

### Background information

[The Flood Risk Regulations 2009](#) translate the EU Floods Directive into law for England and Wales. The Regulations bring the Environment Agency, County Councils and Unitary Authorities together with partners such as water companies to manage flood risk from all sources and to reduce the consequences of flooding on human health, economic activity, cultural heritage and the environment.

The [Flood and Water Management Act 2010](#) is designed to put in place the changes recommended by Sir Michael Pitt in his review of the summer floods of 2007.

The 2009 Regulations and the 2010 Act carry with them some new duties for local authorities, including:

- The duty to produce a Local Flood Risk Management Strategy;
- The duty to produce and maintain a register of assets which have a significant effect on the flood risk in the area. Such assets need to be designated and works to those assets subsequently controlled through a consent procedure;
- A responsibility to investigate and publish reports on flood incidents in their area; and
- The duty to establish a Sustainable Urban Drainage Schemes approval body.
