criterion f now reads "Mineral resources will be safeguarded from other forms of development that would prejudice future mineral extraction. Mineral Safeguarding Areas have been defined for shallow coal, marine and estuarine sand and gravel, basal sand, lower magnesian limestone, and glacial sand and gravel resources in the plan area and their extent is shown on the Policies Map. These resources will be safeguarded from non-mineral development that would needlessly sterilise the resource and prejudice future mineral extraction. Planning permission will not be granted for any form of development within a Mineral Safeguarding Area that is incompatible with safeguarding the mineral unless:"
396412	Northumb erland Wildlife	OTHER / LOCAL ORGANISATI	LP2015541	The Northumberland Wildlife Trust is in support of point ; that any mineral extraction would only be permitted where there is no		DM 8.14 Minerals	Comment noted.	No amendments proposed.

	Trust	ON		adverse environmental impact. This statement remains current.				
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015665	<p>Positively Prepared - yes Justified - yes Effective - unclear Consistency to NPPF - unclear Legal &amp; Procedural Requirements Inc. Duty to Cooperate - yes The Coal Authority notes that this policy addresses all potential mineral proposals that may come forward, including energy and non-energy minerals development. It therefore needs to cover potential proposals which may come forward for hydrocarbons and unconventional hydrocarbons, including any new coal technology such as Coal Bed Methane or Underground Coal Gasification. Although it is accepted that there are currently no PEDL licences issued in North Tyneside by DECC, should this position change in the future there would be an obligation for those to be illustrated in the Local Plan. As currently the policy is not strictly in accordance with the 3 stage policy for hydrocarbons identified in the NPPG, which identifies that criteria based policies should cover the three phases of exploration, appraisal and production phases. Although the Coal Authority accepts that the Council may not wish to amend the policy to take account of something which has not yet been proposed in the area in order to clarify that this policy relates to all potential minerals which may come forward during the plan period it is suggested that additional supporting text is included as follows:"8.59 Should any proposals come forward for conventional and unconventional hydrocarbons these will be considered in</p>		DM 8.14 Minerals	Comments noted.	"Should any proposals come forward for conventional and unconventional hydrocarbons these will be considered in accordance with the policies and guidance set out in the NPPF and NPPG and the above policy as relevant to the stage of exploration, appraisal or production." added in at 8.59, as suggested.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				accordance with the policies and guidance set out in the NPPF and NPPG and the above policy as relevant to the stage of exploration, appraisal or production."				
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015666	Positively Prepared - yes Justified - yes Effective - yes Consistency to NPPF - yes Legal & Procedural Requirements Inc. Duty to Cooperate - yes Support - The policy places a strong emphasis in criterion b. to achieve high standards of restoration and aftercare which The Coal Authority strongly supports. This will ensure that sites can be put to appropriate beneficial afteruse without future public safety issues arising from legacy.		DM 8.14 Minerals	Support noted.	No amendments proposed.
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015667	Positively Prepared - no Justified - no Effective - no Consistency to NPPF - no Legal & Procedural Requirements Inc. Duty to Cooperate Objection: The Coal Authority notes that the 1 hectare threshold for mineral safeguarding has been removed from the policy, we are disappointed to see that site allocations have now been excluded from the requirements to consider mineral safeguarding. Although it is accepted that the 2011 BGS/The Coal Authority Practice Guide to Mineral Safeguarding does include applications in accordance with the development plan in its exemptions criteria it clearly states that this is only acceptable where the allocations process takes account of the prevention of unnecessary sterilisation and determines that prior extraction should not be considered when development proposals come forward. The Coal Authority can find no evidence that the sites identified for development in the Local Plan have been		DM 8.14 Minerals	Comments noted. The criterion "development already allocated in a statutory plan;" should not be included and will be removed. The policy now uses a criteria rather than a size threshold on the advice of the Mineral Products Association.	"development already allocated in a statutory plan;" removed from the criteria.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				considered in respect of mineral safeguarding and potential for prior extraction and therefore object to the inclusion of this criterion. The Coal Authority fully accepts that there needs to be some appropriate way of implementing the minerals safeguarding policy. Where development thresholds can be justified then this is often a way forward and although the Coal Authority would object to an arbitrary threshold, in cases were LPAs can provide evidence and reasoning behind such threshold proposals these have been accepted. In neighbouring South Tyneside the Council evidenced their 1 hectare threshold in their plan by identifying that most site allocations exceeded the threshold. Meaning that the majority of planned development that will come forward would fall within the remit of consideration, but it provided a balance to implementation. The Coal Authority had asked North Tyneside to justify the previously proposed 1 hectare threshold, it was the lack of evidence justification that we objected to. The Coal Authority would be happy to discuss this issue further to try and find a suitable solution for the North Tyneside area before examination.				
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015668	Positively Prepared - yes Justified - no Effective -no Consistency to NPPF - no Legal & Procedural Requirements Inc. Duty to Cooperate - yes Objection: The MSA is not illustrated on the Policies Map which is necessary for the policy to be justified and effective. It is necessary for policies that contain a spatial dimension to be illustrated on the Policies Map in order to provide the		DM 8.14 Minerals	Comments noted. MSAs will be added to the Policies Map.	MSAs added to Policies Map.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				necessary clarity to plan users. It is accepted that in paragraph 8.53 of the plan it does clearly state that: "The whole of the plan area has been identified as a MSA" However it is considered necessary to also make this clear on the Policies Map. It may be that a simple notation on the key could be added referring to "Mineral Safeguarding Area (MSA) Policy DM/8.14" and indicating that it covers the whole of the plan area. This would avoid any potential confusion. The adopted Proposals Map accompanying the South Tyneside Site Allocations DPD utilised the latter approach of a note on the key to good effect. Reason: The lack of illustration of the MSA spatially on the Policies Map does not accord with paragraph 143 of the NPPF, or the advice in the 2011 BGS/The Coal Authority Practice Guide to Mineral Safeguarding in England which provides the practice advice on this topic.				
898977			LP20151005	The proposal for housing development within the land adjacent to Killingworth Moor would effectively prevent any future mineral development and is therefore enforcing mineral sterilisation by non-mineral development.		DM 8.14 Minerals	Comments noted. In consultation with the Coal Authority, we have amended policy DM8.14 (now Policy DM5.14) to ensure that prior to development on land that has mineral value, the mineral should be extracted satisfactorily prior to the development taking place.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151367	Policy DM8:14 Minerals. CPRE broadly supports this policy. In the Durham Plan, Mineral Safeguarding Areas are linked to countryside character assessments which we find a helpful approach. Elsewhere, we have also found useful policy requiring bonds from mineral extractors against the cost of remediation given a number of instances where bankruptcy etc has resulted in		DM 8.14 Minerals	Comments noted. The MSAs have been prepared using the advice of the Coal Authority and evidence set out in the British Geological Survey's Mineral Resource Map. We feel that criterion c of the policy adequately ensures the appropriate level of aftercare.	No amendments proposed.

				remediation not meeting the promised standard.				
803900	Northumb erland County Council	LOCAL AUTHORITY	LP20151536	Policy DM8.14 Minerals The recognition of the need to plan for minerals is welcomed and the policy principles for minerals are generally supported. It is considered that the policy provides appropriate strategic criteria for mineral extraction, site restoration, safeguarding minerals resources and minerals related infrastructure and encourages opportunities for recycled materials.		DM 8.14 Minerals	Support noted.	No amendments proposed.
899297			LP20151706	I would support the inclusion of "a"; that any mineral extraction would only be permitted where there is no adverse environmental impact.		DM 8.14 Minerals	Support noted.	No amendments proposed.
510094	Natural England	GOVERNME NT AGENCY	LP20151956	Natural England supports this policy.		DM 8.14 Minerals	Support noted	No amendments proposed.
510094	Natural England	GOVERNME NT AGENCY	LP20151967	There is not a policy on soils and agricultural land quality in the local plan. Soil is a finite resource that fulfils many important functions and services (ecosystem services) for society; for instance as a growing medium for food, timber and other crops, as a store for carbon and water, as a reservoir of biodiversity and as a buffer against pollution. It is therefore important that the soil resources are protected and used sustainably. The Natural Environment White Paper 'The Natural Choice: securing the value of nature' (Defra, June 2011), emphasises the importance of natural resource protection, including the conservation and sustainable management of soils, for example: i. A Vision for Nature: "We must protect the essentials of life: our air, biodiversity, soils and water, so that they can continue to provide us with the services		DM 8.14 Minerals	Comments noted. Policy will be added as suggested. ALC surveys will be carried out for the strategic sites at Murton and Killingworth.	New section - "Soil and Agricultural Land Quality" has been included within Natural Environment chapter.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>on which we rely' (paragraph 2.5). i. Safeguarding our Soils: "Soil is essential for achieving a range of important ecosystem services and functions, including food production, carbon storage and climate regulation, water filtration, flood management and support for biodiversity and wildlife' (paragraph 2.60). i. "Protect "best and most versatile' agricultural land' (paragraph 2.35). The conservation and sustainable management of soils also is reflected in the National Planning Policy Framework (NPPF), particularly in paragraphs 109 and 112. When planning authorities are considering land use change, the permanency of the impact on soils is an important consideration. Particular care over planned changes to the most potentially productive soil is needed, for the ecosystem services it supports including its role in agriculture and food production. Plan policies should therefore take account of the impact on land and soil resources and the wide range of vital functions (ecosystem services) they provide in line with paragraph 17 of the NPPF, for example to: i. Safeguard the long term capability of "best and most versatile" agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification system*) as a resource for the future. i. To avoid development that would disturb or damage other soils of high environmental value (e.g. wetland and other specific soils contributing to ecological connectivity, carbon stores such as peatlands etc) and, where development is proposed. i. Ensure soil resources are</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>conserved and managed in a sustainable way. The council will therefore require prospective developers to ensure that sufficient site specific Agricultural Land Classification (ALC) survey data is available to inform decision making. For example, where no reliable information was available, we would expect that a new detailed ALC survey should be provided, together with proposals for mitigating any adverse impacts on soil resources or the irreversible loss of high quality land. * As specified in the MAFF / Defra publication Agricultural Land Classification of England and Wales - revised guidelines and criteria for grading the quality of agricultural land (1988). Proposed New Policy: Soil and Agricultural Land Quality Development of "best and most versatile" agricultural land (Grades 1, 2 and 3a in the Agricultural Land Classification system*) will not normally be permitted unless it can be demonstrated that: The need for the development clearly outweighs the need to protect such land in the long term, or i. In the case of temporary / potentially reversible development (e.g. minerals), that the land would be reinstated to its pre-working quality, and ii. There are no suitable alternative sites on previously developed (brownfield) or lower quality land. The council will require all applications for development to include realistic proposals to demonstrate that soil resources were protected and used sustainably, in line with accepted best practice.* (*For example; the Defra Construction Code of Practice for the</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Sustainable Use of Soils on Construction Sites August 2013) As regards any site specific proposals in the emerging local plan, our recommendation would be that developers (or the council) should commission a new ALC survey, for any sites being put forward for consideration. However, should certain sites be allocated in the absence of such information, we would expect these soil and agricultural land quality criteria to be satisfactorily addressed by any subsequent detailed planning application.				
466900	Mineral Products Association	NATIONAL/REGIONAL/ORGANISATION	LP20152149	We are pleased to see that a number of our previous suggestions for changes have been incorporated in this . However, there are a number of anomalies that still need to be addressed in order for the plan to be considered sound.		DM 8.14 Minerals	Comment noted.	No amendments proposed.
466900	Mineral Products Association	NATIONAL/REGIONAL/ORGANISATION	LP20152150	Item f. follows fairly closely our suggested changes in the last consultation. However, we note that the policy is not consistent with the supporting text, and one or other of them needs to be amended. In particular, the policy mentions only coal and basal sand and gravel MSAs whilst the supporting text (para 8.53) also includes limestone and marine and estuarine sand and gravel resources.		DM 8.14 Minerals	Comments noted. The policy did not refer to all mineral resources; this will be amended.	Policy now refers to all mineral resources in the Borough: shallow coal, marine and estuarine sand and gravel, basal sand, lower magnesian limestone, and glacial sand and gravel resources.
466900	Mineral Products Association	NATIONAL/REGIONAL/ORGANISATION	LP20152154	We also question the apparent approach of having one MSA for all non energy minerals regardless of their nature. The BGS good practice guidance implies that an MSA should be designated for each mineral based on its characteristics. We urge the lpa to separate out each mineral for its own MSA.		DM 8.14 Minerals	Comments noted. This will be changed accordingly.	Policy and supporting text now refers to separate MSAs for each mineral resource. The policies map will also be changed.
466900	Mineral Products	NATIONAL/REGIONAL/ORGANISATION	LP20152156	We could not find any reference to MSAs on the Policies Map and so have been unable to		DM 8.14 Minerals	Comments noted. MSAs and Howdon Wharf will be added to the Policies Map.	MSAs and Howdon Wharf added to Policies Map.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
	Association	GANISATION		check the information in the Plan referring to the boundaries of the MSAs. Nor could we find a reference to the safeguarding of Howden Wharf on the Policies Map. We therefore reserve our position in respect of these matters. If the lpa can make this information available to us we would gladly consider it.				
408348	The Coal Authority	GOVERNMENT AGENCY	LP2015669	Positively Prepared - yes Justified - yes Effective - yes Consistency to NPPF - yes Legal & Procedural Requirements Inc. Duty to Cooperate - yes Support : Policy DM/8.15 addresses unstable land and complies with national planning policy set out in paragraphs 109, 120, 121 and 166 of the NPPF. The policy will support the effective implementation of the risk based approach to development management that The Coal Authority operates across the UK with regard to mining legacy and unstable land. The policy is effective in that it addresses the requirement for necessary information to be supplied to the LPA and for the impact of the stability issues on the development to be clearly indicated. It also goes onto complete this process by requiring appropriate remedial measures to be put forward to allow the development to go ahead. The policy is also clear that implementation of remedial measures will be secured by planning condition. Reason: The Local Plan is consistent with advice in the NPPF		DM 8.15 Contaminated and Unstable Land	Support noted.	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151957	Natural England supports this policy.		DM 8.15 Contaminated and Unstable Land	Support noted	No amendments proposed.

893716		RESIDENT	LP2015348	Dear planning policy, Just a note to say how strongly I support the designation of the Benton curve (adjacent to the Oval in NE12) as a wildlife corridor. I am so pleased the local authority has recognised the environmental value of this land and I'm sure I speak on behalf of all the local residents who would hate to see it developed in any way. Thanks and best regards,		DM 8.2 Protection of Green Infrastructure	Support noted. Please note this policy number has now changed to DM5.2	No amendments proposed.
893914		RESIDENT	LP2015384	I support the idea of retaining the old railway track known as the Benton South West curve as a green corridor. That corridor is shown on the plan circulated to residents as linking with the Rising Sun Country Park, so I am against the proposals to put houses on the fields numbered 139 and 17 on that plan. Just as there needs to be a green break between Killingworth and Forest Hall, so there needs to be one between Forest Hall and Wallsend.		DM 8.2 Protection of Green Infrastructure	Comments noted. As outlined in the NPPF, North Tyneside Council Local Plan must strike a balance between the economic, social and environmental needs of the Borough. Please note this policy number has now changed to DM5.2	No amendments proposed.
893913			LP2015416	I have the following concerns: Loss of Green Area		DM 8.2 Protection of Green Infrastructure	North Tyneside recognises that a balance must be made between new developments and the protection and enhancement of green space/ green infrastructure. A	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							number of policies within the Natural Environment chapter have been included to ensure the protection, enhancement and extension of green infrastructure. This is particularly visible in policy S5.1, DM5.2 AND DM5.3. Please note this policy number has now changed to DM5.2	
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015503	We welcome the recognition that if development impinges on Green Infrastructure that alternative provision should maintain green infrastructure connections. This statement remains current. We consider that the meaning of sustainable is getting confused with appropriate levels of growth/development. The Northumberland Wildlife Trust brings the LPA's attention to The UK Sustainable Development Strategy Securing the Future that sets out five "guiding principles" of sustainable development: living within the planet's environmental limits; ensuring a strong, healthy and just society; achieving a sustainable economy; promoting good governance; and using sound science responsibly. Sustainability requires us to conserve and enhance our natural environment; significant parts of this document contradict this aim. Whilst this statement is no longer applicable to this policy, it is considered relevant to the wider document. NWT has concerns over the last sentence in this policy. The LPA are not "planning positively" (paragraph 114 of NPPF) for networks of biodiversity by requiring new green infrastructure to only "not cause adverse impacts". This policy should be looking to meet the aims of		DM 8.2 Protection of Green Infrastructure	Comments noted. As stated in the previous 2013 consultation process, there are many available definitions of Sustainable Development; the Council have based their understanding on National Planning Policy Framework (NPPF). We have not created our own definition so as to avoid duplicating national definitions. Please note this policy number has now changed to DM5.2	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				paragraph 109 of NPPF to seek "net gains in biodiversity" and as such should be reworded to ensure that new green infrastructure not only will not cause adverse impacts on biodiversity but actually seeks to enhance.				
685823	North Tyneside Green Party		LP20151101	Green Party This policy clearly sets out that only exceptional circumstances would allow consideration of loss of land which is "designated wildlife site or providing important biodiversity value" With respect to the development plot identified at Murton, the existence of both designated wildlife site (biodiversity offset for development elsewhere in the borough) and targets for biodiversity enhancement in the site within the 2010 Biodiversity Action Plan, the proposed development is inconsistent with these requirements. Additionally, they are inconsistent with Section 118 of the NPPF which requires that any planning should aim to conserve and enhance biodiversity.		DM 8.2 Protection of Green Infrastructure	Comments noted. The Golden Plover mitigation site is not a designated wildlife site. It is proposed that the area of mitigation land is relocated to a similar suitable site in order to allow the effective delivery of housing policies within the Local Plan. Work for this is currently ongoing and will be resolved through the masterplanning process. Development will not take place without this issue being appropriately resolved. Please note this policy number has now changed to DM5.2.	No amendments proposed.
805471			LP20151127	This seems contradictory as you are not maintaining the green infrastructure at all in fact you are seeking to remove a significant area of green infrastructure in the proposed housing developments around NE12 area		DM 8.2 Protection of Green Infrastructure	Comments noted. As stated in policy DM8.2 'where development proposals could adversely affect green infrastructure, permission will only be granted where: e. Alternative provision, equivalent to or better than in terms of its quantity and quality, can be provided in equally accessible locations which maintains or creates new green infrastructure connections; or f. the proposed development would be ancillary to use of the green infrastructure and the benefits to green infrastructure would outweigh any loss of open area. All Local Plan Policies	No amendments proposed.

							should be read as a whole. Please note this policy number has now changed to DM5.2.	
899444	George F White		LP20151255	DM8.2 Protection of Green Infrastructure Our Clients supports this policy, in particular the comment relating to: Where development proposals could adversely affect green infrastructure, permission will only be granted where: "ç "e: alternative provision, equivalent to or better than in terms of its quality and quality, can be provided in equally accessible locations which maintains or creates new green infrastructure connections; or "ç f: the proposed development would be ancillary to use of the green infrastructure and the benefits to green infrastructure would outweigh any loss of open area€™. Our Client suggests that the significant Green Infrastructure buffers, as illustrated in Proposals map, could prevent maximising identified development sites, which might in turn make some smaller sites unviable. An applicant should work with the LPA to determine the effect of a proposal upon an area of Green Infrastructure, such as a wildlife corridor. If a development proposal has an effect upon these Green Infrastructure areas (including buffers) then mitigation measures could be sought and additional locations could be provided, which would still be part of a network of multifunctional green space.		DM 8.2 Protection of Green Infrastructure	Comments noted. Although some designated sites have wildlife corridors/buffers running through them there is no reason to consider why these sites could not accommodate future development whilst adhering to the policies and maintaining a linked workable network of wildlife corridors. Please note this policy number has now changed to DM5.2.	No amendments proposed.
899452			LP20151278	I get the impression that the green belt is protected but other green areas are at risk of development. Despite council promises/wishes there does not appear to be much to stop developers building on green sites if they want to. It looks like there will be		DM 8.2 Protection of Green Infrastructure	Comment noted. As outlined in the National Planning Policy Framework (NPPF) (para 79) 'The government attaches great importance to Green Belts. Paragraph 83 of the NPPF states 'once established, Green Belt boundaries should	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				no buffer zone between West Monkseaton and Shiremoor, just Murton sitting like an island in the middle of new development. The green spaces are at risk of being chipped away at. Looks like The Rising Sun is going to be another island surrounded by houses.			only be altered in exceptional circumstances, through the preparation or review of the Local Plan'. As outline in the consultation (Policy AS7.4) for the strategic site allocations such as Murton, 'Green infrastructure corridors must be safeguarded through Strategic Allocations. Major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identity, maintaining amenity space, access to the countryside and biodiversity'. Please note this policy number has now changed to DM5.2.	
899455			LP20151283	The proposal to build houses on the remaining green fields along Whitley Road (sites 17, 111, 139 and 110) does not support the aims of this policy. With the new developments since the last consultation, this area has had enough. There is a green break between Killingworth and Forest Hall, so there should be one between Forest Hall/Benton and Wallsend. Please safeguard this land.		DM 8.2 Protection of Green Infrastructure	Comments noted. All the policies outlined in the Local Plan (2015) must be read as a whole. For instance policy DM8.2 (NOW 5.2)states that 'the loss of any part of the green infrastructure network will only be considered in the following exceptional circumstances...'. 'Where development proposals could adversely affect green infrastructure, permission will only be granted where (e) alternative provision, equivalent to or better than in terms of its quantity and quality, can be provided in equally accessible locations which maintains or creates new green infrastructure connections; or (f) the proposed development would be ancillary to use of the green infrastructure and the benefits to green infrastructure would outweigh any loss of open area. The Local Plan must strike a balance between the economic, social and environmental needs of the borough. . The	No amendments proposed.

							Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. The Council has therefore had to suggest green field sites for development, but with objective to also protect and enhance the natural environment and enhance the image of the Borough.	
899459			LP20151289	The site at Murton in particular is of great community amenity value, with the paths across the site used by walkers, runners, dog walkers, horse riders and cyclists on a regular basis. As such this land represents a major green infrastructure element for the areas of Murton, New York, Shiremoor, Preston and Monkseaton which would be lost or seriously compromised by the development of large scale housing on the site.		DM 8.2 Protection of Green Infrastructure	Comment noted. Policy AS4.4A-C outlines the requirement for strategic sites such as Murton. It states that 'A concept framework must be prepared jointly by the landowner/s and North Tyneside Council; this will be used as a basis for further comprehensive master planning. Within this master planning Green infrastructure corridors must be safeguarded through Strategic Allocations. Major new areas of open space and country park provision should be located to avoid the joining together of settlements and maintain their unique character and identity, maintaining amenity space, access to the countryside and biodiversity.	No amendments proposed.
899469			LP20151290	This policy clearly sets out that only exceptional circumstances would allow consideration of loss of land which is "designated wildlife site or providing important biodiversity value" With respect to the development plot identified at Murton, the existence of both designated wildlife site		DM 8.2 Protection of Green Infrastructure	Comments noted. The Golden Plover mitigation site is not a designated wildlife site. Development will not take place without this issue being appropriately resolved. Please note this policy number has now changed to DM5.2.	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151355	Policy DM8:2. Protection of Green Infrastructure. CPRE supports this policy. However, we are concerned, based on experience elsewhere, that clause e) allowing the offer of alternative provision may lead to inadequate or otherwise unsatisfactory outcomes, especially in terms of longer term maintenance. We propose that such provision should be only acceptable in "exceptional circumstances". CPRE are also of the view that it not desirable to disrupt wildlife communities in any circumstances. Reference to the capacity of Neighbourhood Plans to deliver this framework policy e.g. through the designation of Local Green Spaces would be helpful.		DM 8.2 Protection of Green Infrastructure	Comments noted . The first line of Policy DM8.2 already states 'the loss of any part of the green infrastructure network will only be considered in the following <u>exceptional circumstances</u> '. The policy as allows for the possibility of better green infrastructure provision. Neighbourhood plans do not solely cover the designation of green space. They cover a much larger spectrum which is outlined within National Planning Policy and Guidance. Please note this policy number has now changed to DM5.2	No amendments proposed.
464572	Landowner	PLANNING CONSULTANCY	LP20151503	These comments are submitted having regard to the comment in the Local Plan Consultation 2013 and Sites Analysis 2015 Schedule that land to the rear of Midhurst Road, Benton (SHLAA ref 298) is subject to an application to designate the site as Local Green Space. Nexus object to the designation of land to the rear of Midhurst Road, Benton (SHLAA ref 298) as Local Green Space / Green Space / Open Space for a number of reasons including; 1 Planning Practice Guidance (007		DM 8.2 Protection of Green Infrastructure	The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) and S7.1 (now S4.1) (now Policies S1.4 and S4.1). Given that the majority of the site was until very recently used for railway sidings the brownfield context is acknowledged. This site has been assessed through the SHLAA (Site 298) and was included as a potential development site in the 2013 of the plan. However, following further assessment	No amendments proposed

				<p>ref ID : 37-007-20140306) states that designating any Local Green Space will need to be consistent with local planning for sustainable development in the area. The designation of land to the rear of Midhurst Road, Benton as Local Green Space is not consistent with local planning for sustainable development in the area. As set out in the SHLAA, the site is 100 percent brownfield. A core planning principle is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided it is not of high environmental value. Land to the rear of Midhurst Road, Benton is not of high environmental value. Its reuse should be encouraged and it should be allocated and developed in preference to Greenfield sites listed in policy S7.3. A parallel representation has been submitted to policy S7.3. 2 North Tyneside Council's Green Space Strategy February 2015 assesses the value of the site 'low' and the quality of the site 'low', Map 1. In the circumstances the site is acknowledged not to be of particular value. The rationale behind the application for Local Green Space designation has to be questioned acknowledging the guidance in Planning Practice Guidance (007 ref ID : 37-007-20140306) that the Local Green Space designation should not be used in a way that undermines the aim of plan making, namely to identify sufficient land in suitable locations to meet identified needs. The rationale behind the application for the Local Green Space designation particularly has to be questioned acknowledging the statement in</p>			<p>through the Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space. As a result the site will not be selected as preferred residential allocation.</p>

				<p>paragraph 1 of the Benton Triangle Community's website applications' page that, 'there is a risk that it will be used for housing' <a href="http://www.bentontriangle.com/#!applications/coxh">http://www.bentontriangle.com/#!applications/coxh</a>. 3 North Tyneside Council's Green Space Strategy February 2015 includes Objective 9 : Design of Green Spaces. This sets out a number of criteria as to how Green Spaces should be designed. The site does not meet these for reasons including the site is not accessible by all, access being through a fence and down a steep bank, it suffering disuse, it being unlit, there being evidence of antisocial behaviour on the site and that there are not any linkages through. The poor quality of the site is acknowledged in the Local Plan Consultation Sites Analysis report 2015 which under the heading Officer Response details that the site 'has remained largely inaccessible and unused'. 4 It is noted that in the application for the designation of the site as Local Green Space there is reference to allotments on the site. Whilst historically there might have been allotments on a portion of the site this has not been the case for some years, a matter acknowledged in the Council's Allotment Strategy 2009 "" 2015 which records at the time the document was written they were not in use and this remains the case now. The reference to allotment gardens on the Proposals Map and on the Sites Analysis 2015 should be deleted. 5 The site is in Nexus's ownership. The proposal to 'create open space' requires Nexus' agreement otherwise the area will remain largely inaccessible and unused as it currently</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				is as acknowledged in the Officer Response in the Local Plan Consultation 2013 and Sites Analysis 2015. This goes to the deliverability of the proposal, policies amongst things having to be deliverable if the Plan is to be sound, NPPF para 182. Nexus' position is that the creation of open space in isolation is not deliverable. That said as has been detailed previously, if the site was subject of a comprehensive development package including open space and a residential development of around 50 dwellings in accordance with the Potential Sites Background Paper, there would be an opportunity to provide an overall scheme which is deliverable, in the public interest and amongst other things would result in high value and high quality open space meeting the standards in Objective 9 of the Council's Green Space Strategy 2015				
899297			LP20151699	I welcome the recognition that if development impinges on Green Infrastructure that alternative provision should maintain green infrastructure connections. Throughout the document, the meaning of "sustainable" is getting confused with appropriate levels of growth/development. May I bring your attention to The UK Sustainable Development Strategy Securing the Future that sets out five "guiding principles" of sustainable development: living within the planet's environmental limits; ensuring a strong, healthy and just society; achieving a sustainable economy; promoting good governance; and using sound science		DM 8.2 Protection of Green Infrastructure	Comments noted. A balance must be struck between economic, social and environmental sustainability. In line with the NPPF the Green infrastructure policies outline the need to protect, manage, enhance and create. Please note this policy number has now changed to DM5.2	No amendments proposed.

				responsibly. Sustainability requires us to conserve and enhance our natural environment; significant parts of this document contradict this aim. Whilst this statement is no longer applicable to this policy, This is relevant to the wider document. I have concerns over the last sentence in this policy. The LPA are not "planning positively" (paragraph 114 of NPPF) for networks of biodiversity by requiring new green infrastructure to only "not cause adverse impacts". This policy should be looking to meet the aims of paragraph 109 of NPPF to seek "net gains in biodiversity" and as such should be reworded to ensure that new green infrastructure not only will not cause adverse impacts on biodiversity but actually seeks to enhance.				
789566	Environment Agency	GOVERNMENT AGENCY	LP20151825	We support policies S/8.1 and DM/8.2 that seek to protect and provide Green Infrastructure, however we continue to recommend that the text relating green infrastructure recognises the benefits Green Infrastructure can contribute to WFD objectives. In particular in managing urban run-off and improving water quality. We consider this is particularly necessary due to the Water Framework Directive (WFD). WFD is European legislation designed to protect and enhance the quality of our rivers, lakes, streams, groundwater, estuaries and coastal waters, with a particular focus on ecology. WFD sets out the need to protect and improve the water environment in its totality. It applies to all surface water bodies, including rivers, streams, lakes, estuaries and canals,		DM 8.2 Protection of Green Infrastructure	Following designation as open space through the Local Plan, any proposal for alternative use of the site, including for residential development, would be assessed on individual merit in light of relevant policies. In this context, in addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM4.5. Supply from these sources will continue to come forward for development to meet the overall requirement for new homes to 2032. As part of any proposal for development, a planning application must include an assessment to consider the current role, use	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				coastal waters, and all groundwater bodies. The Directive has two main objectives: "ç It sets a target for all waterbodies to achieve "good status" by 2015. "ç No deterioration in current status. Historically, urban rivers have been used as a convenient route for disposing of society's waste, with effluent from industry and sewage damaging the environment for people and wildlife. Despite the great progress made in tackling the harmful effects of urban pollution, many of North Tyneside's watercourses still fail to meet the water quality standards necessary to support a healthy environment. In North Tyneside, urban run-off has been identified as one of the main reasons some of the rivers fail to meet the quality standards set by the Water Framework Directive. This is of particular importance for the Sandy's Letch, the Seaton Burn and the Brierdene. Green Infrastructure is of particular importance in addressing these issues.			and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision.	
510094	Natural England	GOVERNMENT AGENCY	LP20151946	Natural England supports this policy.		DM 8.2 Protection of Green Infrastructure	Support noted. Please note this policy number has now changed to DM5.2	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152044	Policy DM8.2 sets out the policy position that the Council wish to protect the loss of Green Infrastructure within the authority area. Persimmon supports this policy direction however have questions as to the overall scope and application of this policy in practice. The policy map provided alongside this consultation sets only one area (Coastal Change Management Area) however the policy is worded to cover "any part of the		DM 8.2 Protection of Green Infrastructure	Comments noted. The map key was in error and hence presented confusion when reading the policy. The map has now been amended. As stated within the policy loss of <u>any</u> part of the green infrastructure network will only be considered in the following exceptional circumstances...' 	Trust	ON		mitigation. This plan should produce a series of linked areas that would be suitable and produce a net gain for biodiversity across the borough to meet the requirements of NPPF. Again we make reference to paragraph 114 of NPPF that requires LPAs to "set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure". The mapping of areas for habitat creation and retention (by a local partnership) is required by NPPF paragraph 117. This has not happened.		Standards	As referenced, the Local Plan Policies Map outlines that this land is 'allotment gardens'; however, this label is on the Ordnance Survey 1:10000 scale 'base map', a record which is maintained and update by that independent organisation. It is recognised that the site is not used as allotments and has not been for a number of years. Please note this policy number has now changed to DM5.3	
587121		NATIONAL/REGIONAL/ORGANISATION	LP2015971	We have a concern about your proposed designation of land to the rear of Midhurst Road, Benton (SHLAA reference 298) as "Local Green Space", and will be sending you a separate response in connection with this issue. However, following further appraisal it has been concluded that this site does not meet the criteria for designation as formal Local Green Space. Please note this policy number has now changed to DM5.3	No amendments proposed.
898969			LP2015999	When is the council going to tackle the issue of dog foul in the area? There seems little point developing a plan when it is undermined by this blight on society.		DM 8.3 Green Space Provision and Standards	The Local Plan is necessary to guide future development in the Borough. The Council's Street Care team work to tackle dog fouling in the Borough. Issues can be reported to this team via an online form or telephone. Please note this policy number has now changed to DM5.3	No amendments proposed.
899444	George F White		LP20151256	SM8.3 Green Space Provision and Standards Our Client supports the LPAs proposed policy to provide a range of easily accessible play		DM 8.3 Green Space Provision and	The policy will be updated to be more flexible. It will direct to the Green Space Strategy as a guide but will not repeat the	Policy now makes it clear that new development should sustain or improve

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				spaces; however our Client has reservations in regards to the viability of the suggested provision. The proposed policy does not specifically indicate whether the provision of LEAP/ NEAP/ SEAP provision is for all households existing and new development, or whether this is only for new residential development. Our Client would request that there is a higher proportion of high quality play space, but with less strict distance provision, for example within 600 " " 1,000 m of a household, would be more beneficial than various sizes and types of play space at various distances, as high quality provision is likely to attract the majority of users. Therefore quality, not quantity is more important (NPPF, 73); although accessibility to open and play spaces and places is still required. Our Client would also suggest that play spaces do not always require play equipment, open community spaces can be as efficient in attracting people and families to utilise open space. This would also attract various sections of the community and not specifically provide for only children and families. The NPPF (69) aims to involve various sections of the community to be able to access open space and community provisions. This proposed policy should be amended to be less specific and more flexible to meet the needs of the wider community.		Standards	exact standards of that document. Nevertheless, the standards within the Green Space Strategy are considered reasonable. For play areas, they are based on the Fields in Trust (formally the National Playing Fields Association) play area categories and their characteristics, but have been adapted to meet local circumstances, as established in the Council's former Play Policy and Strategy and previous versions of the Green Space Strategy. It is considered that equipped areas for play are important in addition to general open space, which is also recognised. Please note this policy number has now changed to DM5.3	current levels of provision rather than have to achieve 100% provision. Policy now makes reference to the Green Space Strategy rather than repeat its exact standards.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151356	Policy DM8:3. CPRE welcomes this policy. Arguably allotment provision could be incorporated under the heading of amenity green space.		DM 8.3 Green Space Provision and Standards	Comments noted. Allotments are not included within this policy because they do not fall within the definition of free and accessible open space, the provision of such places this policy aims to secure. Allotments	No amendments proposed.

							are however, considered part of the GI network and their protection and enhancement are supported through those relevant policies. Please note this policy number has now changed to DM5.3	
464572	Landowner	PLANNING CONSULTANCY	LP20151504	<p>These comments are submitted having regard to the comment in the Local Plan Consultation 2013 and Sites Analysis 2015 Schedule that land to the rear of Midhurst Road, Benton (SHLAA ref 298) is subject to an application to designate the site as Local Green Space.</p> <p>Nexus object to the designation of land to the rear of Midhurst Road, Benton (SHLAA ref 298) as Local Green Space / Green Space / Open Space for a number of reasons including; 1 Planning Practice Guidance (007 ref ID : 37-007-20140306) states that designating any Local Green Space will need to be consistent with local planning for sustainable development in the area. The designation of land to the rear of Midhurst Road, Benton as Local Green Space is not consistent with local planning for sustainable development in the area. As set out in the SHLAA, the site is 100 percent brownfield. A core planning principle is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided it is not of high environmental value. Land to the rear of Midhurst Road, Benton is not of high environmental value. Its reuse should be encouraged and it should be allocated and developed in preference to Greenfield sites listed in policy S7.3. A parallel representation has been submitted to policy S7.3. 2 North Tyneside Council's Green Space</p>		DM 8.3 Green Space Provision and Standards	<p>The redevelopment of brownfield sites is prioritised through the Local Plan, including in Policies DM2.2 (now S1.4) (NOW1.4) and S7.1 (now S4.1) (Now 4.1). Given that the majority of the site was until very recently used for railway sidings the brownfield context is acknowledged. This site has been assessed through the SHLAA (Site 298) and was included as a potential development site in the 2013 of the plan. However, following further assessment through the Local Plan process, including taking account of information from relevant experts and representations to this consultation exercise, it has been determined that the most appropriate designation for this site is as open space. As a result the site will not be selected as a preferred residential allocation. Following designation as open space through the Local Plan, any proposal for alternative use of the site, including for residential development, would be assessed on individual merit in light of relevant policies. In this context, in addition to allocated sites, an allowance is also made for the delivery of small sites (those of less than 5 units) and windfall sites. These are not allocated on a site-specific basis but are deemed suitable when judged against the criteria of Policy DM4.5. Supply from these sources will continue to come forward for</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>Strategy February 2015 assesses the value of the site 'low' and the quality of the site 'low', Map 1. In the circumstances the site is acknowledged not to be of particular value. The rationale behind the application for Local Green Space designation has to be questioned acknowledging the guidance in Planning Practice Guidance (007 ref ID : 37-007-20140306) that the Local Green Space designation should not be used in a way that undermines the aim of plan making, namely to identify sufficient land in suitable locations to meet identified needs. The rationale behind the application for the Local Green Space designation particularly has to be questioned acknowledging the statement in paragraph 1 of the Benton Triangle Community's website applications' page that, 'there is a risk that it will be used for housing' <a href="http://www.bentontriangle.com/#applications/coxh">http://www.bentontriangle.com/#applications/coxh</a>. 3 North Tyneside Council's Green Space Strategy February 2015 includes Objective 9 : Design of Green Spaces. This sets out a number of criteria as to how Green Spaces should be designed. The site does not meet these for reasons including the site is not accessible by all, access being through a fence and down a steep bank, it suffering disuse, it being unlit, there being evidence of antisocial behaviour on the site and that there are not any linkages through. The poor quality of the site is acknowledged in the Local Plan Consultation Sites Analysis report 2015 which under the heading Officer Response details that the site 'has remained largely inaccessible and unused'. 4 It is noted that in</p>			<p>development to meet the overall requirement for new homes to 2032. As part of any proposal for development, a planning application must include an assessment to consider the current role, use and accessibility of this area of open space and whether there is a need for alternative provision in the local area. Such an assessment would have to justify the loss of open space and, if necessary, identify new space or improvements to other existing provision. The comments with regard to the Green Space Strategy are acknowledged and it is correct that this site has been assessed as 'low' in terms of both value and quality in the latest of the GSS. The proposals for a Local Green Space designation have arisen from the representations of the Benton Triangle Community Action Group and, as a result, it was considered necessary to undertake an assessment of the appropriateness of such a designation through the Local Plan process. However, following further assessment in accordance with the criteria provided in the NPPF, it has been recommended that this site does not meet the criteria for designation as formal Local Green Space. Comments with regard to the current physical quality of the site are acknowledged, as is the limited accessibility. As referenced, the Local Plan Policies Map outlines that this land is 'allotment gardens'; however, this label is on the Ordnance Survey 1:10000 scale 'base map', a record which is maintained and update by that independent organisation. It is recognised</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the application for the designation of the site as Local Green Space there is reference to allotments on the site. Whilst historically there might have been allotments on a portion of the site this has not been the case for some years, a matter acknowledged in the Council's Allotment Strategy 2009- 2015 which records at the time the document was written they were not in use and this remains the case now. The reference to allotment gardens on the Proposals Map and on the Sites Analysis 2015 should be deleted. 5 The site is in Nexus's ownership. The proposal to 'create open space' requires Nexus' agreement otherwise the area will remain largely inaccessible and unused as it currently is as acknowledged in the Officer Response in the Local Plan Consultation 2013 and Sites Analysis 2015. This goes to the deliverability of the proposal, policies amongst things having to be deliverable if the Plan is to be sound, NPPF para 182. Nexus' position is that the creation of open space in isolation is not deliverable. That said as has been detailed previously, if the site was subject of a comprehensive development package including open space and a residential development of around 50 dwellings in accordance with the Potential Sites Background Paper, there would be an opportunity to provide an overall scheme which is deliverable, in the public interest and amongst other things would result in high value and high quality open space meeting the standards in Objective 9 of the Council's Green Space Strategy 2015</p>			<p>that the site is not used as allotments and has not been for a number of years. It is not considered that designation as open space would compromise the deliverability of Local Plan strategy. Not all designated open space is publically accessible and therefore, even though this site is in private ownership, this decision is felt to be appropriate. Please note this policy number has now changed to DM5.3</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
899297			LP20151700	I note that there have been changes made to this policy (in particular points c and d), however would question whether or not these figures are actually achievable, given that proposed areas allocated for development including existing developments and the lack of strategic plan for biodiversity,. This could be achieved by a strategic biodiversity plan, prepared in consultation with appropriate stakeholders, to include areas allocated for biodiversity (including green infrastructure, on and off site mitigation and compensation). This would result in a more effective and achievable plan. This should link to priorities identified by the Local Nature Partnership.		DM 8.3 Green Space Provision and Standards	Comments noted. A strategic biodiversity plan is not considered appropriate at this stage and will arise through the planning application process. Please note this policy number has now changed to DM5.3	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151947	Natural England supports this policy.		DM 8.3 Green Space Provision and Standards	Support noted. Please note this policy number has now changed to DM5.3	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152045	Policy DM8.3 sets out the Council's approach to developments in proximity to types of open space and play facilities. Firstly we consider this policy is confusing in title as it firstly relates to play provision and then secondly to provision and access to open spaces. We suggest that this policy is split to make it clearer. Secondly the standards relate to all households being within the specified distances to the open space and play facilities, it is considered that a very small proportion of the existing households accord with this standard and would like to see how the Council will seek to bring the existing housing stock up to standard? Thirdly for new developments these policies set a standard		DM 8.3 Green Space Provision and Standards	Comments noted. The policy will be updated to be more flexible and clear. It will direct to the Green Space Strategy as a guide but will not repeat the exact standards of that document. Green space definitions are within the Green Space Strategy, along with their current locations. This forms part of the evidence base. Please note this policy number has now changed to DM5.3	Policy now makes it clear that new development should sustain or improve current levels of provision rather than have to achieve 100% provision. Policy now makes reference to the Green Space Strategy rather than repeat its exact standards.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>which is overly proscriptive, onerous and confusing to understanding and apply in practice. It seems unreasonable to expect improved access to all these forms given that the existing housing stock does not. Similarly the policy sets the requirement to meet all types of play facilities meaning new developments would need to provide onsite (if not within target distance) all seven types of play provision, and significant proportions of open space. For the play provision the policy needs to set a hierarchy looking to provide the best type of play facility on site if that site does not fall within the allocated catchment. For the open space policy there should be more clarity as to what the Council considers "parks" and "natural or semi-natural green space" and "accessible, free usable green space" and to clearly show this on the allocations map or at least within the evidence base. At present it is impossible to assess future development sites and how this policy would effect their develop ability / viability. Finally this policy sets out that non compliance with this standard will result in the seeking of mitigation, which not withstanding our misgivings above makes sense however the form and type of mitigation is unclear, additional clarity should be provided as to the form and type of mitigation sought.</p>				
892176		RESIDENT	LP2015246	<p>Please send the swans back from Killingworth Lake to the reserve at Gosforth Park. Organise a regatta or try bird scarers.</p>		S 8.4 Biodiversity and Geodiversity	<p>Comments noted. Swan management is beyond the scope of the Local Plan. The relevant teams of the Council are aware of the issues. Please note this policy number has now changed to S5.4</p>	No amend ments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
463028			LP2015262	The section about conserving enhancing and managing wildlife corridors is at odds with North Tyneside's suggested sites for development. The map shows wildlife corridors going through three areas that either have planning permission for houses, or are marked for development: - Site 17 (Station Road West) - The site opposite this i.e. East of Station Road and West of the Rising Sun, where building has already started. - Holystone (despite a 3500 signature petition), between the bypass and the A19, next to the Stonebrook pub and hotel. This makes no sense at all, as the development will block the wildlife corridor. Is the wildlife supposed to go through peoples' gardens? North Tyneside need to rethink this and stop development in this area.		S 8.4 Biodiversity and Geodiversity	The wildlife corridor map in the Local Plan outlines the general direction of the corridors. A more specific Wildlife Corridor Map is provided within North Tyneside's Green Infrastructure Strategy (2015). This map shows the exact location of the Wildlife Corridors. Master plans of proposed housing developments have been assessed during the review of the Wildlife Corridors to ensure that they cover key areas. Private gardens are a very important wildlife asset and help connect various networks. Please note this policy number has now changed to S5.4	No amendments proposed.
892786		RESIDENT	LP2015288	I have great concerns about the vital preservation of the wildlife corridors that look as if they will be compromised at Gosforth Wood; Killingworth Moor; Backworth; West Allotment; Rising Sun; and, Murton. Developments and transport improvements will have a devastating effect.		S 8.4 Biodiversity and Geodiversity	Comments noted. North Tyneside's Green Infrastructure Strategy outlines the importance of Wildlife Corridors. In order to support the future development and enhancement of GI in North Tyneside a number of recommendations have been created to encourage the creation of appropriate, well maintained, multifunctional, quality provision. Amendments made to Local Plan to provide further policy and guidance on wildlife corridors. Please note this policy number has now changed to S5.4	Amendments actioned. New Wildlife Corridor policy and related text.
893932		RESIDENT	LP2015374	I strongly support the designation of the Benton curve as a wildlife corridor.		S 8.4 Biodiversity and Geodiversity	Support noted. Please note this policy number has now changed to S5.4	No amendments proposed.

893941		RESIDENT	LP2015377	I strongly support the designation of the Benton curve as a wildlife corridor. I have lived at the following address for 57 years and many many years ago I agreed for the same thing to happen to the curve but nothing came of it until now, thank you.		S 8.4 Biodiversity and Geodiversity	Support noted. Please note this policy number has now changed to S5.4	No amendments proposed.
893944		RESIDENT	LP2015379	I strongly support the designation of Benton curve as a wildlife corridor.		S 8.4 Biodiversity and Geodiversity	Support noted. Please note this policy number has now changed to S5.4	No amendments proposed.
893964		RESIDENT	LP2015381	I am emailing to record my strong support for the local authority's intention to designate the Benton Curve, a section of disused railway adjoining The Oval in Benton, as a wildlife corridor.		S 8.4 Biodiversity and Geodiversity	Support noted. Please note this policy number has now changed to S5.4	No amendments proposed.
894055		RESIDENT	LP2015385	I strongly support the designation of the Benton curve as a wildlife corridor.		S 8.4 Biodiversity and Geodiversity	Support noted. Please note this policy number has now changed to S5.4	No amendments proposed.
895005		RESIDENT	LP2015474	During the current consultation period I wish to register my support for the North Tyneside Council plan to designate the disused railway in Benton, also known as the Benton Curve, as a wildlife corridor.		S 8.4 Biodiversity and Geodiversity	Support noted. Please note this policy number has now changed to S5.4	No amendments proposed.
806166		RESIDENT	LP2015477	I am writing to object strongly to the North Tyneside Local Plan for the following reasons: "ç Proposed wildlife corridors are not based on sound assessment and are compromised by planned development and new roads. They do not meet NPPF requirements for establishing coherent ecological networks.		S 8.4 Biodiversity and Geodiversity	Comments noted. Paragraph 117 of the NPPF states that Local Planning Authorities should identify and map components of the local ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect them and areas identified by local partnerships for habitat restoration or creation. There is no definitive methodology for producing a Borough ecological network map. However	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							<p>we have drawn heavily on external resources, including National Planning Policy and Natural England's work. Please note this policy number has now changed to S5.4</p> <p>Alongside the Local Plan a number of additional evidence based studies and guides have been developed, including the North Tyneside Green Infrastructure Strategy (2015). As part of this strategy North Tyneside's Wildlife corridors have been reviewed following significant changes in the landscape since the previous GI strategy and UDP. In order to produce North Tyneside's Wildlife Enhancement Corridors (WEC), for the emerging Local Plan it is essential that a baseline map with all existing green space was produced. This is in line with Natural England's recommendations for opportunity mapping and habitat networks. Working with organisations and individuals in particular with North Tyneside's Ecologist, existing designated sites and valuable habitats were first mapped on GIS. Clusters of habitats and sites which form the core wildlife areas for the Borough were then identified. This then led onto plotting network links between the core areas. Potential buffers, links and stepping stones were created to produce large habitat areas, and to create a functional wildlife network. Outside the network, wildlife habitats and sites will continue to be managed and protected, and can be buffered by habitat creation and appropriate management.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							It is recognised that the additional development proposed in the Local Plan could have indirect impacts on biodiversity and the use of open space for recreation. In preparing site allocations, North Tyneside Council has considered the potential impact of each site allocation on biodiversity and green spaces assets. Where new development occurs North Tyneside Council will seek on or off-site provision resulting from recreational pressure on existing Green Infrastructure sites, when practical.	
806166		RESIDENT	LP2015482	I am writing to object strongly to the North Tyneside Local Plan for the following reasons: "I understand that Signet, an American developer, wants to build a large leisure centre opposite the entrance to Gosforth Nature Reserve. This site has become a natural extension of the reserve for wildlife, including breeding birds. However, Signet is planning to bulldoze the complete site on Thursday March 19th, even before the planning application has been considered. This is totally outrageous.		S 8.4 Biodiversity and Geodiversity	Comments noted. The Local Plan designates sites 10 and 11 (located near Gosforth Business park) for employment land. North Tyneside's Development Management team will assess any individual applications that come forward through the normal planning application process which will assess any impact on biodiversity and geodiversity. Please note this policy number has now changed to S5.4	No amendments proposed.
396412	Northumberland Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015506	NPPF requires LPAs in paragraph 114 to set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity. This statement remains current. Whilst this policy meets the requirement for protection and enhancement, there is no reference to habitat creation, particularly for wildlife links (point d). The Northumberland Wildlife Trust		S 8.4 Biodiversity and Geodiversity	Comments noted. North Tyneside Local Planning Authority and NWT are working closely together in order to reach the right balance between development and biodiversity/geodiversity needs. Opening sentence of Policy has been amended to include creation. Please note this policy number has now changed to S5.4	Policy S8.4 amended 'The Borough's biodiversity and geodiversity resources will be protected, created, enhanced and managed having regard to their relative significance. Priority will be given to:'

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>therefore considers this policy to be incomplete and not to meet the requirements of NPPF. NWT welcomes the alteration to this part of the policy to include the creation of new linking habitats (point d). The Northumberland Wildlife Trust has concerns that point "a" of this policy only looks to protect statutory and non-statutory designated sites. Again this falls short of the requirements of NPPF to create, protect, enhance and manage of networks of biodiversity. As does point "c" that does not include reference to managing or creating local sites of wildlife corridors. NWT welcomes the inclusion of point d, however would like to see more references to creation of wildlife corridors and biodiversity resources particularly in the opening sentence of this policy. The Northumberland Wildlife Trust has concerns that other policies and allocations in this document have conflicting aims with the Policy S/8.4, thus making such actions as protecting and enhancing wildlife links unlikely to be achievable. This statement remains current. "Point b" refers to the National Biodiversity Action Plan. This has now been superseded by The 'UK Post-2010 Biodiversity Framework'. The correct document needs to be referenced here. NWT welcomes the alteration made in reference to this comment.</p>				
895340		RESIDENT	LP2015529	<p>5) Wildlife Corridors Green wildlife corridors are important for nature, but they are also desirable routes for foot, bicycle and horse access "c With the exception of Metro lines, wildlife corridors are particularly synergetic</p>		S 8.4 Biodiversity and Geodiversity	<p>Comments noted. 							were created to produce large habitat areas, and to create a functional wildlife network. Outside the network, wildlife habitats and sites will continue to be managed and protected, and can be buffered by habitat creation and appropriate management. It is recognised that the additional development proposed in the Local Plan could have indirect impacts on biodiversity and the use of open space for recreation. Wildlife Corridor designation does not automatically render development obsolete. Local Planning Authorities are required by National Planning Policy to identify areas of habitat that connect wildlife. North Tyneside's Local Plan seeks to encourage development which helps to maintain and enhance these links. Wildlife corridors help to identify the importance of the area within the network. Please note this policy number has now changed to S5.4.	
898404		RESIDENT	LP2015773	I am writing to confirm my strong support for the disused railway known locally as the Benton Curve to stay as "wildlife corridor". I believe this is vitally important. I will very upset should I find that this is being changed.		S 8.4 Biodiversity and Geodiversity	Support noted. Please note this policy number has now changed to S5.4.	No amendments proposed.
898969			LP2015995	The map included in the plan shows the seafront through Whitley Bay as having a wildlife corridor designation. The promenade is just concrete, bricks and flagstones. No effort has been made to make this 'corridor' into a wildlife corridor by providing suitable native plants, trees and shrubs etc. The few plants that have been provided have been done in very small planters and generally contain non-native, invasive plants, which is hardly a		S 8.4 Biodiversity and Geodiversity	Comments noted. North Tyneside's coastline makes up a very important Wildlife Corridor. North Tyneside has two sites of special scientific interest (SSSI). Due to the importance of the coastline North Tyneside receives a large number of wintering birds including purple Sandpiper, Turnstone and Little Turn. Policy S8.4 (now S5.4) outlines that 'The Borough's biodiversity and geodiversity resources will be protected,	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				endorsement for protecting and enhancing biodiversity. In addition, nesting sites of birds such a House Martin, Swift, Swallow, House Sparrow and Starling have been destroyed through the demolition of empty buildings with no attempt to replace these. How does the council propose to develop, enhance and maintain suitable wildlife corridors?			enhanced and managed having regard to their relative significance. Please note this policy number has now changed to S5.4.	
685823	North Tyneside Green Party		LP20151103	Green Party The proposed development of the land at Murton and scale of land allocated does not seem to support the requirement to give priority achieving the objectives and targets set out in the Biodiversity Action Plan, in particular in relation to the identified target area Murton within the BAP for creation and enhancement of up to 5 linear kilometres of Scrub & Hedgerow, and up to 10ha of new native scrub/ shrub land. The proposed development plot infringes on an identified wildlife corridor which is designated as a priority transport route. 8 acres of the Murton plot is already set-aside to be retained as undeveloped grassland and wetland area under a planning obligation to provide offset habitat for a development elsewhere in the borough. Areas of this offset land are also infringed by the proposed development, particularly priority transport infrastructure. The plan does not identify or accept the existence of this land at all. It is imperative that the unavailability of this land is made clear in the development plan, and that any development proposal is considered in light of this land.		S 8.4 Biodiversity and Geodiversity	Comments noted. The Local Planning Authority is aware of a number of constraints which exist within the site and does not expect the whole site to be developed. As outlined in AS7.4 (now S4.4, now split into 4.4a-c) the North Tyneside Council expect a Master plan for the strategic allocation sites in order to ensure the safeguarding of important green infrastructure assets. In line with this master planning a number of ecological surveys must be carried out before any development can be considered.	No amendments proposed.

				<p>housing estate. "Wildlife corridors allow movement of wildlife between areas of habitat, linking sites and reducing the risk of isolated populations becoming unstable and dying out. Therefore it is important the network of wildlife sites and links between them is maintained and enhanced ". there is evidence to prove that electricity pylon routes are of no use as wildlife corridors. Study suggests pylons and wires that stretch across many landscapes are having a worldwide impact on wildlife! Power lines are seen as glowing and flashing bands across the sky by many animals, research has revealed. Scientists knew many creatures avoid power lines but the reason why was mysterious as they are not impassable physical barriers. Now, a new understanding of just how many species can see the ultraviolet light "" which is invisible to humans "" has revealed the major visual impact of the power lines."It was a big surprise but we now think the majority of animals can see UV light," said Professor Glen Jeffery, a vision expert at University College London. "There is no reason why this phenomenon is not occurring around the world."Dr Nicolas Tyler, an ecologist at UIT The Arctic University of Norway and another member of the research team, said: "The flashes occur at random in time and space, so the power lines are not grey and passive, but seen as lines of light flashing."He said the discovery has global significance: "The loss and fragmentation of habitat by infrastructure is the principle global threat to biodiversity "" it is absolutely major. Roads have always got</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>particular attention but this will push power lines right up the list of offenders." The avoidance of power lines can interfere with migration routes, breeding grounds and grazing for both animals and birds. Autopsies on dozens of mammals from zoos and abattoirs showed their eyes were able to see UV, including cattle, cats, dogs, rats, bats, okapi, red pandas and hedgehogs. Also on the list were reindeer and further work published in the journal Conservation Biology showed these animals, whose eyes are specially adapted to the dark Arctic winters, are particularly sensitive to UV light. UV vision helps reindeer find plants in snow cover, but in the depths of winter their wide irises and sensitive eyes means the power lines appear particularly bright. The avoidance of power lines had been explained in the past by the corridors cut through forests to accommodate them, where animals would be exposed in the open to predators. Around the world, Tyler said: "There are hundred of examples of animals avoiding power lines. Now we know that, not only do these clear-cut corridors mean exposure to predators, at the same time there is this damn thing flashing at you."Jeffery said burying all power cables would be unrealistically expensive but added that one idea would be to put a non-conducting shield around the cable to screen it from view. The UV light, which is caused by electricity ionising the air around cables, are a major source of inefficiency for electricity companies and also cause the hissing or crackling noises sometimes heard. Power</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				companies already use helicopter-mounted UV cameras to monitor power cables, because the flashes can be an early sign of conduction problems, but the cameras only record a very narrow range of UV. "Animals see across the range, so the intensity of light seen by them is much more than seen by the helicopter flights," said Jeffery. The new research was funded by the UK's Biotechnology and Biological Sciences Research Council. There is also the issue of the many research papers on powerlines & childhood leukaemia-this is why you have designated the route under the powerlines as the wildlife corridor, because you cannot build houses in close proximity to the power lines.				
899297			LP20151701	Biodiversity and Geodiversity . Paragraph 8.18 I welcome the recognition that those ecological features outside of designated sites provide important and invaluable contributions to local biodiversity.. . Policy S/8.4 Biodiversity and Geodiversity. . Objection . NPPF requires LPAs in paragraph 114 to set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity. . I welcome the inclusion of point d, however would like to see more references to creation of wildlife corridors and biodiversity resources particularly in the opening sentence of this policy. . I have concerns that other policies and allocations in this document have conflicting aims with the Policy S/8.4, thus making such actions as protecting and	S 8.4 Biodiversity and Geodiversity		Comments noted. The term 'creation' has been added into the opening sentence of policy S5.4 (was S8.4).	Policy S5.4 amended 'The Borough's biodiversity and geodiversity resources will be protected, <u>created</u> , enhanced and managed having regard to their relative significance. 				enhancing wildlife links unlikely to be achievable.				
638268	Natural History Society of Northumbria		LP20151901	Objection NHSN has concerns that other policies and allocations in this document have conflicting aims with the Policy S/8.4, thus making such actions as protecting and enhancing wildlife links unlikely to be achievable.		S 8.4 Biodiversity and Geodiversity	Comments noted. The Local Plan must be read as a whole. Although some designated sites have wildlife corridors running through them there is no reason to consider why these sites could not accommodate future development whilst adhering to the policies and maintaining a linked workable network of wildlife corridors. Please note this policy number has now changed to S5.4	No amendments proposed.
638268	Natural History Society of Northumbria		LP20151905	Furthermore, we do not consider the wildlife corridor allocations to be either functional or accurate to what is on the ground. These appear to be very loose links between small areas of green land (a lot of which is either currently allocated for development or is allocated in this new Local Plan) that do not form any coherent tangible wildlife link across the borough. For these wildlife corridors to have any functionality or be defensible in a planning inquiry they should be realistic and enforceable. Therefore at present the wildlife corridors do not meet NPPF requirement (paragraph 109) to establish "coherent ecological networks that are more resilient to current and future pressures". The LPA should plan positively for biodiversity and produce a targeted, strategic plan for areas that would be suitable for off-site mitigation. This plan should produce a series of linked areas that would be suitable and produce a net gain for biodiversity across the borough to meet the requirements of NPPF. Again we make reference to paragraph 114 of NPPF that requires LPAs to "set out a strategic		S 8.4 Biodiversity and Geodiversity	Comments noted. Paragraph 117 of the NPPF states that Local Planning Authorities should identify and map components of the local ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect them and areas identified by local partnerships for habitat restoration or creation. There is no definitive methodology for producing a Borough wildlife network map. However we have drawn heavily on external resources, including National Planning Policy and Natural England's work. The LPA have been working closely with NHSN and NWT to work through any issues raised with regards to the Wildlife Corridors. Please note this policy number has now changed to S5.4	No amendments proposed.

	Society of Northumbria			that has already been targeted for off-site mitigation for existing developments such as Station Road mitigation land at Murton. Mitigation and compensatory land for biodiversity should not be developed. This will not contribute towards biodiversity net gain, nor does it plan positively for the "protection... of networks of biodiversity and green infrastructure" (paragraph 114 of NNPF). We would seek that the LPA includes a policy that states that land used for mitigation for losses and adverse impacts on biodiversity should remain un-developed in perpetuity.		effects on Biodiversity and Geodiversity	site. It is proposed that the area of mitigation land is relocated to a similar suitable site in order to allow the effective delivery of housing policies within the Local Plan. Work for this is currently ongoing and will be resolved through the masterplanning process. Development will not take place without this issue being appropriately resolved. Please note this policy number has now changed to DM5.5	
510094	Natural England	GOVERNMENT AGENCY	LP20151949	The criteria applied to developments that affect nationally and locally designated sites should reflect the approach to their protection as set out in paragraph 118 of the NPPF. 26. Policy DM8.5 should be amended as follows considering this, with additional amendments suggested for clarity: "All development proposals should: a. protect the biodiversity and geodiversity value of land, protected species and buildings and minimise fragmentation of habitats; d. The benefits of the development in that location clearly outweigh any direct or indirect impacts on the interest features of the site and/or the wider ecological network. f. For all adverse impacts of the development appropriate mitigation measures, reinstatement of features, or, as a last resort, compensation to enhance or create habitats form part of the proposals on or off site."		DM 8.5 Managing effects on Biodiversity and Geodiversity	Comments noted. Amendments made to DM8.5. Please note this policy number has now changed to DM5.5	Amendments actioned.
463028			LP2015263	The section about conserving enhancing and managing wildlife corridors is at odds with North Tyneside's suggested sites for		DM 8.6 Management of	The wildlife corridor map in the Local Plan outlines the general direction of the corridors. A more specific Wildlife Corridor	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				development. The map shows wildlife corridors going through three areas that either have planning permission for houses, or are marked for development: - Site 17 (Station Road West) - The site opposite this i.e. East of Station Road and West of the Rising Sun, where building has already started. - Holystone (despite a 3500 signature petition), between the bypass and the A19, next to the Stonebrook pub and hotel. This makes no sense at all, as the development will block the wildlife corridor. Is the wildlife supposed to go through peoples' gardens? North Tyneside need to rethink this and stop development in this area.		International Sites	Map is provided within North Tyneside's Green Infrastructure Strategy (2015). This map shows the exact location of the Wildlife Corridors. Master plans of proposed housing developments have been assessed during the review of the Wildlife Corridors to ensure that they cover key areas. Private gardens are a very important wildlife asset and help connect various networks. Please note this policy number has now changed to DM5.6	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151359	Policy DM8:6. CPRE supports this policy.		DM 8.6 Management of International Sites	Support noted. Please note this policy number has now changed to DM5.6	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151950	Natural England supports the introduction of this policy which seeks to ensure that the local plan is compliant with the Habitats Regulations. However use of the measure "Preparation and implementation of a Habitat Creation Plan" should only be considered as a compensatory measure if: adverse effects cannot be ruled out; avoidance and mitigation measures have been deemed to be unworkable; there is no alternative and the development meets the test of imperative reasons of overriding public interest (IROPI). The inclusion of compensatory measures to address adverse effects on European/international sites prejudices these strict tests and would not comply with the		DM 8.6 Management of International Sites	Comment noted. This will be removed from the list of criteria. Please note this policy number has now changed to DM5.6	"Preparation and implementation of a Habitat Creation Plan" removed from the policy.

				Habitats Directive as it accepts adverse effects may not be avoided.				
510094	Natural England	GOVERNMENT AGENCY	LP20151968	North Tyneside Council Local Plan: Consultation 2015 Sustainability Appraisal Report - Sites that have been identified in the SA as having environmental impacts and which have been listed in the local plan as suitable locations for development should only be selected after investigation of alternative sites with less harmful impacts to reflect the approach to their protection as set out in paragraph 118 of the NPPF. In particular, housing sites with the potential to negatively affect Northumbria Coast SSSI should ideally be replaced by less sensitive sites to reduce the likelihood of direct impact or indirect impact (such as through recreational disturbance).		DM 8.6 Management of International Sites	The Local Plan process has to identify sufficient deliverable housing land to meet the objectively assessed needs of the Borough. Some of these sites may be in locations that could negatively affect internationally, nationally and locally designated wildlife sites. The HRA/AA that has been prepared to accompany the Local Plan sets out provisions to follow that would allow for the avoidance of negative affects. Similarly, the Local Plan contains policies to protect biodiversity ,which will be implemented when making decisions on development. Please note this policy number has now changed to DM5.6	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151969	Habitats Regulations Assessment The following advice on the HRA should be read alongside Natural England's advice on the relevant above policies. Natural England agree with list of policies and sites that are screened in to be taken to the AA stage, however as previously stated the following policies should also be taken through to the AA stage: AS1.5 The Coastal Sub Area, S5.1 Economic Growth Strategy, S6.1 Competitive Centres and DM7.5 Criteria for New Housing Development. Additionally the potential housing development sites should be reassessed both individually and cumulatively to take into consideration the effects of recreational disturbance both alone and in combination. When assessing recreational disturbance you could, if available, use visitor data that details		DM 8.6 Management of International Sites	The Council's HRA has been revised to take into full consideration the comments highlighted and has incorporated additional engagement and recommended mitigations from Natural England.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>where significant numbers of people come from when using Northumbria Coast SPA/Ramsar to influence your decision of which allocations should be considered in combination. You should be confident that the inclusion and content of policy DM8.6 Management of International Sites is enough to determine no adverse effect on integrity for the entire local plan. It should be clearly explained within the HRA how the mitigation measures within the policy will be delivered and ensure, in the conclusion of the HRA, that they will be effective at preventing adverse effects on integrity (in respect of the conservation objectives) alone and in combination. Given that detailed visitor and tourism proposals haven't been identified in the plan there is uncertainty regarding effects upon the SPA/Ramsar. Therefore, in this case, detailed mitigation can be deferred to the project stage. However given the reliance on policy DM8.6 to mitigate adverse effects and its potential to effect project viability, examples of mitigation and delivery mechanisms should support the HRA. The structure of the HRA requires amending to ensure that in combination effects with other plans and projects are appropriately assessed. The 2015 assesses both effects alone and in combination before determining mitigation measures. If, having ruled out adverse effects of the plan alone, the penultimate stage the HRA (before the conclusion and next step) should re-assess whether there would be residual effects that may adversely affect the site in combination. If your authority feel it</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				necessary, Natural England would be willing to discuss our advice on the HRA.				
396412	Northumb erland Wildlife Trust	OTHER / LOCAL ORGANISATI ON	LP2015537	In order to achieve the aims of the Local Biodiversity Action Plan the Northumberland Wildlife Trust would encourage that a preference towards native species of local provenance is included within this policy. NWT welcomes the inclusion of native trees in this revised policy. However, in point c the use of "where appropriate" is not needed and only leads to ambiguity in the policy.		DM 8.7 Trees, Woodland and Hedgerows	Comment noted and amendments actioned. Please note this policy number has now changed to DM5.7	Point c amended to reflect request.
805689			LP2015894	"Protect and manage existing woodland, trees, hedgerows and landscape features "Removing the litter should take priority. Look after and improve what we already have before planning new schemes.		DM 8.7 Trees, Woodland and Hedgerows	Comments noted. The Planning system primarily deals with the built environment. The Local Plan contains a policy to ensure that new developments Provide sustainable waste management (during construction and use) through the provision of recycling facilities and ensure a suitable location for the storage and collection of waste (policy 7.9 New Development and Waste).	No amendments proposed.
685823	North Tyneside Green Party		LP20151105	Green Party We need some detail here "" where are these trees, when will they be replaced etc. The following policy about tree planting seems to prioritise trees in the new housing and other building developments rather than protecting and enhancing those on green field land or other parts of the borough.		DM 8.7 Trees, Woodland and Hedgerows	Comment noted. The purpose of the North Tyneside Local Plan (2015) is to 'set out the preferred policies and proposals that the Council proposes to guide planning decisions and establish the framework for the sustainable growth and development of North Tyneside up to 2032'. The plan details the policies for the management and enhancement of existing trees whilst also outlining our requirements for new developments. For instance Policy DM 8.7 (now Policy DM5.9) states 'a) Protect and manage existing woodland, trees, hedgerows and landscape features' and b) 'Where appropriate, secure the implementation of new tree planting and	No amendments proposed. Policy DM8.7 is now under reference DM5.9.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							landscaping schemes as a condition of planning permission for new development'. Tree planting schemes and new developments will be dealt with on a case by case basis which must adhere to adopted planning policy.	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151360	Policy DM8:7. Trees, Woodland and Hedgerows. CPRE welcomes this policy, particularly with the implicit prioritisation of retaining existing woodland and hedgerows over replacement.		DM 8.7 Trees, Woodland and Hedgerows	Support noted. 								past, including Roman, medieval, Victorian and late 20th Century heritage assets.". Information about Hadrian's Wall moved to para 9.45.
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152118	Para 9.44 I am pleased that the Historic Environment Record is mentioned here.		Heritage Assets	Support noted.	No amendments proposed.
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152122	9.58 second sentence should say "Historic England guidance" not "English Heritage policy".		Heritage Assets	Comment noted.	Para 9.59 (now para 9.29) now reads "regard to the Historic England guidance for Enabling Development."
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152124	9.59 I am pleased that there is a separate archaeology section. Instead of using "sites of archaeological importance" please use "archaeological sites which are designated heritage assets". Please add that Hadrian's Wall is a World Heritage Site. Instead of using "many other sites of archaeological interest" please use "archaeological sites which are non-designated heritage assets". Including prehistoric, Roman and early medieval (Anglo Saxon) sites, the sites old medieval villages". Whilst I do endeavour to keep the HER up-to-date, it is probably not entirely accurate to say that all known archaeological remains are included. There may be omissions. I would just say "the archaeological remains of North Tyneside are recorded on the Tyne and Wear Historic Environment Record".		Heritage Assets	Comments noted. Section will be rewritten.	Para 9.60 (now para 9.30) now reads "Within the Borough there are a number of sites of archaeological importance that are designated heritage assets and are subject to statutory control and protection. This includes eight scheduled ancient monuments; two of which are part of the Hadrian's Wall WHS. There are also many other sites of archaeological interest that are non-designated heritage assets, including sites where Anglo-Saxon, Roman and earlier finds have been made, the sites of old villages, medieval

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
								field systems and early industrial sites including many associated with the coal industry. The archaeological remains of North Tyneside are recorded on the Tyne and Wear Historic Environment Record."
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152127	9.60 Should this say National Planning Policy Framework as well as National Planning Practice Guidance?		Heritage Assets	Comment noted.	"NPPF" added to 9.61.
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152129	9.61 Please add at the end "and the level of archaeological work which is required".		Heritage Assets	Comment noted.	Sentence added to the end of para 9.62.
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152131	9.62 I am pleased to see this section about publication.		Heritage Assets	Support noted.	No amendments proposed.
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152136	On the policies map I still think it is difficult to differentiate between Scheduled Ancient Monuments and Conservation Areas. Can a block colour not be used for the SAMs? Again, perhaps the World Heritage Site buffer zone should be shown on this map.		Heritage Assets	Comments noted. Issues will be addressed on new version of Policies Map.	Changes made to Policies Map as requested.
396269	English Heritage	GOVERNMENT AGENCY	LP20152120	Evidence and an understanding of significance and possible harm in relation to public benefit To be found sound the Plan should be based on adequate up-to-date evidence about the historic environment, used to assess the significance of heritage assets (designated and non-designated) and the contribution they make to the local area (NPPF paragraphs I 58 and I 69). In order that the historic		Heritage Assets	The Heritage Assessment sets out the consideration given to the impact on heritage assets that development at sites could have. Alongside the implementation of the archaeology policy, which requires archaeological assessment, preservation and possibly excavation prior to development taking place, it is considered that all sites are developable, subject to	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>environment is appropriately safeguarded, it is necessary for the local planning authority to understand fully the significance of any heritage asset that may be affected (directly or otherwise), particularly by a site allocation, and to carefully assess the extent of any harm to, or loss of, its significance in relation to any public benefits that the development might bring. This understanding necessarily forms an integral part of the evidence base for the Plan. Following our helpful discussions last year, it is apparent that the Council has done much to respond to our initial concerns regarding the identification of potential site allocations and their effects upon the historic environment. It should be congratulated for producing the Local Plan Site Heritage Assessments document accompanying the Plan - a detailed and thorough piece of work. A reading of it, however, suggests that, at least in some cases, uncertainty remains as regards an understanding of the likely impacts of development on heritage in the area and the weight to be attached to the conservation of those assets. The importance of this lies in the fact that any uncertainty regarding the significance of any heritage assets likely to be affected by a site allocation, and any uncertainty regarding the level of harm, or loss, to them when weighed against public benefit that cannot be met in any other way casts doubts on the allocation being justified, deliverable and, ultimately, sustainable. English Heritage is not yet fully satisfied that the local planning authority is able to properly assert that the objectively assessed</p>			<p>certain design and layout approaches.</p>	

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				development needs of the area will be met in accordance with the presumption in favour of sustainable development (NPPF paragraph 14) as it relates to the historic environment, and is not yet satisfied that, in respect of its site allocations, the Plan is consistent with national policy. I hope that these comments and observations clarify the English Heritage position for you, and that the additional representations provided in ANNEX A are of some assistance in helping you to refine and develop the content of the Plan. Should you wish to discuss any of the matters raised I shall be happy, as always, to assist.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152174	The section entitled 'Heritage Assets' should read 'The Historic Environment and Heritage Assets'.		Heritage Assets	Comment noted, this will be amended.	Title changed as suggested.
901309	Council for British Archaeology North	NATIONAL/REGIONAL/ORGANISATION	LP20152207	North Tyneside has an excellent track record in promoting heritage best demonstrated by the ongoing investigations at sites including the Wallsend Roman Fort and Baths but also including more recent works on the restoration of Northumberland Park and the restoration of the Clifford's Fort.		Heritage Assets	Comments noted	No amendments proposed.
901309	Council for British Archaeology North	NATIONAL/REGIONAL/ORGANISATION	LP20152215	We are pleased to see that North Tyneside has a Local List and is using it in your Heritage Assessments of Proposed Sites. This is an approach we would encourage as best practice in any local authority area not just North Tyneside		Heritage Assets	Comments noted	No amendments proposed.
901309	Council for British Archaeology North	NATIONAL/REGIONAL/ORGANISATION	LP20152217	CBA North welcome the officer group study of these potential sites, but also notes that no specific archaeological advice was included within that process. We are particularly concerned that "When undertaking the heritage assessments, officers referred to GIS		Heritage Assets	Comments noted. The HER and the input of the County Archaeologist was used when preparing the heritage assessments. This should have been noted in the Heritage Assessment document. This will be rectified.	Heritage Assessment now reads "When undertaking the heritage assessments, officers referred to the Tyne and Wear Historic Environment Record, the

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				sources, historic Ordnance Survey Maps, planning application histories, Google Earth, archive photographs and any other useful resources but not your own HER which should be (and is) a vital primary point for holding information about the historic environment of North Tyneside. The use of this resource should be encouraged..				advice of the County Archaeologist, GIS sources..."
900234		RESIDENT	LP20151746	Para. 9.3 Object. Add to this that design impacts on the Borough's image, a point which is made in S9.5 but that only relates to highly visible locations. Early on in the plan LPCD 15's Objective no. 12- Enhancing Image says that "high quality design will be a requirement of ALL developments" [my emphasis]. So not just at highly visible locations.		High Quality Design	Comments noted. The council seeks high quality design throughout the borough. The policy has now been amended for clarity.	Policy now says "To support the Council's objectives for enhancing North Tyneside's image and attractiveness, exemplar design solutions and architectural excellence will be actively supported and encouraged at the following key areas and sites of major change.."
900234		RESIDENT	LP20151748	Art in the built environment and design quality Object North Tyneside Council has a good reputation for incorporating art/public art, in its widest sense, into the environment, going back as far as the work done by Freeform Arts, e.g. in school grounds. I'm not suggesting some 'percent for art' policy that can turn out to be tokenistic or a half-hearted tick-box effort by unwilling developers. But there is an opportunity as part of design quality and construction to incorporate art into the materials and design of buildings in a way that ordinary people will like. The Stag Line building in North Shields is an example (even though at the time more of a tasteful advert). The old 'bobbles' (artist designed and		High Quality Design	Further amendments to policy Design of development to point (e) to read 'A design responsive to the existing landscape, topography and character of the locations context, incorporating where appropriate innovative features and statements of artistic quality;' changed from 'A responsive design to benefit heating, cooling and lighting'.	Amendments made.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				made finials) on the bank top railings at North Shields would be another: so popular that they all got stolen! Art was incorporated into many features of 'delight' in the environmental improvement scheme carried out a few years ago at 'The Triangle' North Shields, and the feature on the corner of Albion and Preston Roads is another. There are many other examples I could give from elsewhere (like terracotta vegetables done to relieve the bland/blank wall of a Tesco supermarket service yard in High Road Leyton, London; although there are nicer ones but harder to describe in text). The Plans design policies and text should promote art in the design and materials used in new developments that is appropriate in scale (although it doesn't have to be relevant to the building or use). Doing this would help make for a sense of place, be very locally distinctive, and help make places in North Tyneside "where people want to live", as long as done well.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152166	Paragraph 9.3- well designed buildings are those which respond positively to their context and relationship to the historic environment. This relationship also requires, where applicable, new-build to respectfully incorporate those heritage assets which make a positive contribution to that context. Policy and commentary should acknowledge this.		High Quality Design	Comments noted. The policy states "Designs should be specific to the place, based on a clear analysis and respond to the characteristics of the site, its wider context and the surrounding area." We feel this addresses the point raised.	No amendments proposed.
805689			LP2015897	The first problem that needs to be tackled in all of our town centres is the massive litter problem. The visual impact of clean, tidy streets would be enormous. Many people appear to have long forgotten what a clean		Image and the Public Realm	Comments noted. The Planning system primarily deals with the built environment. The Local Plan or Planning system are not able to manage litter. The Council have a Streetcare team who deal with litter issues	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				pavement/verge/road/roundabout/hospital/school (I could go on) looks like and seem to accept litter as the norm. But, as we all know, when an area is looking down and out and sorry for itself, the problem can affect people's well-being and lead to increased health issues and rising crime.			and they are aware of your concerns. Residents are encouraged to report issues by calling the team or via an online form: <a href="http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins">http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins</a>	
396238	North Tyneside Council	COUNCILLOR	LP20152089	General. 1. Would like to see more recognition of need to have plans for regeneration of former mining villages, especially Dudley and Seaton Burn so that development of current empty sites will allow some structure to the village in the future and provide for current unmet need. 2. As the Northern Gateway (Sandy Lane Bypass) has been omitted from the Plan and there are proposals for further extensive house building in the area as well as the development of the Weetslade Industrial site there is a special need to consider future traffic flows and movements. Work to the south of the Sandy Lane roundabout in front of Gosforth Park is long overdue but Sandy Lane itself has been over capacity since the 70s ...		Image and the Public Realm	Comment noted. The importance of the North West and the regeneration of villages in the North West are recognised in Policy S1.1 with further detail provided in the North West Villages section. Policies referring to the North West will be amended to "North West Villages" rather than "North West Communities". Traffic impacts from the amount of growth suggested in the Local Plan have been considered in the transport modelling work that has secured £150million funding for junction improvements (including along the A1056) to make it easier and safer to travel throughout the Borough.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152164	9. The Built and Historic Environment Paragraph 9.1 -the protection of the historic environment is a key contributor to achieving sustainable development. Existing buildings possess embodied energy and their reuse and adaptation assists with reducing energy and waste disposal needs. Sequentially, reuse and adaptation should be preferred to demolition and new-build.		The Built Environment 9	Comments noted.	No amendments proposed.
588278		RESIDENT	LP2015426	There is no reference to the Council's preferred approach to minimising energy use being "fabric first". This minimises year on		DM 9.1 Sustainable Design and	The materials used in the construction of buildings are now considered through Building Regulations.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				year energy use rather than the now outmoded Merton Rule approach for bolting on or retrofitting renewable technologies which do not reduce the basic energy requirement but only generate that energy in less environmentally damaging ways.		Construction		
638512			LP2015611	I was disturbed to learn that solar panels (strictly speaking, photovoltaic cells) would not be fitted as a matter of course to the new houses planned for Murton Village. It was explained to me at the consultation session at the new Whitley Bay library that the houses themselves would be insulated to a very high standard, which is commendable. But where were the solar panels? If it is not council policy to fit solar panels to all new-build properties, it should be. And if it is not changed by the council I will raise this through the Labour Party, of which I am a lowly member. Council builders (if there are any left) should be ordered by the council to fit solar panels. Private builders should be ordered to do the same, and if they refuse, sack them and get other builders who would accept the council's orders. At present prices, to add £1,000 or £2,000 to the price of a house of, perhaps, £150,000 would not be noticed by a buyer if they can get a mortgage. The solar panels should be fitted not only to keep electricity bills down but also to sell clean energy to the national grid. That is the main point. We have to turn each house/school/library into a mini power station, so that the whole of Tyneside can become a huge power station made up of individual solar panels. I know the council fits		DM 9.1 Sustainable Design and Construction	Comments noted. Paragraph 59. of the NPPF states that "Local planning authorities should consider using design codes where they could help deliver high quality outcomes. However, design policies should avoid unnecessary prescription or detail and should concentrate on guiding the overall scale, density, massing, height, landscape, layout, materials and access of new development in relation to neighbouring buildings and the local area more generally."	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				some solar panels to schools and some houses, but what exactly is the council's policy? Everyone knows it is more efficient to fit solar panels as part of the building process, rather than retro-fit them. I would be willing to discuss this personally with the planning team/the Mayor/individual councillors but would hope you could first explain exactly what council policy is on solar panels.				
685823	North Tyneside Green Party		LP20151106	Green Party We support this policy as far as it goes and look forward to seeing it implemented. However design embraces not only sustainable buildings but includes layout, relationship to each other and their function in supporting sustainable communities. New build housing development offers socially responsible developers and planners the opportunity to create the infrastructure for sustainable communities which anticipate climate change and the need for zero carbon emissions.		DM 9.1 Sustainable Design and Construction	Comments noted. It is understood that design doesn't just lie within the buildings which is reflected in Local Plan policies. For instance DM9.2 (now Policy DM6.2) discusses the relationship of buildings and spaces.	No amendments proposed.
899444	George F White		LP20151257	DM9.1 Sustainable Design and Construction Our Client supports this proposed policy; it is in line with the NPPF (7, 17, 18, 93, 95, 103, 143 and 156).		DM 9.1 Sustainable Design and Construction	Support noted.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151368	Policy DM9:1. Sustainable design and construction. CPRE welcomes this policy.		DM 9.1 Sustainable Design and Construction	Support noted.	No amendments proposed.
755686	Home Builders Federation		LP20151737	53. The policy identifies that developments should seek to minimise their carbon emissions through a variety of mechanisms including exploring renewable and low carbon energy, energy efficiency and passive solar. The Council will be aware that the recent ministerial statement on 25th March 2015		DM 9.1 Sustainable Design and Construction	Policy has been deleted as it is no longer necessary and in some parts is not consistent with national policy. Further detail below: In terms of energy efficiency this will now be implemented through Building Regulations. Parts A and B in the policy are therefore no	Amendments made

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				sets out the government's response to the Housing Standards Review. In terms of energy and energy efficiency the statement makes clear that these will be implemented through the impending changes to the Building Regulations and other standards should not be applied. The Council will therefore be unable to implement the elements relating to energy in housing developments. It is therefore recommended that these elements be deleted.			<p>longer relevant.</p> <p>Part D refers to SUDS is sufficiently covered in other parts of the plan.</p> <p>Part E refers to the use of locally sourced materials which is more good practice than policy.</p> <p>Part F refers to waste management which can be referenced in the waste section of the plan.</p> <p>The following point has been added to policy DM9.2 (now Policy DM6.2) 'design of new development':</p> <ul style="list-style-type: none"> <li>• Maximise the use of passive solar design to benefit heating, cooling and lighting.</li> </ul>	
900234		RESIDENT	LP20151745	DM9.1 b, e, Object. Policy should be added to in order to promote long-lasting materials and construction techniques that don't need the expense and effort of maintenance, i.e. ones that won't need replacing or maintaining and in these ways thus be more sustainable. Even if the longer lasting material has higher embodied energy. (Purely as one example- aluminium is high in embodied energy but very long lasting compared to almost any other building material). Developers building for sale will do what is cheap knowing that the maintenance liability will be borne by the homebuyer. Institutional developers and housing associations tend to consider whole life or design life issues/costs better. Supporting text should be added to, to explain this.		DM 9.1 Sustainable Design and Construction	Following the government's response to the Housing Standards Review we can not include policies which require higher standards of sustainable materials. This issue is now considered as part of Building Regulations.	No amendments proposed.
830576	Taylor Wimpey	DEVELOPER	LP20151985	Policy DM9.1 sets out the Council's preferred policy on sustainable design and construction.		DM 9.1 Sustainable	Following the government's response to the Housing Standards Review we can not	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				The principles of the policy relate to reducing carbon dioxide emissions and energy consumption, albeit it is noted there is no specific target set out within the policy. Whilst this is the case, the Government is expected to implement the findings of its housing standards review imminently, including removing all such policies from planning considerations, and placing standard requirements within the building regulations. On this basis, the policy is neither necessary nor consistent with the national policy agenda. We trust these representations will be taken into account as part of the Council's preparation of its emerging Local Plan and generally support the direction of the Emerging Plan. In the meantime, we look forward to discussing the Emerging Plan with the Council further and being informed of any future consultation on this and any other planning policy documents.		Design and Construction	include policies which require higher standards of sustainable materials. This issue is now considered as part of Building Regulations.	
900788		DEVELOPER	LP20151994	Whilst our client supports the encouragement of developments to seek to minimise their carbon emissions, it is important to ensure that the expectation to implement the various measures sought in Policy DM9.1 do not compromise the viability of schemes. It is therefore recommended that the wording of Policy DM9.1 is reworded as follows: 'To ensure that future developments meet high standards of sustainable design and construction, all development proposals, subject to viability, are expected to'.		DM 9.1 Sustainable Design and Construction	Comments noted. Detailed development viability will be discussed at the planning application stage.	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152048	Policy DM 9.1 sets out the authority's policy on sustainable design and construction. Sustainable construction and design is		DM 9.1 Sustainable Design and	Following the government's response to the Housing Standards Review we can not include policies which require higher	None.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>something that Persimmon are heavily involved with at a local and national level. We are aware that National government are pulling together all previous requirements in terms of Code for Sustainable Homes, lifetime homes and Zero Carbon initiatives into the existing Building Regulations structure to which all new developments are beholden regardless. This policy as currently worded is objected to for the above and following reasons: Sub-criteria (a) within this policy seeks additional requirements over and above national building regulations which we object to. In addition the policy wording sets a requirement of "exploring opportunities for renewable energy" and that this should be done via the submission of a Sustainability Statement. While the requirement for this statement is normal and correct how an applicant would go about "exploring opportunities for" within a statement is questionable and seems contrary to the requirements of the NPPF.</p>		Construction	standards of sustainable materials. This issue is now considered as part of Building Regulations.	
396269	English Heritage	GOVERNMENT AGENCY	LP20152165	<p>Policy DM9.1 -I would suggest the following: '(e) re-use existing buildings, especially historic buildings and those at risk, and materials on site and aim to use locally sourced and recyclable materials; ...' The caveat 'where possible' is unhelpful as a qualification. It provides neither clarity as to the circumstances in which the policy might or might not apply, nor allows more flexibility than is provided for in planning legislation.</p>		DM 9.1 Sustainable Design and Construction	Comments noted. It is not considered necessary to specifically mention historic buildings and those at risk - the policy refers to all existing buildings, and the relevant heritage policies support the cause of protecting historic buildings and those at risk. "Where possible" will be removed.	"Where possible" removed from criterion e.
805069	Tyne and Wear Archaeology	OTHER / LOCAL ORGANISATION	LP20152119	<p>I am pleased that the Historic Environment Record is mentioned here.</p>		S 9.11 Heritage Assets	Support noted.	No amendments proposed.

809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151376	Policy S9:11. Heritage Assets. CPRE supports this policy.		S 9.11 Heritage Assets	Support noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152176	Paragraph 9.52- whilst the historic environment (for the most part) is flexible and accommodating of respectful change, and can (and does) positively contribute to a vibrant Borough, it makes that contribution irrespective of whether it is subject to 'development' or not. Simply by being maintained it generates character, local distinctiveness, and a unique sense of place.		S 9.11 Heritage Assets	Comments noted. Paragraph will be rewritten.	Para 9.53 (now para 9.23) now reads "The built environment rarely stays static and as part of that, heritage assets or their settings can be subject to change. Heritage assets should not be viewed as an obstacle to change; indeed their presence, ongoing maintenance or development can positively contribute to a vibrant Borough. However, constructive guidance needs to be in place to ensure they are appropriately conserved."
901309	Council for British Archaeology North	NATIONAL/REGIONAL/ORGANISATION	LP20152210	Your residents, officers and members have in the past played their part in the conservation of historically important remains and we are pleased the proposed plan, recognises the need to continue to do so in S9.11 and DM9.12.		S 9.11 Heritage Assets	Comments noted	No amendments proposed.
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152121	I am pleased that archaeological recording is mentioned here, and the need for heritage reports to be submitted to the Historic Environment Record (HER). I would add that important heritage assets may warrant formal publication of the results of the recording in an archaeological journal or similar.		DM 9.12 Protection, Preservation and Enhancement of Heritage Assets	Comments noted.	Final line within policy now reads "Any heritage reports prepared as part of a development scheme will be submitted for inclusion on the Tyne and Wear Historic Environment

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Paragraph 141 of the NPPF states that "they [LPAs] should also require developers to record and advance understanding of the significance of any heritage assets to be lost (wholly or in part) in a manner proportionate to their importance and the impact" Whilst in most cases the deposition of the record with the HER is appropriate, in some instances the heritage asset will be significant enough to warrant the publication of the results to ensure that they are publicly accessible. We frequently request that a publication condition is imposed on decision notices.				Record (HER) and published where considered appropriate."
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151377	Policy DM9:12. CPRE supports this policy.		DM 9.12 Protection, Preservation and Enhancement of Heritage Assets	Support noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152177	Policy DM9.12 contains policy on 'enabling' development. This policy does not fully accord with English Heritage advice. As written the policy seeks to resist development that would detrimentally impact upon a heritage asset unless it forms part of an enabling scheme, thereby accepting that some harm may be justified. The first test in our advice is that enabling development must secure the asset without causing harm to it.		DM 9.12 Protection, Preservation and Enhancement of Heritage Assets	Comments noted. Agreed that this is not clear and will be removed. The supporting text directs readers to the Historic England guidance on enabling development.	"or it forms part of an enabling development package that would provide positive heritage benefits to heritage assets identified as at risk." removed from policy.
396269	English Heritage	GOVERNMENT AGENCY	LP20152177	Paragraph 9.54- I would suggest the following: 'The settings of heritage assets can contribute significantly to their enjoyment through, for example, 'views, experience and approaches ... '. By this means it is acknowledged that setting can contribute in other ways too.		DM 9.12 Protection, Preservation and Enhancement of Heritage	Comment noted. Agree with suggestion and will amend accordingly.	"for example" added to para 9.55 (now para 9.27).

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
						Assets		
396269	English Heritage	GOVERNMENT AGENCY	LP20152177	Paragraph 9.58- I would suggest- '... enabling development may be supported where ... '.		DM 9.12 Protection, Preservation and Enhancement of Heritage Assets	Comment noted. Agree with suggestion and will amend accordingly.	"is supported" now changed to "may be supported" in para 9.59 (now para 9.31).
899444	George F White		LP20151260	DM9.13 Archaeological Heritage Our Client supports the proposed policy to protect, enhance and promote the Borough's archaeological heritage, in line with the NPPF (17 and 128). However, our Client requests that the LPA give some guidance as to when or where an archaeological desk based assessment, or a full archaeological excavation would be required.		DM 9.13 Archaeological Heritage	Comment noted. Further information will be added. The policy already explains when full archaeological excavation would be required. It is not possible, in light of the unknowns associated with buried remains, to be particularly detailed.	"The need to undertake archaeological assessment and evaluation or to carry out further archaeological work is determined by the information in the HER and by North Tyneside Council on the advice of its archaeological specialists." added to para 9.62 (now para 9.33).
805069	Tyne and Wear Archaeology Officer	OTHER / LOCAL ORGANISATION	LP20152125	Please reword the sentence which starts "when determining applications that propose development to remains and their settings". Full archaeological excavation is rarely required at pre-decision/determination stage. The preliminary evaluation, which would assess the importance, date and degree of survival of the remains, would be required in order to determine the application. It would then be decided whether the remains on the site warrant preservation in-situ or whether it would be acceptable for the remains to be subject to full archaeological excavation which would allow the site to be developed. Such excavation is usually conditioned. I would therefore reword this sentence: "The		DM 9.13 Archaeological Heritage	Comments noted. Policy rewritten.	DM9.13 (now Policy DM6.7) reworded to include suggested sentence.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				results of the preliminary evaluation will determine whether the remains warrant preservation in-situ, protection and enhancement or whether they require full archaeological excavation in advance of development".				
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151378	Policy DM9:13. Archaeological heritage. CPRE supports this policy.		DM 9.13 Archaeological Heritage	Support noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152178	Policy DM9.13 -the NPPF does not separate archaeology from other heritage asset types.		DM 9.13 Archaeological Heritage	We acknowledge that the NPPF does not separate archaeology from other heritage asset types. However, due to the specific nature of how works to assets archaeological interest are dealt with, we have included a specific policy to cover them. This makes clear the specific requirements of such works and avoids an over-long policy that covers all heritage assets. The County Archaeologist has expressed her support for a separate section.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152178	Enhancement' is a difficult concept in relation to archaeology, and is generally considered to be not possible, save in respect of access, understanding and interpretation. As ed, the third paragraph contains a contradiction in that it simultaneously requires preservation in situ and full excavation. This may be resolved if the policy were re-structured to produce a sequence of separate, distinct and effective archaeological conservation policies which give priority to the physical preservation in situ of nationally important sites, whilst ensuring that sites of lesser importance are adequately safeguarded in line with the framework set out in NPPF guidance which		DM 9.13 Archaeological Heritage	Comments noted. The County Archaeologist has made similar comments and the policy has been amended accordingly.	See amendments following County Archaeologist comments.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				requires proper assessment/evaluation and appropriate mitigation measures to reconcile the needs of development with the archaeological interest. Where preservation in situ is not justified using the guidance in the NPPF, preservation by record should be required subject to the terms set out.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152178	Paragraph 9.63 implies that the application of Policy DM9.13 will help secure the integration of heritage protection and economic regeneration at the Swan Hunter yard. However, archaeological potential on this site is being handled in a quite separate and specific way which responds to its Enterprise Zone status and the Local Development Order (LDO) governing development in it. The commentary accompanying this policy should make this distinction clear.		DM 9.13 Archaeological Heritage	This paragraph will be removed to avoid confusion. Hadrian's Wall WHS also has its own policy.	Paragraph removed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151379	Policy AS9:14. CPRE supports this policy.		AS 9.14 Town Centre Conservation Area	Support noted.	No amendments proposed.
899323			LP20151613	The Council is proposing a Conservation Area in Wallsend Town Centre as shown in Map 13. NewRiver Retail notes the Council's response to the previous consultation comments submitted in January 2014. Our Client does not support the inclusion of the Forum Shopping Centre in the Conservation Area boundary and does not consider it to be appropriate given the shopping centre was built in the 1960s and does not have many of the qualities of the rest of the High Street. The proposed designation is therefore unjustified and could lead to unnecessary restrictions to future development. NewRiver		AS 9.14 Town Centre Conservation Area	Comments noted. Conservation areas are long-term designations and inclusion of a building or space takes into consideration its potential redevelopment. You consider that the Forum building has little special interest; however it does form part of the streetscape and contributes to the setting of the wider area, and any development to the building would affect the area as a whole. Nevertheless, the boundary as published is a suggestion and would be subject to further research, full consultation and Cabinet consideration before designation. This will be explained in the text.	"A final boundary would be subject to further research and consultation." has been added to para 9.67 (now para 11.31).

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Retail recommends that the Forum Shopping Centre is excluded from the proposed Conservation Area boundary.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152179	Paragraphs 9.64-9.69 deal with the desirability of designating a conservation area for Wallsend Town Centre. English Heritage supports such an initiative, and welcomes especially the inclusion of Segedunum within the suggested area boundary. The even closer integration of the town centre and the river would be achieved were the boundary to take in land up to the river itself. Paragraph 9.69- in the context of conservation area designation, consideration should also be given to positive management, which may involve the removal of certain permitted development rights.		AS 9.14 Town Centre Conservation Area	Comments noted. The boundary is still a and would be subject to further research and consultation. This will be explained in the text. The LPA would continue positively managing the CA after designation; this will be reflected in the text.	"A final boundary would be subject to further research and consultation." has been added to para 9.67 (now para 11.31). "Once designated, the LPA will continue to positively manage the character and appearance of the area, as set out in policy S6.5." added to para 9.70 (now para 11.35).
901309	Council for British Archaeology North	NATIONAL/REGIONAL/ORGANISATION	LP20152220	Wallsend Priority Investment and Regeneration Area: We welcome the proposed extension to Conservation Areas within Wallsend, especially for its inclusion of the Segedunum Roman Fort and Baths . However we also draw attention to the exclusion of that the triangle of land which includes the site of the former Carrville Methodist Church, including both the excavated remains of the Wallsend B Pit (consolidated as part of the Museum site) and adjacent Hadrian's Wall, as well as reconstruction of Hadrian's Wall, defensive pits and ditch. We would suggested this area should be considered for inclusion within the proposals for the Conservation Area and protected, as crucial to Wallsend's part of the Frontiers of the Roman Empire World Heritage Site (where the contemporary		AS 9.14 Town Centre Conservation Area	Comments noted. The boundary is still a and would be subject to further research and consultation. This will be explained in the text.	A final boundary would be subject to further research and consultation. has been added to para 9.67. (now para 11.31)

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				nature of wall extension to Wallsend and the fort demonstrated), as well as of the regionally significant Wallsend B Pit Colliery remains as a reminder of our coal-mining heritage.. This would contribute to your declared aim of AS1.2f and could add to your 4.20 and 5.11, DM9.15a to AS9.15c. These sites would also fit within your own definitions of 5.12 as tourist sites.				
396449	Cyclists Touring Club	OTHER / LOCAL ORGANISATION	LP2015586	Segedunum and Hadrian's Wall World Heritage Site 9, now Site E008, .71. The Hadrian Cycleway should be The Hadrian's Cycleway.		AS 9.15 Wallsend: Segedunum Roman Fort and Hadrian's Wall WHS	Agreed. The suggested amendment will be made.	Amended to "Hadrian's Cycleway"
630955			LP2015769	I am disappointed not to find in the plan, that the opportunity has not been taken whilst planning the redevelopment of Swan Hunters site to extend Segedunum down to the river bank sufficiently to restore the stones from the last "mile castle" to the place they were removed from during the original Swan Hunter shipyard development.		AS 9.15 Wallsend: Segedunum Roman Fort and Hadrian's Wall WHS	Policy set out within the Local Plan reflects the already designated Enterprise Zone and Local Development Order in place for the Swan hunter site in Wallsend. The Local Plan encourages proposals that respect and enhance the heritage value of the World Heritage Site and would support such actions where deliverable.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151380	Policy AS9:15: CPRE supports this policy.		AS 9.15 Wallsend: Segedunum Roman Fort and Hadrian's Wall WHS	Support noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152180	Policy AS9.15 should make clear that the intention is to safeguard the Outstanding Universal Value of the World Heritage Site and those attributes which define it. It should be noted that the Environmental Impact Assessment Regulations are applied differently in areas where LDOs exist.		AS 9.15 Wallsend: Segedunum Roman Fort and Hadrian's Wall WHS	Comments noted. Wording of policy will be changed to be more in line with suggestion. Regardless of the LDO, an EIA is required for developments likely to significantly effect the WHS. This policy would apply to areas outside of the LDO boundary too.	Criterion a changed to "Ensure the safeguarding of the Outstanding Universal Value of the WHS and those attributes which define it,..."

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
396269	English Heritage	GOVERNMENT AGENCY	LP20152180	Paragraph 9.71 -reference should also be made to the National Trail.		AS 9.15 Wallsend: Segedunum Roman Fort and Hadrian's Wall WHS	Comments noted. Reference to the National Trail will be added.	Para 9.72 (now para 1.37) now reads "The Hadrian Cycleway and the Hadrian's Wall Path National Trail pass and for those following the entire routes the Fort is amongst the first, or last, major Roman archaeological site they would come across."
396269	English Heritage	GOVERNMENT AGENCY	LP20152180	Paragraph 9.72 needs recasting. Hadrian's Wall Trust no longer exists, and work is now being undertaken on updating the Management Plan for 2015 onward. Policy AS9.15 should not only support the Management Plan - it should help deliver it.		AS 9.15 Wallsend: Segedunum Roman Fort and Hadrian's Wall WHS	Comments noted, appropriate amendments will be made.	Para 9.73 (now para 11.38) now reads "The related policy above seeks to support and deliver the aspirations of the Hadrian's Wall Management Plan 2015-2019. The Management Plan provides an important basis for proposals to enhance and capitalise on the opportunities (for example, in education) created by the archaeology, and informs decisions that may affect the WHS. The Council will continue its working relationship as part of the The Hadrian's Wall Partnership Board to support the implementation of the Management Plan and to work on future strategies."
396269	English Heritage	GOVERNMENT AGENCY	LP20152180	Paragraph 9.73- the use of the word 'however' implies opposites to separate and		AS 9.15 Wallsend:	Comments noted, this will be amended.	para 9.74 (now para 11.39) "However, it is also noted

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				balance, which is not/should not be the case.		Segedunum Roman Fort and Hadrian's Wall WHS		that the riverside has its own heritage and role in Wallsend. " now reads "The riverside has its own heritage and role in Wallsend. "
588278		RESIDENT	LP2015428	This commitment is to be applauded but needs to be underpinned by action and successful outcomes. Spanish City is not only a tourist asset but should be developed with and for the local community. Working with and supporting the Big Local group is one way of demonstrating engagement and commitment which is visible to residents.		AS 9.16 The Spanish City	Comment noted and support welcomed. The Local Plan will continue to work with the local community to allow residents the opportunities to influence future planning policies of the local area.	No amendments proposed.
797386			LP20151081	Greater interaction and communication between the Council and local residents and businesses will make progress on this quicker and easier.		AS 9.16 The Spanish City	Comments noted.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151381	Policy AS9:16 Spanish City. CPRE welcomes the plans to regenerate this area. Development of enhanced access by public and sustainable transport would be a constructive addition to the policy.		AS 9.16 The Spanish City	Comments noted. It is considered that sustainable transport options to the coast are supported through the general transport policies and through policy AS10.5 (now Policy 8.23) Coastal Transport.	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151960	Natural England supports the requirement of this policy to be compliant with policy DM8.6 in order to ensure that there are no adverse effects on internationally designated sites.		AS 9.16 The Spanish City	Support noted	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152181	Paragraph 9.75 contains typing errors and does not read clearly.		AS 9.16 The Spanish City	Comments noted, this paragraph was not clear and will be rewritten.	para 9.76 (now para 11.76) now reads "The regeneration of The Spanish City presents a fantastic opportunity to support and compliment concurrent regeneration in the town centre, at Whitley Park, and indeed,

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
								along the whole North Tyneside coast. Planning approval has been granted for the redevelopment of The Spanish City but the final end users are still to be decided. The aim is for a mix of complementary uses, such as residential, community and leisure uses that would benefit the area with a focus on the quality and family friendly appeal. "
396269	English Heritage	GOVERNMENT AGENCY	LP20152181	Policy AS9.16- I would suggest: ' ... make a positive contribution ... '.		AS 9.16 The Spanish City	Comment noted, this will be amended.	Policy AS9.16 (now Policy AS8.18) now reads ' ... make a positive contribution ... ' and para 9.75 amended.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151382	Policy AS9:17 Town Halls etc. CPRE broadly supports this policy. Prioritisation of the alternative uses might be helpful to better manage community benefit.		AS 9.17 Town Hall, Police Court, Fire Station and Public Baths	Comment noted. Whilst the potential value of this approach is recognised, providing uses proposed for the building are compatible with the listed building it would be detrimental to securing its reuse and enhancement if a prioritisation limited any particular use over another.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152182	Policy AS9.17- I would suggest the uses identified should 'be supported where there would be no unjustified adverse effect upon their heritage significance: ... '.		AS 9.17 Town Hall, Police Court, Fire Station and Public Baths	Comments noted and policy will be amended in accordance with suggestion.	"be supported where there would be no unjustified adverse effect upon their heritage significance:" added to Policy AS9.17 (now Policy AS8.10).
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151383	Policy AS9:18 Engineering Research Centre. CPRE broadly supports this policy. The word "negatively" in the third bullet point is		AS 9.18 Former Engineering	Comment noted. The word "negatively" was used because some fragmentation of the site would be acceptable. This should be	"Do not negatively fragment or asset strip the building." has been

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				superfluous and should be deleted.		Research Centre	changed to "unacceptably" to be clearer.	amended to "Not unacceptably..."
396269	English Heritage	GOVERNMENT AGENCY	LP20152183	Paragraph 9.82 repeats paragraph 9.74. Policy AS9.18- the proviso suggested in respect of Policy AS9.17 should apply here too.		AS 9.18 Former Engineering Research Centre	Comments noted. Para 9.82 is repetition and will be removed. Policy will be amended in accordance with suggestion.	Para 9.82 removed. Policy AS9.18 (now Policy AS8.28) has been completely rewritten and now reads "The Council will seek and support proposals for the use of the buildings and site where there would be no unjustified adverse effect upon their heritage significance. Proposed uses should take advantage of the facilities and accommodation that Block A and Block B can provide, including the potential for office, light manufacturing and retailing, with regard given to the potential for additional residential development at this location. Proposals should also: Demonstrate a clear understanding of the building and the impact of the works, Propose a compatible use with the buildings and the surroundings, and Not unacceptably fragment or asset strip the building."
588278		RESIDENT	LP2015427	The aspiration to good design (in its broadest sense rather than merely aesthetic) is to be		DM 9.2 Design of	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>applauded. however, if recently approved examples of market housing are any guide the approach is not being robustly and consistently applied. Earsdon View, Northumberland Park and the current development above Red House Farm estate in Monkseaton are standard developer templates with fancy names and grand aspirations but little evidence of 'design' in the sense described in the Plan Policies. Design Codes and Design Review need to be enshrined in the Plan as mechanisms to ensure quality and value.</p>		Development		
898630			LP2015907	<p>Please do not allow identikit houses to be built. Design is so important. For large, new developments, please try - as much as you can - to make it look like the development has evolved rather than transplanted, which would make it look like the area has grown over a period of time and therefore make it more acceptable to those living around it.</p>		DM 9.2 Design of Development	Comments noted.	No amendments proposed.
899444	George F White		LP20151258	<p>DM9.2 Design of Development Our Client supports the proposed policy. It is a core planning principle of the NPPF (17) to "always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings" Our Client would suggest that although designs of development should be particular to a place and respond to the characteristics of a site, it is also important that this policy allows for a range of house types and density levels to meet the objectives of the plan, including the provision of affordable housing and also large executive housing.</p>		DM 9.2 Design of Development	Comments noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151369	Policy DM9.2. CPRE also welcomes this policy.		DM 9.2 Design of Development	Support noted.	No amendments proposed.
755686	Home Builders Federation		LP20151738	54. The HBF is supportive of the changes to Policy DM9.2 which now encourages the use of Building for Life rather than it being a mandatory requirement. These amendments accord with our previous comments upon this policy.		DM 9.2 Design of Development	Comments noted.	No amendments proposed.
900234		RESIDENT	LP20151747	DM9.2 and Para. 9.4 Object. The Council Plan 2014-18 has an overarching priority: Our Places A: "be places that people like living in...". This phrase should at least be placed word-for-word in para.9.4, even though that mentions live, work, play, spend time, and in policy DM9.2.		DM 9.2 Design of Development	Comments noted. Some wording will be changed in the accompanying text to better reflect the Council priority, although it is not considered that it has to be word-for-word. The policy is the way to achieve the priority, rather than the priority itself, so it does not need to include those words.	Para 9.4 (now para 9.5) now reads "which to enjoy living, working, playing and spending time in".
830571	Persimmon Homes	DEVELOPER	LP20152050	Policy DM9.2 sets out the authority's policy objectives in relation to design of new development. This policy is supported and sets out a logical set of criteria for which development can be assessed. We do however question if the Council are intending to formally screen and assess developments against the 12 building for life criteria or simply use this as a guide?		DM 9.2 Design of Development	The Council considers that BFL12 is a useful tool which we would encourage to be used to support the design quality of major housing applications.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152167	Policy DM9.2(e)- the amenity of all users of buildings and spaces should be protected, not just residents.		DM 9.2 Design of Development	Comments noted. Acknowledged that use of "residents" suggests the policy only applies to residential development.	"and users of buildings and spaces." added to policy.
830571	Persimmon Homes	DEVELOPER	LP20152051	Policy DM9.3 sets out the authority's response to alterations or extensions to new buildings. This policy is supported however some of the wording is questioned as follows. Complementary design is supported however the policy describes how this could be either through "continued use of established design medium or via contrasting "contemporary		DM 9.3 Extending Existing Buildings	Comments noted. Amendments made to DM9.3 (now Policy DM6.3).	Amendments made. Policy now reads 'Extensions should complement the form and character of the original building. This should be achieved either by continuation of the established design form, or

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				design"□. For developments already of contemporary design this would not be a contrast. We propose that the policy be re worded to include "contrasting high quality design"□.				through appropriate contrasting, high quality design'.
396269	English Heritage	GOVERNMENT AGENCY	LP20152168	Policy DM9.3 -this policy concerns adaptation of the existing building stock, but does not provide guidance in cases where works of alteration do not involve extensions.		DM 9.3 Extending Existing Buildings	Comments noted. This policy was specifically about extending and "DM9.2 Design of Development" (now Policy DM6.2) concerns all other development.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151370	Policy DM9:4 Advertisements and signage CPRE broadly supports this policy. Explicit reference to limits on A-frames along a pavement might be helpful in addressing concerns from the blind and partially sighted community.		DM 9.4 Advertisements and Signage	Comments noted. A boards cannot be controlled through the planning system, rather they are managed by the Highways team, who have a policy: <a href="http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=527042">http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=527042</a>	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152169	Policy DM9.4 and paragraph 9.10- careful consideration should be given to all signage and its effect upon heritage assets and their settings. Whether illuminated or not, signs have the potential to harm the significance of heritage assets.		DM 9.4 Advertisements and Signage	Comments noted. Acknowledged that advertisements and signage of any type can have an impact on heritage assets. Paragraph and supporting text to be amended accordingly.	Policy now reads "Careful consideration will be given to advertisements and signage effecting heritage assets or their settings, especially if illuminated, so as not to have an adverse impact on development." Supporting text now reads "Heritage assets can be sensitive to advertisements and signage, particularly if illuminated, as it can have a negative impact if incorrectly designed or insensitively placed"
805724		LANDOWNER / BUSINESS	LP2015278	Support expressed generally for the policy and its reasoned justification.		S 9.5 Improving Image	Support noted.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151371	Policy S9.5: Improving image. CPRE supports this policy.		S 9.5 Improving Image	Support noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152170	Policy S9.5 -the final paragraph does not contain policy. If sites of substantial change and visibility are so important, the Council should commit to preparing masterplans and briefs to guide their development.		S 9.5 Improving Image	Comments noted. Policy S9.5 (now S6.5) amended.	Amendments made. Final sentence now reads 'Any subsequent development proposal will be required to accord with any development briefs which are produced for these sites'.
459177		RESIDENT	LP2015304	Improvements are needed in North Shields town centre. The town centre needs investment and new shops and facilities, No dogs should be allowed into the park at Northumberland Square.		AS 9.6 North Shields Town Centre: Public Realm	North Tyneside's Local Plan (2015) includes policies, such as S6.1 (now Policy S3.1) which support the growth and regeneration of the main town centres. The control of dogs within Northumberland Square is not something which can be enforced through the planning system.	No amendments proposed.
898920	Sustrans		LP2015983	Sustrans would be grateful if reference could be made to the need for high quality bicycle links into and through town centres stressing that this requirement should take precedence over and above surface level car parking (whether on or off street).		AS 9.6 North Shields Town Centre: Public Realm	Comment noted. Greater reference to cycle routes and parking to be included in the Policy.	Policy criteria a) amended to include cycle routes in criteria a) and cycle parking in criteria d).
797386			LP20151078	The Square is an important part of our local heritage and also important for attracting and keeping professional and other commercial enterprises in NT. There is a need for more good office space in at least some of the old Council buildings. I fear that their conversion into the wrong sort of residential units will have an adverse effect on business in North Shields.		AS 9.6 North Shields Town Centre: Public Realm	The Local Plan prioritises the development of all main town centre uses within the borough's town centres, and proposals that address issues of underuse and vacancy are key priorities. Town centre uses include retail, leisure, office and residential development where in accordance with the wider proposed policies of the Local Plan. Viable development proposals that support these priorities for the town centres are supported to achieve their overall regeneration.	No amendments proposed

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151372	Policy AS9:6. North Shields. CPRE supports this policy.		AS 9.6 North Shields Town Centre: Public Realm	Support noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152171	Paragraph 9.13 onward- this section of the Plan contains a series of policies relating to heritage and townscape in the Sub-Areas. The focus is very much on public realm within these areas, yet very little policy concerns the buildings in which resides the majority of their heritage interest. In addition, the caveat 'where appropriate' in Policy AS9.6 and Policy AS9.7 means that even historic townscape may not survive plans to regenerate these areas.		AS 9.6 North Shields Town Centre: Public Realm	Comments noted. Public realm issues have been identified in these areas. The Local Plan contains policies that support the protection and enhancement of all heritage assets, including support for their role in the regeneration of areas. Agree, "where appropriate" should be removed.	"where appropriate" removed from relevant part of policies relating to public realm in Whitley Bay and North Shields town centres.
898920	Sustrans		LP2015984	Sustrans would be grateful if reference could be made to the need for high quality bicycle links into and through town centres stressing that this requirement should take precedence over and above surface level car parking (whether on or off street).		AS 9.7 Public Realm Improvements in Whitley Bay town centre	Comment noted. Policy does refer to the need to give greater priority to cyclists, improving the connectivity between town and seafront, including improvements to cycling infrastructure and seeking to implement cycle priority schemes.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151373	Policy AS9:7. Whitley Bay town centre. CPRE supports this policy.		AS 9.7 Public Realm Improvements in Whitley Bay town centre	Support noted.	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151959	Natural England supports the requirement of this policy to be compliant with policy DM8.6 in order to ensure that there are no adverse effects on internationally designated sites. 396269	English Heritage	GOVERNMENT AGENCY	LP20152173	Paragraph 9.13 onward- this section of the Plan contains a series of policies relating to heritage and townscape in the Sub-Areas. The focus is very much on public realm within these areas, yet very little policy concerns the buildings in which resides the majority of their heritage interest. In addition, the caveat 'where appropriate' in Policy AS9.6 and Policy AS9.7 means that even historic townscape may not survive plans to regenerate these areas. Furthermore, Policy AS9.8 does not commit (by the use of the word 'could') to safeguarding The Green conservation area, where measure (d) refers (in a perhaps ill-expressed way) to 'managing against any potential impacts ...'.		AS 9.8 Wallsend: High Street Improvements	Comments noted. Public realm issues have been identified in these areas. The Local Plan contains policies that support the protection and enhancement of all heritage assets, including support for their role in the regeneration of areas.	No amendments proposed.
899444	George F White		LP20151259	AS9.9 Public Realm in the North West Communities Our Client supports the proposed policy as it will enhance the aesthetic quality of the North West area, which in turn will make the area more attractive to potential inward investment (residential and commercial).		AS 9.9 Public Realm in the North West Communities	Support noted.	No amendments proposed.
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151375	Policy AS9:9 North West Communities: CPRE can support this policy but urges that care must be taken to protect wildlife corridors, open countryside and avoid damage to the Gosforth Nature Reserve and the Weetslade Colliery Park. Measures that emphasise the distinctiveness - not just the identities - of the different communities and settlements "what used to be villages" would be welcome.		AS 9.9 Public Realm in the North West Communities	Comments noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152175	Policy AS9.9(b)(1) is not ed as policy.		AS 9.9 Public Realm in the North West	Comment noted, this will be amended.	Policy now reads "Good quality, attractive street furniture (for example,

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
						Communities		bins and seats) with the environs of shopping areas and community facilities being be the priority target."
396269	English Heritage	GOVERNMENT AGENCY	LP20152189	Paragraph I 0.73 - as with highway structures, many community facilities may be regarded as heritage assets, in respect of which careful maintenance can also form part of a positive strategy for the historic environment. Where a community facility of heritage value (an older school for example) is found to be no longer required, it is important for it not to be disposed of without first having devised a clear exit strategy which will secure its conservation and continued use thereafter.		Community Infrastructure: Education, Health, Social	Comments noted. The Community Infrastructure and Heritage Assets policies work together to ensure that sufficient protection is afforded to community facilities with heritage significance.	No amendments proposed.
878592			LP20154	A similar approach should be taken with other aspects, such as cycling. I think the mindset is still a bit in the present, and what is doable from a low base and in a somewhat apologetic way, rather than anticipating cultural shifts and different expectations in 5 to 10 years time. A general standard though would be to use the NICE guidelines which say that the default is for journeys less than 5 miles to be by cycling and less than 1 mile by walking. So one could make any development be contingent on improving connections from that development to places within a 5 mile radius such that one can reach any locality with greater than 100 houses (say) by a route physically separated from the road, i.e. fulfils the 8 year old test - would you let your 8 year old cycle along it. The planning team need to be cogniscent of the fact that N Tyneside has much higher rates of morbidity and mortality		Connectivity and Transport	Policy is provided within the Local Plan to support and encourage walking and cycling as part of development, and the location of development sites within the Borough is such that walking and cycling, and accessibility to public transport are - or can readily be made to be viable and attractive options for residents.	No amendments proposed.

				needs to indicate which routes are currently available and which are proposed routes				
898589		RESIDENT	LP2015846	I have made a brief examination of the above document and I am pleased to see that some of my concerns expressed in my letter of the 30th December 2013 have been addressed. However, much is still of concern. I note that some attempt has been made to provide details of the necessary infrastructure to accommodate the major developments which are proposed. However, no indication is included as to how these requirements are to be funded. In particular the roads proposed to serve the developments on Killingworth Moor/Backworth. In my opinion, such costs should be borne by the Landowner /Developer, otherwise, the local tax payers will be subsidising the profits of the Developer and Land Owner. Piece meal development of several small sites will not provide the relevant sums. One major Development of the area(s) should generate enough profit to allow this to happen.		General and Funding	Comment noted. The Infrastructure Delivery Schedule (IDS) is part of the Infrastructure Delivery Plan (which is available to view on the Council website - <a href="http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=558901">http://www.northtyneside.gov.uk/pls/portals/NTC_PSCM.PSCM_Web.download?p_ID=558901</a> ) and this outlines the indicative costs for the infrastructure required to meet the levels of growth anticipated in the Local Plan. The IDS does outline that the funding for the major road works required for both Murton and Killingworth will be met by the developers. The Council is taking the approach that Masterplans for both areas will be required before development can take place so that the collective issues can be drawn together and not in isolation – this is the approach of Policy AS7.4 (now S4.4).	No amendments proposed.
899991	Tyne and Wear Public Transport Users Group	RESIDENT	LP20151576	We noted that, in their proposed Voluntary partnership Agreement, the Bus Operators were insisting that services to any new development should, initially be funded by s106 agreements. In the event that the QCS were not to be agreed we are sure that this proposal will be resurrected. We take the view that if s106 money were to be used for the purpose of "'kick-starting' what was to become a commercial service then it should be regarded as a loan to be paid back once the service was established and profitable. We have a problem, in principle, with the idea		General and Funding	Contributions to infrastructure provision are necessary where essential to ensure the sustainability of a scheme and to make it acceptable in planning. The role of s106 is to satisfy such shortfalls in infrastructure that exist when a development comes forward. If a s106 contribution were required to "kick start" a bus service this would be mitigating a shortfall in demand during the early years of a development to ensure the service is in place and attractive to new residents before they adopt alternative modes of travel. That funding will have been paid towards a	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				that s106 money should be used as an investment to generate profits for commercial interests.			service that was provided - it would not be logical for that service to then be refunded and therefore be delivered free of charge by the operator.	
808917	BDW North East	LAND DEVELOPER	LP20151775	BDW note that the councils seeks to maximise contributions from developers for infrastructure projects. The council must ensure that the level of contribution being sought is viable. It is important that the level of contribution does not make the development unviable and stall development. In accordance with the Harman guidance, local authorities should include a viability cushion to ensure the development can proceed. The council must ensure the level of contribution being sought is viable.		General and Funding	Comments noted.	No amendments proposed.
510094	Natural England	GOVERNMENT AGENCY	LP20151971	Infrastructure Delivery Plan 2015 Natural England support the inclusion of a chapter on Open Space. Areas of open space can contribute towards a GI network.		General and Funding	Support noted.	No amendments proposed.
901487		RESIDENT	LP20152264	I am writing with regard to the article featured in the last "Our North Tyneside" issue about the Local Plan consultation, which just closed at the end of March. I would like to enquire about the plans for improving internet connections in the areas of Meadow Vale developments. I am a resident there who just moved in recently. I am very disappointed about the internet connection bandwidth - the upper limit is incredibly low (not higher than 3-4 Mbps) due to the fact that the nearest exchange is located in Killingworth. Considering there are plans to build new developments close to A19/pub Pavilion area, I would like to feed to the Planning Team the need to expand internet capabilities in the		Telecommunications Broadband, mobile phone masts and equipment	Access to high speed broadband connections are of increasing importance to both businesses and residents, as the opportunities presented by the technology continue to expand. However, some areas of North Tyneside currently have only limited broadband connectivity whilst new developments rarely take full advantage of the potential to include complete fibre-optic broadband connectivity. The Government has set a target of achieving superfast broadband services to 90% of the country by 2015, with the remaining 10% provided with at least 2mbps. The Council's role in achieving this Government target is to help facilitate the	None required.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				area. With hundreds of new families and people joining the area, the current bandwidth will no longer be sufficient. Especially for businesses and people working from home, it is not acceptable to live in new development where internet connection is even slower than many developing countries. I hope the Planning Team will take this back and action appropriately. Thanks very much for your time. Looking forward to hearing from you with news.			delivery of superfast broadband services by the private sector providers at the local level in areas where market conditions or geographic location mean that the private sector is not likely to deliver this objective. The Council will continue work with broadband providers to achieve the widest rollout of their infrastructure development and to achieve the best outcomes for residents of North Tyneside.	
594611	National Grid	NATIONAL/REGIONAL/ORGANISATION	LP2015404	National Grid owns and operates the high voltage electricity transmission system in England and Wales and operate the Scottish high voltage transmission system. National Grid also owns and operates the gas transmission system. In the UK, gas leaves the transmission system and enters the distribution networks at high pressure. It is then transported through a number of reducing pressure tiers until it is finally delivered to our customer. National Grid own four of the UK's gas distribution networks and transport gas to 11 million homes, schools and businesses through 81,000 miles of gas pipelines within North West, East of England, West Midlands and North London. To help ensure the continued safe operation of existing sites and equipment and to facilitate future infrastructure investment, National Grid wishes to be involved in the preparation, alteration and review of plans and strategies which may affect our assets. 830652		NATIONAL/REGIONAL/ORGANISATION	LP2015786	<p>Thank you for your recent consultation on the above and taking the time to seek the Mobile Operators Association's views on the emerging Local Plan. We consider this a very proactive approach to forward planning and welcome the opportunity to have input in the process. It is recognised that telecommunications plays a vital role in both the economic and social fabric of communities. National guidance recognises this through Section 5: "Supporting high quality communications infrastructure" of National Planning Policy Framework (March 2012) which provides clear guidance as to the main issues surrounding telecommunications development. Paragraph 42 of the National Planning Policy Framework (NPPF) confirms that; "advanced, high quality communications infrastructure is essential for sustainable economic growth" and that it "plays a vital role in enhancing the provision of local community facilities and services". Further advice on the siting and design of telecommunications and good practice procedural guidance is contained within the Code of Best Practice for Mobile Phone Network Development (July 2013). This builds on the Ten Commitments to ensure that the industry is alive to the concerns of local communities and consultation is built into the development process. While we support the inclusion of a telecommunications policy within the emerging Local Plan, we have the following concerns about the wording of Policy DM10.14: Telecommunications "Broadband, mobile phone masts and</p>		<p>Telecommunications "" Broadband, mobile phone masts and equipment</p>	<p>Comments noted. Sentence has been removed from paragraph.</p>	<p>Amendments actioned.</p>

							<a href="http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins">http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins</a>	
424278	SITA Up	LANDOWNER / BUSINESS	LP20151551	The text in paragraph 10.63 refers to the percentage of municipal waste which is not recycled and is still sent to landfill. SITA UK would question whether this would be more accurately referred to as waste which is not recycled or recovered. Paragraph 10.67 still refers to "a waste energy plant" on Teesside and SITA UK would like to suggest that this is amended to "energy from waste plant" in order to be consistent with commonly used terminology. Paragraph 10.67 states that the Urban Mines study confirms that there is sufficient capacity to manage and treat residual waste until 2030. However, this scenario was based upon the continued operation of Houghton Landfill in Sunderland, which has now been granted planning permission for a low level restoration to facilitate the development of an employment park. There is therefore a potential landfill capacity shortfall within the plan period and this should be recognised in the Local Plan.		Waste Management	Thank you for your comments, amendments have been made.	Altered to read "Although waste which is not recycled or recovered continues to be sent to landfill, this was below 10% in 2013/14." Reference changed to "energy from waste plant" on Teesside. Paragraph about landfill capacity has been altered to read "Houghton Landfill in Sunderland has closed, the impact of this could produce an overall regional landfill capacity shortfall in the medium term, unless increased recycling and diversion targets are delivered. This will continue to be monitored at a regional level."
396412	Northumbria Wildlife Trust	OTHER / LOCAL ORGANISATION	LP2015549	Neither is it apparent that any current or potential flood attenuation measures have been adequately considered or identified in the plan.		Water Management	Flood Risk Assessments will be carried out for all major developments. Two early assessments have been carried out for Murton and Killingworth Moor to assist with masterplanning, surface water separation (SuDS) has been considered within a flood risk assessment. 				policy DM10.10 accordingly.				
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151806	<p>We strongly support the content of Policy DM10.10, which contains important guidance for developers regarding the disposal of surface water from development sites. The principles identified within Policy DM10.10 will ensure a proactive approach to the reduction of surface water and sewer flooding risk within North Tyneside and enable development to reduce existing surface water runoff rates. In particular, we welcome the strict approach to surface water disposal incorporated within the policy, whereby discharge directly to combined sewers will only be considered in exceptional circumstances. Having said this, we do believe that there are opportunities within Policy DM10.10 and its supporting text to promote the use of sustainable drainage systems to a greater degree. Once again, phrases such as "where practicable" are seen to threaten the overall approach to sustainable drainage within new development, which is otherwise sound in principle. Equally, it is our opinion that the language of DM10.10 should set sustainable drainage within a more positive context, with encouragement of surpassing post development runoff rate requirements, rather than meeting a minimum reduction to fulfil criteria. Furthermore, we believe that the structure of DM10.10 is slightly confused at present, with reference moving from sustainable surface water management to sustainable drainage systems without clear indication. We would suggest that the policy</p>		DM 10.10 : Sustainable Drainage	RE: Confusion in policy wording, reorder Policy 10.10 to separate run off from SUDs, consider splitting into two.	<p>"Where practicable" has been removed. The two water sections have been combined into a Water Environment Section within chapter 8. Policy 10.10 has now been split into Policy DM5.14 Surface Water Run Off and Policy DM5.15 Sustainable Drainage</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>may first address sustainable surface water management, including post-development runoff rates, before focusing upon the incorporation of sustainable drainage systems as a means to achieve the required reduction in surface water runoff. Rearrangement of the policy in this manner would create the opportunity for further reference to be made to the design, features and mechanisms of sustainable drainage systems. Looking to the future, we would suggest that the policy should give recognition to the evolution of national sustainable drainage standards. In particular, SuDS NS5 of the guidance for the National Standards for Sustainable Drainage published in June 2014 proposes stricter guidelines for previously developed sites, suggesting that: "SuDS NS5. For developments which were previously developed, the peak runoff rate from the development to any drain, sewer or surface water body for the 1 in 1 year rainfall event and the 1 in 100 year rainfall event must be as close as reasonably practicable to the greenfield runoff rate from the development for the same rainfall event, but must not exceed the rate of discharge from the development prior to redevelopment for that event." When the National Standards are adopted, planning policy will need to align with these stricter guidelines. In any event, we would advocate this stricter approach to minimise the risk of sewer flooding, and would urge the Council to consider this greater reduction in surface water run-off within at least the Council's "critical drainage areas".</p>

789566	Environment Agency	GOVERNMENT AGENCY	LP20151828	As outlined in 10.57 and the WCS there currently is insufficient capacity at Howdon Sewerage Treatment Works (HSTW) to accommodate the increased foul drainage from the planned housing and employment growth. NWL are currently working on a Sustainable Sewerage Strategy across Tyne and Wear which will help remove surface water from sewers. Although this will help increase capacity at HSTW this will not free up sufficient capacity to accommodate all planned growth. Surface water is seen as both the problem and a solution to freeing up capacity at HSTW and enabling sustainable growth. The key to increasing capacity would be to take surface water out of the sewerage network - on this basis, we recommend that the policy reflects these requirements. In removing surface water from the sewer network careful consideration must be given to ensure that surface water does not increase flood risk elsewhere. On this basis, the requirement of "no net increase" may not be sufficiently reflect these issues. DM 10.10 seeks to limit post development run off rates to a maximum of 50% of the flows. We consider cross referencing of these policies is required to avoid confusion.		DM 10.10 : Sustainable Drainage	Flood policies have been reworked so that they are now all listed together in the plan in the Natural Environment section. This now links development and flooding, flood reduction, surface water run off and sustainable drainage in one section. Reference to "no net increase" has been removed from the reworked flood policies.	The two water sections have been combined into a Water Environment Section within chapter 8.
789566	Environment Agency	GOVERNMENT AGENCY	LP20151828	You will know that the Government has announced that it intends to change our statutory consultee duties for planning applications. This also means making Lead Local Flood Authorities statutory consultees for surface water drainage issues for "major" developments. This will need a change to the Development Management Procedure Order		DM 10.10 : Sustainable Drainage	Thank you for the information, the water section will be updated following the updates to the DMPO and the PPG. The national SuDS Design Guide and a Regional Guide will provide more detail for SuDS. The Council is also considering an SPD for use by the Planning team and the LLFA	References SAB removed and Local Lead Flood Authority inserted

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>(DMPO). A new DMPO which includes these changes and consolidates the original DMPO and amendments made to it was recently published and will come into force on 15th April 2015. To support the new consultation arrangements, DCLG has changed the Planning Practice Guidance (PPG). The main changes are to the pages: Why are sustainable drainage systems important? How the local planning authority should involve the lead local flood authority when determining planning applications and what advice should be given about local flood risks Water supply , wastewater and water quality considerations in plan-making This guidance provides clarity on when SUDs are appropriate, together with minimum standards of operation and the need that there are clear arrangements in place for ongoing maintenance. On this basis, we consider it is essential that the Policy outlines the LPA's position and expectations "" particularly regarding maintenance and adoption of SUDS. The PPG further highlights that SUDS provide opportunities to: "ç reduce the causes and impacts of flooding; "ç remove pollutants from urban run-off at source; "ç combine water management with green space with benefits for amenity, recreation and wildlife. Given this emphasis of the wider benefits of flood risk, we consider that this policy can be strengthened to highlight the water quality, amenity, recreation and wildlife benefits. As previously highlighted a number of recent planning applications have proposed direct deep drainage discharges of surface</p>

805490		RESIDENT	LP2015701	Schools in Killingworth area already full, surplus school places in North West area.		S 10.13 Community Infrastructure	Comment noted. The Local Plan seeks to consider the needs of current and future residents and how these needs will change over time. The importance of school places is reflected in Policy S10.13 'Community Infrastructure' (now Policy S7.10) and Policy S10.1 'General Infrastructure and Funding' (now Policy S7.1). The planning team have been in discussion with the Councils education officers to determine the impact of the proposed level of growth on school places and this has shown the need for an additional primary and secondary school to meet the needs of the future populations at Killingworth Moor and Murton.	No amendments proposed.
806113		RESIDENT	LP2015768	As public affairs and pub preservation officer I thank you on behalf of the Tyneside and Northumberland branch of CAMRA (Campaign for Real Ale) for the opportunity to comment on the proposed local plan consultation for North Tyneside. Our concern is for the survival of public houses and here in particular community pubs. Unfortunately we were unable to find any reference in the how the council is proposing to safeguard the future of community pubs in North Tyneside. That said, words in itself cannot save pubs. You need to spell out in your local plan how you wish to safeguard the future of community pubs. You could make reference		S 10.13 Community Infrastructure	Comment noted. The Local Plan sets out the importance of community facilities in the Local Plan in Policy S10.13 (now Policy S7.9). This Policy covers pubs and these are recognised as an important part of providing for local communities needs and achieving community cohesion. Policy S10.13 (now Policy S7.9) does state that where land or buildings used as community facilities are deemed surplus to requirements, priority should be given to alternative community uses with a set of criteria to be applied.	No amendments proposed.

							and Murton.	
830652		NATIONAL/REGIONAL/ORGANISATION	LP2015799	<p>Policy DM10.14 "" Criterion (c) Criterion (c) of Policy DM10.14 states that applications will be permitted where there are no satisfactory alternative sites available. In some instances it is possible for more than one "satisfactory" site/option for the installation of telecommunications equipment to be available and in those cases a choice is made between the "satisfactory" options available. On that basis, it would not be reasonable for an application to be refused on the basis that other "satisfactory" alternative options are available, when the option being progressed is also considered to be "satisfactory". In order to avoid ambiguity we would suggest that the wording for criterion (c) of Policy DM10.14 is amended as follows: "There are no more satisfactory alternative sites for telecommunications available". Policy DM10.14 Criterion (d) of Policy DM10.14 requires that there is a justifiable need for a new telecommunications site however paragraph 46 of NPPF states that Local planning authorities should not, "question the need for the telecommunications system". On that basis, we request that criterion (d) of Policy DM10.14 is deleted. Summary In summary, while we support the inclusion of Policy DM10.14 within the emerging Local Plan, we consider that the criteria detailed above are overly restrictive to telecommunications developments and contrary to the provisions of National Policy and Guidance. We therefore recommend that</p>		DM 10.14 Telecommunications Broadband, mobile phone masts and equipment	<p>Comment noted. The suggested amendments have been considered and the suggested changes of Policy DM10.14 (now Policy DM7.10) have been incorporated into large parts of the existing policy. Some elements have not changed and criteria (d) has been retained as it is a reflection of NPPF para 43, which does not question the need for telecommunications systems but the need for a new telecommunications site to be justified.</p>	<p>New Policy criteria below:</p> <p>a. If proposing a new mast, evidence should demonstrate that no reasonable possibilities exist of erecting apparatus on existing buildings, masts or other structures.</p> <p>b. The siting and appearance of the proposed apparatus and associated structures should seek to minimise impact on the visual amenity and respect the character or appearance of the surrounding area</p> <p>c. If sited on a building, apparatus and associated structures should be sited and designed in order to seek to minimise impact to the external appearance of the host building</p> <p>d. The development should not have an unacceptable adverse impact on areas of ecological interest, areas of landscape importance, archaeological sites, conservation areas or buildings of architectural or historic interest. When considering applications</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>the wording is amended as suggested above. As an alternative to the amendments suggested above, another option would be to substitute the existing wording of Policy DM10.14 with the following wording: "Proposals for telecommunications development will be permitted provided that the following criteria are met: - (I) the siting and appearance of the proposed apparatus and associated structures should seek to minimise impact on the visual amenity, character or appearance of the surrounding area; (ii) if on a building, apparatus and associated structures should be sited and designed in order to seek to minimise impact to the external appearance of the host building; (iii) if proposing a new mast, it should be demonstrated that the applicant has explored the possibility of erecting apparatus on existing buildings, masts or other structures. Such evidence should accompany any application made to the (local) planning authority. (iv) If proposing development in a sensitive area, the development should not have an unacceptable effect on areas of ecological interest, areas of landscape importance, archaeological sites, conservation areas or buildings of architectural or historic interest. When considering applications for telecommunications development, the (local) planning authority will have regard to the operational requirements of telecommunications networks and the technical limitations of the technology". We trust you find the above comments of</p>				<p>for telecommunications development, the Council will have regard to the operational requirements of telecommunications networks.</p> <p>e. There are no more satisfactory alternative sites for telecommunications available.</p> <p>f. There is a justifiable need for a new site.</p> <p>g. Proposals subject to government guidelines on non-ionising radiation protection are accompanied by an International Commission on Non-Ionizing Radiation Protection certificate.</p>

				communities and the potential local benefits.				
755686	Home Builders Federation		LP20151740	58. The HBF is generally supportive of this policy and the amendments from the previous consultation on the plan which largely reflect our previous comments. It is, however, recommended that further clarity be provided in respect of criterion ii and how this would work in practice.		DM 10.2 Development Viability	Support noted. The suggested amendment has been considered and policy DM10.2 (now Policy DM7.2) has been updated accordingly.	Policy DM10.2 (now Policy DM7.2) has been amended for further clarity. Point b now reads as follows: "Consider alternative phasing, through the development period, of any contributions where to do so would sufficiently improve the economic viability of the scheme to enable payment."
510094	Natural England	GOVERNMENT AGENCY	LP20151961	Should a situation arise where a developer can no longer make infrastructure payments, this should not affect any mitigation required for development that has potential to affect Northumbria Coast SPA/Ramsar needed to comply with policy DM8.6 Management of International Sites.		DM 10.2 Development Viability	Comment noted. Policy DM10.2 (now DM7.2) will work with other policies to ensure that required mitigation is delivered. The policy will provide an opportunity to work with developers to ensure that financial issues will not prevent necessary mitigation from being delivered.	No amendments proposed.
396511	GVA	PLANNING CONSULTANCY	LP20152010	The consortium supports the policy because it acknowledges the role of viability in achieving the overarching benefits of new development. It is reasonable to consider deferral of payments as an alternative to exemption but in the spirit of the policy as a whole it is important to understand that deferral may not always achieve viability which will normally be viewed over the whole life of a project in any event.		DM 10.2 Development Viability	Support noted. It is accepted that deferring a payment may not always provide a solution when addressing viability. Policy DM10.2 has been amended and also makes references to phased payments as an alternative.	Policy DM10.2 has been amended and the text reads as follows: "In these circumstances the Council may: a. Enter negotiations with the applicant over a suitable contribution towards the infrastructure costs of the proposed development, whilst continuing to enable viable and sustainable development; b. Consider alternative

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
								phasing, through the development period, of any contributions where to do so would sufficiently improve the economic viability of the scheme to enable payment."
830571	Persimmon Homes	DEVELOPER	LP20152053	Policy DM10.2 is also supported subject to the same reservations as highlighted above.		DM 10.2 Development Viability	Support noted.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152185	Paragraph I 0.4 -subject to minor amendment, the historic environment would clearly be seen to be a legitimate recipient of Community Infrastructure Levy and Section I 06 monies where heritage assets would be impacted upon by development.		DM 10.2 Development Viability	Comment noted, this will be amended.	Last bullet of para 10.4 (now para 10.6) now reads "secure protection and in particular enhancement of the natural, built and historic environment, and the improvement of the image of the Borough."
444604		RESIDENT	LP201586	Please preserve the field paths routes for pedestrians and cyclists as these are vital for road safety in keeping people away from heavy-traffic-ed routes. OK, many field paths are not legally bridleways but they are well used by cyclists going to work and school.		S 10.3 Transport	Comment noted. The Local Plan sets out its clear focus to deliver improved accessibility whilst also reducing carbon emissions, primarily by encouraging active travel - walking and cycling. Working with the Council and its partners the Local Plan will seek to provide safe convenient and accessible routes for pedestrians, cyclists, horse-riders and other non-motorised modes of transport, using green infrastructure links where appropriate.	No amendments proposed.
890186		RESIDENT	LP201587	Transport Links into the two major developments are totally inadequate to handle all the additional traffic that will be generated. The roads around Silverlink and Cobalt are already severely overloaded at 'rush hour' - this needs attention before further expansion		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel in the	No amendments proposed.

							details of the design of the transport schemes will be publicised on the Council website when information is available.	
892866		RESIDENT	LP2015297	Traffic! Speed and volume both already major issues on Killingworth Bank and West Lane. I'm woken up every morning by noise of traffic.		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed improvements will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	No amendments proposed.
814591			LP2015351	Traffic on the coast and old coast road is horrendous at present so I dread to think what it'll be like with extra housing bearing in mind that 2 residents seem to bring 2 cars, is public transport likely to be able to cope?		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. Policy S10.3 'Transport' and Policy DM10.4 'New Development and Transport' (now Policoes S7.3 and DM7.4) consider transport infrastructure from the large strategic issues (e.g. potential Metro extensions) down to footpaths and cycle way improvements that help ensure an integrated transport approach to travelling throughout the Borough.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
			LP2015364	Bus services from Dudley and Annitsford to South East Northumberland need to be improved. Current routes - X21, X22, 2 - are not good enough and neither is the road infrastructure.		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. The routes and frequency of services of bus companies can be encouraged in the Local Plan (additional development may attract more frequent services or new services), but ultimately the bus company would determine the service in cooperation with NEXUS.	No amendments proposed.
893904		RESIDENT	LP2015366	Bringing extra roads into Sandy Lane will place extra pressure on the existing junctions at the Gosforth Park roundabout and also the roundabout approaching the A189, leading to Killingworth, north and south traffic.		S 10.3 Transport	The suggested sites for housing and employment in the Local Plan have been considered in the transport modelling work for North Tyneside that has helped secure around £150million of highways funding. This funding has targeted junctions near Gosforth Park to make it easier and safer to travel in the Borough.	No amendments proposed.
893914		RESIDENT	LP2015383	I do not see any specific proposals for improving cycle routes. Wagonways are excellent as the basis of these, but the surfaces of them are not all good enough for cycling. Other routes need developing as well. For example, Station Road Benton is a very dangerous road to cycle on, particularly under the Metro bridge at Benton station, and many cyclists chose to use the footpath here, which		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of commuters, public transport users, cyclists and pedestrians. The proposed highway improvements in the Borough reflect the anticipated levels of economic growth across the Borough's key employment sites, namely Quorum, Cobalt,	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				is itself dangerous as the path is narrow and constrained by railings. There exists a parallel route used by some cyclists, using the un-adopted road which links The Oval with Westcroft Road, but the surface of this is diabolical in wet weather. Also links at the western end of the very useful west-east wagonway which served Rising Sun Colliery could be developed in the westerly direction to be cycle friendly.			Indigo Park, and North Bank of the Tyne (inc. Tyne Tunnel Trading Est.). There are four major improvement schemes; A19 employment corridor access improvements (A19 Holystone to Cobalt), Coach Lane and Tyne View Park (A191 corridor), A1056 Weetslade Corridor (Sandy Lane), North Bank of Tyne. The Local Plan supports safe, convenient and accessible routes for cyclists and implementing improvements to strategic and local routes as development proposals come forward Policy S10.3 and DM10.4 (now policies S7.3 and DM7.4).	
894604		RESIDENT	LP2015409	Priority Transport Improvements I have shown on the enclosed plan the proposed TRANSPORT IMPROVEMENT ROAD moved to the east of the A19 and shown in blue for two very important and valid reasons. 1. There is a major accident black spot at the junction of the B1322 and the A1056 Seghill, Backworth, Killingworth junction. Providing a roundabout at this junction would virtually eliminate major accidents and could provide an easier junction for traffic leaving the A19 southbound. 2. There would be a major benefit to Backworth Village as the relocation of this route to the east of the A19 would provide a very much needed by-pass to Backworth Village without a great cost. As you will be aware the road through Backworth Village is very narrow and not at all designed to cope with the excessively heavy volume of very large lorries that use this road as a shortcut to Silverlink and Cobalt. The large lorries are so close to the pavement and indeed on many occasions the wing mirrors of		S 10.3 Transport	Comment noted and the suggested transport improvements will be passed onto the highways engineers for consideration as part of the future junction improvements throughout the Borough.	Comment passed to colleagues in the Highways team.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				these lorries actually project over the kerbs and so close to children walking to school - something must be done before there is a fatality. (Representation also logged against Policy AS7.4)				
893913			LP2015414	I have the following concerns: Increased traffic on already busy roads that are in poor state of repair and constantly being dug up. No doubt more pointless sets of traffic lights will be erected, similar to the lights outside Wellfield Estate that constantly stop four lanes of traffic on Earsdon Road when no traffic or personnel are waiting at the Wellfield side! Also concerned about Transport Services.		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. North Tyneside now operates a new permit scheme for organisations that wish to dig up roads in the Borough. North Tyneside is the first local authority to introduce this scheme as previously utility works could be carried out without needing to inform the Council, but now the Council will operate a scheme to minimise unnecessary delays. The traffic signals on Earsdon Road were installed as a result of a planning condition placed on the West Park development. When the lights were activated in August 2014 there were traffic flow issues in the area and changes were made to the signals in order to address these issues. The junction itself is still being monitored by the Local Authorities Traffic Team to determine when further changes will be required in relation to the increasing	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							occupancy of West Park.	
444906		RESIDENT	LP2015434	All the proposed developments to major roads are welcomed as necessary given the increased traffic. But improvements to public transport are even more important so the Council needs to work hard with transport providers to enable and encourage such improvements.		S 10.3 Transport	Comment noted. The Council will be working in cooperation with public transport providers in preparation of the Local Plan.	Expand the consultation list for public transport providers
894730		RESIDENT	LP2015443	The roads cannot cope with traffic now so how can it cope with an extra 3,000 new homes and when the Cobalt is only half full.		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	No amendments proposed.
895180		RESIDENT	LP2015491	Access to Whitley Bay via car is not sustainable by building new houses. Those who work further away need to drive!		S 10.3 Transport	Comment noted. Good connectivity both within North Tyneside and to the wider regional and national transport network, is important and the Local Plan supports the delivery of an improved transport network for North Tyneside to ensure integration of land-use and transport planning – Policy S10.3 and Policy DM10.4 (now Policies S7.3 and DM7.4).	No amendments proposed.
793403		RESIDENT	LP2015553	Concerned about cross-boundary transport issues in north Newcastle - particularly proposals for cycle lanes on Gosforth High St. The narrowness of this road makes it unsuitable (detailed comments forwarded to		S 10.3 Transport	Comment noted. Cycle lanes on Gosforth High Street is a Newcastle Council issue but the Local Plan does recognise the importance of strategic transport routes in Policy S10.3 and DM10.4 (now Policies S7.3	Further update on the formation of the combined authority and its role in transport planning. Specific example of joint working

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				Newcastle City Council).			and DM7.4). However, the emphasis of working with partners to improve cross boundary transport routes could be further emphasised in the Local Plan.	with Newcastle on coast road cycle route added
471682		RESIDENT	LP2015554	The roundabout at the Jolly Bowman needs updating - already in the morning we have traffic over a mile long. What is the use of building more houses if the infrastructure cannot cope. The same will apply on Station Road if improvements are not made.		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough, which include works to the A191 at the top of Station Road and the Jolly Bowman roundabout, have been calculated based on the levels of growth set out in the Local Plan with the aim to make it easier and safer to travel in the Borough.	No amendments proposed.
396449	Cyclists Touring Club	OTHER / LOCAL ORGANISATION	LP2015587	S10.3 Transport 1st line: Future provision of transport would be better as Future transport provision. 2nd par, from 2nd sentence. More accurate wording would be: The A19 provides a vital south to north route from Sunderland and South Tyneside to Northumberland, connecting with the A1 (not the A1M) at Seaton Burn. There are also a number of key west to east links providing access from Newcastle to the coast, including the A191, the A1058 (Coast Road) and the A193 (Hadrian Road is the A187). The Road Network 2)d. A1(M) should be A1. Pedestrians, Cyclists and Horse-Riders 3)a. walking and cycle routes should be walking and cycling routes.		S 10.3 Transport	Agreed. The suggested amendments will be made	Amendments made. Provision of transport changed to 'transport provision'; north to south changed to 'south to north' for the A19 and east to west changed to 'west to east' for connections with Newcastle to the coast; walking and cycle routes changed to walking and cycling; Hadrian road changed to A187 from A193 and reference to A1 (M) changed to A1.
897298		RESIDENT	LP2015608	3000 homes means possibly 6000 more cars in an already gridlocked traffic area during peak times. How do you propose to solve these issues and where can I find your plans?		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. Further information of the junction improvements is in the Council Magazine and available on the Council website – if you follow the link there is information on page 38 and 39 - <a href="http://my.northtyneside.gov.uk/sites/default/files/web-page-related-files/Our%20North%20Tyneside%20Residents%20Magazine%20Spring%202015.pdf">http://my.northtyneside.gov.uk/sites/default/files/web-page-related-files/Our%20North%20Tyneside%20Residents%20Magazine%20Spring%202015.pdf</a>	
897641		RESIDENT	LP2015651	Also, I would request that you come with me any morning, and observe the gridlock effect. The roads around most of North Tyneside were not built for half of the current number of cars, in fact in many streets, if cars park on the road, it becomes single lane, your response to date has been to lower the speed limit. You are also looking at such as traffic lights at the end of the coast road. The issue is that the road infrastructure is unable to cope with the ever increasing traffic. This will certainly become an increasing issue, as we also lack a strong public transport system. The metro is good, but people use their cars to get to it, as bus links do not exist. It is in fact a mish-mash of ideas, which is now beyond control, without knocking down large areas of housing to provide further roads.		S 10.3 Transport	Comment noted. The Council is committed to transport improvements in the Borough and over the next five years is undertaking a series of works making it easier and safer to travel in the Borough. These improvements would not be the only solution to the levels of growth anticipated in the Local Plan and Policy S10.3 (now Policy S7.3) sets out the need to work towards a integrated strategic public transport network that improves the ease of change for example between bus and Metro. This is seen to be vital for public transport to become an increasingly attractive option and ensure a shift from private transport. Policy DM10.4 (now DM7.4) also outlines a set of criteria to be taken into account with new development and its relationship to the transport network so that 'all new development is well	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							serviced by an attractive choice of transport modes, including public transport, footpaths and cycle routes.'	
396641		RESIDENT	LP2015688	I am concerned about the impact of extra traffic on Station Road if all of the proposed housing in that area is allowed to be built. There are already very congested times during the day when people naturally access Station Road to go to work, school, shopping etc. Alternative access is needed.		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough have reflected the levels of growth set out in the Local Plan, including the sites around Station Road, and will aim to make it easier and safer to travel in the Borough. Further information of the junction improvements are detailed in the Council Magazine and available to view on the Council website – if you follow the link the relevant information is on page 38 and 39 - <a href="http://my.northtyneside.gov.uk/sites/default/files/web-page-related-files/Our%20North%20Tyneside%20Residents%20Magazine%20Spring%202015.pdf">http://my.northtyneside.gov.uk/sites/default/files/web-page-related-files/Our%20North%20Tyneside%20Residents%20Magazine%20Spring%202015.pdf</a> .	No amendments proposed.
805490		RESIDENT	LP2015703	The roads from Monkseaton, New York, Shiremoor, West Allotment, Cobalt, Silverlink, Holystone, Backworth, Killingworth, Forest Hall, Benton, Longbenton are already full of traffic, gridlocked at peak times. They will not be able to cope with the extra traffic from 4,500 houses and a 17 hectares employment site. A gross overdevelopment of the Murton and Killingworth Moor sites. The South of the borough has the A1058 dual carriageway new coast road from North Shields to Heaton, and the A193 Howdon Road from North Shields to Walkerville. In the mid area of the borough from Monkseaton to Longbenton		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				/Killingworth apart from the new dual Shiremoor by-pass + Earsdon/Wellfield sections we have 'B' roads and country lanes that are clogged up at peak times, the old coast road (Whitley Road) ,Great Lime Road, New York Road, Rake Lane, Backworth Lane, Killingworth Lane. A new road from the Grey Horse roundabout should run North West by-passing Backworth and join the A1056 (known as The Northern Gate Way as it joins the A1 to the A19) at the A19 intersection.				
898560		RESIDENT	LP2015831	Improvements to road infrastructure are also needed so it is good news that a number of schemes are planned.		S 10.3 Transport	Comment noted.	No amendments proposed.
898591		RESIDENT	LP2015850	The local road infrastructure currently gridlocks regularly at prime times. Despite the proposed new road through Murton the additional vehicles from such a huge development is of serious concern.		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. The strategic housing sites identified in Policy AS7.4 (now Policy S4.4) for Killingworth and Murton would be accompanied with a masterplan identifying access routes and public transport corridors. An access and transport strategy would need to be developed that maximises walking, cycling and use of public transport opportunities for both Killingworth and Murton.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
467822		RESIDENT	LP2015874	We need trolley buses going from Ashington down to the coast maybe going to Sunderland via Wallsend and other buses and Trolley coming from West End Newcastle to the Coast.		S 10.3 Transport	Comment noted. The Local Plan supports the retention and protection of essential infrastructure that would facilitate sustainable passenger and freight connections between Ashington and the rest of the Borough with connections to the wider Tyne and Wear region. This proposal is a key aspiration of Northumberland County Council and the North East Strategic Economic Plan. Policy S10.3 (now Policy S7.3) of the Local Plan reflects this ambition to safeguard the Ashington, Blyth and Tyne Railway line and this is shown on the Policies Map.	No amendments proposed.
898767			LP2015910	We strongly object to the in fill of further green field sites along Whitley Road. 1. Increased traffic congestion along Front Street and backing up along Whitley Rd with likely increased stop start and idling motors due to the conversion of Four Lane Ends roundabout to traffic lights; consequent threat to our health from diesel particulates and other contaminants. 2. 5. We note that at least 1 approved housing development "" for 9 houses on Front Street on the Black Bull site is not marked in the plan. Perhaps there are other small pockets that have not been revealed? 3. What steps will the council take to ensure that sustainable transport such as cycling and access to metro stations is given priority in planning decisions and where is the network of cycle paths to enable commuters into Newcastle from Benton to safely use cycle transport via direct routes, giving cyclists precedence over cars.		S 10.3 Transport	Comment noted. The Council has to provide for the future needs of the Borough. The evidence on housing and job projections for North Tyneside over the next 15 years are positive but this places a requirement on the authority to plan for this growth. There is a lack of sites that have already been built on to accommodate the future levels of growth. Sites that have been granted planning permission (such as the Black Bull) have been calculated in the future provision of housing for the Borough but it is not considered a large enough site to be marked on the Plan. The Council has therefore had to suggest green field sites for development (such as those around the Rising Sun), but with objective to also protect and enhance the natural environment and enhance the image of the Borough. Green links are considered in Policy DM8.2 'Protection of Green Infrastructure' (now Policy DM5.2) and the intention of the policy is to be	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							positive with a strategic approach to green links through the Borough. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough (including the A191) will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. The Local Plan includes policies that will improve the access to and safety of Metro Stations with a clear requirement for partners to work together to improve public transport interchanges so facilitate better integration between modes of transport. The Local Plan also covers accessibility of cycle routes in the Borough with the clear direction to improve local and strategic cycle routes that are safe, convenient and well connected Policy S10.3 and Policy DM10.4, (now policies S7.3 and DM7.4).	
898853		RESIDENT	LP2015957	Suggestion: Close the vehicle access from Preston Road - Camp Terrace. Advantages: (a) reduce traffic congestion at traffic lights Preston Road/ Q. Alex. (b) conserve the listed cobbles and heritage buildings . Much easier, safer gateway at the west end of camp terrace.		S 10.3 Transport	Comment noted. The changes suggested to the highway are not an issue to be covered within the Local Plan but the comments have been passed on to the Highway Network Manager for their consideration.	No amendments proposed.
587121	Nexus	NATIONAL/REGIONAL/ORGANISATION	LP2015964	Reference is made in S10.3 (1) to protection of a site on Earsdon Road, related to the potential Cobalt Metro extension "" this is		S 10.3 Transport	Comment noted. The site is shown on the Policies as map as a transport safeguarded route.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				welcome, but the site should ideally be indicated on the proposals map, for the avoidance of doubt.				
898920	Sustrans		LP2015988	Sustrans are concerned that the commitment to sustainable transport is weak and heavily caveated. Given North Tyneside's historic commitment to sustainable transport we would prefer to see explicit commitment to deliver a functioning walking and cycling network. There seems again to be a confusion between walking and cycling networks and green infrastructure.		S 10.3 Transport	Comment noted. The Local Plan includes policies that will improve the accessibility of cycle routes in the Borough Policy DM10.4, (now policy DM7.4)) and work with partners to deliver improved local and strategic cycle routes that are safe and convenient Policy S10.3, (now policy S7.3). Green Infrastructure routes, as outlined in the Planning Practice Guidance, can include walking and cycle routes. This is reflected in the Local Plan, which also supports future walking and cycling routes, using green infrastructure.	No amendments proposed.
898989		RESIDENT	LP20151008	The current Holystone Interchange (A191/A19 Junction) is very busy and regularly at a standstill at key times during rush hour. It is also often busy at weekends. This is likely to get worse as the Earsdon to Holystone Interchange bypass becomes busier. We would prefer for this bypass to be able to access the A 19 directly further North allowing traffic to be diverted away from the residential areas and reducing congestion and associated noise and disruption to local residents.		S 10.3 Transport	Comment noted. There are no proposals to create an additional junction on the A19 north of Holystone but funding that has been identified for junction improvements to A191/A19 roundabout. Over the next five years around £150million is set to be invested in the Boroughs highway network (including the A191). For the schemes that qualify for the £150million funding an Outline Business Case (OBC) will be prepared and submitted to the NELEP (North East Local Enterprise Partnership) for assessment and a comprehensive public consultation process will be carried out. Further information of the consultation process will be available on the Council website. The OBC will include a screening assessment of the environmental impacts of the proposed schemes. Any impacts identified as significant will be assessed in	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							more detail and associated mitigation measures proposed where practicable, this would include air quality, noise and ecology concerns. The Full Business Case would include any environmental impact assessment required to support the scheme submission. The NELEP have indicated that the funding sort is available subject to North Tyneside Council demonstrating the scheme is good value for money.	
898989		RESIDENT	LP20151009	Speeding traffic along the A191 has made pedestrian crossing more difficult particularly at peak times and in the evenings during the dark winter nights.		S 10.3 Transport	Comment noted. Violations of speed limits within an area would not be an issue covered by planning policy. However, over the next five years around £150million is set to be invested in the Boroughs highway network (including the A191) for the benefit of commuters, public transport users, cyclists and pedestrians. Those schemes that qualify for the funding will be required to prepare an Outline Business Case and carry out comprehensive public consultation, which will include the details of the junction improvements (such as pedestrian crossings). Further information of the public consultation will be available on the Council website.	No amendments proposed.
898989		RESIDENT	LP20151012	Direct access from A19 to Cobalt is the best option for all concerned. Also there is no necessity for commercial traffic to use A191 when access to the coast road/ A19 is available via Silverlink. Removing the necessity for commercial vehicles to route through residential areas:- I.e. A191. The whole idea has been hidden from residents of area and the properties will no longer have any value. The Council wouldn't like a dual		S 10.3 Transport	Comment noted. The Local Plan does not determine the routes that commercial traffic use within the Borough. Funding has been identified for junction improvements to A191/A19 roundabout and these works, alongside other investment in the Boroughs highway network. The detailed designs of the highway network improvements will be consulted on separately to the Local Plan. Further information of the consultation	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				carriageway at the bottom of their garden.			process will be available on the Council website.	
898989		RESIDENT	LP20151013	There is no necessity for commercial traffic to access the A19 via the A191 as access is available to A19 via Coast road off Silverlink which is not residential.		S 10.3 Transport	Comment noted. The Local Plan does not determine the routes that commercial traffic use within the Borough. Funding has been identified for junction improvements to A191/A19 roundabout and these works, alongside other investment in the Boroughs highway network. The detailed designs of the highway network improvements will be consulted on separately to the Local Plan. Further information of the consultation process will be available on the Council website.	No amendments proposed.
898989		RESIDENT	LP20151015	The overall Transport infrastructure appears to hinge on the Holystone Interchange and its proposed expansion. This view appears to be quite limited and does not consider other alternatives such as a direct access to Cobalt from the A19, or routing traffic away from Holystone Interchange further North to and from the Earsdon to Holystone Interchange bypass.		S 10.3 Transport	Comment noted. There are no proposals to create an additional junction on the A19 to Cobalt but funding has been identified for junction improvements to A191/A19 roundabout. These works, alongside other investment in the Boroughs highway network (including the A191), will benefit commuters, public transport users, cyclists and pedestrians. The detailed designs of the highway improvements will be consulted on separately to the Local Plan. Further information of the consultation process will be available on the Council website. There will need to be changes to the transport infrastructure in the Borough to meet the levels of growth suggested in the Local Plan and the Council has already been successful in accessing funding to improve the highway network directly impacted by the expected job growth. The transport impacts associated with the housing sites in emerging Local Plan would be	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							predominantly developer funded separately and are considered in the Strategic Traffic Model (STM) – available on the Council website ( <a href="http://www.northtyneside.gov.uk/browse-display.shtml?p_ID=33571&amp;p_subjectCategory=809">http://www.northtyneside.gov.uk/browse-display.shtml?p_ID=33571&amp;p_subjectCategory=809</a> ).	
898989		RESIDENT	LP20151017	Access and Egress - Proposed changes to the Eastbound turning from Murrayfields and the West Allotment roundabout pose significant questions as to how this will affect traffic entering and leaving West Allotment. What impact is anticipated on traffic through the estate as a result of changing the access rights to these junctions? What impact will there be to children needing to cross the Holystone Interchange to Access Holystone Primary School?		S 10.3 Transport	Comment noted. The consultation of the Local Plan coincided with the announcement that over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit of commuters, public transport users, cyclists and pedestrians. The Local Plan does not determine the access and egress form housing estates but considers the overall transport infrastructure of the Borough. The detailed designs of the highway network improvements will be consulted on separately to the Local Plan, and will allow the opportunity for people to comment on the designs proposed by the highway engineers. Further information of the consultation process will be available on the Council website.	No amendments proposed.
898989		RESIDENT	LP20151018	Noise- Noise Levels are already increasing particularly to houses backing onto the A191 road itself. With a proposed lane widening the traffic will be physically closer to properties and with increased commercial and residential traffic capacity noise is likely to increase. What sound and vibration studies have been carried out to date and when are future studies planned? What specific sound defences does the council propose to mitigate rising noise levels to existing residents?		S 10.3 Transport	Comment noted. The Council has been successful in accessing £150million funding for improvements to the highway network. The Local Plan does not determine the detailed designs for improvements of the highway network but considers the overall transport infrastructure of the Borough. For the schemes that qualify for the £150million funding an Outline Business Case (OBC) will be prepared and submitted to the NELEP (North East Local Enterprise Partnership) for	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							assessment and a comprehensive public consultation process will commence. Further information of the consultation process will be available on the Council website. The OBC will include a screening assessment of the environmental impacts of the proposed schemes. Any impacts identified as significant will be assessed in more detail and associated mitigation measures proposed where practicable, this would include air quality, noise and ecology concerns. The Full Business Case would include any environmental impact assessment required to support the scheme submission. The NELEP have indicated that the funding sort is available subject to North Tyneside Council demonstrating the scheme is good value for money.	
898989		RESIDENT	LP20151020	In simple terms the addition of one additional single lane and general widening will not address the problem, the most recent update of the Holystone Interchange from 2 lanes to 3 lanes, which was major works of approaching 12 months in duration, is already approaching capacity and is deemed in residents' eyes as not being fit for purpose. Given the now increased capacity at the junction, what impact on commuters and residents is anticipated during any planned upgrade to this junction? What plans will be put into place to provide alternative routes during this time for access to Cobalt Business Park? Is the upgrade planned before any works are to commence on any proposed new homes at the Murton site?		S 10.3 Transport	Comment noted. The Council has been successful in accessing £150million funding for improvements to the highway network. The Local Plan does not determine the detailed designs for improvements of the highway network but considers the overall transport infrastructure of the Borough. For the schemes that qualify for the £150million funding an Outline Business Case (OBC) will be prepared and submitted to the NELEP (North East Local Enterprise Partnership) for assessment and a comprehensive public consultation process will commence. 				<p>expansion of the metro to Blyth and for cyclists, and the north/south link to Percy Main, the Cobalt office park desperately needs this. I would welcome the re-instatement, or setting aside, of the north west curve of the metro/main line for a link for the metro/light rail to Morpeth/Forest Hall/Killingworth/Cramlington, which would alleviate the traffic problems for those people travelling in from South East Northumberland (the rail route from Morpeth is the one of the most overcrowded in the country). I know there are technical issues with this but they could be overcome in both the short and the long term. For example, reinvigorated London tube carriages could use diesel propulsion on the main line from say (No Suggestions) (which I think still has sidings to cope with this) then switch to the metro voltage from Benton to Longbenton and perhaps terminate at the metro yards at South Gosforth or even go on to the airport. This would really help with inbound traffic. To repeat what I have already said elsewhere in case it is missed: In section 2.18 you said that the borough had good transport links, but I don't agree with this statement. The metro has not been expanded since 2002 and it is very expensive. I expect the current poor service to improve after all of the work but the worse its service, the more people will move to cars. It is cheaper to travel on the tube in London than on the metro and their GDP per head is significantly greater than ours. The north south public transport links are poor and reliant on congested roads. Provision for</p>			<p>across the Borough's key employment sites, namely Quorum, Cobalt, Indigo Park, and North Bank of the Tyne (inc. Tyne Tunnel Trading Est.). There are four major improvement schemes; A19 employment corridor access improvements (A19 Holystone to Cobalt), Coach Lane and Tyne View Park (A191 corridor), A1056 Weetslade Corridor (Sandy Lane), North Bank of Tyne. These works focus on improving the highway network directly impacted by the expected job growth and not the housing sites associated with the emerging Local Plan for which any highway improvements would be predominantly developer funded separately. 				<p>cyclists is poor - it's dangerous or convoluted to use your bicycle here. The 'A191 corridor' and the traffic to it from Killingworth - along Great Lime Road down through Forest Hall and Benton, and from it into Wallsend down Station Road is already congested. It is my understanding from talking to council officials that bus services will come when the housing is built, but this will be too late - people will get used to using their cars. The roads cannot cope as it is. I hope the proposed improvements along the A191 help, but I cannot see how they will support the two thousand plus 2, 3 and 4 bedroom houses already planned, and the new houses already being built; never mind the new housing you propose for the remaining green fields around Whitley Road, which would add another 650 houses to the mix. Nearly 4000 houses, probably a lot of them with two cars. How can the infrastructure cope with this? Your own stats say that North Tyneside has the highest car ownership in Tyne and Wear. The proposed housing, not served well by public transport or the metro, being sold to 'executives', will only make getting around the borough by car even harder, and this will have a long term economic impact on the borough's economy. Road congestion cost the UK economy £13bn in 2013 according to the CEPD. I think you may also want to reflect on why the borough has the largest car ownership in Tyne and Wear, is this a result of the public transport provision in the borough or the building of houses without putting in the infrastructure to cope with them? It can't</p>			<p>will commence. Further information of the consultation process will be available on the Council website. The OBC will include a screening assessment of the environmental impacts of the proposed schemes. 				<p>be because we are all rich because our average wage is lower than the Tyne and Wear average. Your stats say that 83% of journeys into the borough are made by car and only 14% by public transport. This is quite a damning statistic. I don't blame the council for this, but I think, along with the point about car ownership, this shows where investment/support is needed. It would be useful to know the breakdown of the 25,000 inward commuters. If a significant number come from South East Northumberland then this would strengthen the argument for better metro connections to perhaps Blyth and the north south link to Percy Main, and the improvement and reopening of commuter rail/metro services from the north.</p>			would be considered on its planning merits, as to when the service would commence, it would not necessarily be at the completion of the scheme.	
899455			LP20151284	<p>The proposed development of housing in sites 17, 111, and 139, and the industrial use of Site 11 now Site E010, will only increase the traffic west bound along Whitley Road and southbound along Station Road. 							<p>increased numbers of traffic movements on the highway network. Further detailed work on what mitigation would be required will be developed as the Local Plan progresses. For the schemes that qualify for the £150million funding an Outline Business Case (OBC) will be prepared and submitted to the NELEP (North East Local Enterprise Partnership) for assessment and a comprehensive public consultation process will commence. Further information of the consultation process will be available on the Council website. The OBC will include a screening assessment of the environmental impacts of the proposed schemes. Any impacts identified as significant will be assessed in more detail and associated mitigation measures proposed where practicable, this would include air quality, noise and ecology concerns. The Full Business Case would include any environmental impact assessment required to support the scheme submission. The NELEP have indicated that the funding sort is available subject to North Tyneside Council demonstrating the scheme is good value for money. The Borough does have good transport links and the Local Plan supports a comprehensive, integrated, safe, accessible and efficient public transport network, capable of supporting development proposals and providing attractive alternative travel options. The Local Plan supports an integrated approach towards sustainable development and working with its transport partners the Plan</p>

							seeks to deliver cross boundary improvements, such as improvements to the cycle network and ensuring the protection of strategic transport routes Policy S10.3 and DM10.4 (now S7.3 and DM7.4).	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151386	Policy S10:3. CPRE welcomes this policy. Support for the Metro upgrade could be reflected throughout the Plan, supporting the spatial distribution strategies for housing and employment site locations. CPRE acknowledges that proposals for road improvements are moderate in extent but they should not lead to extensive new road building. The policies on walking, cycling and horse riding are welcome. However there is a missed opportunity in promoting walking and cycling for journeys to work, education, shopping or use of community facilities as well as for leisure.		S 10.3 Transport	Comment noted. Policy S10.3 (now S7.3) does identify and support the Metro system upgrade and this is considered sufficient as the Plan repeats its support for the Metro system towards achieving sustainable development throughout the Plan. The Plan also promotes walking and cycling to work, education, shopping or use of community facilities as well as for leisure throughout the Plan e.g. Policy S10.3 (now S7.3), DM2.2 (now S1.4) and Policy DM10.4 (now Policies S7.9, S1.4 and DM7.4).	No amendments proposed
899754		RESIDENT	LP20151416	The current Holystone Interchange (A191/A19 Junction) is very busy and regularly at a standstill at key times during rush hour. It is also often busy at weekends. This is likely to get worse as the Earsdon to Holystone Interchange bypass becomes busier. We would prefer for this bypass to be able to access the A 19 directly further North allowing traffic to be diverted away from the residential areas and reducing congestion and associated noise and disruption to local residents.		S 10.3 Transport	Comment noted. There are no proposals to create an additional junction on the A19 north of Holystone but funding that has been identified for junction improvements to A191/A19 roundabout. Over the next five years around £150million is set to be invested in the Boroughs highway network (including the A191). For the schemes that qualify for the £150million funding an Outline Business Case (OBC) will be prepared and submitted to the NELEP (North East Local Enterprise Partnership) for assessment and a comprehensive public consultation process will be carried out. 				choice of primary school within the local area. This will only get worse with additional proposed homes unless significant new places are made available before the homes are built.			residents and how these needs will change over time. The Councils school selection policy and parents preference of school fall outside the issues covered by planning but the provision of education facilities and other key infrastructure is a key consideration for the Local Plan. The importance of school provision is reflected in Policy S10.13 (now S7.10) 'Community Infrastructure' and Policy S10.1 (now S7.1) 'General Infrastructure and Funding'. The planning team have been in discussion with the Councils education officers to determine the impact of the proposed level of growth on school places and this has shown the need for an additional primary at both the Murton and Killingworth Moor strategic sites and a new secondary school preferred at Killingworth Moor. The details of the size and location of the proposed new schools will be brought forward as part of the Masterplanning work for the strategic sites at Killingworth Moor and Murton.	
899821		RESIDENT	LP20151476	The overall Transport infrastructure appears to hinge on the Holystone Interchange and its proposed expansion. This view appears to be quite limited and does not consider other alternatives such as a direct access to Cobalt from the A19, or routing traffic away from Holystone Interchange further North to and from the Earsdon to Holystone Interchange bypass.		S 10.3 Transport	Comment noted. There are no proposals to create an additional junction on the A19 to Cobalt but funding has been identified for junction improvements to A191/A19 roundabout. These works, alongside other investment in the Boroughs highway network (including the A191), will benefit commuters, public transport users, cyclists and pedestrians. The detailed designs of the highway improvements will be consulted on separately to the Local Plan. Further information of the consultation process will be available on the Council website. There	No amendments proposed

899991	Tyne and Wear Public Transport Users Group	RESIDENT	LP20151577	S10.3 Transport Overall we want to see lower fares, and a simpler fare/pass structure, across all forms of an integrated public transport. We think that these are an essential part of encouraging people to make less use of cars. Public Transport We want to see policies that aim at faster upgrading of all metro stations to make them safer. We also look for policies that will help to reduce unsocial behaviour on bus and metro journeys with the aim of making public transport feel safer for all passengers but especially for women and older people. These groups, and others, tell us of the advantages that come from public transport that offers a relaxed , clean and comfortable journey. We also think that the plan should set out proposals to provide toilets at all stations and take into account the need for facilities that will allow breast feeding. We would also like to see		S 10.3 Transport	Comment noted. Policy S10.3 (Now 7.3) does outline the Councils intention to work with its partners to secure a comprehensive, integrated, safe, accessible and efficient public transport network, capable of supporting development proposals and providing attractive alternatives travel options. The conditions of pavements are a matter that would need to be taken up with the Councils highways team. Further information to report concerns can be found on the Council website - <a href="https://reportit.northtyneside.gov.uk/Highways/CreateHighwaysCase.aspx">https://reportit.northtyneside.gov.uk/Highways/CreateHighwaysCase.aspx</a>	No amendments proposed

				<p>provision made at major metro stations to support the hire/use of shopping mobility scooters. This is especially important given the restrictions that individuals face on using their own scooters on Metro. We aspire to see cycles accommodated on Metro, with more cycle rails for secure parking of cycles outside Metro stations, shops and other public buildings. We hope that the Cycling festival coming to the North East in June , with the testing of introduction of cycles on metro , will continue, even if this is metro trains out of peak times to begin with. The Road Network We are concerned at the conditions of pavements across the borough that causes huge costs for the health service and employers, as well as the dire consequences for individuals. This especially affects older people. There are still, despite the efforts of the Council, places without the drop kerb that is essential for wheelchairs, mobility scooters and prams and trolleys. Unless more attention is paid to walking and cycling there will be huge health implications for our young people, where the recent statistics are that youngsters are 25% obese. We would like to see a "recycle your bike" facility in N. Tyneside.</p>				
899964		RESIDENT	LP20151586	<p>The side of my house is infect closer to the West Allotment bypass than any of the houses. EVEN NOW it is extremely noisy, something should be done now regarding leaving the bypass and entering into West Allotment. Please note this policy number has now changed to S7.3.	
900234		RESIDENT	LP20151743	Priority Transport Improvements (star symbol on proposals map and relevant plan text) Support improvements at Norham Road Interchange: Coast Road - Norham Road junction. Badly needs improvement, even if just mini roundabouts at the two junctions of slip roads and Norham Road. Traffic comes from all directions and so hard to turn out of sliproads. This is a real problem, now made worse again now that the Coast Road Retail Park is occupied again as it adds to northbound Norham Road traffic especially from Tesco. A marked contrast to generally good roads in North Tyneside.		S 10.3 Transport	Comment noted. Please note this policy number has now changed to S7.3	No amendments proposed.
900308	Places for People		LP20151780	(Comments with input from Urban Splash) North Tyneside has the highest level of car ownership in Tyne & Wear and still rising (increase of 8% in last 10 years), with 83% commuting by car. We would recommend that local policies, which currently support car		S 10.3 Transport	Comment noted. Please note this policy number has now changed to S7.3	No amendments proposed.

							need to be developed for both sites that maximises walking, cycling and use of public transport opportunities for both Killingworth and Murton. Please note this policy number has now changed to S7.3	
510094	Natural England	GOVERNMENT AGENCY	LP20151962	Natural England supports the use of GI as a method of providing routes for pedestrians, cyclists and horse-riders as part of the multifunctional benefits that GI can offer.		S 10.3 Transport	Support noted Please note this policy number has now changed to S7.3	No amendments proposed.
396511	GVA	PLANNING CONSULTANCY	LP20152013	In the opening paragraph it may be clearer to state "future provision of transport infrastructure". In part 1(a) of the policy the consortium would suggest removing reference to the "all change programme". This requires readers to cross reference to a document which may not always be relevant or easily accessible. The final bullet point within 1(f) refers to new metro stations in the context of safeguarding the network. The consortium would suggest that this should be seen as a separate item on the agenda. At this stage it would be inappropriate to make a firm proposal of a new station (or stations) but it is certainly something which should be investigated and encouraged. Provision of a new metro station would represent a potentially very significant piece of new infrastructure capable of making a development more "sustainable". One option for the plan would be to "reserve" land for a metro station in the event of funding being available in or beyond the plan period. In part 2 of the policy there is no specific reference to enhancing connectivity in the local road network to take pressure away from the trunk roads.		S 10.3 Transport	Comment noted. The wording of transport encapsulates more than just the infrastructure so for clarity it will remain but the suggestion is welcomed. The reference to the 'all change programme' will be removed from the policy, but retained within the supporting text. The final bullet point 1(f) does relate to the overall policy so will remain. The Policy does not make a firm proposal of a new Metro station or stations but outlines how they should be considered where appropriate and linked to potential development sites. The safeguarding of transport routes on the Policies Map stresses the importance of making sure that such routes retain their potential for future transport and not restricted by inappropriate development. Investigations to determine the potential for a new Metro station or stations within the strategic development sites at Murton and Killingworth would be considered as part of the future masterplans for these sites. The work of the masterplans could potentially lead to further safeguarded transport routes being identified in the Local Plan. Part two of the Policy does make specific reference to	Reference to Metro 'all change' removed in the Policy but retain in the supporting text.

							improvements planned to enhancing the local road network and there is further information in the Infrastructure Delivery Plan. Please note this policy number has now changed to S7.3.	
901136		LOCAL AUTHORITY	LP20152064	Newcastle supports the objective to provide sustainable access to the wider region and welcomes the introductory text in Policy S10.3 Transport which sets out the strategic transport links to Newcastle City Centre. Additionally, the priorities for improvements including the Coast Road and Sandy Lane are supported as these will have a major impact on Newcastle's network as identified in Strategic Traffic Model 2015. However, we would like to understand in more detail the cross boundary impacts of proposed growth. It would be helpful if further detail on the current network operation (without development) could be provided and also detail on sites trip rates in order to assess the headline trip generation figures quoted in section 4.3. The use of TRICS or developer information has been referenced in section 4.1. It is suggested that trip rate information should be provided in an expanded Appendix A1. Part 3 of Policy S10.3 Transport outlines the intention to develop cycle routes. Given the commitment to developing the Coast Road in the Newcastle Cycle City Ambition Fund Phase 2 Bid it is suggested that reference should be made to the intention to develop cycle routes from the Borough to the wider area. The IDP states that the Coast Road has strong potential to form part of the national cycle network. It is suggested that		S 10.3 Transport	Comment noted and support welcomed. The Council will continue to work closely with its neighbouring authorities and will seek to present the transport data (in supporting evidence) so that the impacts of the proposed growth can be referenced. The proposed improvements to the cycle network along the coast road will be included in the Plan.	Include coast road cycle improvements into the Plan and update evidence on transport

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				text should be included in the Plan to reflect the importance of A1058 as a strategic cycle route. It is recommended that a commitment for development of a public transport strategy should to be included in section 7.7 next steps in order to create sustainable communities.				
396269	English Heritage	GOVERNMENT AGENCY	LP20152184	Policy S1 0.3- the last sentence of the second paragraph does not read clearly.		S 10.3 Transport	Comment noted, this will be amended. Please note this policy number has now changed to S7.3	Minor amendments made to policy wording.
808018		RESIDENT	LP20152202	My main concern is the lack of planning (or discussion) for road improvements or new roads (the last consultation was the "Sandy Lane Bypass' this appears to be off the radar?) When do we see the road plan?		S 10.3 Transport	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. The road network along Sandy Lane is one of the areas highlighted for future investment and the timetable of the process of works will be published in the summer as part of a full business case. The information of works will be available on the Council website. Please note this policy number has now changed to S7.3	No amendments proposed.
			LP20152229	Metro is a disgusting service i.e. delays and cancellations on a daily basis		S 10.3 Transport	Comment noted. Issues concerning delays and cancellations are principally a matter that is the responsibility of NEXUS and the Metro operator. The Local Plan does support proposals to upgrade the Metro system that will hopefully improve the overall public transport provision for the	No amendments proposed.

				place to provide alternative routes during this time for access to Cobalt Business Park? Is the upgrade planned before any works are to commence on any proposed new homes at the Murton site?				
794350		RESIDENT	LP201551	Re. 10.21 to 10.24: Please don't build anything that will stand in the way of future bigger solutions. Gleb K. Samailov's suggestions (gleconsam on the skyscraper city site) may be way in excess of anything affordable. It may also be untrue, that putting forward such a huge plan is necessary to get a smaller plan implemented. If a plan is too big, it will be dismissed without even being looked at. Nevertheless, the possibility of taking the Metro through a tunnel to Chichester (and beyond?) "" even if it takes 20 years of waiting to get funding "" should not be squandered altogether by short-sighted action. Any proposal for rail development south of Percy Main should keep open this long-term option.		DM 10.4 New Development and Transport	Comment noted. National guidance in the National Planning Policy Framework (NPPF) states that each local planning authority should produce a local plan for its area. The Local Plan is the planning document that not only helps decision makers determine planning applications but also sets out opportunities for development. The Local Plan should be aspirational but realistic. North Tyneside previously sought to deliver a Borough wide strategic Plan with area based plans for North Shields, Wallsend and the Coast. However, government guidance changed and the preferred approach is now for each planning authority to produce one single Plan. The North Tyneside Local Plan contains a lot of detail but we aim to make it as easy to understand. Substantial improvements to the public transport network often require long lead in times and the Local Plan has identified land to be safeguarded for such proposals in Policy S10.3 (now Policy S7.3). Examples include, Ashington, Blyth and Tyne Railway (Seghill - Northumberland Park - Benton); and Northumberland Park - Percy Main/Howdon Metro extension (Cobalt Corridor Link) including protection of key site at Earsdon Road, Shiremoor and sites for potential stations and access points along the route. There are no proposals for a Metro link	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							under the Tyne or for rail links south of Percy Main to the riverside, which had been previously suggested in earlier s of the Local Plan but removed based on consultation responses.	
455564		RESIDENT	LP20152482	With all of the proposed sites for housing in and around Benton Farm and the land adjacent to Tyne View Park etc. how does the council propose to get over traffic congestion. This is an ever increasing problem that even now leads to long queues at roundabouts and road junctions at off peak times????		DM 10.4 New Development and Transport	Comment noted. One of the key elements of the Local Plan is to understand the impact of the levels of growth suggested and within this is the impact of the transport system. The Council have been successful in securing grant funding for highway improvements that mean over the next five years around £150million is set to be invested in the Boroughs highway network (including along the A191) for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	No amendments proposed.
892176		RESIDENT	LP2015245	Please ensure adequate parking for new developments. Bear in mind that children grow up and will all want cars, no matter how "you" try to discourage this. Encourage 3-storey housing with garages on the ground floor. Ensure lots of off street parking.		DM 10.4 New Development and Transport	Comment noted. Policy DM 10.4 (now Policy DM7.4) 'New Development and Transport' sets out in criteria c) that: The number of car and cycle parking spaces provided in new developments will be in accordance with standards set out in the Transport and Highways Supplementary Planning Document (LDD12). A copy of LDD12 is available to view on the Council website - <a href="http://www.northtyneside.gov.uk/browse-display.shtml?p_ID=514457&amp;p_subjectCategory=811">http://www.northtyneside.gov.uk/browse-display.shtml?p_ID=514457&amp;p_subjectCategory=811</a> . Policy DM10.4 does also encourage a wider transport choice by	No amendments proposed.

							to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	
587121	Nexus	NATIONAL/REGIONAL/ORGANISATION	LP2015965	In DM10.4 (d) there should be a stronger reference made to the requirement for developer "funding" of required transport improvements, and make mention that this could be new or enhanced bus services, minor infrastructure (bus shelters and access to these), or major infrastructure (bus-only gates, Metro stations etc). Reference is made in DM10.4 (e) that new developments near to good public transport facilities will be required to "consider" providing higher development density. We feel that this needs to be strengthened, and to also refer to commensurate reduction in car parking at such sites, rather than strict adherence to the Council's parking policy in this regard. Provision of large amounts of car parking will usually discourage public transport use and/or reduce its financial viability.		DM 10.4 New Development and Transport	Comment noted. The wording within part (d) of Policy DM10.4 (now Policy DM7.4) will be reviewed to consider if it could be reworded to 'New developments will need to demonstrate that existing or proposed public transport levels can accommodate development proposals, or where necessary, identify opportunities for public transport improvements including sustainable access to public transport transport hubs.'. The wording of criteria (e) allows for the flexibility of the policy but the wording will again be reviewed 'New developments in close proximity to public transport facilities will be required to provide a higher density of development to reflect increased opportunities for sustainable travel'. The Councils maximum parking standards are part of the Transport and Highways Supplementary Planning Document 2010, but this is currently being reviewed and due to be updated in 2015. The consultation released at the start of the year allowed for the flexibility of parking standards 'In areas with good accessibility and parking management in place a reduction in these maximum standards will be considered where it can be demonstrated that there will not be a detrimental affect on the adjacent highway	Amend criteria d) and criteria e). Include additional text in supporting paragraphs explaining Transport Assessments, Transport Statements and Travel Plans.

							safety'. The SPD does outlines the details of Transport Assessments (TA) and Transport Statements (TS) that accompany certain planning applications based on criteria from the Department of Transport. For those applications that are for a residential scheme and needing to submit a TA or a TS applicants are asked to submit a Residential Travel Plan (TP). The details of what is required from a TA, TS or TP could be further expanded in para 10.34 to strengthen the Councils commitment towards sustainable development.	
898920	Sustrans		LP2015989	A specific commitment to network density in new development (250m) would clarify the requirement for cycle routes.		DM 10.4 New Development and Transport	The Sustrans Design Manual - Handbook for cycle-friendly design advocates the development of a cycle network within urban areas so that an alternative route is never more than 250m. The Local Plan encourages a safe, convenient and accessible cycle network and this approach is favoured within Policy rather than requiring a defined distance for new development to cycle routes as it will deliver the same aims but not having to be embroiled in arguments over the justification of the distance and allowing for site specific details that could make the 250m distance unachievable.	No amendments proposed.
898920	Sustrans		LP2015990	Point 10.29 is inaccurate. The waggonway network on the whole offers poor quality substandard routes for walking and cycling, much is unlit and surfacing is poor and unbound. The commitment to create a walking and cycling network that is fit for purpose is missing from this document. New development requires connections that as a		DM 10.4 New Development and Transport	Comment noted. The waggonway does provide a network of routes throughout the borough for walking and cycling but it could be further improved and therefore the 'high quality' reference has been removed. The Local Plan does support further improvements and connections to the cycling and walking network.	reference to 'high quality' deleted from paragraph 10.29 (now para 10.40)

				friendly means of travel. The big failing in the plan is that it does not define where the borough's main utility cycling routes should be. The three existing national cycle network routes are shown on the map, but these date from ten years ago, so where is the ambition to complete a network? We want to see all new public transport, including good walking paths , cycling paths, metro stations and bus stops etc all in place before shops and other facilities are in put place. 10.22 We want to see all the land safeguarded for the option of a heavy rail link referred to re the Port of Tyne. 10.28 We would like to see the restoration of a ferry link with Norway.			corridor, A1058 Coast Road corridor. The Infrastructure Delivery Plan also references the North Tyneside's Cycling Strategy, adopted in 2010, and a revised Cycling Strategy is to be developed which will set out how a future vision for cycling will be secured in the Borough. This information all helps shape the Local Plan which aims to deliver sustainable development. Policy DM6.11, S10.3 and DM10.4 (now Policies DM3.1, S7.3 and DM7.4) outline the Councils approach to minimise the need to travel and encourage the use of electric cars. The restoration of a ferry service to Norway falls outside the role of the Local Plan but the benefits of this route are referenced in Policy S5.1 (now Policy S2.1). Comments relating to para 10.22 are noted but at this time a rail link is not currently considered necessary to support the economic development of the Port of Tyne, however, the possibility that this land may benefit from a new rail link to support freight movement to and from the north bank at some point in the future cannot be totally discounted.

				for each site on the day." This parking development would then encourage visitors and residents to visit and use more of the facilities located throughout the coastal area.				
805724		LANDOWNER / BUSINESS	LP2015279	Horton Estate consider this policy needs to be more focused and in particular criterion f. The policy and in particular criterion f is wide ranging and extends beyond Whitley Bay town centre and its immediate surroundings. Within Whitley Bay town centre and its immediate surroundings Horton Estate support the policy but consider it should not be applicable in St Mary's Headland. In this respect emerging policy AS5.9 refers to new visitor facilities at St Mary's Headland. A possible location for these could be a portion of the existing car park and compensatory car parking might not be appropriate or desirable acknowledging other policy aims and coastal green links.		AS 10.5 Coastal Transport	Comment noted. The importance of car parking is a key consideration to those wishing to visit the coast and is seen as key factor in supporting economic opportunities at the coast. Maintaining the level of car parking at the coast has been a clear aspiration of previous consultation events and the policy is a reflection of this. The Local Plan will consider amendments to Policy 10.5 (now Policy AS8.23) and whether greater flexibility to support alternative sustainable forms of transport to access the coast if car parking sites were to be lost.	Introduction of the Policy amended to read 'Through working in partnership the Council aims to improve the accessibility of the coastal area that will.' The final criterion (f), has been amended to maintain the car parking at the coast but also seeking to support other sustainable forms of transport - 'Maintain adequate car parking provision that serves the coast with improved access for sustainable transport that would cause no adverse impacts on people, biodiversity and the environment.'
396449	Cyclists Touring Club	OTHER / LOCAL ORGANISATION	LP2015589	AS10.5 Coastal Transport b. remove the words consideration of. c. add the word motor before vehicle (this is because a cycle is a vehicle).		AS 10.5 Coastal Transport	Agreed. The deletion of 'consideration of' from criteria (b) and include the word 'motor' before vehicle in criteria (c).	Agreed. The deletion of 'consideration of' from criteria (b) and include the word 'motor' before vehicle in criteria (c).
587121	Nexus	NATIONAL/REGIONAL/ORGANISATION	LP2015967	Support for Metro and bus access to Wallsend town centre is welcome. However, in the Coast section, policy AS10.5 proposes both to reduce car access to Whitley Bay town centre, and increase town centre car parking or alternate nearby sites; we believe that these policies have the potential to conflict with		AS 10.5 Coastal Transport	Comment noted. The intention of the Policy is to create a more attractive town centre for Whitley Bay by reducing the impact of cars travelling through the centre but recognising that car parking is an important issue that supports businesses. It is considered that both could be achieved but	No amendments proposed.

809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151389	Policy AS10:6. Wallsend. CPRE can support this policy.		AS 10.6 Wallsend: Transport and Accessibility in the Town Centre	Support noted.	No amendments proposed.
899991	Tyne and Wear Public Transport Users Group	RESIDENT	LP20151583	Wallsend Sub Area On the basis of conversations we have had with residents we are not certain that Wallsend and Willington Quay have good public transport connections. There is little doubt that people living within easy reach of either Metro or the Coast Road have good connections both to the Coast and to Newcastle. What is less certain is that they have good connections to other parts of North Tyneside. We have noted that Go Ahead have recently reduced the frequency of some of the services they offer that within North Tyneside and think that the time has come for a full study to be done of transport needs and links within North Tyneside. We think that a commitment to such a study should be included in the plan.		AS 10.6 Wallsend: Transport and Accessibility in the Town Centre	This comment is noted and has been shared with the North Tyneside Transport Planning Team. The need for constant and ongoing measures to encourage improvements to public transport provision is recognised through the transport policies of the Local Plan. With specific reference to Wallsend whilst it is acknowledged there may be specific locations and challenges to access overall, as is pointed out within the comment the area is well served by the Metro, which provides access not only to the coast but 17 stations across North Tyneside. Meanwhile, bus routes provide access from Wallsend to locations less well served by the Metro such as Cobalt Business Park, Quorum and Killingworth. A commitment to such a study specifically linked to Wallsend and Willington Quay is therefore not considered an appropriate criteria within policy of the Local Plan.	No amendments proposed
891828		RESIDENT	LP2015208	Main Street through Dudley cannot take more traffic. Far too busy with traffic cutting through. Not safe for children especially on school runs. Meadowbank has problems with motorcycles cutting through to Annitsford and taxi drop-off through cut to Annitsford. This will be increased with housing on		AS 10.7 Sustainable transport and traffic management for the North West	Comments noted. This policy recognises issues such as this and sets out that traffic calming should be explored in the area. Any housing proposals would be assessed for their potential impact on the road network.	No amendments proposed.

				Annitsford Farm.				
898030			LP2015697	<p>Although the North West is "well-served by the local major road network, with the A1, A19 and A189 all within or having junctions in the North West area" it is also a nightmare at peak times with the traffic congestion from the A19 Killingworth\Seghill junction all the way through to the A1 Gosforth Park junction. Before extra houses\employment opportunities are introduced into the North West can I suggest that this route through the North West is improved? Villages such as Camperdown, Burradon &amp; Annitsford are plagued with commuter traffic all trying to escape the congestion. I have seen the plans for the proposed changes to the A1056 Sandy Lane but I don't believe this will alleviate the congestion. Putting traffic light operated junctions at either end will just slow the traffic down further and the A19 Killingworth\Seghill junction is an accident blackspot with far too many left\right blindspot turns in a short space of road. This junction needs replacing urgently. Also, public transport is not an option for most commuters in this area as we have no quick &amp; direct access to the metro network, no local trains so can only rely on the bus network. The buses seem to be getting more infrequent and the routes they take are congested anyway so it is not a viable option for regular commuting.</p>		AS 10.7 Sustainable transport and traffic management for the North West	<p>Comment noted. One of the key elements of the Local Plan is to understand the impact of the levels of growth suggested and within this is the impact of the transport system. The Council have been successful in securing grant funding for highway improvements that mean over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately. The Highways Agency is responsible for works to be carried out on the A19 and A1, and the Council is responsible for works on A189. The Seghill A1/A19 roundabout has received funding for a road widening scheme and the A189 has funding secured for junction improvements as part of the overall £150million funding package. The provision of bus routes is primarily a decision taken by bus companies and NEXUS but the Local Plan does support the improved public transport provision for the North West in stipulating the importance to safeguard and improve the areas bus service and aim to discourage 'rat runs' of people avoiding the</p>	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
							congested main routes. There are no plans to extend the Metro service or local train service to the North West.	
898525		RESIDENT	LP2015827	<p>The road, B1505, is also an issue when considering development of Site 142. Though, perhaps officially unreported, there have been several traffic incidents on this road. Frequently used by motorists trying to avoid congestion on the A189, this is already quite a busy road as the latest of several traffic calming measures contest. Traffic can only increase with the opening of the new emergency hospital at Cramlington later this year and the possibility of more motorists from the large development Site Reference 3 proposed in your Consultation plan. The potential hazard to residents, particularly children, crossing from houses on the proposed site to Front St. has to be obvious especially since the return journey might well require crossing from behind cars parked outside the general dealers and fast food outlets on Front Street. While details of the building line for the proposed development are not available, pollution, and its possible effects, from traffic on the A189 have also to be considered. Though there are already houses to the south of Site 142 and their occupants may be quite willing to live in such close proximity to this busy dual carriageway, any houses on the proposed development, especially the northern end, would be exposed to greater levels of pollution from stationary traffic queuing at traffic lights on the A189, particularly during rush hour periods. It's not a place I would want to live!</p>		AS 10.7 Sustainable transport and traffic management for the North West	<p>Comment noted. Policy DM10.4 (now policy DM7.4) does outlines a set of criteria to be taken into account with new development, but the details of the access and site layout for Site 142 will be determined at the planning application stage. Pollution is an issue that the Local Plan recognises, with a policy on Pollution that is designed to protect both new and existing development from contributing to or being put at unacceptable risk from, or being adversely affected by unacceptable levels of pollution. The Council is therefore seeking to require development to comply with national standards and adopt techniques to prevent, minimise or render harmless polluting substances. Development proposed where pollution levels are unacceptable will not be permitted unless it is possible for mitigation measures to be introduced to secure a satisfactory living or working environment.</p>	No amendments proposed.

	Green Party			encouragement for the development of community energy schemes.		Energy and Low Carbon Technologies		
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151391	Policy DM10:8 CPRE welcomes this policy		DM 10.8 Renewable Energy and Low Carbon Technologies	Support noted.	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152055	Policy DM10.8 sets out the Councils aims in relation to carbon and renewable energy solutions. Persimmon does not have a direct objection to this policy however we have the following concerns. The application of this policy to new developments is clearly held through policy DM9.1 and the same concerns as raised for that policy apply here.		DM 10.8 Renewable Energy and Low Carbon Technologies	Comments noted. Policy Dm9.1 has been removed from the Local Plan.	No amendments proposed.
396269	English Heritage	GOVERNMENT AGENCY	LP20152188	Policy SM 10.8 -whilst it is important to promote the use of renewable and low-carbon energy technologies wherever possible, this policy should extol sequentially the role of non intrusive energy conservation measures in preference to any form of energy consumption.		DM 10.8 Renewable Energy and Low Carbon Technologies	The Local Plan sets out design policies that address of low impact energy conservation such as use of layout to maximise passive solar gain. This policy refers specifically to support for the installation of renewable and low carbon technology.	No amendments proposed.
892139		RESIDENT	LP2015242	I suggest the Council look to repair drains in Murton Village after being flooded two times badly. £50,000 damage - 2005 to 2012.		S 10.9 Water Management	Comment noted. The Council are currently carrying out drainage schemes in the Murton Area and further investigation will be undertaken in association with any development at Murton	No amendments proposed
396306	South Tyneside Council,	LOCAL AUTHORITY	LP2015465	Finally, we wholly support Policies S10.9 and DM10.10 and their supporting text regarding the strategic need to invest in sustainably managing surface water, and thus waste water and sewage capacity at the Howdon Sewage Treatment Works, in order to ensure the headroom necessary to support future development in the cross-boundary		S 10.9 Water Management	Comment noted.	No amendments proposed.

				catchment area.				
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151392	Policy S10:9. Water management. CPRE broadly supports this policy but has concerns about the effectiveness of SuDS. We welcome the requirement for "whole lifetime management". We are concerned about the cumulative impact of multiple SuDS schemes both under normal operation and on the risk of a "domino effect" catastrophic failure. We are aware of the tension between effective drainage and the maintenance of wildlife corridors.		S 10.9 Water Management	Comment noted.	None required.
807164	Northumbrian Water Ltd	NATIONAL/REGIONAL/ORGANISATION	LP20151805	With reference to the supporting text of Policy S10.9, we believe that there is an opportunity for further emphasis upon water conservation alongside commentary regarding water supply and current availability in paragraph 10.55. Climate change and development pressure are rightly identified as key influences upon future water resources and wastewater treatment capabilities, however it is our opinion that this text should go further in highlighting the need for the careful use of water resources into the future. Furthermore, we would suggest stronger wording is assigned to the status of Howdon STW and the importance of surface water separation schemes. The current sentence in paragraph 10.56 states that "'surface water, which currently flows into the sewerage systems, needs to ideally be removed'. It is our opinion that this language is not sufficiently pro-active in encouraging new development to embrace the principles of sustainable water management and		S 10.9 Water Management	Comments noted and amendments will be made.	Water sections of Local Plan have been combined and re-written. NWL were re-consulted on these changes and have agreed them.

				<p>consequently contribute towards increased capacity in the sewerage network and at Howdon STW. We recognise that the wording around the subject in Policy S10.9 is much more effective, however we would suggest the revision of supporting text to portray a consistent message. With regard to Policy S10.9 specifically, we welcome the coordinated approach to water management and will again continue our existing role in working with the Council and others to manage water resources, wastewater treatment and drainage infrastructure. We strongly support point "a" and we commend North Tyneside Council for recognising the importance of ensuring that appropriate infrastructure is provided in tandem with new development. We welcome consultation with developers as early as possible in the development process to ensure capacity in the network for future developments, and that where any improvements are necessary they are planned and implemented in a timely manner. With regard to point "b", specifically, whilst we welcome the requirement to incorporate sustainable drainage systems within all new developments, the preceding wording relating to surface water runoff is slightly confusing. We believe this phrase may intend to refer to sustainable surface water separation, and we would suggest that the sentence is revised to clearly reflect this. Moving on to the subsequent statement in S10.9, we believe that North Tyneside Council must take a stronger position in the requirement for</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>sustainable drainage systems in new development. The provision of "clear justification' from developers is considered to threaten the approach to sustainable drainage otherwise outlined in the policy. It is our opinion that sustainable drainage systems should be excluded only in exceptional circumstances, and that there should be a requirement to provide robust evidence to demonstrate the reasons that sustainable drainage systems cannot be incorporated. Additionally, we have concerns regarding the use of the phrases "where practicable' and "where practicable and suitable' throughout this section, as we consider that this could be grounds for a viability argument from developers, in a period when ensuring sustainable surface water management is becoming increasingly critical in the provision of infrastructure services for new development. We fully support the final paragraph of S10.9, which offers valuable guidance to developers relating to water supply and wastewater infrastructure. We strongly advocate the principle of "avoid, minimise and control' with regard to surface water disposal, and welcome the clear links between surface water disposal, sewerage capacity and headroom at Howdon STW set out in this policy. Having said this, we suggest that supporting paragraph 10.57, which currently follows Policy S10.9, would form an effective introductory section prior to the policy wording or perhaps more importantly that the second half of the paragraph should be incorporated into the body of the policy, as</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>this text contains the critical message relating to sustainable surface water management: To ensure that growth can be accommodated sustainably by the water infrastructure, the policy requires that in all locations surface water should be separated, with any surface water runoff entering the sewerage system being minimised and controlled. The priority is to avoid using public sewers wherever possible for the disposal of surface water. If connection to the public sewerage network is the only option, there is a need for on site mitigation to attenuate surface water to minimise and control surface water flows.</p>				
789566	Environment Agency	GOVERNMENT AGENCY	LP20151827	<p>We support the inclusion of a flood risk and sustainable drainage policies. We welcome that Policy DM/8.12 has been further strengthened through adding a requirement to avoid development within areas at risk of flooding. In addition we support that the policy now seeks development should manage flood risk from all sources, taking into account the impact of climate change over its lifetime. Strand c) of the policy seeks to ensure that "there is no net increase in surface water runoff". We maintain that this policy should be amended to reflect issues outlined in North Tyneside's Water Cycle Study (WCS) and Surface Water Management Plan (SWMP). As outlined in 10.57 and the WCS there currently is insufficient capacity at Howdon Sewerage Treatment Works (HSTW) to accommodate the increased foul drainage from the planned housing and employment growth. NWL are currently working on a Sustainable Sewerage Strategy across Tyne</p>		S 10.9 Water Management	<p>Comments noted, the water sections have been significantly rewritten and subsequently EA have been reconsulted.</p>	<p>Water sections have been combined and re written.</p>

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>and Wear which will help remove surface water from sewers. Although this will help increase capacity at HSTW this will not free up sufficient capacity to accommodate all planned growth. Surface water is seen as both the problem and a solution to freeing up capacity at HSTW and enabling sustainable growth. The key to increasing capacity would be to take surface water out of the sewerage network - on this basis, we recommend that the policy reflects these requirements. In removing surface water from the sewer network careful consideration must be given to ensure that surface water does not increase flood risk elsewhere. On this basis, the requirement of "no net increase" may not be sufficiently reflect these issues. DM 10.10 seeks to limit post development run off rates to a maximum of 50% of the flows. We consider cross referencing of these policies is required to avoid confusion. You will know that the Government has announced that it intends to change our statutory consultee duties for planning applications. This also means making Lead Local Flood Authorities statutory consultees for surface water drainage issues for "'major' developments. This will need a change to the Development Management Procedure Order (DMPO). A new DMPO which includes these changes and consolidates the original DMPO and amendments made to it was recently published and will come into force on 15th April 2015. To support the new consultation arrangements, DCLG has changed the Planning Practice Guidance (PPG). The main</p>				

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				<p>changes are to the pages: Why are sustainable drainage systems important? How the local planning authority should involve the lead local flood authority when determining planning applications and what advice should be given about local flood risks</p> <p>Water supply , wastewater and water quality considerations in plan-making This guidance provides clarity on when SUDs are appropriate, together with minimum standards of operation and the need that there are clear arrangements in place for ongoing maintenance. On this basis, we consider it is essential that the Policy outlines the LPA's position and expectations "" particularly regarding maintenance and adoption of SUDS. The PPG further highlights that SUDS provide opportunities to: " ç reduce the causes and impacts of flooding; " ç remove pollutants from urban run-off at source; " ç combine water management with green space with benefits for amenity, recreation and wildlife. Given this emphasis of the wider benefits of flood risk, we consider that this policy can be strengthened to highlight the water quality, amenity, recreation and wildlife benefits. As previously highlighted a number of recent planning applications have proposed direct deep drainage discharges of surface water to the bedrock. These have been particularly problematic at Algernon "" we welcome that the policy recognises deep drainage structures are unsuitable in this area. Mine water levels are currently actively managed across the Local Authority area. On this basis, we consider that such techniques</p>

				do not provide a sustainable, long term solution due to rising groundwater levels reducing the storage capacity which may lead to groundwater flooding elsewhere. Discharges that concentrate the flow of effluent at one location and bypass some of the soil layers will limit the ability of the ground to attenuate pollutants and protect groundwater. Direct input into groundwater presents a significantly increased risk of pollution. We are seeking to stop cases where discharges are directly into the ground water through wells, boreholes and shafts. The level of prior examination required to support a proposal to use a borehole may be significantly greater than required for near surface infiltration systems. An environmental permit may be required. On this basis, we would recommend that the asterisk highlights that deep drainage structures are unlikely to be suitable anywhere in the Authority area.				
830571	Persimmon Homes	DEVELOPER	LP20152056	Policy's S10.9 and DM10.10 set out the Council's approach towards water and drainage management. While we support in principle these policies we would advise as commented in response to policy DM9.1 applies in this case also. Policy DM 9.1 sets out the authority's policy on sustainable design and construction. Sustainable construction and design is something that Persimmon are heavily involved with at a local and national level. We are aware that National government are pulling together all previous requirements in terms of Code for Sustainable Homes, lifetime homes and Zero Carbon initiatives into the existing Building		S 10.9 Water Management	Comments noted and amendments will be made.	Policy 9.1 has now been deleted

				Regulations structure to which all new developments are beholden regardless. This policy as currently worded is objected to for the above and following reasons: Sub-criteria (a) within this policy seeks additional requirements over and above national building regulations which we object to. In addition the policy wording sets a requirement of "exploring opportunities for renewable energy" and that this should be done via the submission of a Sustainability Statement. While the requirement for this statement is normal and correct how an applicant would go about "exploring opportunities for" within a statement is questionable and seems contrary to the requirements of the NPPF.				
805689			LP2015901	Overall, I believe the plan is good. It is well written and well laid out - although as is the nature of these things - a huge task to read through. However, I've enjoyed reading it - I've learnt more about my area and more about why we need the plan. I am in agreement with your proposed programme to monitor progress with flexibility for possible future change and processes to identify problems and find solutions. Except, throughout the whole plan - even in the section regarding waste management - I have not seen a single reference to the current litter epidemic and how it will be tackled. With six weeks or so until the elections, I would be delighted to see you take action. I can see so many opportunities for the Council to gain more support and really make North Tyneside look and feel as good as we know it		S 11.1 Monitoring and Local Plan Implementation	Comments noted. The Planning system primarily deals with the built environment. The Local Plan contains a policy to ensure that new developments provide sustainable waste management (during construction and use) through the provision of recycling facilities and ensure a suitable location for the storage and collection of waste" (policy DM7.9 New Development and Waste). The Local Plan also has to include policies on the facilities and land associated with waste management. However the Local Plan or Planning system are otherwise not able to manage litter and therefore we cannot include a monitoring indicator on the topic. The Council have a Streetcare team who deal with litter issues and they are aware of your concerns. Residents are encouraged to report issues by calling the team or via an	No amendments proposed.

				is - UNDERNEATH ALL THE LITTER!!! :-)			online form: <a href="http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins">http://my.northtyneside.gov.uk/category/403/report-untidy-streets-and-overflowing-litter-bins</a>	
809185	CPRE	NATIONAL/REGIONAL/ORGANISATION	LP20151394	Policy S11:1. CPRE supports this policy.		S 11.1 Monitoring and Local Plan Implementation	Support for Implementation and Monitoring policy noted.	No amendments proposed.
830571	Persimmon Homes	DEVELOPER	LP20152057	Policy S11.1 sets out the Council's monitoring and implementation policy. This policy is supported and seems logical and supported by evidence. We would however advise that the final sanction to a failing plan (if identified by AMR) would be an early plan review process. We suggest that this is included as an additional action in response to this scenario. This links with our response highlighted above in relation to policy S3.1 in relation to Green Belt.		S 11.1 Monitoring and Local Plan Implementation	It is acknowledged that there are a number of fundamental issues which could necessitate a review of the plan. This position needs to be reviewed throughout the plan period through appropriate monitoring indicators, with the triggers which would necessitate a further review highlighted and the contingency measures outlined. The Implementation and Monitoring section will be further developed to reflect this, including in outlining what triggers would set about a plan review process and how the Council will respond.	Policy S11.1 (now 9.1), text added: "If the measures outlined in the criteria above prove to be insufficient, or are otherwise unable to overcome the barriers to delivery of the overall objectives and strategy, then the Council will consider the need for a partial of full review of the Local Plan"
590341			LP2015191	what penalties are imposed if the plan[s] are not implemented?		Implementation and Monitoring 11	Without a Local Plan, decisions about planning applications do not consider local circumstances and priorities, just national guidance. Without a Local Plan, we are less likely to be able to successfully reject planning applications that we believe are wrong for North Tyneside. A Local Plan allows us to plan more strategically, such as the proposed masterplans at Killingworth and Murton, rather than respond to piecemeal development.	No amendments proposed.
898630			LP20151276	Who, both on the council and the councillors involved, will take responsibility if your		Implementation and	The local plan and its evidence is fully endorsed by all members of the Council.	No amendments proposed.

Person ID	Company	Respondent Group	Comment ID	All Comments	Site Ref	Section or Policy	Officer Response	Amendments made
				projections are wrong and we unnecessarily build on greenfield sites? Also, the process should be transparent in that the citizens of North Tyneside should know who grants what planning permission and which councillors vote for what.		Monitoring 11	Planning committee is always open to all members of the public who can witness at first hand the voting process.	
891027			LP2015189	The proposal to squeeze more homes into green belt land at Killingworth Moor and Murton will only exacerbate the already serious road transportation issues to the east and west of the A19 corridor. Tinkering with the existing road transportation plans will be insufficient in meeting the extra demands and is unsustainable. So whilst the council wish to attract new business and create more jobs I fear the proposals will have the opposite effect and turn business away due to the inability for their workforce and goods/services to move in and out of the borough.		Interpreting the Spatial Strategy through Delivery of the Plan	Comment noted. Over the next five years around £150million is set to be invested in the Boroughs highway network for the benefit for public transport users, cyclists and pedestrians. The proposed junction improvements in the Borough will aim to make it easier and safer to travel and have reflected the expected job growth and not the housing sites associated with the emerging Local Plan for which any additional highway improvements would be predominantly developer funded separately.	No amendments proposed.
899444	George F White		LP20151298	4 A sustainable Development Strategy for North Tyneside (4.5) The sub-division of the plan area into "'Strategic Policy Areas' would benefit from further clarity on Map 2 and the proposals map. The extent of the "'Urban Fringe Area' is unclear, this requires a boundary line to make it clear where the "'Urban Fringe' is differentiated from the remaining "'Main Urban Area'.		Interpreting the Spatial Strategy through Delivery of the Plan	Comment noted. Maps and the Strategic Policy Areas will be clarified.	Revised Map produced to show strategic policy areas
